which would be equally efficacious, and much more palatable, and which, as far as we can understand, is approved of both by the leading banks and the merchants—that is, to leave pounds, shillings, and pence untouched as moneys of account, but to make the rupee a legal tender also, thus giving the sanction of law as well as custom to a system that, apart from some suspicion of illegality, has been found to work satisfactorily. That some such measure is expedient cannot be denied, and the Governor is undoubtedly the right person to originate it; but, in our opinion, a little more deliberation, and more willingness to take the mercantile community into his confidence, would have greatly strengthened his position.

## THE CHINESE IN CALIFORNIA.

(San Francisco Times.)

There is one fact connected with the Chinese female immigration which is not generally known. We had been ourselves wholly ignorant of it; but it is attested on sufficient evidence, and is to be accepted as a new fact in the case. It is that the majority of the women who have more lately come from China, and who are now coming, are the real wives of men already established among us, who bring with them their children and household goods, and settle down as honestly as any other people in the domestic relation. The last passengers by the *Great Republic* had thirty children with them. The proportion of this class of women has been steadily, and is still, increasing. As a mere matter of fact, it is not true that the class of prostitutes in China is larger than in other countries. The proofs, indeed, are that it is smaller than in some European communities. For a ready reference in support of this assertion, see Mr. Bayard Taylor's observations on Northern Europe. If, then, Chinese women of all classes immigrated freely to this country, it is safe to say that the proportion of disreputable ones would be no greater than amongst the average immigration from Europe.

It is a fact that the immigration heretofore has not been drawn equally from all classes. But it is equally a fact that it is now beginning to be so. In the past and present an undue proportion has been of the disreputable order. As for any expectation of eradicating from human society an evil which has existed from the earliest record of human history, no man of sense entertains it. So long as there are ten thousand male human beings in California, there will be an element of disreputable ones. There are sixty thousand Chinamen, which implies, under human infirmity, the existence of a certain number of disreputable women of their race. But the further fact, the controlling fact, and the most disgraceful fact of the whole business is, that these women derive their main support from the very class of men who evince, in acts of brutality, their opposition to Chinese immigration of any sort. And so long as this fact continues, the objectionable part of the immigration may be expected to continue in a proportion greater than that which is chargeable on the Chinese themselves. Further: so long as we possess a class of citizens who are brutalised in nature and instinct, we must expect some of this disproportion to be maintained.

Since the laws of human industry (opposition to which is a mere butting of one's head against the everlasting rocks) decree that we are to have the Chinaman amongst us, every consideration of political and social economy, and of humanity itself, urge us to foster and encourage the immigration of his wife. It will make a better citizen and a better man of him. We want him for his labour, and it will make him a better labourer. If it be an object to prevent his returning with the scanty savings of his wages to his native land, no other means may be found so efficient as that of giving him a home in this. John's total savings are not an appreciable element in any one of our local financial problems. But the products of John's labour (our manufactures) are at the very foundation of our prosperity and wealth. Since, then, the gain is all on our side, let us concede to him what we can to lighten the burden of labour and sweeten the bitterness of life. Give John his wife and his home, and he will repay us therefor many fold.

## THE NEW U.S. MINISTER TO PEKING.

From San Francisco we have the following notice of Mr. Low:—It is so seldom that one has occasion to praise a foreign appointment from this country that the designation of ex-Governor Low as Minister to China affords a pleasing surprise. Mr. Low is not only a representative Californian, but a representative American, and so, while our local pride is gratified by his selection, the natural anxiety which all feel who are interested in the subject of our relations with China is relieved when the name of the new Minister is announced. The attention of all civilised nations is just now directed toward the strange, mysterious country which, standing between the old and new civilisations of the world, is aptly called the Middle Kingdom. Reluctantly emerging from her ancient seclusion, distrustful of her eager new friends, and still paralysed by the influences of Oriental sluggishness and enervation, China to-day presents the most interesting and fascinating study of any nation upon the face of the earth. How much the natural and created wealth of the country has been exaggerated, and how much has been concealed; how far genuine are the professed desires for material progress of the people; what are the relations of the people to the rulers; and what is the undeveloped policy of the central ruling force in China—these are all questions which not only must interest every thoughtful observer, but they greatly concern all mankind, for they enter into the problem of human progress everywhere. Mr. Low has paid some attention to these questions, we believe, and has heretofore shown that he has some advanced ideas relative to the position which China holds to the rest of the world.

That the appointment of Mr. Low is eminently satisfactory to the people of the Pacific States need hardly be said. An evidence of its fitness, in the eyes of our representative men, is found in the following despatch sent to President Grant yesterday:—

San Francisco, Sept. 29, 1869.

To President U. S. Grant, Washington City, D. C.

Ex-Governor Low's appointment to the Chinese Mission is a high compliment to this Coast, eminently satisfactory to our people, and gives the nation a representative at that ancient empire whose ability and acquaintance with their customs, commerce and industries will vindicate the fitness of his selection. We join in congratulations to the President on this excellent choice.

Schuyler Colfax, C. Cole, James W. Nye, Wm. M. Stewart, John F. Miller, W. C. Ralston, Thos. H. Selby, C. N. Felton, Edgar Mills, J. D. Fry, F. D. Atherton, Milton S. Latham, Abram Seligman, O. H. Lagrange, Oliver Eldridge, John Parrott, Alsop and Co.

## CHARGE OF SCUTTLING A SHIP.

At the Justice Room of the Mansion House, on the 16th inst., Thomas Bulman, described as a master mariner, was brought before Alderman Sir Robert Carden, on a charge of scuttling the ship *Old England* on the high seas in July last, with intent to defraud the underwriters of Lloyd's, who had effected policies of insurance on the vessel. In another column we record the fact of a Board of Trade enquiry being held with reference to the loss of the vessel, resulting in the cancellation of Captain Bulman's certificate.

The present proceedings were commenced by Mr. Lewis, who said he appeared on behalf of Lloyd's Salvage Association to prefer a very serious charge against the prisoner of scuttling and casting away a ship called the *Old England* on the high seas, with intent to prejudice the underwriters, and he thought when the Alderman had heard the facts he would have no hesitation in saying the evidence brought home to the prisoner the commission of that very heinous crime. The *Old England* was a vessel of 1,030 tons, and the prisoner was the captain and part owner. He effected a certain insurance upon his share of the ship and upon personal property in her which belonged to him. She left Cardiff in June last on a voyage to Point de Galle. She was then perfectly tight and stanch, and the only drawback to her proper equipment was that the pumps were not in very good order, but still in sufficient order to keep the ship quite dry, as the evidence would show. Mr. Lewis then related the circumstances attending the alleged scuttling and abandonment of the vessel as they were afterwards partly stated in evidence. He added that after the ship had become derelict the captain and crew were taken on board a Portuguese brig, when within about twenty-four hours' sail of Pernambuco; that on the captain arriving in England he produced a log-book, which had clearly been written after and not during the voyage; that, on being asked to explain the circumstance, he said in effect that the old log-book had become very dirty, and that, the master of the Portuguese brig having expressed a wish to see how English captains kept a log-book, he gave it to him. The Portuguese captain, by the way, was not able to read or speak a word of English, so that the Alderman might judge of what use a log-book in that language could be to him. When those explanations were given at Lloyd's the authorities there could draw but one conclusion from them. Mr. Lewis then called as witnesses the cook and the steward, who deposed that they saw the captain and the carpenter down in the after hold with a couple of augurs; that before that the ship was free from water, but soon after she began to fill, and the crew took refuge on board a Portuguese brig. The witnesses admitted that no secret was made of the augurs, that the ship had been leaking, and that the crew were tired with pumping. The magistrate remanded the prisoner, and refused to take bail.

Silk Manufacturing in the United States.—The business of manufacturing silk has progressed in the United States far beyond the estimate generally formed by unobservant persons. A great proportion of the silk goods sported by American ladies, who pay extravagant prices for them under the pleasing delusion that they are adorning their persons with the products of French and Italian skill, are made in that unclaimed State called New Jersey. Paterson is the head-quarters of this business, boasting of fifteen factories, which turn out all sorts of silk wares, from sewing silks to the most beautiful gros grains. New York city contains about fifty mills, and Philadelphia has thirty trimming factories. Schenectady, Troy, and Yonkers, in New York State; Mansfield, Hartford, and Manchester, in Connecticut, and at many other places throughout the Northern States, this business flourishes. The manufacture of ribbons, braids, and trimmings has increased largely. One establishment at Paterson, New Jersey, makes the following amounts of the specified articles every month, viz.:—3,000lbs. of manufactured thread, 1,000 gross of silk braids, 600 gross hat-bands, and 350 yards of serge. It employs 300 hands, mostly children. Another at the same place turns out 70,000 yards dress trimming monthly. A Connecticut firm established at Manchester fabricate each year 60,000lbs. of thrown silk, 60,000lbs. of "patent spun," 100,000 pieces belt ribbons, and 600,000 yards wide goods, comprising dress silks, gros grains, poplins, foulards, and pongees. They employ 1,000 hands. The raw silk used by these various factories is imported from China and Japan free of duty, but first passes through the English market, where the prices are fixed. It is hoped that the Pacific Railroad will do away with this obstacle by passing the raw silk direct to Eastern manufacturers. We have here (observes the *United States Economist*) some clear perception of the vast market ready in our own country to take all the supplies that California can possibly furnish. The exports of silk worm eggs alone from Yokohama for the year 1868 amounted to five and a half million of dollars, a fact which furnishes an indication of the demand for raw silks.

The Burning of the Emperor's Palace at Peking.—We briefly noticed in our last this event. It appears that the loss entailed is a very serious one. In the Wu-yin-tien—the principal buildings de-

Digitized by Google

stroyed—were stored a large and very valuable collection of the books published by order of those munificent patrons of literature the Manchu Emperors, and of blocks for printing. From their connection with literature they are the best known buildings in the Palace. Their name appears on the title pages of all the Imperial editions of books printed during the last two hundred years. It was here that the famous work "Tu-shu-chi-cheng"—a single copy of which now costs as much as £500—was printed with copper types at the beginning of the eighteenth century. And it was here that the large and valuable collection of works known as the "Si-ku" was printed. "the mere catalogue of which, with critiques upon them, occupies nearly 200 chapters." The fire broke out in a side building occupied by workmen at one o'clock on the morning of the 28th of July, and it is supposed that some scraps of paper that they had been in the habit of burning to keep off the mosquitoes ignited the parings left by the bookbinders, and hence the mischief. The fire raged until eight o'clock, when it was got under by the exertions of the courtiers and soldiers, after having destroyed seven ranges of buildings, consisting of five compartments each. The disaster affords occasion to the aged secretary, Wo-gen, to warn the Emperor against indulging in fine buildings and luxury generally, when the people at his gates are starving, when his treasury is empty, and when yet two provinces are in the hands of the rebels. "In ancient times," he tells his Imperial master, "the Emperors were told that destructive fires in the palace were judgments sent to the reigning monarchs for repairing his pleasure houses while the people were groaning in poverty."

Launch of the "Wilhelmine Emma."—This vessel, a screw composite, has been built by Messrs. Wingate and Co., on Clyde, to the order of Messrs. Miller Bros., Glasgow, for their friends, Messrs. Siber and Bremould, Japan. She is a handsome steamer, of 620 tons, fitted with a pair of improved compound surface-condensing engines of 100-horse power, and is classed 16 years A1 at Lloyd's. The ceremony of naming her *Wilhelmine Emma* was performed by Mrs. Peter Miller, of Mosesfield. The construction of this steamer is of a somewhat novel description, the bottom being composite, with flush iron topsides, so as to combine in the highest degree the strength and stiffness of an iron vessel with the anti-fouling properties of a composite. The cabins are most elegantly fitted up in polished hardwood, and the vessel altogether a credit to those concerned. She has been placed on the loading berth at Glasgow for Japan by Messrs. Miller and Messrs. Skinner.

The Telegraph Construction Company.—The directors and friends of this company dined at the Albion Tavern on the occasion of the approaching sailing of the *Great Eastern* from Sheerness with the submarine cable manufactured for the British Indian Submarine Telegraph Company. Sir D. Gooch was in the chair, and among those who proposed or acknowledged toasts were Lord Houghton, Mr. R. W. Crawford, M.P., Lord William Hay, the Right Hon. W. N. Massey, Capt. Barrow, Capt. Seymour, Mr. Verdon, Mr. Pender, Capt. Sherard Osborn, and Capt. Halpin. Mr. Massey said he was pleased to be able to announce that on that very day arrangements had been completed for the extension of the cable to the principal Chinese ports, by means of Ceylon and Singapore, and thence also to Australia.

The Japanese Colony in California.—The American journals report that the Japanese colony, at Gold-hill, California, is much less successful than has been claimed by interested parties. That there are but eight Japanese there; that the one hundred and forty "soon to arrive" never have embarked from their native land; that from the several million tea seeds brought by the colony, less than 130 plants have been produced, and these in a puny condition, and that only two of the several hundred mulberry trees brought are alive, the dry summer having killed the remainder.

California Silk Eggs in France.—Last autumn a banking house in San Francisco purchased and shipped the first merchantable lot of silkworm eggs exported from America. It is true it was not a very important shipment as regards amount—it was only a few thousand dollars' worth, but it was important to that country as the first legitimate profit from years of anxious experiment and tedious labour, and it was important to France and Italy as opening for the sericulturists of those nations a chance of recovering a healthy stock of their favourite species.

Sir James Hope at Portsmouth.—Yesterday being the anniversary of the battle of Trafalgar, Nelson's flagship *Victory* was, in accordance with custom, dressed at each mast-head and yardarms with laurel wreaths. During the afternoon some few of the remaining survivors of the memorable engagement went on board, and were, with several of the senior executive, petty, and executive officers in the port, entertained at dinner through the liberality of Admiral Sir James Hope.

More Coolie Horrors.—The French barque *Tamaris*, which left Macao with three hundred coolies on the 6th Feb. for Havana, put into St. Helena, the coolies having dwindled down to seventy-five!! We gave an account of this vessel putting into Padang some months since, after having murdered the captain and part of the crew.

Launch of the "Eastern Isles."—Messrs. Archd. M'Millan and Son launched from their building yard at Dumbarton a fine composite screw-steamer of 600 tons register, and classed 16 years A1 at Lloyd's. She has been named *Eastern Isles*, and is laid on at Glasgow for China and Japan.

The New Season's Tea Clippers.—We have to announce the arrival of the *Taeping*, on 23rd, from Foochow, in 106 days; the *Argonaut*, from Shanghai, on 21st, in 112 days; the *Belted Will*, from Canton, on 21st, in 104 days.

A telegram from Portland, Oregon, to the San Francisco papers, reported that the Chinese there were loading a barque for Hong Kong with a miscellaneous cargo of old scrap iron, boxes of dead Celestials, broken glass, flour, and other produce."

## NAVAL AND MILITARY.

### THE FLAGSHIP FOR CHINA.

The Admiralty authorities have again changed their intentions with reference to the appointment of a flag-ship for the China squadron; the Penelope was the first vessel selected, afterwards, as announced in our issue of the 4th inst., the screw frigate Glasgow, and now we are informed that orders for her fitting out have been countermanded, and that the Audacious has been substituted. The last-named ship is new—indeed, she is not yet fully completed, being only just out of the hands of her builders, Messrs. Napier and Sons, of Glasgow. The Audacious is an iron vessel, partially armour-plated, of fourteen guns, 3,774 tons burthen, and 800-horse power; she has been constructed upon Captain Cowper Coles' turret principle, at a cost for hull and engines of £226,857; her length between perpendiculars is 280 feet, and extreme breadth 54 feet; her draught of water forward will be 21 feet 6 inches, and aft 22 feet 6 inches. The engines, by Messrs. Ravenhill, of Glasgow, are on an improved expansive plan, with surface condensers. Orders have been received at Portsmouth from the Admiralty for the Donegal, screw line-of-battle ship, 3,246 tons, 800-horse power, to be removed from her harbour moorings and placed alongside the dockyard, to fit out for a voyage to China and back. She is to take out the officers and crew for the Ocean, for service under Rear-Admiral Kellett's flag. Captain Hewitt, V.C., Sir H. Kellett's flag-captain, will probably proceed to China by this vessel. The officers and men who have served on board the Ocean, under the flag of Sir H. Keppel, will return to England in the Donegal.

### ARMY CONTROL.

The *Army and Navy Gazette* states that the arrangements for the new Department of Army Control are completed, the Treasury assent having been given, and that in a very brief period they will be formally promulgated in a Royal Warrant. If we are rightly informed, the department will be divided into two sub-departments—one for Supply and Transport, which will include the Army Service Corps, and another for Pay. The former sub-department, acting under the Control Department, will manage all stores, clothing, and provisions, and the transport thereof, and officers of this sub-department will have the command of the new Army Service Corps. The duties of the Pay Sub-Department are sufficiently indicated by the name. The officers in the Control Department will be divided into three grades—controller, ranking relatively with a major-general; deputy-controller, with a colonel; and assistant-controller, with a lieutenant-colonel, and those combatant officers employed on probation will rank as majors. The combatant officers to be selected in the first instance for this last-mentioned position must not be under the rank of captain. After the first formation of the establishment the Control Department will be filled by promotions from the Supply and Transport Sub-Department, and by officers of the army, who must have five years' service, be under thirty years of age, if from the cavalry or infantry, and have gone through the Staff College. After two years' probation, if approved, they will join the Control Department, receiving the value of their commissions. During the two years' probation they wil be detached from their regiment, and, if in the ordnance corps, seconded. The pay of a controller will be £3, of a deputy £2, and of an assistant £1 a-day, and this latter rate will be given to combatant officers who are probationers in lieu of their regimental pay. In the Supply and Transport Sub-Departments the ranks will be commissary, deputy commissary, and assistant commissary, ranking with major, captain, and lieutenant respectively. Two years' service in the army is a necessary preliminary, aud the officers must be under twenty-five years of age if from the Line, and thirty if from the Artillery or Engineers. Non-commissioned officers of espe cially good qualifications, and under thirty years of age, are likewise to be eligible. The pay of a commissary will be 17s. 6d., of a deputy 11s. 6d., and of an assistant 9s. a-day respectively, these rates increasing after five years' service. The Sub-Department of Paymasters will also be divided into three grades, with pay ranging from 10s. 6d. to 25s. a-day. It is understood that retirement from the Control Department shall be compulsory at sixty, and from the Sub-Departments at fifty-five years of age. We have also reason to believe that most of the personal arrangements are so far completed that nothing but formal sanction is required. Great Britain will be divided into the London, Northern, South-Eastern, Western, South-Western, Eastern, Chatham, Woolwich, and Scotch districts. Commissary-General Drake will have charge of the Northern; Purveyor-in-Chief Robertson, C.B., of the South-Western; Deputy Commissary-General de Fonblanque of the South-Eastern; Deputy Superintendent of Stores W. M. King of the Eastern; Assistant Commissary-General H. Moore of the Western; Assistant Commissary-General Adams of the Chatham; Assistant Commissary-General Rogers of the Woolwich; Deputy Superintendent of Stores St. George of the Scotch; and Assistant Commissary-General Winter of the London districts. The appointments generally will be filled by officers of the Commissariat, Purveyors, and Store Departments, and, in the first instance, we believe that only two combatant officers will be attached to the department—Captain Hozier, of the 3rd Dragoon Guards, and Captain Stuart, now on the Quartermaster-General's Staff in Ireland.

### TROOPS FOR CHINA AND THE STRAITS.

The Ellenborough sailed from Gravesend on the 10th inst., with the following detachments of troops for China and the Straits Settlements:—70 non-commissioned officers and men, 7 soldiers' wives, and 5 children of the 75th Regiment; 9 non-commissioned officers and gunners of the Royal Artillery; and 1 man and woman of the Army Hospital Corps, for Singapore; 3 men of the Royal Artillery, for Penang; 30 non-commissioned officers and gunners, 9 soldiers' wives, and 9 children of the 75th Regiment from Shorncliffe, 14 men of the Royal Artillery from Woolwich, and 1 woman of the Royal Engineers, for Hong Kong. The following officers embarked with the troops: Captain Michael John Sexton, Royal Artillery, in command of the troops, and Ensign Robert Hawkee Ellis, 75th Regiment, for Hong Kong; Lieutenant John Hume Hart, Royal Artillery; Ensign Reginald B. Rudyerd, Ensign Philip F. Walker, and Ensign Henry Harding Matthias, 75th Regiment, for Singapore; the whole under the medical charge of Staff Surgeon Augustus Frederick Turner.

### THE SANITARY CONDITION OF THE ARMY.

The Report annually issued by the Medical Department of the Army is this year of a comparatively uninteresting and of a correspondingly satisfactory character. In other words, the sickness and mortality in the army were near the usual averages. Compared with the results for 1866 there has been an increase in the ratio of deaths to the extent of 2.28 per 1,000, and a decrease in the proportion of men discharged the service as invalids amounting to 4.8 per 1,000. There has also been a decrease in the mean daily sick of 2 per 1,000. The rate of mortality, though higher than in 1866, was still a little under the average of the last seven years, and the numbers discharged as invalids and constantly non-effective from sickness were each 5 per 1,000 below the average. The only exceptionally high mortality (71.07 per 1,000) occurred at Jamaica, and was occasioned by yellow fever. This disease attacked 90 persons in a garrison of the average strength of 788, and destroyed 38 of them, the deaths from other causes being only seven in all. The highest rate of sickness was in the Mauritius, where the admissions to hospital were in the proportion of 2,233 per 1,000, and the mortality was 40·95 per 1,000 in a garrison of the average strength of 1,294. In India, including all three Presidencies, the admissions to hospitals were 1,379 per 1,000 of force, and the deaths 28·86; the deaths in Bengal having been somewhat above, and in Bombay and Madras somewhat below the average. In Malta the proportion of admissions was 863; the deaths were 24·19 per 1,000. In the United Kingdom the admissions were 870, the deaths 9·40. The great scourge of the army—the diseases due to sexual immorality—is not only unabating, but increasing. In the United Kingdom the *increase* has been 33 cases per 1,000 of force; in Gibraltar the increase over 1866 has been "considerable;" in Barbadoes it has been 32 per 1,000; in New Zealand the number of cases has been nearly double the average; in Japan it has amounted to 797 per 1,000, and in Bombay to 723 per 1,000. Nova Scotia and New Brunswick, Honduras, and Australia all report an increase; and at all the stations this increase has been chiefly due to the syphilitic group of maladies—the most important and far-reaching in their effects. Malta, Jamaica, China, Bengal, and Madras report a decrease, but not to an extent that balances the increase elsewhere. It is surely time that the efficiency of the present Contagious Diseases Act should be recognised, and that an endeavour should be made to increase the practical value of its provisions. The appendix to the report contains, as usual, a number of highly valuable communications on a great variety of subjects that affect the health and well-being of the soldier. The second of these communications is a commentary by the Army Sanitary Commission on the cleansing of Indian stations; and it enters at length into the consideration of the "dry earth system." This, which has been so successful at Wimbledon, is altogether condemned by the Commission as being more expensive, more troublesome, and less efficient than a water system, and they append to their remarks some interesting observations on the utilisation of ordinary sewage.

## THE YANGCHOW RIOT.

BY REV. M. J. KNOWLTON, NINGPO.

After all that has been published respecting the Yangchow riot, the editorials of home journals and the late debate in the House of Lords render it evident that there is still great ignorance of the facts of the case, even among those whose duty it was to better inform themselves.

1. In regard to the Yangchow affair, they assume that the missionaries were "imprudent" in going *so "far inland"*—beyond, it is said, "consular jurisdiction." But what are the facts? They were but fifteen miles by water, and ten miles by land from the open port of Chinkiang, where were a custom-house, Consular establishments, and a number of foreign residents. Yangchow is in sight from the Chinkiang British Consulate, and may easily be reached from there on a pony in an hour and a-half. So much for being "far inland," away from Consular jurisdiction. If the jurisdiction of a Consul does not extend to Foreigners when distant from an open port but ten miles, then what assurance can Foreigners have of protection when they leave an open port and proceed into the interior for trade, or recreation, or any other purpose, the very shortest distance?

2. The Yangchow missionaries, though so near an open port, had *passports*. According to a special provision in the old treaties, Foreigners are allowed with passports to proceed into the interior, without limit as to distance. Is not a Foreigner with a passport in his pocket, however far he may be in the interior, under the protection of his Consul, and also of the Chinese officials? Yet Lord Clarendon, in his letter to the directors of the London Missionary Society, declares that "it is impossible for Her Majesty's Government to protect a missionary establishment in places where no Consular authority is at hand." And it is very noticeable that, in the whole debate in the House of Lords, no reference is made to the passport system, by virtue of which missionaries, merchants, and scientific men have hitherto travelled in the interior. Is the British Government about to dispense with the passport system?

According to the principles laid down in the Treaty with the United States, recently agreed upon at Washington, citizens of the United States of America are to have the same privileges in China that are accorded to Chinese in the United States. This is equivalent to dispensing with passports, and to allowing citizens of the United States to travel, rent or purchase houses and lands, and reside wherever they like in China. But this fine and darling theory of the Burlingame Embassy is, however, fatally opposed by the great inequality of conferring upon the Chinese all the advantages of a highly civilised and enlightened state of society, of just laws and an equitable government, while citizens of the United States in China must be subjected to all the disadvantages of a very low state of civilisation, of antiquated or unjust laws, and a Government in its practical workings but little removed from barbarism.

3. Again, the Yangchow missionaries, before visiting that city, took the precaution to *consult with* some *officers* of different nationalities, as to the propriety and practicability of residing there; and they all agreed that they had the right, and that it was undoubtedly feasible for them to do so.

4. Moreover, the missionaries obtained of the Taoutai under whose jurisdiction Yangchow lies, *an official despatch* to the officers of that city, informing them of the object of the missionaries, and directing them to afford them protection and aid in securing a place of residence. The native officers of all grades, so far as I have heard, all admit the right of Foreigners under the treaties to rent houses and reside in the interior. That the Chinese Government and the provincial officers do admit this right is proved by the fact that Foreigners do actually possess houses and reside in every province in the Empire.

5. By means of the Taoutai's despatch, the missionaries had no difficulty in obtaining the issue of *a proclamation by the district magistrate of Yangchow*, allaying any suspicions that might be secretly entertained among the people respecting them, and greatly facilitating the renting of a house.

6. The missionaries have been blamed for going in *so large a party*. But in the first instance only Mr. Taylor and his family went there, remaining about a month, living part of the time in a boat, and the other part in an inn. Finding the people and authorities apparently so friendly disposed, and having obtained a house in a somewhat retired locality, he felt no hesitation in inviting a fellow missionary with his family to come and reside, bringing with him a printing press and materials, &c., for printing; also philosophical, chemical, and photographic apparatus, a case of surgical instruments, a musical instrument, books, clothing, &c., &c.—all of which were destroyed or taken away during the riot. The *Saturday Review* makes itself merry over the "indemnity for losses extorted from the Chinese." But this ridicule is sadly out of place. When Mr. Taylor was called upon by the Consul to give a valuation of the losses sustained, he could not at once call to mind all the articles that were lost; and it was afterwards found that the estimate given fell several hundred dollars below the actual loss. And up to this time the missionaries have received nothing for injuries suffered. One received a permanent injury to his eye, another a hernia that will incommode him for life. The *Saturday Review* misrepresents them as *demanding* "indemnity;" but they did not, and the compensation and penalties demanded by Consul Medhurst were most moderate and just. And in regard to the largeness of the party, it should be mentioned that some of the missionaries who happened to be present during the riot were merely making a temporary visit, one or two having arrived on the very day of the riot.

7. It has generally been assumed that the mob was raised by the *preaching of Christianity*, and especially by *declaiming against ancestral worship*. But the facts of the case prove beyond all controversy that the propagation of Christianity, and the assailing of Chinese superstitions, had nothing whatever to do with exciting the disturbance. *The missionaries had not yet commenced preaching at all.* And even if they had, it is not Mr. Taylor's custom, nor that of the more experienced missionaries generally, I believe, when preaching to a wild heathen audience, to begin with inveighing against ancestral worship and other Chinese superstitions, but rather to begin with certain generally admitted principles. Those who have raised objections to the mode of missionaries' preaching have probably never heard a missionary preach, never perhaps visited a mission chapel or school, and in fact know nothing from personal inspection, or from trustworthy sources, of the operations of missionaries. In the Yangchow case, they had been occupied with obtaining a house, in making repairs, and getting settled, and had not yet begun missionary operations; much less had they assailed any of the cherished religious opinions or practices of the people. The people knew nothing of Christianity; hence how could they feel opposition to it? Moreover, they were friendly. When the Foreigners appeared in the streets, there was, of course, the usual idle curiosity, but nothing rude. And the missionaries were careful not to excite even that unnecessarily; the ladies did not appear in the streets when they wished to walk, but took a boat and went to a retired place two or three miles distant.

So much for the alleged "imprudence" of the missionaries—"that small independent body of men," as the Earl of Shaftesbury said, "who raised this fuss," while the great missionary societies conduct their proceedings with so much zeal and judgment." Indeed if "a small body of independent men, acting under no central authority," act with so much discretion as facts prove they did, what paragons of good judgment, circumspection and prudence must be the missionaries under the direction of "the great missionary societies."

*How was the riot caused?* Precisely in the same way that every riot of which I have heard has been produced, viz., by the instigation of the gentry, *i.e.*, rich, literary men, especially that class who, failing to obtain an appointment to an official position for extorting money, make extortion in a private way their business. This class of men, very numerous in China, invariably have within easy

Digitized by Google

call a set of ignorant, loafing, athletic bullies, to perform their low, mean business. In the Yangchow case, a number of these gentry held a secret meeting at least fifteen days before any disturbance arose, and deliberately formed their *plan* for ejecting the Foreigners from the city. This plan was the usual one of posting inflammatory handbills, and circulating "agitating reports," and thus working upon the ignorance and passions of the populace, until a mob could be excited. Two incidents especially emboldened them to make this attempt, first, the recent withdrawal of the English Consul from Chinkiang, and the appointment of an assistant in his place (Mr. Taylor heard the matter remarked upon in the tea-shops of Yangchow) ; secondly, the fact, which had also become noised abroad at Yangchow, that the missionaries had just been successfully baffled by the district magistrate of Chinkiang, in their attempts to procure a house in that city. The manner in which this last was done is worthy of note, since it appears to be the one now generally adopted by unfriendly officials to prevent Foreigners from obtaining houses in the interior. A Foreigner rents a house, the writings are duly made and signed by the proper parties and by the usual "middle-men ;" the Foreigner is soon surprised (for the gentry have secretly been at work) at receiving from the officer of the place a polite note, informing him that the man who has rented him the house is not its proper owner, the contract is void, and the house must be given up ; in the meantime the owner of the house is informed secretly that if he does not get back his house he will suffer for it. A case quite analogous to this has just occurred, but a few days since, in Kinghwa fu, in the Chekiang province. A Foreigner rented a small house, the writings were all duly drawn up and signed, and the day fixed when he was to take possession of the house. The gentry went to work, compelled the owner to secretly sell the house to them, and the day before the Foreigner was to take possession a mob was taken to the spot, the house was taken to pieces, and every stick and brick of it was carried away and deposited in a temple ! That was an American, and if the United States officers in China do not cause those gentry to return that house to its former condition, or else obtain another house for the United States citizen in its place, I should like to know of what account the treaty of reciprocity is that was recently agreed upon with the Chinese Embassy at Washington ? And of what account also is the "most highly favoured nation clause" in the old treaty of 1859 ? for Frenchmen are allowed to rent and purchase houses and reside throughout the empire. It is true they are Romish priests, and the United States citizen mentioned above is a Protestant missionary, very "prudent," of one of "the great missionary societies."

The gentry at Yangchow began at once to carry out their plan. At first the anonymous handbills in manuscript were posted, containing absurd charges against the Foreigners, and threatening them, and also the landlord and house agents. These not exciting much attention, large placards, a yard long, were printed and posted up throughout the city, stating that "these brigands of the religion of Jesus opened foundling hospitals for the purpose of enticing into them small children, that they might cook and eat them ; that they scooped out the eyes, and took out the lungs and livers of the dying who might be within their power." For such monstrous reports they had, in the minds of the people, some apparent foundation, for there had recently been considerable sickness in the foundling hospital of the Romish mission in Yangchow, and many of the children had died. A man having been detected at one of the city gates in carrying out a child covered up in a basket, to bury it in the Roman Catholic burying ground, so great an excitement was awakened that the magistrate of Yangchow caused some eighteen of the graves of the little children who had died in the hospital to be opened, and their corpses examined, to ascertain whether they had been mutilated or not. The "taking out of the eyes and lungs and livers" is an old standing charge against Romanist missionaries throughout the Empire, and the people and even the literati and officials make no distinction between Romanists and Protestants—everything "foreign" is all the same to them, and equally to be condemned, simply because it is "foreign."

These and such like horrible charges had the desired effect ; the people were roused. Nor were the missionaries indifferent and inactive. They petitioned the prefect to take steps to repress the growing excitement and disturbance, but he treated the matter lightly and did nothing. Again they petitioned the prefect, reminding him of the possible result of the excitement, unless it was checked ; he promised to take action, but remained inactive. Other placards were posted, of such a vile and indecent character as to be unfit for publication ; exaggerated and most absurd rumours were flying in every direction ; the whole city was in a ferment. But the officials still did nothing. Had they issued a proclamation when requested, threatening the instigators of the mob, and allaying the absurd fears of the people, there can be no doubt that the riot would have been prevented. Even a placard posted by the missionaries, containing a refutation of the outrageous charges, had a marked effect upon the deluded people. Two or three years since precisely similar efforts were made to excite a mob against the missionaries at Hangchow, but the officials, when appealed to, at once issued proclamations, which put a stop to the nefarious proceedings of the gentry, and the missionaries remained in peace.

On the 22nd of August, 1868, two Foreigners from Chinkiang, one of them a United States Consul, paid a visit to Yangchow, passing quietly through the streets, looking at any curios they might find, and also called on the missionaries. In the afternoon they returned to Chinkiang. Immediately the report was circulated that "twenty children were missing," who were "taken away to be cooked and eaten," or for some other equally horrible purpose. Upon this the excitement burst into a flame, the mob was called out, and that same evening it accomplished its fiendish work. Now in view of all these facts who can have any doubts as to who were the instigators, and what was the cause of that riot ? Where in the whole history of that affair is there any act, any course of procedure of the missionaries to which the blame can be attached ? Is it not perfectly evident that the gentry, entirely without any just cause, excited the populace and raised the mob, and that the officials secretly connived at their proceedings ?

The opinion appears to have become widely prevalent that the *Chinese authorities* and *people* are *especially opposed to the propagation of Christianity*. Even Sir Rutherford Alcock, in his despatches to Her Majesty's Government (as stated by Lord Clarendon in the debate), has "referred to the riots which have occurred as a proof that not only the authorities and influential persons, but the whole population of China, are adverse to the spread of missionary establishments ;" hence "that it would be very inconsistent with wisdom or prudence to insist upon an article in the new treaty to be negotiated with China, empowering missionaries to purchase lands and reside in the interior." Now, from an intimate acquaintance with the Chinese during a period of fifteen years, and from experience of their opposition both near the open ports and far in the interior, I do not hesitate to affirm that Sir Rutherford's inference from the riots is utterly false, not being consonant with facts. The root of the opposition that has led to disturbances is not found in any special repugnance to Christianity, but in *hatred to all Foreigners, as such*. At a place 250 miles in the interior, where we have met with much opposition, I took special pains to ascertain the ground of it ; and I found that it was not aimed at Christianity, but the current talk of the opposers in private among themselves was, "If missionaries are allowed to come and reside among us, they will no doubt be followed, by and by, by other and perhaps unprincipled Foreigners, and especially by *merchants with sufficient capital to take the trade out of the hands of our native merchants*." This last consideration seemed to weigh most with them. Merchants have often met with opposition, and have often been driven from places in the interior. Missionaries are residing in cities in the interior, and boldly prosecuting their missionary operations where merchants would not be allowed to stay, and where, in some instances, merchants had previously been driven away. A merchant and his servants had been beaten and robbed by an official and his lictors, at a place not far from Yangchow, previous to the Yangchow riot. At Taiwan merchants had been as seriously interfered with by the officials as the missionaries ; and gunboats were called in more to vindicate the treaty rights of the merchants than those of missionaries. The same was substantially the case at Yangchow. The disturbance at Swatow recently, in which placards were posted offering $50 reward for every European head, and in the putting down of which by force many lives were lost, had nothing to do with the missionaries. Nor had they anything to do with the collision at Amoy, in which the rioters were fired upon by the marines, and a number of Chinese were wounded, and one or two at least killed.

I cannot close this paper better than by quoting an extract from Consul Medhurst's despatch to Sir Rutherford Alcock, August 31st, 1868. After having taken the affidavits of the missionaries, and by a most careful investigation on the ground having possessed himself of the facts of the Yangchow riot, Mr. Medhurst gives the following *summary* of them :—"1. That the attack was entirely unprovoked. 2. That it was instigated by the literati and gentry generally. 3. That the outrage was distinctly premeditated and occupied time in being put into execution. 4. That the local authorities took no pains whatever to prevent or put down the excitement, notwithstanding that they were warned of the possible result, and were repeatedly and courteously appealed to for protection. 5. That when the rage of the mob had been permitted to take its course, and after protection had been tardily accorded, they actually threatened the victims to leave them to their fate, unless they recorded it as their opinion that the attack partook of the nature of a simple disturbance, punishable as far as the actors in it were concerned, with the cangue. And 6, that since the affair took place, the authorities have done nothing towards expressing their disapprobation of the conduct of the ringleaders."

The mode in which the affair was settled was, under all the circumstances, they very best that could have been devised. Had it been sustained by the British Government, it would have done more towards the opening of the interior to foreign residents, and preventing like infringements of the treaties, than a dozen such embassies as that of Burlingame, or a hundred adjustments by mere diplomacy at Peking, or by reference to the Home Governments of Treaty Powers. Indeed, justice cannot be obtained by diplomacy. The treaties are as worthless as blank paper unless *backed by "force."* But the Earl of Clarendon appears to be in mortal fear lest a Consul, who calls in force to compel a provincial Chinese officer to observe the treaty stipulations, will necessarily involve H.M.'s Government in a war with China. But this by no means necessarily follows. Lord Clarendon and his peers should by this time have learned enough of China to know that it is "a mountain of sand ;" war in one part does not necessarily affect any other part. The fighting, and the repulse and subsequent victory of the allies at Tienstin, in 1858 and 1859, did not raise a ripple of excitement at the other ports. Chusan Island, which is under the jurisdiction of Ningpo-fu, was taken complete temporary possession of, yet all remained perfectly quiet at Ningpo, natives and Foreigners continuing at their business as usual. A Consul may call in the aid of a gunboat or man-of-war, and whip a pig-headed refractory provincial mandarin into the line of his duty in observing the stipulations of the treaty, as at Taiwan-fu and Swatow, without in the least disturbing the peaceful relations of China with his own Government ; he has but made those relations more firm, friendly, and peaceful. Indeed, this course is often a necessity. Cases have occurred calling loudly for redress, the matter was referred to Peking, the central Government in substance says :—"We are certainly very sorry that this breach of the treaty has occurred, but we have not the power always to control those provincial officers, moreover the people are joined with them in this case, which renders it doubly difficult. Suppose we compromise the matter this time ; we will reprimand the officer, and give strict orders forbidding the like to occur again." The Minister pities the weakness of the Central Government, listens to its sophistry, gives the matter the go by, snubs his Consul, and lays the foundation for fresh outrages. Who does not see that when the Central Government pleads its inability to control the provincial authorities and "people," the *only way to obtain redress* is for the Consul to be allowed to call to his aid sufficient *force* to enable him to bring the contumacious provincial officer and his band of gentry to terms ?

## THE UPPER YANGTSZE.

The opening of Hankow and Kiukiang to foreign trade admitted mercantile enterprise into a vast field previously closed against it, though to some extent explored, and known to abound in the essentials of a great trade. For some years afterwards, our countrymen were content to work—with what success we need not specify—the rich mine thus opened to them, and hardly cared to inquire into the nature of the country that lay beyond the upper portion of the Great River, and the districts traversed by it; and these have accordingly remained, until very lately, a *terra incognita*. It would not however have been right to neglect permanently the exploration of the Upper Yangtsze. Certainly, neither the present aspect of the foreign settlement at Hankow, nor the record of its progress during the past few years, offer any encouragement towards the foundation of similar settlements at other and more distant points; still, it has been rightly considered that our commercial relations with the Chinese may be fostered, and our trade developed, by the opening of new paths into the inner recesses of the country, without incurring the necessity of building "model settlements" of palatial dwelling-houses and massive go-downs at every point. The recent exploration of these upper waters, so far as we can judge from the Report issued by the Shanghai Chamber of Commerce, must be regarded as a highly satisfactory achievement. Admiral Keppel acted with his usual good judgment in taking the *Salamis* on a sort of voyage of discovery up the river; Mr. Swinhoe worthily represented the Consular service; and the Chamber of Commerce made an undeniably good choice in selecting as their delegates Messrs. Michie and Francis. Their observations show that for a distance of at least 360 miles above Hankow the river is suitable for steam navigation, and that eventually even this will be far from the extreme limit. At least one first-class and two second-class trading-marts might be at once availed of, Shasi, the most important, being a large city, through which passes the entire trade of Szechuen and Yunan, and where some 40,000 tons of native shipping was congregated; while Ho-hu and I-chang, though of minor importance, present great trading capabilities. It is worthy of note that the people everywhere expressed the greatest willingness to trade, and that those who accompanied the expedition agree in a firm conviction that wherever foreign merchants present themselves they will be civilly, and even cordially, received. Here is another great and (to any reasonable mind) convincing proof, that it is not any rooted aversion or hostility on the part of the populace that we have to contend with. Let the official class cease their malevolent intrigues, and Europeans will no longer be insulted or maltreated by the people of China.

---

Our correspondent at New York informs us that a very neat Organ has been contracted for by a gentleman from Yokohama, intended for the church at that place. The first cost is to be about $3,000 currency. We congratulate the community on this acquisition, which was much needed; and we hope soon to hear that a new church—on a better site—has been decided on.

## THE OTTOMAN EMPIRE AND THE SUEZ CANAL.

The opening of the new Canal, the journey of the Empress, and the voyaging of the few journalists who accompany, or, rather, follow the Imperial *cortège*, naturally cause a great deal of talking and writing *àpropos* or otherwise to the circumstances of the Isthmus; and pamphleteers seize upon the opportunity to plead the causes to which they are attached, or to argue out the crotchets they have taken up. A pamphlet appeared the other day in the Palais Royal which appears to have been written to order for the Turkish Government, and the style may be fairly judged of by the second paragraph of the publication. After speaking of the bold statesmanlike act of the Sultan in visiting Western Europe in 1867, with fitting admiration the writer adds:—"And "with the tact which characterises great nations France ap "plauded him, France exhibited towards him her most re- "spectful sympathies." Perhaps such sentences are necessary to cause a pamphlet that does not treat of party conflict or scandal to be read in Paris, but they do not agree with the English notion of sober writing. About fifty-five of the sixty pages of this pamphlet are occupied with laudation of Turkey and its Government, condemnation of every act of the Western Powers in relation to Ottoman affairs, abuse of the Viceroy of Egypt and his Government, and the usual declamation against Russian views in the East.

What is said about the Suez Canal is not of much value, but still it deserves notice. The Prodigal Son, who is squandering the heritage of Mehemet Ali, says the anonymous author, has invited the Sovereigns of the West to the inauguration of the work of another Prodigal Son, who has managed to sink 300 millions of European gold (francs), 300 millions of Europeans savings, in the sands of Egypt. The Canal, we are assured, is condemned to become barren, profitless before ten years are passed if other resources are not found to maintain and to complete it, than European capital and the produce of the navigation by that route towards the East. In order to protect the precarious existence of the Canal against the sands of the desert, the vessels that traverse it must produce annually 15 millions of francs for the interest on the capital of 300 millions, and at least 8 millions for the maintenance of the Canal and attendant expenses. The higher the rates are raised the smaller will be the number of trading vessels which will abandon the old route of the Cape, and sailing vessels will never do so at all. The Suez Canal is a work of luxury, and only passengers who can afford to pay well, and light goods, will ever pass through it.

And we know only too well what would become of our railways without heavy goods. The author applauds those Powers which have refused to be present at the inauguration, and says that the greater the *eclat* of the ceremony the greater will be the ridicule which will fall some day upon those who could not see that the work of M. de Lesseps is as unstable as the sands through which it is carried.

The following sentences furnish a good example of the mixture of truth and error spread through the pages of this pamphlet:—"As regards the present policy of England, it "is well to note that this Power formerly enjoyed a prepondе- "rating influence at Constantinople, where she was for a time "effaced by France, until the Treaty of Unkiar-Skelessi gave "Russia the first place. But England has a constant interest "in the maintenance of Turkey, and can never consent to its "being reduced. She has, in fact, lost so much of her Euro- "pean commerce that she would be compelled to close her "factories if nothing but European markets remained to "her. But England is still mistress of the commerce "with the rest of the world, and is always seeking new "outlets. The nearer India is brought to her by a short "route, and by means of steam, the more important becomes "her relation with that immense Empire which constitutes "her chief resource." Yet, in another place, the author declines to speak of the Suez Canal after the jealous and *interested* critiques of the English press. The Suez Canal, says our author, can never exist on its own resources; it would, however, be a grand and useful undertaking if it could be maintained, extended, and completed. Completed in what direction or in what sense is not explained. The Egyptian Government, we are assured, can never meet the incessant demands of this work. The Viceregal Government, improvident and prodigal to excess, has got to the end of its means, and is driving to despair its unhappy subjects, who will soon rise up against it. The only possible way to save the Canal from

Digitized by Google

ruin, and to prevent the loss of the immense sums so improvidently lent to the Khedive, we are told, is to restore Egypt to its legitimate Sovereign, and force the Viceroy to maintain the treaties which he is continually violating. If not placed in the hands of a powerful Government, the shareholders will abandon the work at the first crisis. There is no counting on English capital to raise up the enterprise; English capitalists have never been favourable to the Suez Canal, and underneath English want of confidence there is much more than jealousy or envy. The Sublime Porte alone can save the Canal from ruin; in assuming the direct administration of Egypt, in order to utilise her immense resources, she could easily pay for the maintenance of the Canal, as well as the interest on the shares of the Company out of the revenues of Egypt.

If the writer of this pamphlet be right in his views, the future of the Suez Canal Company is dark indeed; but we trust that his predictions will turn out as ill-founded as his assertions are grossly exaggerated with regard to England, and all with whom he differs, and as his conclusions are often glaringly illogical. We do not wonder at English capitalists having no faith in the pecuniary prospects of M. de Lesseps' enterprise; we rather wonder how he has found the necessary means so far; but we applaud his determination and untiring zeal, and we hope that the case of the Company may turn out to be infinitely better than our pamphleteer would make it appear.

## THE YANGCHOW AFFAIR.

Mr. Knowlton, an American missionary at Ningpo, gives a temperate and searching account of the Yangchow affair, which we reprint. It is worthy the attention of members of both Houses of Parliament, and all interested in China. Mr. Knowlton contends most ably for the right of Mr. Taylor and any other missionary to locate at Yangchow and all other places, and he gives an account of the way they went there. He says that the misrepresentations made by members of the Houses of Lords and Commons and of the press in this country is astonishing and wicked to a degree, and he is not far wrong. Opinions are formed and expressed on such cases without reference to the simple facts which are not understood and are discarded; they are inconvenient, and are thrust aside as impracticable. On the origin of the riots Mr. Knowlton gives us the conclusion of Mr. Medhurst, our Consul. Indeed, the whole of the narrative is a most valuable contribution to the elucidation of the much-abused and misrepresented Yangchow affair. It is another condemnation of the miserable policy pursued by our Foreign-office in this and our general relations with China. With such oft-repeated advice of how to manage the Chinese, can Lord Clarendon longer maintain the style of his despatches? Mr. Knowlton emphatically confirms what we have so often stated, viz., that a reference to Peking of all our grievances, and the withdrawal of power from the Consuls, is the sure way of bringing on another big war. Mr. Knowlton very well describes the manner of treating our complaints at Peking, which amounts in all cases to an expression of regret and the affair shall be looked into, and after a delay of weeks the Minister gets the following:—"We are sorry that a breach "of the treaty has occurred, but we have not the power to "control those provincial officers, and the people are joined "with them, which makes the matter more difficult. Suppose "we compromise the matter this time; we will reprimand the "officers, and give strict orders to prevent its recurrence." By this course our grievances accumulate, and we are obliged to make threats, and then carry them out by a war. Now, the only way to be at peace with China is to insist on our just rights by treaty, and straighten out any infringement *on the spot at once.* This course is the more valuable and the less to be cavilled at, as we know from experience that, as a rule, the Government at Peking simply administer a wigging to the Governors of provinces for getting into a row with us, and causing us to trouble them with the matter. In the case of Swatow, Formosa, and many others, the officials on the spot thanked our Consuls for the measures taken to obtain redress. Our chief enemies in China are the class termed the literati, who hold no office, but live by petty squeezes. One thing the Foreign-office may be sure of—that if the present policy is pursued the valuable and trained staff of Consuls in China will retire in disgust. Sir Rutherford Alcock may be expected home in a mail or two, when our policy and position can be thoroughly examined previous to the opening of Parliament; and we trust that Sir Rutherford will succeed in convincing Lord Clarendon of the danger of the present policy.

## MISSIONARIES IN CHINA.

The *Chinese Recorder* for August (edited by the Rev. S. L. Baldwin, of the American Board Mission at Foochow) contains an account of the various Protestant Missions in China arranged in a tabular form, by which we can see at a glance that the total number of missionaries, English and American, with a few German and Swiss, number 152 males and 129 females, divided over the various ports of China. The aggregate number of chapels at these places is no less than 296. The number of boys and girls who are daily taught sum up over 4,000; the number of communicants nearly 6,000. Amongst these missionaries there are several who have studied medicine, and hospitals for the Chinese are conducted by them at Peking, Tientsin, Shanghai, Hankow, Ningpo, Amoy, Canton, Hangchow, Taiwan, &c. The arrangement and publication of these missionary statistics fills a want much felt, and is very creditable to the editor. The missions are divided as follows:—

| | English. | American. | German, &c. |
|---|---|---|---|
| Peking ... ... ... | 8 | 30 | — |
| Tientsin... ... ... | 11 | 2 | — |
| Chefoo ... ... ... | 6 | 3 | — |
| Tungchow ... ... | — | 12 | — |
| Shanghai ... ... | 6 | 15 | — |
| Kiukiang ... ... | — | 2 | — |
| Hankow... ... ... | 12 | 1 | — |
| Ningpo ... ... ... | 13 | 21 | — |
| Foochow ... ... | 6 | 14 | — |
| Amoy ... ... ... | 12 | 5 | — |
| Taiwan ... ... ... | 4 | — | — |
| Swatow ... ... ... | 6 | 4 | — |
| Canton ... ... ... | 17 | 9 | 13 |
| Hong Kong ... ... | 6 | — | 14 |

What is termed the China Inland Mission, under the Rev. Mr. and Mrs. Taylor, of Yangchow fame, consists of fifteen males and fifteen females, and they do not form part of any of the established missions.

At a meeting held at Peking of the members of the "American Board of Missions," Dr. S. W. Williams, the American *chargé d'affaires*, took the chair, and, in his address, said that when he arrived in China thirty-six years since there were only two missionaries.

The Chinese Newspaper published in Shanghai, and edited by the Rev. Y. J. Allen, is largely circulated, some 35,000 copies having been sold at one to two cents per number. The paper treats on the practical and mechanical appliances of the West, such as railways, telegraphs, life insurances, and our general trade, wealth, &c. This seems to be very much like what Mr. Muirhead is so urgent in pressing on us in his letter, which we published in our last number.

## THE SUEZ CANAL.

In addition to the extra steamers to be despatched by the Messageries and other companies, we understand that the P. and O. Co. will despatch their steamer *Delta* for the ceremony of the 17th November. It is not the intention of the directors to send the *Hindostan* through the Canal; she will proceed out to the India station round the Cape. The *Wm. Miller*, screw, for Singapore, Labuan, and Hong Kong, is announced to go through the Canal by Messrs. Killick, Martin, and Co. Messrs. Haviside and T. and W. Smith also announce vessels for Bombay and Calcutta through the Canal; the freight asked is £3 10s. to £4 per ton.

It is said to be now definitely settled that neither the Prince of Wales nor any other member of the Royal family will be present at the opening of the Canal. England will be represented at the ceremony by Mr. Elliot, our Minister at Constantinople. The opening of the Canal is expected by commercial men in Russia to produce great advantages for Russian trade, and preparations are being made for using it largely as a means of communication with India and Central Asia.

With reference to the establishment of a lighthouse on the Great Basses Rock, Ceylon, we are able to announce that Mr. W. Douglas, the executive engineer, and Mr. J. N. Douglas, of the Trinity-house, who has been appointed designer and consulting engineer to the undertaking, will leave England about the 17th prox. The vessel conveying the mechanics, stores, and appliances will be despatched during December, and the workmen are expected to be on the rock by January next.

# Foreign Intelligence.

## GERMANY.

(FROM OUR OWN CORRESPONDENT.)

Hamburg, Oct. 19.

However the official organs may endeavour to conceal and gloss over unpleasant facts, there can be no doubt that in Prussia everything is not going on as smoothly as could be wished. The extraordinary absence of Count Bismark from Berlin, where the Parliament has been sitting for a fortnight, seems to confirm the general belief that he has had a quarrel with the other Ministers, or at least that there exists a difference of opinion between them on some important questions; for otherwise it is but natural and usual that he would be present to take part in the debates, and support the Ministerial measures by the weight of his influence on the assembly, and the force of his eloquence. It cannot be said that he is suffering from any infirmity or disease, as it is well known that he is in the full enjoyment of his bodily health and mental faculties. The only way to account for his unexplained absence is his wish not to identify himself with the measures of the present Cabinet, of which, however, he is the head, and, indeed, in more senses than one the Ministers appear to have lost their head, and are exposing themselves to rebuffs and defeats that in any other constitutional State would make it incumbent on them to resign office.

First and foremost, there is the Budget to settle. The Minister of Finance has laid on the table of the House the estimates for 1870, accompanied by his financial statement. The revenue is computed to amount to $164,311,275, and the expenditure to $169,711,275 (of which latter $164,072,575 are for the usual annual expenses of the State, and $5,638,700 for special purposes), thus showing a deficit of $5,400,000, to cover which the Minister requires the concurrence of the House to increase by 25 per cent. the classified income-tax, the class-tax, and the tax on butchers' and millers' produce. In the House of Representatives there is a strong feeling of dislike among the members to lay any fresh burthens on the shoulders of their constituents, and as this feeling is shared by both Liberals and Conservatives, it is not difficult to foresee the result of the division when the subject is brought forward for discussion, which will probably be next week. In the meantime the Baron von der Heydt, the Minister of Finance, has, it is understood, declared his intention to stand or fall by the measure, and threatened to resign if it is defeated by an adverse majority.

Then there is another great danger impending. In order to raise funds for enabling four of the principal railway companies to make a series of extensions—many of them, no doubt, of great utility, and for the benefit and convenience of the public—the Government propose to grant a concession to the Discount Company of Berlin for a loan of $100,000,000 (say one hundred millions of dollars) in the shape of a lottery loan, which at the present time of day, when public opinion sets so strongly in the direction of abolishing lotteries, gaming tables, and other gambling transactions, is far from popular. The question was mooted in the Upper House on the 11th inst., by Count Munster, a Hanoverian noble, in the shape of an interpellation to the Minister for Trade and Public Works, whether such a lottery loan were consistent with the welfare of the State. The Minister of course warmly defended the measure, and stated that it required the sanction of the King, to whom he confessed he had not yet submitted it; but he denied that it required the approbation of Parliament, as it was a self-supporting scheme, and imposed no additional taxes or other burthens on the people. The Upper House have hitherto taken no further action in the matter, as they have at present adjourned for some weeks; but the Lower House have taken it up, and that is where the danger is expected to come from. Four members, representing the chief political parties in the House—Von Branchitsch, a Conservative; Von Kardorff, a Free-Conservative; Von Denzin, a Liberal; Benda, a National Liberal; and Dr. Loewe, a Progressionist—supported by several members belonging to other political factions, moved a resolution that the proposed hundred million Lottery Loan is inconsistent with the welfare of the State (Count Munster's identical words in the Upper House). It is arranged that the debate shall come on as soon as the Budget is disposed of.

Rear-Admiral Kuhn, who, ever since his return from the command of the China and Japan station in the *Vineta*, has been suffering from an ophthalmic disease, and obtained a leave of absence from duty that has just expired, has now received from the King a renewed furlough to enable him to complete his cure under medical treatment.

The King of Norway and Sweden has appointed Herr Arnold Jacob to be his Vice-Consul at Samarang, under the Consulate General at Batavia.

The *China*, Capt. Jordan, arrived at Bremerhaven from Rangoon, has brought a splendid Bengal tiger, and landed it in good condition, though the ship had a rough passage and encountered a dreadful gale at the end of July off the Cape, when a wave washed clean over the decks and carried off two seamen, who could not be rescued, and the vessel also suffered considerable damage.

### COMMERCIAL.

The Tea market is quiet; ord. and good. ord. Congou offered on easier terms; middling Congou lower, but the finer descriptions of the new crop are firmly supported. No alteration in Souchong, but Pecco obtains higher prices. Among the sales by importers were 600 chests Gunpowder and 25 do. Young Hyson. Cassia Lignea is still in request, but very scarce; so that, unless fresh supplies come to hand soon, a rise must inevitably take place. More business doing in Pepper, at previous quotations. Spelter still neglected.

### SHIPPING.

Arrived.—Bernhard Carl, from Ilo Ilo; Ernst, from Cochin.
Sailed.—Princess, to Singapore; Deutschland, to Rangoon.

Loading.—For Bombay, Hermann; for Singapore, Carl and Auguste; for Hong Kong, Penguin, Devonshire, Wohldorf, Catharina; for Shanghai, Robert Rickmers; for Nagasaki, Fidelio.

## HOLLAND.

(FROM OUR OWN CORRESPONDENT.)

Rotterdam, Oct. 19.

I am still without certain information with regard to the recall of Governor-General Myer. When I last wrote the rumour was circulated so widely, and even by the Liberal papers so positively, that everyone thought the recall must very soon take place. Several names are mentioned as of the probable successor, amongst them those of Mr. Fransen van de Putte, Mr. Gevers Deynoot, Burgomaster of the Hague; Mr. Loudon, and others. It is now asserted that several members of the Second Chamber are vigorously urging upon the Minister of the Colonial Department the recall of Mr. Myer; but the *Vaderland* and the *Middelburgsche Courant* state that the Minister shrinks from such a measure. Other papers say that Mr. de Waal declines to adopt this important step, because it is not at all certain that the Second Chamber will approve his Budget. This much is certain, that the Section Report, which is just published, is very unfavourable. It was generally complained that the Budget was laid before the members so late, and several objections are made to the administration in India. It was hoped that the cultivation of coffee would be extended, and while a favourable impression was made by the fact that the Government had resolved to sell a greater quantity of sugar, it was expected that a larger supply of coffee would likewise be offered in the Indian market. It was greatly regretted that no credit was asked on behalf of a subsidy for a steam line between Java and Australia. The plan of the Minister to stipulate a fixed sum as the annual contribution of Java to the mother country was generally condemned. On the whole the report was most unfavourable, so that the majority of the public are of opinion that the Budget will not pass.

Some members have inquired what course the Minister had taken to raise the spirit of discontent which prevails among the officers of the East India army. It was condemned by only a very small minority, that the officers had held meetings, and had addressed a complaint to the Second Chamber, the majority being of opinion that nothing had been done by the officers to call for disapproval. It was much regretted that the Government had done so very little to explore the mines in Java. There are different metals, coals, and petroleum to be found, and nothing has been done to reach these valuable products. Neither has anything been done on behalf of the instruction of the natives; indeed, it is stated by an official report that only 7,000 children of natives receive instruction upon the whole island, and that even in a town like Batavia no school for natives exists.

The fact, published some time ago by the Java papers, that the Governor-General, on his voyage through the island, had exceeded the credit of f.100,000 granted him for the journey, led to the question whether it was true that the Government had refused to pay some debts resulting from that voyage. It was also asked whether the negotiations with the Trading Company to decrease the commission percentage had led to any result; and some member made the remark that it was highly desirable that coffee should not be sold here by monthly auctions, but that every cargo, on arrival, should be brought into the market. These are the principal items of this report. The Government has now to answer these queries, and in the meantime the Chamber has taken recess till the 2nd of November.

Mr. Fraser, the manager of the Netherlands India Steam Company, has arrived from Batavia at the Hague. He has had several consultations with the members of the Cabinet about the proposed line of steamers to Java, *via* the Suez Canal. No particulars, however, have transpired thereupon, and it is even pretended that publicity would prejudice the project. Yesterday the International Exhibition at Amsterdam was closed with a festival. Prince Alexandre was present. It has made a very bad impression that the King has not once visited the Exhibition.

In Utrecht a meeting has been held, under the presidency of Colonel Jansen, to promote a plan for establishing a steam line between Holland and America. Of course there was much diversity of opinion respecting the charter of the steamers, the harbour from which they should start, the place of arrival in America (Norfolk or New York), whether the enterprise needed to be subsidised by the State or not, &c. Everyone, however, agreed that the undertaking was highly necessary, and a committee was appointed to promote the plan. The Royal Steam Navigation Company, however, has begun its operations at once, and without the aid of the committee. It has issued a prospectus, by which the proposal is made to raise a loan for the amount of $4,500,000, in order to build three first-class steamers of large size and great speed, to open a regular service between Flushing and New York, without a subsidy from the State. This company, which has worked for several years regular lines on the Baltic and the Mediterranean, shows by figures that the undertaking must prove a very lucrative one. At the Trading Congress, which will be held at Cairo when the Suez Canal is opened, Holland will be represented by Messrs. J. Muller, N. J. den Tex, F. J. Piate, and H. Bunge.

His Majesty the King is at his seat *het Loo*; her Majesty the Queen is on a trip to Germany; the Prince of Orange is busy with partridge shooting in Gueldre; and Prince Alexandre is preparing to start with H.M.'s man-of-war *De Valk* to the Mediterranean. With the exception of the last-named, the whole of the Royal family will return to the Hague early in November, when a national monument in memory of the events of 1813 will be inaugurated. His Majesty has appointed Colonel G. M. Verspyck General-Major of the East India Army. This appointment creates a good deal of astonishment. Some time ago I mentioned the death of Mr. Schutze van Houten, the agent for the Trading Company in this town; as successor to this important office is elected, by the managers, Mr. W. van der Hoeven, member of our Town Council, and an ex-shipmaster.

The election in the district of Amsterdam for a member of the

Digitized by Google

Second Chamber has given a very unfavourable result for the Liberal cause. The candidate of the Conservatives, Mr. E. H. 's Jacob, formerly member for Alkmaar, was duly elected, having received 1,087 out of 1,977 votes. The Liberal candidates, Messrs. dr. J. Bosscha and N. J. den Tex, obtained respectively 722 and 149 votes.

## PRODUCE MARKETS.

A want of activity continues to be the prevailing characteristic of our market for colonial and foreign produce: and although rates for the leading articles are on the whole well maintained, the turn of prices is, on the whole, in favour of buyers, and sales to any extent would only be practicable at a material concession. The Netherlands Bank has again raised its rate of discount one half per cent., bills of exchange, bearing at least three signatures, to 4½ per cent.; and for promissory notes, to 5 per cent.

COFFEE.—Continues in a quiet position, without any alteration in prices. Holders keep firm, but buyers operate cautiously. Sales have been closed by private contract of 1,000 bags Java, ex Aria and Betsy; 1,800 b. Padang, ex Jan van Brakel, at 38¾c. to 42½c.; 2,200 b. Java, ex Nieuw Waterweg II., at 33½c. to 36½c.; 400 b. Padang, ex Grondwet, at 33½c. to 37c.; 300 b. Padang, ex Jan van Brakel, at 34c.; 688 b. do., ex do., 105 b. ex Colombo; and 1,000 b. Padang, ex Henriette, on secret terms. The Trading Company's public sale for this month will be held here to-morrow week, comprising 129,700 bags Java and Padang, which quantity includes 20,221 bags bought in at the company's public sale on the 16th June last.

RICE.—About 4,000 bags Java, ex Aeroliet, changed hands at f.7½, and 18,000 bags Kandanghauer Table, ex India. Prices are nominally maintained.

SPICES.—The demand for all articles under this head remains inactive; and in the absence of any sales of note to report prices are but nominally maintained at the range of my last quotations.

RAW SUGAR.—Has remained in a quiet position, and no transactions have taken place from first hands except 708 baskets Samarang, ex Utrecht, No. 18½, very good and fine quality, a few moist, at supposedly f.36¼.

TEA.—The public sales of Java, comprising 326 4/4 chests, which took place here on the 15th inst., went off very satisfactorily, the whole quantity put up, with the exception of about 180 chests bought in, having found ready buyers at fair market prices, viz:—

| Mark. | | | Valuations. Cents | Prices paid. Cents. | Lots. Sold. | Lots. Bght. in. |
|---|---|---|---|---|---|---|
| Singa Nangoeng | 319/4 | Ch. Congou | 78 to 90 | 78 to 82 | 40 | — |
| | 1470 | ... Souchong | 90 to 105 | 84 to 96 | 184 | — |
| | 87 | ... Pekoe | 250 to 300 | 320 to 325 | 10 | — |
| Nangoeng | 36 | ... Congou | 75 to 80 | 80 to 83 | 5 | — |
| | 406 | ... Souchong | 90 to 95 | 88 to 99 | 50 | — |
| | 24 | ... Pekoe | 200 to 300 | 300 to 321 | 3 | — |

JAVA TOBACCO.—The result of the public sale of 4,318 bales Java held here on the 8th inst. was as follows: 2,244 bales, mark Blitar, at 25½c. to 72c.; 2 bales, mark Boermeester, at 44c.; 214 bales, mark Blitar Papoh, at 30c. to 92½c.; 192 bales, mark Wachman, at 34c. to 51½c.; 351 bales, mark Hagedoorn Kedirie, at 28½c. to 49½c.; 579 bales, mark ETB/Kota, at 22½c. to 41½c.; 14 bales, mark Djaiah Malang, at 23½c.; 342 bales, mark Banteng, at 24½c. to 42c. Sales were closed by private tender previous to these public sales of 113 bales Java, Wachman; 128 bales, ditto, Wachman/Kedirie; 100 bales, ditto, Wachman/Blitar; 39 bales, ditto, Kedirie; 98 bales, ditto, K.S.P.D.; 320 bales, ditto, W.G.J.; 380 bales, ditto, K.P.S. On the 4th Nov. about 14,000 bales are to be offered by public sale or private tender. The public sale of Manila cheroots, which took place on the 8th inst., went off as follows: Of 140 mille 2a Cortados Cavitas 1868, 30 mille sold at f.36, and 110 mille bought in; 20 mille sold at f.38; 20 mille sold at f.35; the balance of both parcels being bought in, as well as 30 mille 2a Habanos Cavitas 1868.

COCOA-NUT OIL sells at f.30 for Cochin and f.28 for Ceylon.

BANCA TIN.—A heavy tone has continued to prevail for this article, and the decline has made further progress. Banca has receded from f.74¾ to f.72, 14 days' prompt, at which latter price there are now buyers, but no sellers, and to-day f.72½ has been paid. 500 slabs Banca were sold for delivery, ex the spring sale of 1870, at f.67, whilst Billiton on the spot changed hands at f.73. At the closing of the market f.73½ was paid; nothing can be had under f.74.

KAPOK.—Sales have been closed at Amsterdam, on secret terms, of 290 bales and 459 bales raw, ex Areta and Dunedin, besides 200 bales sea-damaged, at 12c. to 15½c.; 230 bales cleaned, ex Amstelstroom and Haamstede, are to be put up to tender next Thursday.

ARRACK.—I have to report the sale of 45 casks Batavia and 263 casks Sourabaya, ex Aequator, and 88 and 112 casks Sourabaya, ex California, at prices not named.

COTTON.—Prices continue to give way, without inducing buyers to operate beyond requirements for actual wants.

DRUGS, &c.—Sales have been closed of 19 cases Sumatra Gum Benjamin at a steady price. Long Pepper has changed hands at 20c., and the stock on hand is getting very reduced. Cassia Fistula is held for f.9; Cassia Lignea, 77c. Holders of Cassia Vera keep firm, and 49c. to 52c. has to be paid, according to quality. Camphor without transactions. A cargo of 5,043 tubs Japan has come to hand direct from Hiogo, per Algernon, for account of the Trading Company.

INDIGO.—No alteration is reported in the market since the last auction; 30 cases Java have been sold by secret tender, but at rather easier rates.

CUTCH.—The public sale of 511 baskets met a poor result; the whole quantity has been bought in at f.16½.

RATTANS.—90 parcels, ex County of Berwick, have been disposed of on secret terms. The Trading Company has offered in public auction 49,800 bundles, which were sold as follows:—Borneo, according to the quality, from f.8 80c. to f.11 10c.; Padang, f.8 30c. to f.13 60c.; Koeti, at f.7 10c. to f.7 30c.

## SHIPPING.

ARRIVALS.—Oct. 8, at Brouwershaven, from Batavia, Allegonda Jacoba; from Saigon, Nederland; 16, at Brouwershaven, from Rangoon, Margaretha Delphina; from Batavia, Fop Smit; from Hiogo, Algernon; from Akyab, Leonardo Davinci; 18, at Brouwershaven, from Batavia, Kanagawa; at Hellevoet, from Batavia, Johanna Antonia; at Texel, from Rangoon, Invidia; at Flushing, from Akyab, Kawstone; 19, at Brouwershaven, from Batavia, Medea.

DEPARTURES.—Oct. 7, from Brouwershaven, for Batavia Noach III.; from Flushing, for Akyab, Michiel Loos.

FREIGHTS.—The Trading Company has chartered the following three vessels to convey produce from Java:—To Rotterdam, Nicolette, at f.74 50c.; to Amsterdam, Ymuiden, at f.71 99c.; and Anna Maria Wilhelmina, at f.74 50c., per last.

PASSENGERS INWARD.—From Java, per Utrecht: Mrs. Satorius and family, Messrs. Peyer, Imhoff and family, Hoogwinkel, H. G. Sillevold and family, Bauer, De Graaf and family, Dodelyn de Win and family, Van Soelen and family, B. Ovink and family, Hamakers, Eisinger and family, Spier and family, Bloem and family, Brunting and family, Van Sohsten and family, De Raad and family, Van Mouw and family, Kuypers and family, Hajenius, Donkersloot, J. Spier, Kuster, Thieme, Hanibalo and family, Koningsfeld, Huppen and family, Mrs. D. Rienar, Mrs. Martens and family, Mrs. Gobius, Mrs. Hellings, Miss Van Soelen, De Raad and Dodelyn, Messrs. Burgemeester and Van Soelen; per Fop Smit, Messrs. Van Schuylenburg and family, J. Erdbrink and family, Frederich and family, Van den Borne and family, J. Loots.

PASSENGERS OUTWARD.—For Java, per Friesland: Messrs. F. Pertat, E. Andreas, J. Andreas, H. Liss; per Noach III.: Messrs. Ketjer and family, Locker de Bruine, de Bruin and family, Kalfsterman and family, Jorritsma and family, Blom, Engelenburg, van Hall and family, Maerseveen and family, Dires, Wisbols Teugen, Pluggers, van Berkel, de Vogel, van Oldeborgh, Miss Beyerinck, Batiste, van der Wall, de Bruyn, Mrs. Rosenburg.

# Monetary and Commercial.

The company alluded to in our last issue as about to be formed for laying a telegraphic cable from Galle to the Straits, and eventually on to China, has now been launched under good support, and a contract made with the Telegraph Construction Company for the cable to be laid during next year. Full particulars of the project will be found in our advertising pages.

The India, China, and Australia Company, which proposed to lay a light cable from Galle to the Straits, has, we believe, been given up. This course we had anticipated.

The "Albert Life Office" has gone into liquidation, the Vice-Chancellor having appointed Mr. Price and Mr. Young as the liquidators under the Court of Chancery. The shareholders will be called on for the unpaid capital, and every effort will be made to make the loss as light as possible to the unfortunate policy-holders, but that there will be a large deficiency there is no doubt. A correspondent at Ceylon, whose letter will be found in another column, gives a telling description of the working of the Albert in India. It is quite clear that the office has been insolvent for many years, and the directors who carried on such a concern certainly ought not to get off scot free. It will be for the public good that they should be prosecuted.

The following is from the report of the directors of the Singapore Gas Company (Limited):—

"The directors have the satisfaction of reporting continued progress in the lighting of Singapore, for particulars of which they refer to the report annexed, from their engineer and manager, Mr. E. J. Wells, dated Aug. 21, 1869. The balance-sheet to 30th June, 1869, and appended to this report, shows the financial position of the company. The profits for the half-year are £1,419 4s. 6d., after writing off for depreciation of works and plant, and off the expenses of first establishment, as per balance-sheet, at the rate of three-quarters per cent. per annum, which, together with £24 12s. 9d., the unappropriated profit of the preceding half-year, makes the available balance £1,443 17s. 3d. Out of this sum the directors recommend the declaration of a dividend at the rate of 7½ per cent. per annum, less income-tax, on the preference capital, and a dividend at the rate of 5 per cent. per annum on the amounts paid on the original capital, free from income tax; the balance of £199 14s. 4d. to be carried forward to the profit of the succeeding half-year. The profit is sufficient to pay a dividend of 6 per cent. on the ordinary share capital, but as the company is meanwhile short of working capital the directors consider it is not desirable at present to increase the dividend beyond 5 per cent. The dividend will be payable so soon as funds are received from Singapore, of which due notice will be given."

At the meeting of the Chartered Bank of India, Australia, and China, held on the 20th inst., the chairman announced a dividend at the rate of 6 per cent. per annum. A report will be found in another column.

The *Manchester Examiner* announces the suspension of Mr. D. R. Rodocanachi, with liabilities variously estimated at from £10,000 to £30,000. At a final meeting at Manchester of the creditors of Mr. H. R. Stevenson, cloth merchant, who suspended about a month back, a composition was accepted of 18s. 9d. in the pound, to be paid immediately. A statement of the affairs of the manufacturing firm of Messrs. Anderson and Gray, of Glasgow, who recently suspended, shows debts for £80,250, exclusive of liabilities on bills for £105,616, which may prove to be fully covered by consignments, and assets amounting only to £20,287.

A change in the personnel of the banking-house of L. P. Morton, Burns, and Co. is announced, Mr. Burns retiring therefrom, and the Hon. Mr. Rose (the late Finance Minister of Canada) joining the firm, which, in London, will now be conducted under the name of Morton, Rose, and Co. Mr. Walter Watson (late manager of the Bank of British North America, in New York) becomes a partner in the firm of Morton, Bliss, and Co., there.

In relation to the Crédit Foncier of England (Limited) it is stated that the directors have been prevented from distributing the bonus of £30,000 among its shareholders, as authorised at the late general meeting, by an unforeseen legal difficulty. This difficulty, however, they hope to overcome early next month, on the re-opening of the Courts. Meanwhile it will be a satisfaction to the shareholders to know that the necessary funds for this purpose have been received from the ex-directors.

Some few months since we recorded the results of some experiments conducted by Mr. W. C. Sillar, at Leamington, with the object of purifying town sewage, and manufacturing from it a dry and portable manure. It is now proposed to extend the application of the process, and the patents have been assigned, together with the works at Leamington, to a Company entitled the Nataive Guano Company (Limited). The capital is to be £60,000, in £5 shares, to be fully paid up upon allotment, and the list of directors includes the names of Messrs. W. C. Sillar and R. G. Sillar, of China, and Messrs. William Napier and William Paterson, of Singapore.

With reference to a complaint made by a shareholder in the British India Submarine Co., that the cable was not being manufactured with Manila hemp, the following explains the matter, we think, satisfactorily :—

A letter appeared in the Money Article of the *Times* of the 8th inst. putting forward statements reflecting on the management of this company, which were controverted the next day in the same journal by the secretary. It may, however, interest some of your readers to know the following facts :—Page 39 of the printed contract specifies that the cable is to be covered with St. Petersburg or Manila hemp. The difference in value of the quantity used to make the cable is so small that under no circumstances could the suspicion arise that the directors would substitute an inferior article, as insinuated by the *Times'* correspondent. But the facts furnished to me by Sir James Anderson and the chairman, Mr. Pender, are as follows :—The result of an elaborate series of experiments, conducted some months ago, on the best description of each of these hemps (bought of one of the first London houses) gave a uniform result in every case in favour of Russian hemp. The cable covered with it, and tested at Messrs. Brown, Lenox, and Co.'s, gave a breaking strain of one-third higher than that covered with Manila. The former was consequently adopted irrespective of price. It is well known that a large speculation in Manila hemp was entered into some months since under the impression that the Construction Company *must* use it. *Hinc illæ lachrymæ!* The Construction Company, from its experience, is turning out the present British Indian cable in all respects equal, in many superior, to any cable yet made.

The directors of the Royal Mail (West India) Company have decided to recommend to the shareholders at the meeting of the 27th inst., the payment from the insurance fund of £1 per share, free of income-tax, for the half-year ended the 30th of June last.

Captain Jones, of the lost P. and O. steamer *Carnatic*, is expected from Bombay about the end of the month, when the Board of Trade inquiry will commence. The Salvage Association have not yet received any of the treasure, &c.

Tenders for £200,000 in bills on India were received on the 20th at the Bank of England. The amount allotted to Calcutta was £181,500, and to Madras £18,500. The minimum price was fixed as before at 1s. 11d. Tenders on these presidencies at 1s. 11$\frac{3}{8}$d. will receive about 11 per cent, and those above in full.

The amount of bullion by the P. and O. Company's steamer *Pera*, from Southampton, on the 16th inst., was—in gold, to Galle £117 ; to Bombay, £25,000 ; to Madras, £4,450 ; in silver, to Hong Kong, £12,365 ; total in gold, £29,567 ; in silver, £12,365.

## CHARTERED BANK OF INDIA, AUSTRALIA, AND CHINA.

On the 20th an extraordinary meeting of the shareholders in the above-named bank was held at the London Tavern, Bishopsgate-street, for the purpose of declaring an *ad interim* dividend. The chair was occupied by Mr. T. A. Mitchell, M.P., and there was a large attendance of shareholders. The notice calling the meeting having been read by the secretary, Mr. Mullins,

The Chairman said: Gentlemen, we shall to-day have to confine ourselves to one resolution only, and that is the amount of dividend which we have to declare. You will have been made aware by the foot-note attached to the notice calling this meeting—which was also published in most of the daily newspapers—of the views of the directors. I may therefore just say that we propose to carry out those views by proposing that the dividend for the half year should be at the rate of 6 per cent. per annum, free of income tax. In deciding upon doing so, I need not assure you that the board have been careful to consult the best interests of the company, nor state that the board have done their duty, which is to be perfectly certain that they in nowise touch upon the capital, but pay the dividend out of real and ascertained profits. (Hear, hear.) I may just say, however, that we, the directors, have most carefully and most dispassionately considered the question, and after a thorough review of the accounts we have no hesitation whatever in recommending the dividend which we propose. (Cheers.) With regard to the general aspect of commerce, I am convinced I need scarcely tell you, who are for the most part men of business engaged in various commercial pursuits, that I regret to say the trade of the East has partaken of the general dulness which has been the characteristic of the trade of this country for the past three years. (Hear, hear.) Under these circumstances it is a matter for congratulation that all through India and the Straits we have been able to hold our own as a bank against all comers. In China there has been a deal of overtrading. There have been large importations, and the markets there have been glutted with British manufactures to so great an extent that between one million and a half and two millions of bullion have been returned from that country. This, as I need hardly tell you, has operated adversely upon banking transactions; but then I must tell you that, whatever may be the consequences, we suffer not alone, but in common with other institutions of a kindred character. (Hear, hear.) As to the bad debt account, it will be in your recollection that the amount at which it stood when last I had the pleasure of addressing you was £56,000. It is therefore a matter for sincere congratulation that since then it has been reduced, and now stands at only £36,000, and that the whole account has resulted in a very fair profit upon our valuation. Consequently, we now know that we did not at the time undervalue the loss which we imagined we had previously sustained. (Cheers.) It will be, I am sure, in your recollection—at least in the recollection of such of those present as attended the last meeting—that upon that occasion I adverted to a fresh liability—I can scarcely call it a bad debt—which had been incurred in the East, at Batavia. At that time very exaggerated ideas obtained currency as to the amount of that liability, but I may now tell you that the gross amount of that liability is but £70,000. Against the total sum we have the undivided profits which we carried forward on the last occasion, amounting to £23,000. But it was not entirely a question of bad debt. We knew the firm, which had been trading in Batavia for over forty or fifty years, and we did not think a great deal of it, and did not intend to give it any credit. But the manager or agent of the firm there simply deceived the manager of our bank, and now the whole question is the amount of the securities we hold, which is involved in the intricacies of Dutch and German law. Out of the £70,000 we hold the bills of lading upon some goods which have since come home, and they have been sold by our agents, Messrs. Hope and Co., of Amsterdam, and part of the proceeds of those sales are in dispute, and part not. The remainder is in bills drawn under credits to the firm, which should have been duly honoured, but the whole matter is, as I have already told you, involved in the intricacies of German and Dutch law, and we cannot anticipate the decisions which will be arrived at. Considering, however, the amount of undivided profit we carried forward before, added to the amount we now treat in the same manner, the board consider themselves fully justified in maintaining the usual dividend. As one of the best proofs of the position of the bank and the confidence it enjoys, I may just say—without mentioning the exact amount—that our deposit receipts are yearly progressing, and that they have doubled within the past two or three years. (Loud cheers.) I do not know that I have any further remarks to address to you, and simply premising that I shall on behalf of the board be most happy to afford any and every information, and answer any questions which you may wish to put to me, I will move—"That an *ad interim* dividend, at the rate of 6 per cent. per annum, free of income tax, be now declared for the half year ended 30th June last, payable on and after the 27th instant."

Mr. Jones begged to second the motion, which he did in the full assurance that the shareholders had sufficient confidence in the directors to leave the matter in their hands, in the firm conviction that the board would not recommend a dividend which had not been fairly and honestly earned. A slight discussion ensued, in which Messrs. Huggins, Armstrong, and A. Morrison took part, and the chairman having replied to the questions put, the resolution was unanimously agreed to. Mr. Huggins said, the formal business of the day being concluded, he was anxious, before the meeting separated, to propose a vote of confidence and thanks in the directors for the way in which they had managed the bank's affairs. Mr. E. Watson had very much pleasure in seconding the motion, which was unanimously agreed to, and the proceedings terminated.

## EXPORT OF COTTON GOODS TO THE FAR EAST.

The following is a summary of Mr. Sam Mendel's tables for the present month, which contain details of the quantities of Cotton Manufactures and Yarn shipped from the ports of London, Liverpool, Southampton, and the Clyde, to Hong Kong, Shanghai, Japan, Singapore, Batavia, Manila, and Ceylon, during the month and twelve months ended 16th Oct., 1869, compared with the corresponding periods of the two preceding years :—

### HONG KONG AND WHAMPOA.

Plain Cottons.—Export for the month ended 16th Oct., 1869, 1,683,473 yards; for the twelve months 1869, 40,863,414 yards; for the

Digitized by Google

twelve months, 1868, 63,391,402 yards; for the twelve months 1867, 47,077,309 yards. Decrease for 1869 against 1868, 22,527,988 yards.

Coloured Cottons.—Export for the month ended 16th Oct., 1869, 12,640 yards; for the twelve months 1869, 1,353,575 yards; for the twelve months, 1868, 1,881,548 yards; for the twelve months, 1867, 2,182,016 yards. Decrease for 1869 against 1868, 527,973 yards.

Printed Cottons.—Export for the month ended 16th Oct., 1869, 43,075 yards; for the twelve months 1869, 889,397 yards; for the twelve months 1868, 2,154,518 yards; for the twelve months, 1867, 781,359 yards. Decrease for 1869 against 1868, 1,265,121 yards.

Cotton Yarn.—Export for the month ended 16th Oct., 1869, *nil.*; for the twelve months 1869, 3,914,422 lbs.; for the twelve months 1868, 7,157,788 lbs.; for the twelve months 1867, 6,097,244 lbs. Decrease for 1869 against 1868, 3,243,366 lbs.

Value.—For the month ended 16th Oct., 1869, £41,504; for the twelve months 1869, £1,090,054; for the twelve months 1868, £1,727,871; for the twelve months 1867, £1,480,946. Decrease for 1869 against 1868, £637,817.

### SHANGHAI.

Plain Cottons.—Export for the month ended 16th Oct., 1869, 58,76,195 yards; for the twelve months 1869, 212.210,671 yards; for the twelve months 1868, 241,967,841 yards; for the twelve months 1867, 129,447,623 yards. Decrease for 1869 against 1868, 29,757,170 yards.

Coloured Cottons.—Export for the month ended 16th Oct., 1869, 769,687 yards; for the twelve months 1869, 12,640,963 yards; for the twelve months 1868, 8,322,561 yards; for the twelve months 1867, 10,026,735 yards. Increase for 1869 against 1868, 4,318,402 yards.

Printed Cottons.—Export for the month ended 16th Oct., 1869, 877,204 yards; for the twelve months 1869, 3,933,442 yards; for the twelve months 1868, 4,575,127 yards; for the twelve months 1867, 4,947,122 yards. Decrease for 1869 against 1868, 641,685 yards.

Cotton Yarn.—Export for the month ended 16th Oct., 1869, *nil*; for the twelve months 1869, 335,623 lbs.; for the twelve months 1868, 241,700 lbs.; for the twelve months 1867, 431,232 lbs. Increase for 1869 against 1868, 93,923 lbs.

Value.—For the month ended 16th Oct., 1869, £203,577; for the twelve months 1869, £4,099,587; for the twelve months 1868, £4,146,998; for the twelve months 1867, £2,905,572. Decrease for 1869 against 1868, £47,411.

### JAPAN.

Plain Cottons.—Export for the month ended 16th Oct., 1869, 755,879 yards; for the twelve months 1869, 17,140,107 yards; for the twelve months 1868, 22,568,886 yards; for the twelve months 1867, 19,196,615 yards. Decrease for 1869 against 1868, 5,428,779 yards.

Coloured Cottons.—Export for the month ended 16th Oct., 1869, 244,517 yards; for the twelve months 1869, 1,542,402 yards; for the twelve months 1868, 1,750,291 yards; for the twelve months 1867, 3,318,261 yards. Decrease for 1869 against 1868, 207,889 yards.

Printed Cottons.—Export for the month ended 16th Oct., 1869, 13,200 yards; for the twelve months 1869, 768,392 yards; for the twelve months 1868, 573,003 yards; for the twelve months 1867, 783,192 yards. Increase for 1869 against 1868, 195,389 yards.

Cotton Yarn.—Export for the month ended 16th Oct., 1869, 181,204 lbs.; for the twelve months 1869, 5,418,910 lbs.; for the twelve months 1868, 4,449,369 lbs.; for the twelve months 1867, 2,611 429 lbs Increase for 1869 against 1868, 969,541 lbs.

Value.—For the month ended 16th Oct., 1869, £36,063; for the twelve months 1869, £700,548; for the twelve months 1868, £709,028; for the twelve months 1867, £690,337. Decrease for 1869 against 1868, £8,480.

### SINGAPORE AND PENANG.

Plain Cottons.—Export for the month ended 16th Oct., 1869, 3,727,500 yards; for the twelve months 1869, 46,051,107 yards; for the twelve months 1868, 55,075,342 yards; for the twelve months 1867, 58,310,972 yards. Decrease for 1869 against 1868, 9,024,235 yards.

Coloured Cottons.—Export for the month ended 16th Oct., 1869, 657,705 yards; for the twelve months 1869, 4,865,851 yards; for the twelve months 1868, 5,018,289 yards; for the twelve months 1867, 9,695,927 yards. Decrease for 1869 against 1868, 152,438 yards.

Printed Cottons.—Export for the month ended 16th Oct., 1869, 614,073 yards; for the twelve months 1869, 3,352,654 yards; for the twelve months 1868, 2,515,660 yards; for the twelve months 1867, 4,293,101 yards. Increase for 1869 against 1868, 836,994 yards.

Cotton Yarn.—Export for the month ended 16th Oct., 1869, 110,569 lbs.; for the twelve months 1869, 1,231,558 lbs.; for the twelve months 1868, 2,001,009 lbs.; for the twelve months 1867, 2,646,593 lbs. Decrease for 1869 against 1868, 769,451 lbs.

Value.—For the month ended 16th Oct., 1869, £213,561; for the twelve months 1869, £1,031,780; for the twelve months 1868, £1,152,460; for the twelve months 1867, £1,664,224. Decrease for 1869 against 1868, £120,680.

### BATAVIA.

Plain Cottons.—Export for the month ended 16th Oct., 1869, 75,487 yards; for the twelve months 1869, 9,036,236 yards; for the twelve months 1868, 20,965,936 yards; for the twelve months 1867, 23,005,738 yards. Decrease for 1869 against 1868, 11,929,700 yards.

Coloured Cottons.—Export for the month ended 16th Oct., 1869, *nil*; for the twelve months 1869, 6,302,479 yards; for the twelve months 1868, 8,279,072 yards; for the twelve months 1867, 14,223,477 yards. Decrease for 1869 against 1868, 1,976,593 yards.

Printed Cottons.—Export for the month ended 16th Oct., 1869, *nil*; for the twelve months 1869, 4,303,401 yards; for the twelve months 1868, 6,718,023 yards; for the twelve months 1867, 15,283,377 yards. Decrease for 1869 against 1868, 2,414,622 yards.

Cotton Yarn.—Export for the month ended 16th Oct., 1869, *nil*; for the twelve months 1869, 313,475 lbs.; for the twelve months 1868, 713,580 lbs.; for the twelve months 1867, 701,995 lbs. Decrease for 1869 against 1868, 400,105 lbs.

Value.—For the month ended 16th Oct., 1869, £2,571; for the twelve months 1869, £425,611; for the twelve months, 1868, £777,104; for the twelve months 1867, £1,225,962. Decrease for 1869 against 1868, £351,493.

### MANILA.

Plain Cottons.—Export for the month ended 16th Oct., 1869, 2,455,302 yards; for the twelve months 1869, 13,970,698 yards; for the twelve months 1868, 17,287,426 yards; for the twelve months 1867, 19,466,450 yards. Decrease for 1869 against 1868, 3,316,728 yards.

Coloured Cottons.—Export for the month ended 16th Oct., 1869, 1,545,962 yards; for the twelve months 1869, 12,353,372 yards; for the twelve months 1868, 13,458,432 yards; for the twelve months 1867, 17,084,686 yards. Decrease for 1869 against 1868, 1,105,060 yards.

Printed Cottons.—Export for the month ended 16th Oct., 1869, 157,376 yards; for the twelve months 1869, 1,306,918 yards; for the twelve months 1868, 989,220 yards; for the twelve months 1867, 869,887 yards. Increase for 1869 against 1868, 317,698 yards.

Cotton Yarn.—Export for the month ended 16th Oct., 1869, 18,530 lbs.; for the twelve months 1869, 176,585lbs.; forthe twelve months 1868, 356,022 lbs.; for the twelve months 1867,204,196 lbs. Decrease for 1869 against 1868, 179,437 lbs.

Value.—For the month ended 16th Oct., 1869, £85.176; for the twelve months 1869, £571,996; for the twelve months 1868, £749,148; for the twelve months 1867, £913,475. Decrease for 1869 against 1868, £177,152.

### CEYLON.

Plain Cottons.—Export for the month ended 16th Oct., 1869. 2,868,542 yards; for the twelve months 1869, 22,036,967 yards; for the twelve months 1868, 23,663,513 yards; for the twelve months 1867, 18,424,706 yards. Decrease for 1869 against 1868, 1,626,546 yards.

Coloured Cottons.—Export for the month ended 16th Oct., 1869, 206,185 yards; for the twelve months 1869, 1,138,432 yards; for the twelve months 1868, 836,157 yards; for the twelve months 1867, 1,257,858 yards. Increase for 1869 against 1868, 302,275 yards.

Printed Cottons.—Export for the month ended 16th Oct., 1869, 447,462 yards; for the twelve months, 1869, 3,601,814 yards; for the twelve months 1868, 1,923,656 yds.; for the twelve months 1867, 2,536,085 yards. Increase for 1869 against 1868, 1,678,158 yards.

Cotton Yarn.—Export for the month ended 16th Oct., 1869, 102,330 lbs.; for the twelve months 1869, 417,472 lbs.; for the twelve months 1868, 509,137 lbs.; for the twelve months 1867, 266,135 lbs. Decrease for 1869 against 1868, 91,665 lbs.

Value.—For the month ended 16th Oct., 1869, £76,776; for the twelve months 1869, £507,361; for the twelve months 1868, £473,835; for the twelve months 1867, £504,437. Increase for 1869 against 1868 £33,526.

## ARTICLES OF IMPORT.

*(For Quotations see Table of Prices Current.)*

### TEA.

Since our last report there has been little alteration in the tone of the market; the demand continues languid, and the desire to sell on arrival still evident, whilst the supplies on offer are more than buyers can absorb. The result has been a further slight decline in nearly all kinds, the sole exception being the finest parcels, which are readily taken, both by the trade and exporters, at extreme prices. The public sales of the 19th inst. comprised 22,079 packages, of which 20,942 packages were printed without reserve.

Siftings and broken-leaf Congous have sold ½d. per lb. lower, at 7½d. to 9d. Fair to good common must be quoted a fraction easier. Old Kaisows have sold at very low prices, from 1s. 1d. to 1s. 2d. per lb. In new seasons, fair to good have been difficult of sale, and prices have given way ½d. to 1d. per lb. In the finer kinds those with strength or character have been fairly saleable at about former prices, but many parcels wanting in point have been difficult to move; finest have been readily taken from 2s. 2d. to 2s. 10d. per lb. Pak Lins have been much depressed, and fair to good in boxes have sold from 1s. 4d. to 1s. 6d. per lb.; fine, 1s. 8d. to 1s. 11d.; a few parcels choice have sold from 2s. 6d. to 2s. 9d. per lb.; half-chests have sold from 1s. 3d. to 1s. 6d. for good quality. In Amoy kinds the decline is about ½d. per lb. Good common Black-leaf have sold from 1s. 0¾d. to 1s. 1d., being a shade lower. Old season's good to fine have been sold from 1s. 2d. to 1s. 4d., showing a further reduction. In new, good qualities have sold from 1s. 4d. to 1s. 8d., being about previous prices. Fine have been dull of sale, but the few finest parcels on offer have commanded full prices. New-make Cantons remain difficult of sale at the decline last quoted. Oolongs have been much depressed, old Teas selling at 10¾d. to 1s. per lb., and new at 1s. 2d. to 1s. 6d. per lb., being 4d. to 6d. below opening rates. Souchongs remain much as before; we are still without arrivals of really fine quality. Flowery Pekoes have been inquired for. Scented Teas —Canton Capers: The first supplies, per Deerhound, were on offer yesterday, and a fair proportion was sold, prices ranging from 1s. 10d. to 2s. for good, and from 2s. 2d. to 2s. 7d. per lb. for fine to finest. Foochow kinds remain in demand. Orange Pekoes: Canton kinds, of old import, have been neglected. In new few sales have been made in fair to good, but 2s. 2d. to 2s. 7d. per lb. has been paid for fine to finest. Foochow kinds have been dull of sale at a further reduction in prices. Uncoloured Japans: The supplies, per Ariel, have been chiefly common to fair, and only a very small portion has been sold. Green Teas: There has been less demand during the past fortnight, and prices have generally ruled slightly in favour of buyers. The Fychow kinds have been comparatively difficult of sale.

The following is from Messrs. Shepard, Harrison and Rehden's Circular:—The market has been over-weighted with Tea throughout the past fortnight, and a strong desire evinced on the part of importers to realise; the result has been a further giving way in the value of all Congous, but exceptionally fine quality, which has continued to bring fancy prices. The advices from China, latest dates by telegram extending to 28th Sept., report business checked at Shanghai owing to the high prices demanded, an impression prevailing that the export would prove short, but though it may be a few millions of pounds

Digitized by Google

weight under those of previous seasons, there is no fear whatever, with 15,000,000 lbs. from India, of any scarcity of Tea in this country for the next 12 months, and admitting better times next spring, Teas bought in China by late advices will scarcely pay unless this market improves considerably as the season advances. There is no new feature with regard to the export trade, which has been small to all parts of the world.

Black.—There has been a fair demand for grades of red-leaf below common, but prices have ruled lower, ranging from 7½d. to 11½d. per lb.; inferior to good flavoury kinds have been in full supply at 1s. 0½d. to 1s. 1d. per lb.; for new season's Kaisow kinds to fine Kaisow great difference of opinion exists as to value, but results are against Importers; only finest and extra fine Kaisow give profit, which sell from 2s. 4d. to 2s. 10d. per lb. Packlings have sold at lower rates than usual, many hundreds of boxes medium to fine realising but 1s. 3d. to 1s. 6d., finest 1s. 7d. to 2s. 2d. per lb. Imitation Kaisow made from Tayshan leaf: The limited transactions have been at a low scale of prices. Black-leaf: Good common Oonam is obtainable at 1s. 0½d. per lb.; preferable to medium (old seasons'), at 1s. 1d. to 1s. 2d.; medium to fine at 1s. 2½d. to 1s. 4d. per lb. New season's has been fairly dealt in, and there is no question that prices have receded to a very moderate standard, but with the system inaugurated this season of importers determined to sell on arrival (and past experience has proved this the best policy) there is room for a further decline, unless holders support the market. Souchong: No further arrivals of importance have taken place. Sales have been made at 1s. 5d. to 2s. 2d. per lb. for medium to finest. Oolong: Seldom or ever has this class sold cheaper, and consumption here must be less than formerly; the low prices current have attracted shippers' notice, and some buying has resulted for the American markets. Scented Teas—Canton Orange Pekoe: Transactions have been limited to one or two parcels ex Deerhound, the first vessel with New Season's, at 2s. to 2s. 6d. per lb. Capers of New crop are in good demand, and are realising extreme, rates from 1s. 10d. to 2s. 7d. per lb. Foochow Orange Pekoe or Caper: No change. Green: No further arrivals of New Ping Sueys have taken place. The market has been well supplied with Old Seasons' ex Forward Ho, chiefly Fychow kinds, which have met a slow sale. Uncoloured leaf: Some 7,000 half-chests ex Ariel have been on the market last few days; so far, no business of importance has transpired. The quality proves ordinary common to fair quality.

## SILK.

The public sales of the 20th and 21st inst. have passed off with an extremely limited amount of business, and a depressing tone generally. The trade appears very unwilling buyers, notwithstanding the really tempting rates at which much Silk is offering, and importers are still anxious to be current, and in many instances press sales. Of Japan Silk some further parcels have been sold this week at continued low rates, but in China Silk there is no quotable alteration, but prices are rather easier, generally, than they were this time last week. The deliveries from 1st to 20th inst. are—1,799 Chinas, 230 Cantons, 411 Japans, 214 Bengals; total, 2,660 bales.

The Lyons market report is as follows:—The decline in prices continues, and falls more especially on thrown silks. Those of France, which had hitherto been comparatively firm, in consequence of the slowness of production, are beginning to follow the general movement. Wefts command better prices proportionally. Raw silks are falling, but not so rapidly as the thrown. Chinese goods are most in favour just now; after having been abandoned for more than a year, they are at present in great demand. The news from London is not very satisfactory. Since the end of Sept. business has been far from brisk, and the transactions are far from being important. The last cargo consisted of 3,000 bales, and the quality is said to be anything but first-rate. However, the official returns show that there is a certain activity in manufacture. The tissue market naturally feels the effect of the dulness in the raw material. Some diminution in production is reported; the dyers in black, for example, are less occupied than they were a few weeks ago. This state of things is explained by the desire of the weavers to exhaust the stocks they had laid in at high prices, so as to be able to deal with the raw material at lower rates. However, the apprehension of a further decline seems for the present to prevent any resumption of activity.

Quotations are: Tsatlee, No. 1, 30s. to 31s.; No. 2. 29s. to 30s.; No. 3, 27s. 6d. to 28s. 6d.; Red Peacock, 23s.; Canton, 14s. to 21s.; Maibash, No. 1, 29s. to 30s.; Sodai, No. 1, 25s. 6d. to 26s.; Koshu, No. 1, 26s. to 27s.; mixed parcels, 24s.

## COFFEE.

The prices for Ceylon descriptions show but little change from those current at the date of our last report, when the large quantities brought to public sale had occasioned a decline. Although the supplies at auction have since been considerably lighter, no recovery has been effected, the demand being restricted to the immediate requirements, speculators holding back in anticipation of a lower range of prices being established, which is at present prevented by the firmness of holders, and many parcels offered at the sales have consequently been bought in. The following are the latest prices paid:—Plantation Ceylon, chips and garblings, 12s. 6d. to 25s. 6d.; triage and ordinary, 40s. to 60s. 6d.; small grey, 59s. to 61s.; low middling grey and dull kinds, 65s. to 65s. 6d.; bold do., 69s. to 72s. 6d.; small coloury, 63s. 6d. to 67s.; middling coloury, 70s. 6d. to 74s. 6d.; pea-berry, 74s. to 76s.; native Ceylon triage, 38s. to 39s.; ordinary, 49s. 6d.; good and fine ordinary, 52s. to 53s. There is still an entire absence of transactions in Manila, no offers having been made since our last report. Singapore has shared in the decline affecting Ceylon, a sale of 861 bags good Bonthyne having realised 59s. 6d. for pale, and 52s. to 56s. 6d. for mixed.

The quantity of Ceylon Coffee afloat for Great Britain on the 18th inst. was as follows:—Plantation, 120,187 cwt., against 84,879 cwt. at the corresponding date of 1868; Native, 35,083 cwt., against 29,370 cwt. The quantity afloat for Europe was—Plantation, 1,167 cwt., against 4,275 cwt.; Native, 2,701 cwt., against 6,341 cwt. The quantity of Coffee landed in the forty-two weeks ended Oct. 2, 1869, was, of Ceylon, 34,726 tons, against 38,832 tons during the corresponding period of 1868; of all descriptions, 62,428 tons, against 59,989 tons. The quantity entered for home consumption was, of Ceylon, 8,789 tons, against 10,096 tons; of all descriptions, 15,276 tons, against 15,732 tons. The quantity exported was, of Ceylon, 21,923 tons, against 24,656 tons; of all descriptions, 38,444 tons, against 36,380 tons. The stock on Oct. 16 was, of Ceylon, 15,009 tons, against 14,067 tons; of all descriptions, 28,028 tons, against 24,209 tons.

Cotton.—A slight improvement set in on the 16th inst., which has since become more marked, and rates have recovered to the extent of ½d. to 1d. per lb., the current quotations being—Surats, 6½d. to 10½d.; Bengal, Scinde, &c., 3⅝d. to 8⅜d. The London market has also exhibited an improvement, and is firm at the following rates:—Madras—Tinnevelly, middling fair, 8⅝d.; fair, 9d.; good fair, 9⅛d. to 9⅜d.; Northern and Western, middling fair, 8⅜d.; fair, 8⅝d.; good fair, 9⅛d.; Coconada, fair, 8⅝ d. to 8⅞d.; good fair, 9d.; Scinde, middling fair, 7⅝d.; fair, 8d.; good fair, 8½d.; Bengal, middling fair, 7⅛d.; fair, 8d.; good fair, 8¼d.

Cocoa-nut Oil.—The demand for Ceylon is quiet, at £41 10s. to £42 per ton.

Camphor.—Limited transactions in China at £4 15s. per cwt.

Coir Goods.—The moderate supply placed on offer during the interval has for the most part been taken off at previous rates. 46,866 dhols., &c. (66 tons), Ceylon Yarn chiefly sold, very common to common at £21 15s. to £25, low middling to middling £25 15s. to £27, good middling to good £30 5s. to £32 5s., very good £38 10s., and 11 bales fine at £46 10s. 10 bales fine bright pale Ceylon Fibre sold at £34 5s.; of 3,821 ballots (10½ tons) 2 tons middling sold at £20 5s., the remainder low bought in at £11 per ton.

Galls.—There is a moderate business doing in China and Japan at 53s. per cwt.

Gums.—Benjamin: No Siam offered; of Sumatra 173 cases brought forward and partly sold, fair third quality at £5 to £5 10s., middling second at £8, and some low dark at 65s. to 67s. 6d. per cwt. Copal: Of 89 cases Manila at auction nearly all sold, common soft at 33s. 6d.; fair hard, 42s. 6d.; mixed, 30s. to 33s. 6d. per cwt. Damar: At auction 22 cases Penang obtained 84s. to 85s. per cwt. for fair clean; 61 boxes Ceylon, ordinary mixed, sold at 28s. 6d., and good pale 51s. Gamboge: Of 11 cases in auction, 10 cases sold; good fair pipe at £16 5s. to £16 7s. 6d.; blocky, £15 to £15 10s. per cwt.

Japan Wax.—Prices are firmly maintained, but only small quantities have been offered, and these were for the most part bought in, there being little or no enquiry.

Manila Hemp.—The improvement noted in our last was followed by an active demand on the part of speculators, which has extended over the entire interval, and has had the effect of forcing prices up fully £10 per ton, sales being quoted of good roping at £63, Boluzan at £66, and Quilot at £70.

Plumbago.—The market is dull, owing to the placing upon the market of recent heavy arrivals; Ceylon, good and fine lump is quoted 20s. to 23s. 6d.; medium, 16s. to 17s. 6d.; Chips, 10s. to 14s.; and dust, 9s. to 10s. per cwt.

Pepper.—Black: At auction Trang has realised 4 1-16d. to 4⅛d.; Borneo, 4¼d.; Siam, 4¼d.; Singapore, 4¼d. to 4⅜d.; private sales of Penang are reported at 4⅜d. White Singapore at public sale has brought 5⅜d. to 6d. per lb.

Rice.—The demand for White Bengal is still the leading feature of the market, all other descriptions remaining extremely dull. Small public sales are reported of new Rangoon at 10s.; Necransie, 8s. to 8s. 6d.; Saigon, 9s.; Siam, 8s. to 8s. 6d.; and limited private business has transpired at corresponding prices.

Rhubarb.—Has sold irregularly; of 144 cases China at auction, part sold—good flat at 5s. 3d. per lb.; very good round, 6s. 10d.; middling, 3s. 8d. to 3s. 10d.; inferior rough, 1s.

Sugar.—The market has been characterised throughout the interval by a similar absence of activity to that prevailing at the date of our last, and the continued dulness has depressed prices to the extent of about 6d. per cwt. We note public sales of Clayed Manila (duty 8s.) at 30s., low Java at 26s. 3d., low brown Penang at 26s., and private business in low brown Java at 26s. 3d. A cargo of about 1,400 tons unclayed Ilo Ilo has been sold to arrive at 20s. 6d. per cwt. ex quay.

Spices.—Cassia Lignea: Nothing of consequence doing, for want of supplies. Cinnamon: Is in good demand for all desirable qualities; of 67 bales at auction, half sold upon former terms; of Chips about 600 bags have been sold at firm prices, low to good middling 4½d. to 8½d. per lb. Cloves. More enquiry for Penang, and sales to some extent effected at very full prices, generally 11½d. to 11⅝d. per lb.; Zanzibar steady, with inquiry. 400 bales at auction sold at 2⅞d. to 3d. per lb. for ordinary dull to very fair. Mace: Flat, and sales made privately at 3s. 7d. to 3s. 8d. per lb. for good, being lower; 29 cases Penang in auction were retired; 31 cases Java sold at 2s. 9d. for middling palish, and 2s. 6d. to 2s. 7d. for ordinary reddish. Nutmegs: Dull, and buyers only at a decline from late rates; of 63 cases in auction a few only sold at 1s. 9d. to 2s. 8d. per lb.; for small to middling bold, steady, at 9s. 3d. per lb., with retail business.

Sapanwood.—At auction Siam has realised £8 10s., and Ceylon £9 per ton.

Tapioca.—Is difficult of sale, the supply being in excess of the requirements of the trade; 192 bags Malacca at auction sold at 2½d. per lb. for good: 434 bags Singapore were retired; 576 bags Penang partly sold, middling greyish 2¼d.; good middling 2⅜d.; Pearl has declined 1s. to 2s. per cwt. Sales of good bold made at 22s. 6d., and bullets at 27s. per cwt.

Terra Japonica.—Cutch: The large supplies check speculative operations, and the market remains extremely dull. Of 4,515 boxes and bags Pegue at auction only a small part sold at 24s. per cwt. for good, in boxes. Gambier is steady; of 1,173 bales block at auction

Digitized by Google

part sold at 17s. to 17s. 3d. per cwt., chiefly the former price. Of 3,863 baskets Cubes one-fourth sold at 20s. 6d. for middling quality. Sales of good extent also effected privately in block.

Tin.—Until within the past few days the demand has been extremely restricted, owing to the unfavourable position of the Dutch mark e, but there is now a slightly improved tone apparent. Quotations: Straits, on the spot, £125; afloat, £123; Banca, £126 to £127 per ton.

## ARTICLES OF EXPORT.

### MANCHESTER GOODS.

The slight improvement in the demand for China Shirtings which existed at the date of our last report was only of short duration, and renewed dulness became perceptible a few days after the departure of the mail. Extreme depression has now been the characteristic feature of the market for nearly two months past. Stocks are reduced since the last few weeks within very moderate compass, and this, with the shorter production, serves to give a stronger tone to the market than the actual extent of the demand warrants. Yarns are quieter than Goods, and quotations are barely maintained.

### WOOLLEN AND WORSTED GOODS.

62-inch, 19 yards, Spanish Stripes, Elephant Chop, Scarlet, 2s. 11½d. per yard; Black 3d. per yard less, other colours in proportion. 0 to 31-inch, 24 yards, Long Ells, Lion Chop, Scarlet. 31s. 6d. per piece Black 3s. per piece less. 30 to 31-inch, 58 yards, Camlets, best SS, Elephant Chop, Scarlet, 63s. per piece; Black 5s. 3d. per piece less; 31-inch, 30 to 31 yards, Lastings, Lion Chop, Gentian, 60s. per piece. 31-inch, 30 to 31 yards, Lastings, Lion Chop, Dark Blue, 59s. per piece. 31-inch, 30 to 31 yards Lastings, Lion Chop, Black, 57s. per piece. 31-inch, 29 yards, Brocades, Cotton Warp, Half-moon Chop, Scarlet, 22s. per piece; Black 2s. 3d. per piece less.

Anna and Sophia, Batavia to Amsterdam, Sept. 16, 13 N., 20 W.
Marie Elise, Amsterdam to Batavia, Sept. 20, 11 N., 26 W.
Gladiateur, Liverpool to Shanghai, Aug. 16, 13 N., 113 E.
Blonde, Shanghai to London, Sept. 28, 35 N., 41 W.
Lord Collingwood, Saigon to Falmouth, Aug. 29, 36 S., 18 E.
Grace Peille, Clyde to Hong Kong, Sept. 19, 10 N., 25 W.
Felicia, Bangkok to Bremen, Aug. 29, 4 S., 18 W.

### FREIGHTS AND CHARTERS.

We have no change to note in berth freights to the Eastern ports; the long prevailing dulness still continues, and there seems as yet but little prospect of improvement; coal freights from the Northern outports remain very inactive.

Current rates of freight for vessels on the berth:—To Yokohama: 32s. 6d. weight, 30s. meast. To Nagasaki: 45s. weight or meast. To Hiogo or Osaka: 40s. weight, 35s. meast. To Shanghai: 40s. weight, 35s. meast. To Hong Kong: 35s. weight, 27s. 6d. meast. To Batavia: 25s. weight, 30s. meast. To Singapore: 30s. weight, 25s. to 30s. meast. To Ceylon: 20s. to 25s. weight, 20s. meast. At New York to China; $12 to $15 per ton of 40 cubic feet.

The current quotations for coal, &c., are as follows:—From Wear or Tyne per keel.—For Shanghai: £42. For Hong Kong: £33. For Singapore: £24. For Galle: £22. 10s. From Newport, Cardiff, or Swansea per ton. For Shanghai: £2. For Hong Kong: £1 10s. For Singapore: £1 4s. For Galle: £1 2s. 6d.

The Admiralty have invited tenders for the conveyance of about 33 tones stores to Trincomalee, and sundry small stores to Hong Kong.

### CASUALTIES.

The Warren (?) (ship), of and for London, from Ceylon, was spoken with Aug. 5, off Cape Agulhas, by the W. G. Russell, arrived at New York from Manila, and reported having been on her beam ends, and lost foretopmast during a heavy gale.

The Hazard, which arrived at Boston Oct. 4, from Manila, had experienced severe W. gales for 14 days between Algoa Bay and the Cape of Good Hope, and had bulwarks stove, &c.

The W. G. Russell, Jewett, from Manila, which arrived at New York Oct. 2, had lost several sails, having experienced a cyclone veering from W. to S., Sept. 11, in lat. 12 N., lon. 41 W.

The Star, Robinson, from Singapore, which arrived at Liverpool Oct. 18, had experienced very severe weather during the whole passage; she was continually shipping heavy seas, which filled the cabin with water; also lost part of bulwarks, cabin skylights, sails, &c., and received other damage.

The Mindoro, which arrived at Boston, Oct. 6, from Manila, lost sails during a violent S.E. gale off Cape Cod.

The Belted Will, Capt. Locke, from Canton and Macao, reports that shortly after passing Gaspar Straits, July 30, during a gale from E by S., the ship, while plunging heavily, struck, as was supposed, the bottom, and the bottom was seen to be stirred up in her wake in one spot as if it were a bank; she grazed over the shoal a second time without striking, and on sounding shortly after got two casts of the lead in nine fathoms, but to the westward it was thought the water looked shoal; the vessel would not have touched if the water had been smooth. This dangerous spot was in lat. 3 deg. 35 min. 35 sec. S., lon. 106 deg. 56 min. E.

### MISCELLANEOUS.

An inquiry, instituted by direction of the Board of Trade, and which had occupied three days' previous investigation, has been held at the Greenwich Police-court, into the circumstances attending the abandonment at sea of the ship Old England, Captain Thomas Bulman master. The evidence taken was very voluminous. It appeared that the vessel, on the 15th of June last, left Cardiff with a cargo of patent fuel for Point de Galle, Ceylon. Her crew consisted of twenty-three hands, including the master. Nothing unusual occurred in the voyage until the 17th of July, when a leak was discovered, and this continued until, on soundings being taken, there was a measurement of twelve feet of water. The crew were kept constantly at the pumps, until about seventeen hours before the vessel was abandoned, they having refused to work, and during that time they were keeping company with a Portuguese brig, which took them on board with provisions brought from the ship, and landed them at one of the Cape Verd Islands. The freight had been insured for £1,600, and the ship (insured by the several owners, of which Captain Bulman held an eighth of sixty-four shares) was valued at £4,000. In the course of the inquiry it was stated that the captain and the carpenter had gone into the hold of the ship, and that holes were cut in the side of it by the latter with an auger; but this was shown to be necessary cutting in order to ascertain where the leak was. After being taken on board the Portuguese brig it was shown that the record of the voyage, with the exception of a few days, had been written from an old into a new log book, and that the old log book was not produced because the first mate had given it to the mate of the Portuguese brig, who had expressed a desire to see in what manner the log of an English ship was kept. The judgment of the Court was that the vessel had been improperly abandoned; the Court therefore adjudged that the certificate of Captain Thomas Bulman be cancelled.

# THE BRITISH-INDIAN EXTENSION TELEGRAPH COMPANY, LIMITED.

## CEYLON TO SINGAPORE,

In connexion with the Falmouth, Gibraltar, and Malta, the Anglo-Mediterranean, and the British-Indian Submarine Telegraph Companies; incorporated under the Companies Acts, 1862 and 1867.

## CAPITAL, £460,000, IN 46,000 SHARES OF £10 EACH,

OF WHICH 13,000 SHARES, FULLY PAID-UP, ARE RESERVED FOR THE CONTRACTORS, LEAVING 33,000 SHARES FOR SUBSCRIPTION. DEPOSIT ON APPLICATION £1 PER SHARE, ON ALLOTMENT £2.

### Directors.

Right Hon. WILLIAM NATHANIEL MASSEY, Chairman.
CHARLES WILLIAM EARLE, Esq., Director of the Electric and International Telegraph Company.
Lieut.-Colonel THOMAS GEORGE GLOVER, R.E., late Director-General of Telegraphs in India.
FRANCIS AUGUSTUS BEVAN, Esq., Lombard-street.
GEORGE GARDEN NICOL, Esq., Chairman of the Chartered Mercantile Bank of India, London, and China.
PHILIP RAWSON, Esq., Director of the Anglo-Mediterranean Telegraph Company.

**Engineers**—Sir CHARLES BRIGHT, LATIMER CLARK, Esq., H. C. FORDE, Esq. **Bankers**—Messrs. BARCLAY, BEVAN, TRITTON, and Co.; the CHARTERED MERCANTILE BANK OF INDIA, LONDON, AND CHINA.

**Solicitors**—Messrs. BISCHOFF, BOMPAS, and BISCHOFF. | **Secretary** (pro tem.)—T. H. WEDDELL, Esq.

### Temporary Offices—49, PALMERSTON-BUILDINGS, OLD BROAD-STREET.

The establishment of direct telegraphic communication with India by the formation of the Falmouth, Gibraltar, and Malta, Anglo-Mediterranean, and British-Indian Companies, whose cables are expected to be open for traffic in May next, calls attention to the want of further extensions eastward.

That this want has been long felt is shown by the fact that, notwithstanding the existing imperfect communication, which necessitates the conveyance of telegrams by steamers to and from Point de Galle, the traffic from Australia, China, Singapore, Java, and other places beyond Galle has amounted to about 20 per cent. of the whole messages hitherto passing over the Indo-European Lines.

To afford direct telegraphic communication to the countries lying east of British India this Company has been formed, and a cable will be laid from Galle to Singapore, touching at Penang and Malacca, as a first instalment towards connecting Australia and China with the Indian and European systems.

Negotiations are in progress, to the knowledge of the directors, with the Dutch and Australian authorities for the necessary concessions to enable telegraphic extensions to be carried out from Singapore to those countries, and soundings are about to be taken for a cable route from Singapore to Hong Kong.

From the extreme point of the Dutch Possessions to the Australian Continent the distance is only 1,130 miles; and a cable of 1,780 miles in length will connect Singapore with Hong Kong, *via* Cochin China.

The directors intend after the completion of their cable, or earlier if so advised, to adopt such measures as may ensure the carrying out of the above extensions.

When such a system is completed there can be little doubt that the messages passing over the Singapore and Ceylon Cable will exceed the present estimate of the British-Indian Company, namely, 300 per diem. In the meantime, looking to the importance of Singapore, and the fact that messages will reach it at once by steamers from China, the Philippines, Cochin China, and Java, it is considered a moderate estimate that 75 messages will pass each way daily.

The total length of the present Singapore Cable will be 1,756 miles, and the type is similar to those manufactured by the Telegraph Construction and Maintenance Company for other deep sea lines, with such improvements as recent experience has suggested.

A contract entered into with the Telegraph Construction and Maintenance Company provides for the manufacture and laying of this Company's cable in the year 1870, at a cost of £440,000, of which the contractors will take £130,000 in fully-paid shares. £50,000 of these fully-paid shares are to be reserved until this Company's engineers have certified that the whole line has been successfully laid and has continued for thirty consecutive days, equal to the standard of insulation prescribed by the specification.

A tariff has been arranged with the Falmouth, Gibraltar, and Malta, the Anglo-Mediterranean, and the British-Indian Telegraph Companies, by which the charge for a message of twenty words from England to Singapore will be £4 4s., of which this Company will receive £1 7s. The tariff for local messages between the termini of this Company's cable is intended to be £1 10s.

Calculating the daily number of messages at 150, of the average length of 30 words, at a tariff of 27s. per 20 words, and allowing 330 working days, the gross annual revenue would be £100,237. Deducting from this £16,000 for working expenses, and £10,000 for a reserve, a balance is left of £74,237, yielding upwards of 16 per cent. per annum on the capital; and it may be fairly assumed that this income will be doubled as soon as the projected extensions are carried out.

The payment on the shares subscribed and allotted will have to be made as follows:—

| | |
|---|---|
| On application ... ... ... ... | £1 per share |
| On allotment ... ... ... ... | 2 „ |
| 1st call 1st February, 1870... ... ... | 2 „ |
| 2nd do. 1st April, 1870 ... ... ... | 2 „ |
| 3rd do. 1st May, 1870 ... ... ... | 2 „ |
| 4th do. 1st June, 1870 ... ... ... | 1 „ |
| Total ... ... ... ... ... | £10 |

Copies of the Memorandum and Articles of Association and contract can be seen at the offices of the solicitors of the company, Messrs. Bischoff, Bompas, and Bischoff, 4, Great Winchester-street-buildings, E.C.

Application for shares in the form annexed, accompanied by a deposit of £1 per share, should be left with Messrs. Barclay and Co., the bankers of the Company. If no allotment is made the deposit will be returned in full, and if an allotment is made to the applicant the deposit will be appropriated towards the amount payable on deposit and allotment.

The deposit and subsequent payments will be liable to forfeiture if any instalment is not duly paid.

No applications for shares will be received after 4 o'clock on Monday, the 25th of Oct., for London, nor after 12 o'clock on Tuesday, the 26th Oct., for the country.

The following is a copy of the Memorandum of Association:—

1. The name of the Company is the British-Indian Extension Telegraph Company (Limited).

2. The registered office of the Company is to be in England.

3. The objects for which the Company is established are:—The contracting for, constructing, acquiring, leasing, maintaining, dealing with, and working lines of land and submarine telegraph between India and Singapore and other places in Eastern Asia and the adjacent Islands, and between any places or points forming or intended to form part or parts of any telegraphic route or routes between those places, or any of them, and (as and when authorieed by Extraordinary Meeting of the members) branches from and extensions of any of those lines to such countries or places as the Company think fit; the establishment of telegraph stations, and, generally, carrying on the business of a Telegraph Company; the applying for, acquiring, selling, leasing, using, and disposing of such lands, telegraph lines, vessels, concessions, leases, privileges, licenses, and letters patent, and any shares or interest therein respectively, as may be useful or desirable for the purposes aforesaid, or any of them; the doing of all or any of those matters or things in conjunction with any other Company or person; the registration or constitution of the Company abroad as a Société Anonyme or otherwise; the subscribing for and acquiring shares of or amalgamating with and sharing in the business or undertakings of any other Telegraph Company or Companies, and the making and carrying into effect of working, traffic, and other agreements with Governments, Railways, Postal, Steamboat, Telegraph, and other companies and authorities, and the doing of all such other things as are incidental or conducive to the attainment of the above objects.

4. The liability of the members is limited.

5. The capital of the Company is £460,000, in 46,000 shares of £10 each.

The following contract has been entered into:—19th October, 1869.—Contract between the Telegraph Construction and Maintenance Company (Limited) of the one part, and the British-Indian Extension Telegraph Company (Limited) of the other part.

THE BRITISH-INDIAN EXTENSION TELEGRAPH COMPANY (LIMITED).
No.——

Form of Application (to be retained by the bankers).

To the Directors of the British-Indian Extension Telegraph Company (Limited).

Gentlemen,—Having paid to Messrs. Barclay, Bevan, Tritton, and Co., the sum of £ , being a deposit of £1 per share, I request that you will allot me shares of £10 each, in your company, upon the terms of the prospectus and Memorandum and Articles of Association; and I hereby agree to accept the said shares, or any smaller number which you may allot to me, and I agree to make the payments thereon at the times specified in the prospectus, and to become a member of the company; and I request you to place my name on the register of members in respect of the shares which may be allotted to me.—I am, Gentlemen, your obedient servant,

Name in full .....

# THE LONDON AND CHINA EXPRESS,

**A NEWSPAPER SPECIALLY ADAPTED FOR READERS IN CEYLON, CHINA, JAPAN AND OTHER EASTERN SETTLEMENTS.**

THE "London and China Express" is published in time for transmission by each outward mail, *via* Marseilles, to Ceylon, the Straits Settlements, Java, Siam, Manila, China, Japan, &c. Each number contains a well-selected digest of the news since the preceding mail, English, Continental, and American; extra space being devoted to subjects having a special interest for residents in the above countries. It also includes the fullest Commercial and Shipping Reports, and the same Leading Articles and Special Correspondence as appear in the "London and China Telegraph."

Merchants and others who wish their Correspondents or Agents in the Eastern Settlements to be kept well supplied with General, Mercantile, and Shipping news from Europe, are recommended to order the "London and China Express" to be sent to them regularly.

Terms of Subscription (including postage), 54s. per annum, payable in advance; or with Export Supplement (similar to that issued with the "Telegraph"), 12s. extra. Subscriptions payable to any of the Agents abroad (see list in separate advertisement), and in London to James West, publisher, at the head office,

2, COWPER'S COURT, CORNHILL, E.C.

## THE CHINA AND JAPAN AGENCY.

For the Purchase and Shipment of Goods of all kinds to Ports in China, Japan, the Straits Settlements, &c. Orders for Furniture, Stores, Books, and Personal Requirements of every description promptly executed, either by Overland Route or Clipper Sailing Vessels. The articles in all cases are carefully selected by persons who have had personal experience of the wants of residents in China and Japan. Orders should be accompanied either by a remittance, or a reference for payment in London. All communications to be addressed, and remittances made payable, to

## SINGAPORE DOCKS.

THE PATENT SLIP AND DOCK COMPANY execute SHIPS' REPAIRS of all descriptions in the most efficient manner, under the supervision of European Engineers and Shipwrights.

The DRY DOCK (opened in March, 1859) admits two Vessels at the same time, being over 400 feet in length, with a depth of water ranging to 15½ feet. A second DRY DOCK of larger dimensions will shortly be completed, and available for the heaviest Steamers.

Adjoining the above there is extensive WHARF WAREHOUSE, and other accommodation, including every convenience for coaling Steamers, discharging cargo, and storing goods, together with ample MACHINERY and appliances for repairing iron steamers, &c.

Apply at the offices of Messrs. PATERSON, SIMONS and Co., Singapore; or 21, St. Swithin's-lane, Cannon-street, London, E.C.

WM. CLOUGHTON, Managing Director.

New Harbour, Singapore, June, 1868.

## PORT OF AMOY.

SHIPOWNERS, AGENTS, and COMMANDERS are informed that the Dock Company's establishments at the above port afford every facility, at moderate charges, for REPAIRING and SPARRING VESSELS, cleaning and painting iron ships and steamers.

Their large Granite Dock has 286 feet length on the blocks, and at average spring tides can receive vessels of 16 to 17 feet draught. It has a caisson-gate and a powerful centrifugal steam pump, and an engineer's workshop fitted with lathes and tools, driven by steam: iron and brass foundries, boiler-makers' shop, a large smithy and carpenters and boat-builders' sheds. All superintended by resident Europeans.

Their two smaller GRANITE DOCKS can receive, at spring tides, vessels drawing 12 feet.

Spars, timber, and other Dockyard material kept in stock.

Quarters for officers and a DRY GODOWN for stores of vessels under repair.

## FOOCHOW DOCK.

*RIVER MIN.*

THE above granite floored DOCK, of the following dimensions, viz., Length, 300 feet, breadth at bottom, 40, is capable of receiving vessels drawing 13 to 16 feet, as the state of the tides will allow. The Dock runs dry to the blocks, and is pumped out by steam.

The above premises comprise a large Machine Shop containing a

WHITWORTH'S 12-INCH SCREW CUTTING GAP LATHE, DRILLING AND SCREWING MACHINES,

A LARGE SMITHY, &c., &c., &c.

Large Godowns are on the premises for STOWAGE OF CARGO, &c., &c. A large stock of Woods, Metal, &c., &c., always on hand.

The Dock steam tug *Woosung* is available at all times to tow vessels to or from sea.

JOHN C. SKEY, Superintendent.

## COMPTOIR D'ESCOMPTE DE PARIS.

Incorporated by National Decrees of 7th and 8th of March, 1848, and by Imperial Decree of 20th July, 1854, and 31st December, 1866.

Recognised by the International Convention of 30th April, 1862.

CAPITAL, fully paid up, £3,200,000.

Reserved Fund ... ... f 20,000,000 ... £800,000

HEAD OFFICE.—14, Rue Bergere, Paris.

## CHARTERED BANK of INDIA, AUSTRALIA, and CHINA.

MINUTES of an EXTRAORDINARY GENERAL MEETING of the SHAREHOLDERS, held at the London Tavern, WEDNESDAY, the 20th day of October, 1869.

THOMAS A. MITCHELL, Esq., M.P., in the Chair

The advertisement convening the Meeting having been read, the following resolution, after some introductory observations, was moved by the Chairman, and, being seconded by John Jones, Esq., was carried unanimously:—

"That an INTERIM DIVIDEND at the rate of 6 per cent. per annum (free of Income-tax) be now declared for the half-year ended 30th June last, PAYABLE on and after the 27th instant."

With a vote of Thanks to the Chairman and Directors, moved by Thomas Huggins, Esq., seconded by Edward Watson, Esq., and carried unanimously, the proceedings terminated.

T. A. MITCHELL, Chairman.

Warrants for the dividend above declared, payable at the City Bank, Threadneedle-street, London, on and after the 27th inst., will be issued forthwith to all the shareholders.

October 20th, 1869.

## TO PARENTS IN INDIA AND CHINA.

THE ADVERTISER (who is the wife of a professional man), is willing to receive TWO YOUNG LADIES to be EDUCATED with her own daughter. The best course of education will be combined with all the advantages of a comfortable home. The house and garden are large, and in the neighbourhood of the Crystal Palace. Terms, £100 per annum each.

Address "T.," "London and China Telegraph" Office 2, Cowper's-court, Cornhill. Unexceptionable references given and required.

C. KRAMER begs to inform the public that he has established himself at this place as NURSERYMAN and SEEDSMAN, and is fully prepared to execute any orders for Japanese plants, bulbs, or seeds for any part of the world.

An experience of four years in this business in foreign parts, two of which has been gained in this country, may ensure the confidence of customers.

Orders must be accompanied by remittances or references, and letters must be addressed to

C. KRAMER,

No. 63, BLUFF, YOKOHAMA.

## NOTICE.

MORRIS'S DIRECTORY for CHINA, JAPAN, and the PHILIPPINES, &c., published on the 1st Jan., 1869, contains a Revised List of the Foreign Residents at all the open Ports of the China Sea, including Saigon, which has never yet been included in any similar work; together with the Time Tables of the different Steamship Companies, Rates of Postage, Local Ordinances, and such other matter as will be useful to all interested in the China trade. No trouble or expense has been spared to make this the most accurate publication of the kind ever offered to the public.

Price, complete in one volume, 14s.

Orders received by the Publisher of the "London and China Telegraph," 2, Cowper's-court, Cornhill, E.C.

AMSTERDAM INTERNATIONAL EXHIBITION, 1869.—THE GRAND DIPLOMA OF HONOUR, being the First Prize, and superior to the Gold Medal, has been awarded to LIEBIG COMPANY'S EXTRACT OF MEAT; which likewise carried the first prizes at the Paris and Havre Exhibitions

A single trial will at once convince the consumer of the great superiority in flavour, strength, and clearness over all other Extracts of Meat, thus fully showing the correctness of the received high distinctions.

Every genuine jar bears Baron Liebig's signature.

## THE SAIGON ADVERTISER & SHIPPING GAZETTE.

A SUMMARY of Commercial and Shipping Reports from SAIGON, and a Record of Progress in COCHIN CHINA.

Subscription, £5 per annum, exclusive of postage.

London Agency: THE LONDON AND CHINA TELEGRAPH Office, 2, Cowper's-court, Cornhill, London, E.C.

HOLLOWAY'S OINTMENT and PILLS are an infallible remedy for bad legs and all kinds of wounds. The surpassing sale of these invaluable medicines in every part of the civilised world is the most convincing proof of their efficacy, of which, were further proof required, the long list of voluntary testimonials received from grateful patients from all quarters of the globe would amply supply it. They speedily cure bad legs, old wounds, scrofula, and all diseases of the skin. Thousands of persons who had long and severely suffered from these dreadful maladies have been cured by these medicaments after every other means had failed; and it is a fact beyond all doubt that there is no case, however obstinate or however long standing, which they fail to relieve.

### JAPAN.

#### YOKOHAMA.

The present mail brings advices from Yokohama to Sept. 4 The French mail of July 8 arrived on the 25th Aug., and the English mail of July 16 on the 31st Aug., the latter conveying London telegrams to Aug. 6. Besides these, the Pacific mail had arrived with San Francisco dates to Aug. 4, and London telegrams to Aug. 3, making three mails within a fortnight. In another column will be found a telegram in advance of the homeward Pacific mail, with Yokohama dates to Sept. 29—a fortnight later than those received to-day.

Our last issue contained nothing under this head, except a bare record of the Duke of Edinburgh's arival at Yokohama. We now give, from the *Japan Times* and *Japan Gazette*, a fuller account of his reception:—

H.M.S. *Galatea*, Captain his Royal Highness the Duke of Edin burgh, arrived in the harbour of Yokohama at 1 P.M. on Sunday the 29th inst., saluting the Admiral's flag only. On Monday the Prince landed privately, and lunched with Sir Harry Parkes, K.C.B., H.M.'s Minister to Japan, and in the afternoon went out riding, accompanied by the principal members of the Legation, Sir Henry Keppel, and several other gentlemen. On the following morning the Royal Standard was hoisted on board the *Galatea*, and saluted by all the vessels of war in port as well as by the fort of Kanagawa.

It had been previously notified in the official organ that his Royal Highness would hold a levee at the Legation at noon; consequently, in spite of the heavy rain which fell nearly the whole of the day, several persons assembled to witness his landing. At eleven o'clock the Prince left the *Galatea* in his barge, accompanied by Admiral Keppel, Colonel Norman, C.B., Captain Maxwell, adjutant-general, and several other officers, and followed in succession by the captains of H.M.'s ships in their respective galleys. On landing his Royal Highness was enthusiastically cheered, which he repeatedly acknowledged; then, entering the carriage-in-waiting, in which Sir Harry Parkes was sitting, drove to the Legation.

The following is the text of the Address presented to his Royal Highness by the British Residents, which was read by Mr. W. G. Aspinall:—

*May it please your Royal Highness:*

We, the undersigned British subjects, resident at Yokohama, beg to approach your Royal Highness in order to testify our loyalty and devotion to the Throne and Family of our most Gracious Queen. We feel it our happiness on the occasion of the visit of your Royal Highness to Japan to be allowed to tender you a most hearty welcome, and we beg to assure Her Majesty and your Royal Highness, that though we are a small community, scattered among men of every race, in a settlement far from our native shores, we ever cherish the deepest affection towards our beloved Queen and her Royal Family. We hail the arrival of the *Galatea* in these waters, and we heartily pray that prosperity may attend the ship and her Royal Captain throughout. We own with gratitude the watchful Providence which has ever guarded the life and prospered the reign of our

Digitized by Google

Gracious Queen, and we fervently pray that God will long vouchsafe His blessings to Her Majesty and her royal line.

Subscribed at Yokohama, August, 1869.

To the Address were nearly 260 signatures, being within half-a-dozen of all the known British residents. Mr. Aspinall having handed it to an aide-de-camp, his Royal Highness read his reply, which ran thus :—

Gentlemen,—I thank you sincerely for the Address which you have presented to me. In the Queen's name I acknowledge the expression of loyalty to her Throne and person; and for myself, I am grateful for the kind wishes which you have expressed for my future welfare. I attach the more weight to your Address because it comes from a body of gentlemen who form the principal link between the Empires of Japan and Great Britain. The increased favourable relations between these two countries must add very materially to the prosperity of both, and it rests to a very great extent with you, by the energetic prosecution of peaceful industry, to improve still more the intimacy and good-fellowship between the people of this country and your own land. That your efforts in so good a cause may be crowned with success is my earnest wish—a wish that is all the more sincere because I feel that your prosperity in this country must add to the well-being of both Empires. ALFRED.

To the British Residents at Yokohama.

After this, officers of the army and navy were presented, and then Mr. Lowder, H.M.'s Consul, and the gentlemen of the Consulate, all of whom were introduced by Sir Harry Parkes. The general residents followed, but they, unfortunately, were but few in number, most of them being behind time, as the proceedings commenced with a punctuality said to be rare at the Legation. Mr. Loureiro, the Portuguese Consul, was only just in time to be presented before the Duke left the room, and he had actually retired when M. Outrey, the French Minister, arrived, but courteously returned and received that gentleman and his suite. Many others subsequently arrived, but were too late.

The appearance of the Duke, and the manner of his reception, seem to have been a source of unmixed surprise to the Japanese. They could not understand that one who claimed equality with the Mikado could actually be the captain of a man-of-war. But the greatest puzzle of all was, when the Duke landed in private clothes to tiffin with Sir Harry Parkes. He landed like any other man; got into a carriage like any other man; and was driven off without fuss of any kind; and the remark of the numerous Japanese who had assembled, expecting to see a great sight, was universally one of disappointment. One man asked derisively, "D'ye call that an English Prince?" alluding to the absence of display and ceremony. The next day, when he landed in state, it was quite another thing. But then they could not understand his condescension in noticing the people by raising his hat, nor the noisy manifestations of welcome when the people cheered.

The Prince, escorted by a guard of honour from the Legation, and accompanied by Sir Harry Parkes, drove to Yedo on Wednesday, Oct. 1, where he arrived at half-past one, and was received by a guard of marines and a detachment of native troops. Some attempt at illumination appears to have been made by the Japanese in Sinagawa, in the usual manner, paper lanterns; but his reception so far has been altogether private and free from ostentation of any sort.

No particulars are yet to hand of the interview with the Mikado, except that the arrangements were on a magnificent scale. A correspondent informs us, that from Japan the Duke will proceed to Peking, whether invited or not; that he will be accompanied by Admiral Keppel, who will continue with him while in China waters, after which Sir Henry will return home, and the *Galatea* proceed to Calcutta.

The same correspondent informs us that trade at Yokohama is very bad, the Japanese holding out for very high prices for silkworms' eggs, while tea and silk both continue dull.

The P. M. S.S. Company is rapidly becoming the largest line of steamers in the Far East. The new San Francisco steamer, the *America*, arrived at Singapore on the 4th inst., and was expected to leave Hong Kong with the mails on the 18th Sept. The *Oregonian* is also a new steamer of the same class as the *New York* and *Costa Rica*, and is intended to run upon the Shanghai line *via* the Inland Sea. A change will also be made in the agencies of the company; Captain Phelps, about to leave for New York, will be succeeded by Mr. George E. Lane, from Hong Kong, as general agent, who in turn will be succeeded by Mr. J. A. Harris, formerly of Acapulco. Mr. Gibbons, the popular agent here, takes charge of the Nagasaki station, and Mr. G. F. Bowman remains at Shanghai.

H. M. the Mikado is daily expected to return to Kioto, and it is rumoured that soon after his arrival a grand council will be held, when the (to the Japanese) momentous question of whether foreigners shall be encouraged or discouraged to remain in Japan will be discused.

## CHINA.

—o—

### PEKING.

(FROM OUR OWN CORRESPONDENT.)

Mr. Hart has been obliged to admit the contumacy of the Tsung-le-Yâmun in continuing to refuse to acknowledge the treaty made by Mr. Burlingame with the United States. The French Minister has telegraphed this home, and it is said requested his Government to defer entering upon further negotiations with Mr. Burlingame until his despatches reach Paris. The following extract from the *North China Daily News* is well worth sending you, as showing how rotten and corrupt the Government of China is :—

We subjoin a sketch of the paragraph about Lekim taxation, from a memorial to which we lately referred as having been presented to the Emperor. A correspondent, in sending it, adds, such memorials are filled with enumerations of office prostituted, and mandarins corrupted, and altogether afford a darker picture of the decadence, even rottenness, of the Empire, than ever entered the mind of foreigners to conceive. The Government are suspicious of the mandarins; the mandarins prey upon the people; and the memorialists are no better than the rest of their class. Otherwise, being judges, and having power, why do they not quel the evils they condemn?

In a recent memorial, presented to the Emperor by one Tsien-pou-lien, an eminent scholar and high officer at the capital, the disbandment of all militia forces still under organisation is forcibly urged, with a recommendation that all arms and ammunition in their possession shall be given up, and the temporary fortifications made by them in time of danger be reduced—the former with a view to prevent piracy, the latter defiance.

The memorialist further urges that, inasmuch as peace is now largely restored to the country, *Li-king* (Li-kim), or war-tax, should be greatly abated, and suggests that this can best be done by distinguishing between large and small dealers, and between articles of luxury and the necessaries of life, as, for instance, wines and tobacco, silks and satins, should be taxed, while articles of food, cotton, cloth, wood, coal, oil, paper, &c., &c., should be exempt.

This distinction, he insists, is necessary to protect the poor against the squeezes of unprincipled mandarins, and to protect and encourage trade.

In conclusion, the memorialist begs that the Emperor will cause the Collector-General to be required, by orders from the Governors-General and Governors, to publish a list of such articles as are subject to the above tax, whereby the oppression of the people may be in future prevented, and the poor have occasion for gratitude.

It is said that foreigners are treated with marked disrespect; abusive epithets, until recently unknown, are now freely used. A foreigner was the other day walking in the streets, a runner accompanying a mandarin's cortege passing, exclaimed, "See, the foreign devils now take off their hats to Chinese."

HANGCHOW.—A correspondent writes, there has been so much rain and no sun, that now we have an epidemic; dysentery and cholera are raging.

HANKOW.—The water continues to rise; it is from three to four feet over the Bund; sampans are again in use.

CHEFOO.—The weather is getting so cold as to cause some of the visitors—health seekers—to come South. The Settlement was thrown into a state of excitement on the 1st inst. by a row between the Swatow junk men and the Imperial troops from Tientsin; the latter got the worst of it.

### TIENTSIN.

#### MURDER OF MR. WILLIAMSON.

The following is from the *Evening Courier;* it is the most authentic account of the circumstances connected with the murder, near Tientsin, of the Rev. John Williamson, late of the London Missionary Society :—

The deceased, in company with the Rev. Mr. Hodge, was proceeding by boat up the Grand Canal, to visit some inland stations, and on the night of Wednesday, the 25th Aug., or the morning of the 26th, while their boat was at anchor off the west bank of the canal, opposite to the town of Chêng kuan-tun, about 35 miles from Tientsin, it was boarded and plundered by a number of armed Chinese robbers.

Mr. Hodge deposed before H. M.'s Consul at Tientsin on the 27th that he and Mr. Williamson retired at 9.30 on the 25th, in the large central compartment of their boat; that about one o'clock next morning he was awakened by the violent rocking of the boat, and by the voices of a number of men outside. He sprang out of bed, and was surprised that he could see nothing of Mr. Williamson. He looked out and saw four or five Chinese armed with swords, at the bow of the boat, which was hauled on to the bank. Failing to open his revolver case he jumped on deck with the intention of throwing the case into the water. As soon as he appeared a cry of "mao-tze," "mao-tze," an opprobrious epithet commonly applied to foreigners in the North of China, was raised, supplemented with "ta, ta" (strike, strike). He threw down the revolver case and called out "let me go ashore;" and while endeavouring to get away, he was struck on the head and shoulders by the robbers with the flats of their swords. He succeeded in jumping ashore, and when there was again struck in a similar manner by others of the robbers who were on the bank. He escaped from them, and was not pursued, as he ran off to a neighbouring village for assistance. Arrived at the village, he roused the inhabitants. One of them, on being told that the robbers numbered about 20, recognised them as being known in the neighbourhood to be very dangerous. This villager lent him some clothes, and on their way to the town of Chêng-kuan-tun they met a local mardarin, who

Digitized by Google

was on his way with soldiers to the boat. Mr. Hodge joined them, but on reaching the boat they found it had been deserted by the robbers after they had pillaged it. None of the Chinese on board were injured, but Mr. Williamson was nowhere to be found, and none of them knew what had become of him. One of the boatmen, however, who had slept on the foredeck, afterwards informed Mr. Hodge that when he was held down by the robbers he saw Mr. Williamson on the forepart of the vessel, but could not say whether he jumped ashore or fell into the water. This man, when subsequently examined by Her Majesty's Consul, denied all knowledge of having seen or heard anything about Mr. Williamson, but stated that at the time the robbers were holding him down he heard a shot fired, followed by something falling into the water. The other boatmen declared that at the very beginning of the attack they heard two shots fired, but heard nothing fall into the water. Mr. Hodge himself heard no shots at all. Mr. Williamson's body was found on the 28th floating in the canal, and was buried on the 29th. Active measures are being taken by the Chinese authorities to trace the murderers. The deceased was brother of the Rev. A. Williamson, of Chefoo. His wife went home in May last.

## SHANGHAI.

(FROM OUR OWN CORRESPONDENT.)

SHANGHAI, Sept. 9, 1869.

Telegrams have been received, *via* Kiachta, dated London, Aug. 17, arriving here on 5th inst., by San Francisco from Europe, dated 3rd Aug., both to hand same day. We have received telegrams to Aug. 11, brought on by the extra P. and O. steamer *China*. On the 5th inst. the *United Service* arrived, bringing $700,000, also the P.M.S. *New York*, on the same day, with $400,000.

The *Mary Moore* started with a cargo of tea on the 4th for London; she was too lightly ballasted, and before she got to the *Hellespont* wreck she had to return to Woosung. She got ashore on the inner bar coming up the river, through the carelessness of the pilot. She is now discharging her cargo at Gibb's Wharf; she may be expected to sail in a few days. The steamer *Fan-le-Juen* (late *Nora Creina*) is at Ningpo in a sinking condition. The British barque *Stinchar*, laden with rice from Bangkok, struck on Ty-go-san; she has become a total wreck; the crew have arrived at this port, and are under the care of H.B.M.'s Consul. The steamer *Bertha* is in dock at Foochow.

A land sale took place on the 3rd inst. A parcel on the Hongque side, between Gibbs, Lvingstone and Dow's Wharf, fetched Tls.21½ a mow. A lot on the Siccawei-road brought Tls.24½ a mow; another lot on the same road brought Tls.7 the mow. A piece on the French-road realised Tls.11 per mow.

There has been a meeting of the Gymnasium; the members propose moving from the Masonic Hall to the Main Guard. It was decided at the meeting not to have any costume for athletic sports. The Shanghai Rifle Club has had a meeting, and elected Mr. William Kidner their captain. The Rowing Club has decided to hold a regatta at the end of October. It is hoped that a Yacht Club will be permanently established. Messrs. Stevenson, of the Kiang-nan Arsenals, have given cups to be sailed for by yachts on the 18th and 20th of this month.

Sir Edmund Hornby finds such an accumulation of public business at Yokohama, consequent on the death of Mr. Fletcher, and subsequent changes, that he is compelled to remain longer at that port than he anticipated. To facilitate the getting through of the work, he has ordered one of the Clerks of the Supreme Court to be sent over to his assistance. Mr. R. A. Mowat, Law Secretary, left by the French mail for England; his object in going home is to qualify and get called to the Bar. Mr. G. A. Jamieson, of the Consular Service, takes up Mr. Mowat's duties during his absence.

Mr. Seward, U.S. Consul-General, leaves for San Francisco by the P.M.S.S. *Costa Rica* on a year's leave of absence. Mr. Markham, H.B.M.'s Consul at Chefoo, proceeds to England on leave, *via* the States. Mr. Lay, now at Kiukiang, succeeds Mr. Markham, and Mr. Hughes, on his return from Europe, returns to Kiukiang. Mr. F. Dillon, for several years H.I.M.'s Vice-Consul in London, and brother of Mons. Dillon, Vice-Consul for France at this port, passed through Shanghai the other day, *en route* to Bangkok, to which place he has been appointed Consul. Mr. Chaloner Alabaster, H.M.'s Acting Consul at Swatow, is to be relieved from that station, and take up the duties of Vice-Consul at Shanghai. Whether this change has been made on account of Mr. Alabaster's action some time ago in regard to the attack by the villagers near Swatow, on the boats of H.M.S. *Cockchafer*, has not transpired. Mr. Forrest will most likely take up the duties of Consul at Newchwang, in the room of the late Mr. T. Taylor Meadows It is rumoured Mr. Winchester returns to Shanghai, in which case Mr. Medhurst goes back to his old post at Hankow. Dr. Jenkins takes charge of the U.S. Consulate during Mr. Seward's absence. Mons. Dalry, Consul-General for France, has returned from Japan. Mr. Medhurst, H.B.M.'s Consul, has left for Nagasaki to recruit his health.

Admiral Sir Harry Keppel, K.C.B., returns to England, *via* San Francisco, by the next Pacific mail. It is rumoured that H.R.H. the Duke of Edinburgh will not visit Shanghai.

Mr. Cunningham, president of the Shanghai Steam Navigation Company, and head of Messrs. Russell and Co.'s firm in China, will leave for America early in the coming year. It is thought he leaves China for good. Messrs. David Sassoon, Sons, and Co. have had a difference with the opium guild at this port, and for the past fortnight that large opium firm has been unable to do business with the Chinese. The American portion of the community were all on the *qui vive* on the arrival of the American mail steamer on the 5th, there being a probability that ex-Secretary Seward would be on board. It is confidently asserted here by some Americans he intends visiting China.

Considerable indignation is felt towards the Shanghai Club Committee for having suddenly posted up a list of gentlemen who have not, from absence and other causes, paid their subscriptions. This abrupt action is not likely to increase the popularity of an institution which has a heavy lee-way to make up to take anything like a foremost position in public esteem. Mr. Koch, honorary secretary of the gymnasium, has been presented by the members with a handsome microscope, in acknowledgement of his valuable services to that institution.

On Saturday evening, Sept. 4, about six o'clock, a gentleman in the employ of Messrs. Russell and Co., while returning from Toonkado with his wife, was set upon by a number of Chinese, stripped of all his clothes, and beaten severely, and was very nearly losing his life. It seems that a Chinaman went up to the chair in which the lady was and looked in, and that her husband pushed him away. The scoundrel then made threatening gestures, and called out to his companions, who assaulted the gentleman, beating him severely. An immense number of Chinese were soon collected, and with great difficulty the gentleman got into a house, but was followed by his assailants, and for nearly an hour managed to keep them at bay with a piece of wood, which he tore from the staircase. The mob, however, continued to attack him, until he got through a window into the street. There they again set upon him, stripped him of all his clothes, and beat him most brutally, until a respectable Chinaman came up, who addressed the crowd and got their victim away, and supplied him with sufficient Chinese clothes to enable him to go home. The gentleman is a Mons. Louvier, Messrs. Russell and Co.'s silk inspector, a French subject, but it seems that information was not given to the police until this morning, and we are unaware whether any of the Chinamen have been arrested. Occurrences of this kind are becoming far too frequent, and we trust that the cowardly ruffians will not be allowed to escape like those who committed the outrage at Pootung some time ago, and that they will meet with such a punishment as will prevent another occurrence of the kind for sometime.

### SUPPLEMENTARY.

SEPT. 10.

Mail has been delayed one day.

On the 9th a small screw steamer, entirely built by Messrs. David Muirhead and Co., of Pootung, including engines, in Shanghai, took a turn round the shipping; from the speed she attained the result was most satisfactory. This is the first steamer, I believe, that has been completely built in China.

The recent letter of Mr. Johnstone, secretary to the Municipal Council, to the *London and China Telegraph*, in which he vindicates the aspersions cast on it by his Grace the Duke of Somerset, has caused considerable comment in the China Press. The *Evening Courier* has made a savage assault upon it, and wilfully misconceived what seems to have been its scope and intention. The *Courier* attempts to make it the council's vindication of the model settlement, but the letter, as it stands, could but appear, to any unprejudiced person, not to be an official utterance.

KUIKIANG.—A correspondent says, "We are still water-locked here, and likely to remain so if the reports about the state of the Upper Yang-tsze are correct."

The *Courier* has the following:—

No less than twenty large ships are at present lying idle in the harbour, finding it pay better to do so than to accept current coasting rates. One inconvenience arising from this state of things is probably not generally known. To save a vessel the expense of moving say 20 to 30 taels, vessels are kept waiting in berths far down the reach, involving three to six and even more days' extra detention, with a consequent additional expense of say from Tls. 60 to 200 and upwards. We mention the alleged fact as one worthy of attention from those concerned.

I extract the following from one of the local journals:—

Preliminary arrangements are being made to offer a hospitable reception to the Duke of Edinburgh. The general Committee have elected sub-committees to compose addresses and to communicate with the various Shanghai societies, who, it is supposed, will desire to take part in the projected entertainments. A theatrical performance by the Amateur Dramatic Club is proposed, and Dion Boucicault's comedy of "London Assurance" has been selected as the piece to be played on the occasion of his Royal Highness's visit. The Club Concordia, we believe, intend to offer a dramatic and musical entertainment, and a *dejeuner* on the field will be got up by the Shanghai Cricket Club.

## HONG KONG.

Dates by this mail are to the 16th of Sept. The London mai of 7th Aug. (French) arrived out on the 15th Sept., with telegrams to the 30th Aug.

There is nothing of interest in local affairs beyond the prepara-

Digitized by Google

tions to receive the Duke of Edinburgh. The *Daily Press* on this subject says:—

The chief topic of interest during the past fortnight has been the approaching arrival of H.R.H. the Duke of Edinburgh. Various accounts come to hand concerning his movements, in consequence of the refusal of the Peking mandarins to receive him with the honours due to his rank. It was first reported that he would not in consequence visit any of the China ports, but it is now finally settled that he will go to Peking as a private individual, and will also visit Shanghai. He may be expected in Hong Kong about Oct. 20. Although it is quite impossible to designate as yet anything like a perfect programme of the festivities that are now under consideration, a brief enumeration of what is proposed, and of the actual preparations in progress, will be of interest to home readers. As previously advised, the visit was not to extend beyond four days, but on account of the *Galatea* requiring a refit there is some probability of this time being extended. The public landing will take place at Peddar's Wharf, where a triumphal arch is now in the course of erection. His Royal Highness will then be invited to inaugurate the City Hall, and it is proposed that he should afterwards hold a public *levee* in the building. In the evening a ball will be given in the City Hall in honour of the distinguished guest, by the reception committee, which in all probability will be one of the most brilliant affairs that has yet occurred in this colony. Invitations have been issued, and subscription lists are already being prepared for circulation. The minimum limit of the amount of a single subscription has, it is understood, been fixed by the committee at $15, and it is to be hoped that the well-known liberality of the residents of Hong Kong will not be found a thing of the past, notwithstanding the gloomy aspect of things commercial. On the evening of the arrival, and, consequently, of the ball, if the above proposal should be carried out, it is expected that a general illumination of the colony will take place, and if the various rumours of preparations in progress for this event should turn out correct, it will be a brilliant as well as novel spectacle. The second evening is to be devoted to an inaugural performance in the new theatre, given jointly by the English and German amateurs theatrical societies. This will also be an event of no small importance. The third evening it is proposed to have a display of Chinese fireworks upon the cricket ground, and afterwards a Chinese dinner, or "chow-chow," and a Chinese "sing-song," given by the Chinese community to his Royal Highness, is talked of.

## STRAITS SETTLEMENTS.

—o—

### PENANG.

We understand that Mr. Allan, of Messrs. Sandilands, Buttery and Co., has been appointed a commissioner under the new Fire Bill, and Mr. Gentle, of Messrs. Fraser and Co., will represent the merchants.

The rooms lately fitted for the Merchants' Exchange room have been opened, and are a vast improvement on the old ones.

Mr. William Maxwell, son of the Chief Justice, has taken up the post of magistrate.

Complaints continue to reach us that Governor Anson does not consult the community in the various measures proposed for the Settlement.

## CEYLON.

—o—

### COLOMBO.

(FROM A CORRESPONDENT.)

COLOMBO, Sept. 28, 1869.

Dates by the present mail are to the 3rd Oct. from Colombo, and 4th from Galle. The chief items of news were, however, anticipated in our issue of the 25th Oct. per French mail.

And so we are to have a visit from the Duke of Edinburgh. The Governor told us this in his opening speech to the Legislative Council. It is not, therefore, longer a matter of doubt, but one of fact, for the Viceroy has declared it, and has asked the Council to vote the necessary supplies, which they will do right cheerfully, no doubt. And right royally will he be welcomed to one of the most loyal dependencies of the British Crown, for his august mother holds not under her sway a more devoted population. Let us hope he will come, and see and admire what there is to be seen and admired in this beautiful island, and that his visit will be full of enjoyment to himself, of satisfaction to the colonists, and of information to the people at home. These are not all so ignorant that they require to be informed of our island's whereabouts, although sometimes it is mistaken for Sierra Leone, and at others it is thought to lie somewhere between the Falkland Islands and Terra del Fuego. Anyhow, there are many in England that require to be informed of its whereabouts, and what sort of people inhabit it, not even excepting some Members of Parliament and editors of newspapers. The more especially is enlightenment necessary when such unscrupulous writers as Mr., now Sir Charles Wentworth Dilke, in travelling over the country see so many things which do not exist, and use the traveller's license so freely on their return as to mistake facts, misrepresent customs, and communicate a distorted view of everything. After such a visit and such a description it is high time that a truthful picture of this "Eden of the Eastern wave" should be presented to the British public. Therefore, if for no other reason, it would be gratifying to the colonists that a son of England's Queen should visit them, and see if such things exist as have been represented by Sir C. W. Dilke, and distorted and exaggerated by his critic of the *Edinburgh Review*. Mr. Dilke must have travelled first and made up his notes afterwards; for he has evidently jumbled up what he saw in one country with his description of another. He must have been dreaming when he saw the four ponies drawing the coach, been asleep when, all the way from Colombo to the interior, he did not see a single European, and been lively with his imagination when he saw the Mahawelliganga emptying itself into the Kandy Lake. You, Sir, have recently visited Kandy, and will doubtless recollect that the River Mahawelliganga, while it encircles the town, is at a lower elevation by an average of say 300 feet, while it does not at any point approach within two miles of the central capital. The Duke's visit will therefore do good, inasmuch as it will tend to correct the absurd statements promulgated by the bookmakers. Let us hope Sir C. W. Dilke will be more correct and truthful in his description of the Russian scenes he is now visiting. His records of Ceylon remind one of those of another bookmaker who wrote about it some 12 or 15 years ago—Mr. Knighton. He wrote some sketches of Ceylon, its scenery and its business; a very readable book he made, too, and very instructive to those who knew no better; but equally untrue in many of his descriptions with those of Mr. Dilke. For instance, he said the coffee planter was of the type of the Haleys and Legrees of "Uncle Tom's Cabin," who considered he had a right to wallop his own nigger whenever he pleased; and the merchants, he said, marked all their best coffee *mocha*; both statements being downright fabrications; but they were sensational, and doubtless helped to make the book sell. Well, to return to the Prince, his visit here will be as good as an advertisement to us, and will tend to make our quiet little island better known, and, we hope, better appreciated than it is. That this is necessary no better proof exists, in addition to the facts above related, than that of an English paper the other day commenting on a statement made by one of our local journals, to the effect that £24,000 were to be voted by the Legislative Council, to defray the cost of the entertainment of his Royal Highness:—"All very well," says this sage critic, "for you people of Ceylon to vote away our money—the money taken out of the pockets of the British tax-payer. But we object to you having the fun and we the pay." Let us inform said critic, however, that whatever may be voted by the Ceylon Government (and the subject has not yet been even broached in the Legislative Council), it is our own money—not that of the English tax-payer—that will be spent. Let us tell him, further, that Ceylon is the only colony of Great Britain that pays her own expenses, and does not cost the mother-country a farthing; and, therefore, we may be allowed to be liberal in entertaining a Prince of the blood without our generosity being cavilled at, or our propriety being called in question. All this is something to know, and it is as well that our English friends who are disposed to be critical should know something of our position. Therefore, again, the visit of the Royal Duke will be heartily welcomed. So also would be the visits of every member of that Royal house. Let us hope that when he does come there will be in the Prince's train—

"A chield amang us takin' notes,"

and that he'll print them.

GALLE, Sept. 28.

The following items are from the *London and China Express Telegraphic Extra*:—

The M. I. steamer *Hooghly* arrived on the 25th inst., after a very favourable passage (much before her time), bringing the China mail of the 9th idem. She left Singapore on 17th inst. She sailed this morning for Suez.

The s. s. *Tigre*, with European mails (London, 2nd inst.), arrived 27th inst., and sails this afternoon for China.

The telegraph lines have lately been interrupted between England and India, and a dearth of telegraphic news has been the consequence.

Our last issue per English mail of 22nd mentioned the rumoured loss of the *Carnatic*, which was only yesterday confirmed.

EXCHANGE.—Unchanged.

## CEYLON, STRAITS, JAVA, CHINA, AND JAPAN IMPORTS.

YOKOHAMA.—The market for the two principal staples, Yarn and Shirtings, had maintained the active tone noted in our issue of the 18th ult. An advance in prices, noticeable especially in Shirtings, had been established, and holders continuing firm, an improved business was looked for. For Cotton Yarn a fair inquiry existed, about 600 bales of all counts having been settled at advanced prices. It is gratifying to be able to announce that holders were firm and not tempted by the demand. Beyond a slight inquiry for Velvets, the above-named staples had enjoyed a monopoly of the business done. Camlets, Blankets, and all classes of Woollen Goods were stationary and without demand, though quotations remained without change. Nail Rod Iron and other metals were quiet,

Digitized by Google

with but small inquiry. Quotations:—Cotton Yarn, 16 to 24, $46.0 to $47.0 per picul; 28 to 32, $48.0 to $48.50; 38 to 42, $49.50 to $50.50; Grey Shirtings, 7 lbs., $2.40 to $2.45 per piece; 8.4 to 8.6 lbs., $2.90 to $2.95; Black Velvets, $8.25 to $9.60 per piece; T. R. Cambrics, $0.90 to $0.95 per lb.; Blankets, $0.45 per lb.

TIENTSIN.—An advance of two candareens had taken place in Grey Shirtings, and a similar improvement was noticeable in T-Cloths, 7 lbs. best Mexican being quoted Tls. 1.7.5 to Tls. 1.8.2.

HANKOW.—Grey Shirtings: The demand had been very limited, and prices during the early part of the fortnight declined two candareens per piece. Subsequently holders became firmer, owing to more encouraging advices from Shanghai; but the dealers showed little anxiety to get into stock, and the market closed quiet. 7 lbs. goods had been inquired for, but heavy makes received no attention. Closing quotations were, Tls. 1.96 to Tls. 1.98 for 7 lbs., Tls. 2.15 to Tls. 2.19 for 8¼ lbs., and Tls. 2.80 to Tls. 2.95 per piece for 9¾ lbs. goods. White Shirtings: Beyond a few transactions in 64/66 reeds at easier rates, nothing had been done in these goods. T-Cloths: There had been a small inquiry for 8 lbs. goods, but the amount of business done was unimportant; 7 lbs. cloth of good make had been sold at lower prices to a small extent. Drills had continued in fair inquiry at a slight decline on last quotations; low-priced goods were most in demand. Fancy Cottons: Dyed Spots and Brocades had been inquired for at higher prices, while White goods were lower, and almost unsaleable. Dyed Damasks and Black Velvets had been sold at a decline, and were not much wanted. Camlets: Few transactions reported, and sellers had submitted to a decline in prices in order to induce business. Lastings extremely dull of sale. Long Ells: Scarlet again 5 candareens per piece lower, without inquiry; Indigo wanted at about Tls. 7 per piece for a good shade; Assortments quiet. Spanish Stripes little wanted. Medium and Broad Cloths found buyers to some extent at low prices. Figured Orleans had been in little demand, and sales were not readily effected. Metals: Sales in Lead had been made at Tls. 5.30 to Tls. 5.40 per picul, but the market was weak; transactions in Quicksilver were few, and the market was quiet; Tin advanced in price, owing to the market being bare of stock.

SHANGHAI.—We have to report a fair business in the chief staples during the fortnight, but only in Grey Shirtings can a decided improvement in price be noted. Arrivals of cargoes from England had been numerous, but the high cost of the goods had prevented their being forced on the market. Grey Shirtings: The increased firmness of holders and the comparatively light stocks in dealers' hands had tended to raise rates, and prices were 5 cands. per piece higher for ordinary goods (8-4 lbs.), and 3 cands. per piece for Eagles; 7 lbs. had been in active inquiry at a rise of 7 cands. per piece for fair makes, and 5 cands. per piece for best Eagles. Heavy goods dull with but few buyers—7lbs. Tls. 2.0.1 to Tls. 2.0.3, 8-4 lbs. Tls. 2.1.9 to Tls. 2.2.3, and 9 lbs. to 9-12 lbs. Tls. 2.4.5 to Tls. 2.8 5 per piece. T-Cloths: There is but a limited business to report in these goods, and prices were somewhat lower. Quotations—6 lbs. Tls. 1.3.5 to Tls. 1.6.0, 7 lbs. Tls. 1.6.0 to Tls. 1.8.7, and 8 lbs., 36 inch, Tls. 2 to Tls. 2.1.5 per piece. White Shirtings: Improved demand for the lower counts, and prices 5 cands. per piece higher. Sales between 8,000 and 9,000 pieces. Prices—Tls. 2.1.0 to Tls. 2.1.5 for 56 reed, Tls. 2.2.0 to Tls. 2.2.5 for 60 reed, Tls. 2.3.5 to Tls. 2.4.0 for 64 reed, and Tls. 2.4.5 to Tls. 2.5.0 for 66 reeds. Drills: The chief sales of the fortnight had been of American Cloth (mixed chops) at a fall on last prices, Tls. 4 per piece representing the value of best American cloth. English and Dutch dealt in to a fair extent at last prices. Sheetings quiet, prices lower. Jeans: Sales of American at a further fall, and there were Chinese re-sellers at Tls. 3.1.5 per piece. English Cloth in demand at Tls. 2.85 to Tls. 2.90 per piece. Fancy Goods: A moderate business reported in Gentian Shirtings, Chintzes and Turkey Red Cloth, at about last prices. Dyed Brocades higher, with good inquiry. Woollens: Assorted Camlets rather lower, and difficult to place, though some colours show a slight rise. In Long Ells, Medium Cloth and Spanish Stripes the business had been limited, while about 4,000 pieces of Figured Orleans are reported as sold at a small improvement in value. Crape Lustres and Crape Lastings had slightly given way in price. Metals—Iron: The market had been very dull, only 5,000 bales of Nail Rods having found buyers at Tls. 1.9.0 to Tls. 2.1.0. Bars neglected, no transactions. Stock of Nail Rods heavy, being estimated at 90,000 bdls., that of Bars about 4,000 piculs. Lead: Stock considerably reduced; some speculative purchases at Tls. 4.8.5 to Tls. 5.0.0. Holders firm. Coals: Transactions unimportant, and quotations unchanged. Arrivals—Cardiff, 686 tons, Newcastle, 1,430.

FOOCHOW.—The following have been the transactions during the interval:—1,000 pieces, 7 lbs., T-Cloths, at $2.40 per piece; 500 pieces, 8 lbs., Grey Shirtings, at $2.95; 1,000 pieces, 8¼ lbs., Grey Shirtings, at $3.05; 100 pieces Scarlet Camlet, at $18; 120 pieces Assorted Camlets, at $17.25; 100 pieces Scarlet Long Ells, at $8.50; and 1,175 piculs Lead, at $7.50 for cash and $8 to $8.25 against Tea.

HONG KONG.—Messrs. Olyphant and Co.'s Circular, dated 9th September, contains the following report:—Cotton Yarn: Settlements have been upon a large scale, and stocks in foreign hands are now reported to be less than 2,000 bales of all counts; the inquiry continues strong, and sales in some instances show an advance of $3 to $5 per bale, but a general rise of $2.50 per bale is to be noted. With the small supply now on offer, importers are showing no particular desire to make sales even at the advance, as a further rise in the market is thought likely. Piece Goods: The market has ruled firm for all descriptions of Cotton Goods, and a further slight improvement is observable in most of the staple manufactures. 7lb. and 8.4lb. Grey Shirtings are dearer, and meet with ready sale at an advance of 2c. for the former and 5c. for the latter; 8.4 lb., however, are not freely offered at this figure, as higher prices are demanded. Common White Shirtings are wanted at a rise of 5c. per piece, while the better qualities are not so much in request. 6lb. and 7lb. T-Cloths show an enhancement in values of 2c. to 5c., and whilst an active inquiry exists for the lower qualities, the best chops of these weights are in but slight demand. Drills have commanded increased attention, and the sales made have been upon more favourable terms. One or two small lots of American have found buyers at $5.15 to $5.20 per piece, but holders' ideas are now somewhat above these rates, though dealers have shown no disposition to make large purchases at the figures mentioned. Sales of Dutch amount to nearly 6,000 pieces, prices realised showing an advance of 10 cents; the stock on offer is very small. Woollens: Beyond a large auction sale of 2,000 pairs of 7 lb. and 10 lb. Blankets nothing of special moment has transpired, and no particular change has to be noted other than a decline of 2 to 3 cents in Scarlet Spanish Stripes. Metals: Prices of Iron Nail Rod are unchanged. Bar Iron is lower, though holders of Soft are not willing sellers at quotations. Hoop continues firm. Steel is lower. Lead has declined 10 to 20 cents. Large quantities of Tin have come to hand, and in consequence rates have fallen $2 per picul. Quicksilver is more firmly held. Coal: Arrivals have been—4,239 tons Sydney, 1,700 tons West Hartley (to consumers), 2,800 tons Anthracite, and 2,220 tons Cardiff. Sales have been 3,989 tons of Sydney at $5 to $6 per ton. Ginseng: The inquiry is not active, and the market has a downward tendency. Sales reported are—104 large casks Crude at $118 per picul, and 40 half-casks White at $170 per picul. The current quotations were:—Cotton Yarn, Nos. 16 to 24, $135.00 to $140.00 per bale; 28 to 32, $145.00 to $150.00 per bale; 38 to 42, $153.00 to $157.50 per bale; Grey Shirtings, 7 lbs., $2.55 to $2.60 per piece; 8.4 lbs., $2.87½ to $2.92½ per piece; White Shirtings, $2.50 to $4.80 per piece; T-Cloths, 6 lbs., $1.90 to $2.10 per piece; 7 lbs., $2.17½ to $2.60 per piece; 8 to 8.4 lb., $2.75 to $2.85 per piece; American Drills, 40 yards, 15 lbs., $5.15 to $5.20 per piece; Dutch Drills, 40 yards 14 lbs., $4.60 to $4.80 per piece; Spanish Stripes, Scarlet, $0.73 to $0.75 per yard; ditto, Assorted, $0.70 to $0.72 per yard; Medium, Ladies' and Habit Cloths, $1.15 to $2.00 per yard; Long Ells, Scarlet, $7.80 to $7.90 per piece; ditto, Assorted, $7.70 to $7.80 per piece; Camlets, SS., $16.25 to $16.50 per piece. Iron—Nail Rod, $2.70 to $2.75 per picul; Lead, $6.25 to $6.80 per picul; Tin-Plates, $6.25 to $6.50 per box; Steel, $4.25 to $4.50 per tub; Coals, English, $8.00 to $8.50 per ton; ditto, Welsh, $9.50 to $10.00 per ton.

BATAVIA.—Maddapollams:—Dutch White: In little demand at last rates. Unbleached: Trifling sales. English white: Quite neglected. Unbleached: Held for higher rates. Shirtings—Dutch white: Demand still small. Unbleached: Small supplies, and wanted. English white: Little demand, some qualities saleable at low prices. Unbleached: Holders firm and prices rising. Cambrics: Still dull of sale. Drills—Dutch: Demand increasing. English: Saleable at advanced rates. Blue: Nothing doing. Jaconets—Plain: Unsaleable. Printed: Suitable styles saleable. T. R. Cloth: Saleable at low rates. Dyed Cloth: No transactions. Prints: Demand for green diminished, padded pinks saleable, prices somewhat lower. Mule Twist: Small supplies, holders firm, but the demand is small. Turkey Red: In no inquiry. Green and Orange: Saleable. Sewing Thread: Still of ready sale. Batticks: Prices low, and market quiet. Blankets—Woollen: Saleable. Molton: In some inquiry at lower prices. Iron—Swedish: No demand, market amply supplied. English: Overstocked, sales by auction; out of hand unsaleable. Steel: Arrivals. Sheet Copper: Saleable occasionally. Zinc—Sheet: Little request. Spelter: Saleable. Lead—Sheet: Neglected. Pig: In some demand. Iron Nails: Good assortments of ready sale. Copper Nails: Without inquiry. Tin Plates: Prices improving. Coals—English and Australian: Overstocked and no demand; more supplies expected. Flour—American and Dutch: Overstocked and unsaleable.

SINGAPORE.—Grey Cloth, after showing considerable advance, had receded, and was quoted $2.97½ to $2.95 per piece for 8¼ lbs. Madapollams maintained previous rates; transactions small. Light weight T-Cloths in fair inquiry at last quotations; heavier weights dull. Drills: In less demand. White Shirtings: Medium to fine placed to fair extent, at easier prices. Low Reed Shirtings: In small stock; few sales reported. Imitation Irish Linens: Less inquired for. Cambrics: In moderate inquiry; prices a shade better. There had been some sales of Jacconets, but at low rates. Figured Shirtings: More inquired for, and sales of Spots at slightly better prices. Dyed Cottons dull. Turkey Red Cambrics: Sales of light weights at previous rates; heavy cloth unsaleable. Sarongs sold to some extent, but at poor rates. Batticks very dull. Grey Yarn in fair inquiry. Woollens of all descriptions out of demand; trifling sales of Spanish Stripes and Ladies' Cloth. In metals only a small business. Iron in large stock; demand limited, prices weak. Lead sold at a reduction on last rates. Yellow Metal in better inquiry. Coals unimproved; a cargo of 600 tons Cardiff had been placed at $8 per ton ex ship.

PENANG.—The business done during the fortnight had been very much restricted, as holders of the principal staples had remained firm, and refused to operate, unless the price demanded by them be given by intending purchasers, who only supply themselves with what goods they actually require. Grey Shirtings were not in heavy stock, and the small quantity disposed of had been at somewhat hardened prices. 6 lbs. at $18 per corge; 7 lbs., $52 per corge; 8¼ lbs., $61 to $63 per corge. Grey Long Cloths neglected. Grey Madapollams: Sales effected of 8 lbs. goods at $22½ per corge. Grey T-Cloths continued in fair demand, and sales reported at slightly firmer prices. In 4 lbs. nothing done; 5 lbs., inferior, $32½; superior, $35 per corge; 6 lbs., $39½ to $39¼; 7 lbs., $45 to $45¾ per corge. White Shirtings: Prices ranged from $65 to $86 per corge for 36 inch, medium, and from $88 to $110 per corge for fine—the "low fine" had been in the best demand. In 45 inch goods no transactions.

COLOMBO.—The following is from Messrs. Geo. Wall and Co.'s Report—We have a very limited business to comment upon, and we again close with "nothing doing." The Chelties have been alarmed by the sudden lowering of the offer for Cotton, and expect a corresponding reduction in the value of the manufactured article. As yet, however, there is hardly a quotable reduction, but the business done has been chiefly confined to the articles upon which the narrowest margin existed, while the qualities for which quotations showed a fair profit have been neglected. Thus in Grey Shirtings there have been sales of the lower and of the higher weights, while for the medium qualities, formerly most in demand, our quotation is quite nominal; 30 inch 7 lbs., 11s. 3d.; 8¼ lbs., 13s. 9d. to 14s.; 45 inch 8 lbs., 13s. 9d. to 14s.; 9 lbs., 16s. 6d. to 16s. 9d.; 10 lbs., 18s. 6d. to 19s.; 11 lbs. 20s. 6d.; 50 inch 10 lbs. 18s. 6d. to 19s.; 11 lbs. 20s.

## CEYLON, STRAITS, JAVA, CHINA, AND JAPAN EXPORTS.

### TEA.

YOKOHAMA.—Advices from America being unfavourable business had been quiet, and settlements did not exceed 1,000 piculs, chiefly of good medium and fine grades. Stocks were rather heavy, but of good quality. Prices showed no change, and although native dealers were anxious to realise, they were very firm in making no reduction as long as purchases continued. The Mary Lee and the Cedric were fully engaged; the Carobel, Janet Ferguson, Geo. Becker, and Phaeton were loading. The Great Republic sailed on the 29th Aug. with 168,102 lbs. for San Francisco and 34,702 lbs. for New York. Quotations:—Common, nominal; good common, $22.0 to $23.0 per picul; medium, $25.0 to $26.0; good medium, $27.0 to $30.0; fine, $31.0 to $33.0; finest, $36.0 to $37.0.; choice, nominal.

SHANGHAI.—Black: The market remained quiet for some days after the departure of the last P. and O. mail, and a small and quiet business was transacted at unchanged rates. Later on large and hurried transactions were entered into, and natives instantly demanded and obtained a considerable advance on previous quotations, the enhanced price showing itself more particularly in those grades possessing a little flavour, which had been previously ignored, except at a fractional advance on those possessing almost none. The tone of the market at the close was quiet, and natives were rather disposed to sell than to hold. The stock was materially reduced. Settlements for the fortnight, 36,000 chests; reshipments on owners' account, 6,000 chests; stock 95 chops, or 17,000 chests. Quotations (duty paid, at exchange for credits, six months' sight, 5s. 11½d. per tael, and freight at £1. 10s. per ton):—Hohow, common to fair, 1s. 2d. to 1s. 8d. per lb.; Oonam, common to good, 1s. 1d. to 1s. 5d; Ningchow, fair, 1s. 2¾d. to 1s. 3¾d.; Oopack, fair, 1s. 2¾d. to 1s. 4¼d. Green: The market had been a drooping one, few American buyers operating except to a very limited extent, at existing quotations, in the face of gloomy New York advices. A few English buyers had bought Teenkai Teas for the steamer Diomed, but in face of export figures equal to those of last year, no great spirit had been shown. Pingsueys had been bought at Tls. 35¼ to 39¼; Fychows, Tls. 29¼ to 36; and Moyunes and Teenkais, Tls. 37½ to 44¼. Prices upon the whole are Tls. 1 to 2 lower. Settlements for the fortnight, 34,000 half-chests; reshipments on owners' account, 900 half-chests; Stock 69 chops, or 45,000 packages.

HANKOW.—The following is from Messrs. Drysdale, Ringer, and Co.'s report:—Throughout the fortnight our market has been but barely supplied, only a few chops coming to hand daily, which have been at once taken at gradually hardening rates, till we now quote an advance of fully one tael per picul. Settlements for the time under notice have been 7,600 chests and 2,950 half-chests, at Tls. 16 to 19¼, the bulk being common to fair Oopak kinds at Tls. 17¼ to 18¼, as only two chops of Shuntan packed have been offered, which realised Tls. 16 respectively, and, till within the last two or three days, teamen found it very difficult to realise a higher figure even for teas of much better quality. The third crop teas are, we think, relatively better than the second; we have not, however, received many that can be called true thirds, as they have been mostly more or less mixed with second crop leaf. We are still unable to speak with any confidence as to our probable total supply, as the high state of the water has now for some time past interfered with the transit of teas from the country to this, rendering it very difficult to estimate the supply yet to come; native estimates show a deficit of 5 to 6 millions pounds; we are, however, disposed to think that about 8 millions will prove to be the quantity short of last year's supply. We quote Shuntam packed tea 16. Leeling and Oopack, common to fair, 17¼ to 18¼; fair to good, 18¼ to 19¼. Settlements from 21st ult. to 4th September 7,600 chests, 2,950 half-chests.

KIUKIANG.—Black Teas: Only three small chops had found buyers during the fortnight, but native speculators had purchased for resale on the Shanghai market, and prices had had an upward tendency. Quotations were—Ningchows, Tls. 16¾ to 17¾; Hohows, nominal. Exports from 1st Jan. to 4th Sept., 1869, 10,585,451 lbs.; ditto ditto, 1868, 13,161,590 lbs. Green Teas: Contrary to general expectation, only three chops had arrived in the fortnight, but should the winds be favourable a further supply of about 20,000 half-chests were expected. Exports from 1st Jan. to 4th Sept., 1869, 1,923,197 lbs.; ditto ditto, 1868, 852,376 lbs.

FOOCHOW.—A large business had been transacted during the fornight. Congous had been in very brisk demand, principally on English account; settlements (which for the fortnight amounted to 49,000 chests) consisted principally of the low to good common kinds, and had been made at fully previous quotations. The few arrivals of better grade Teas from the Sar Yune, Yung How and Kaisow districts had been eagerly competed for at advancing rates. Supplies were coming in much more freely from the country; and, although the arrivals showed a marked falling off as compared with last season, it was generally expected that the total yield of Congou for the year would show but a very small deficiency. Souchongs: Owing to the poor assortment on offer, only a small business had been done. Oolongs: American buyers had not entered the market, and there were no transactions to report. Scented Teas: In limited inquiry and rather cheaper. Flowery Pekoes: About 1,400 chests had found buyers at very full prices. Settlements for the fortnight:—Congou, 49,159 chests, at Tls. 9.8 to Tls. 26.8 per picul, ship off; Souchong, 2,922 chests, at Tls. 19.3 to Tls. 29.8 per picul, ship off; Oolong, nil.; Scented Teas, 3,621 boxes, at Tls. 22.3 to Tls. 26.05; Flowery Pekoe; 1,399 chests, at Tls. 16.8 to Tls. 54.8.

AMOY.—Congou: During the fortnight about 5,120 packages of low quality had been settled at $16 to $18. There was no stock left on the market, and but 5,000 half-chests more were looked for during the rest of the season. Oolongs: There was but little business to report, 852 packages had been taken at $18½ to $19 for common and for fair $21¾ to $22.

CANTON.—During the fortnight a fair amount of business had resulted, settlements consisting almost entirely of the commoner grades, of which stocks were generally composed; prices without change. No arrivals of Country Congou, and none in stock.

### SILK.

YOKOHAMA.—Arrivals had been on a fair scale, about 800 bales, consisting chiefly of medium hanks. Buyers had shown some disposition to operate, but the supplies comprised so very few lots of good, and the parcels altogether were so mixed, that settlements were not more than 550 bales. Stocks increased. Prices of good Silks had been well maintained. Common had been obtainable on somewhat easier terms. Quotations (all charges paid to London at exchange 4s. 5¾d.): Hanks, Mybash, Sinchu, &c., best, 30s. 11d. to 32s. 11d.; medium, 28s. 4d. to 30s. 3d.; inferior, 26s. to 27s. 7d.; Oshu, best, 30s. 3d. to 32s. 2d.; Coshu, best, 26s. 5d.; medium, 24s. 7d. to 25s. 8d. Silk Worms' Eggs: Total arrivals now amounted to 400,000 cards, against 1,500,000 to date last year. Buyers had given way to a small extent, and made some purchases. Total settlements estimated at 75,000 cards. Common to good held at $½ to $3½; best at $3½ to $4½.

SHANGHAI.—Messrs. C. J. Skeggs and Co. report as follows:—There is little of interest to notice as regards this market, and no change in prices can be quoted. Settlements for the fortnight are estimated at 1,800 bales, about 600 of which have already been shipped per French mail, and other opportunities. The dealers are very anxious to sell, but firmly hold out for previous rates, and it is only at the close that a few needy owners of common Silks may have given way about Tls. 5; this description, however, runs so mixed and irregular, as evidenced by the large quantity rejected, that the market cannot be considered in favour of buyers, especially as exchange has slightly advanced. In Tsatlees chop Silks are unchanged. A few crack No. 1 Kahings have been taken at Tls. 500, which shows an advance, and Chincums are also a shade higher, but all other classes are nominally as before, and firmly held.

## JAVA, STRAITS, AND CEYLON PRODUCE.

BATAVIA.—Arrack: f.120 to f.125 per leaguer; sales, and in good demand. Cloves: f.18 to f.20 per picul; dull. Coffee—Java: f.31 to f.32.50 per picul; sales. Cubebs: f.17 to f.18 per picul; nothing doing. Gutta Percha: f.60 to f.120 per picul, according to quality; market bare. Gum Damar: f.46 to f.48.50 per picul, sales; supplies. Hides: Cow f.35 to f.40; Buffalo, f.23 to f.25 per pound, according to quality. India Rubber: f.90 to f.100 per picul; sales and scarce. Indigo; Sales at Samarang, f.5.25 to f.5.35 per lb. for first quality. Mace: f.110 to f.115 per picul—wanted. Nutmegs: f.110 to f.115 per picul—sales. Pepper—Black f.18, White f.30 per picul; no stocks. Rice in demand; first quality, f.150 to f.160; second quality, f.120 to f.130; cargo, f.95 to f.100—per Coyang. Rattans: Borneo f.10.50 to f.13 per picul, and Padang f.8 to f.8.50 per picul. Sapanwood: Manila in bond f.5—none; Java f.3 to f.3.50 per picul—sales. Sugar: No. 14, f.16.50 per picul.

SINGAPORE.—Gambier: About 1,500 tons sold at $3.30 to $3.20, the latter being the closing price. Black Pepper $7.10 to $7⅛. White Pepper very scarce, and worth $10.60 to $11. Sago Flour: 9,000 piculs Borneo sold at $2.70 to 2.75. Contracts for Singapore at $2.72½. Pearl Sago very active, small grain contracted for at $3.30 to $3.35, large grain at $3.40. Tapioca dull at $4⅛ to $4⅜. Buffalo Hides in good demand at $10¾ to $11½. Buffalo Horns without arrival, wanted at $10½. Gum Damar out of supply, worth $17. Rattans in better supply, good quality worth $3 to $3⅜; common, $2 to $2½. India Rubber: An arrival of 100 piculs brought $36. Guttapercha: Purchases at $65 for No. 1 quality. Camphor in more demand, market cleared at $19 for shipment to India. Cassia Lignea held for $20½. Cubebs very dull, worth $7½ to $8¾. Coffee: 1,500 piculs Benthyne taken at $12⅜, stock held for higher prices. Nutmegs: No arrivals, worth $50. Mace in demand, worth $55.

PENANG.—Pepper: No business. Tin had not come forward to any large extent; the greater part offered was secured for China; prices, $30.12½ to $30.75 per picul. Sugar: None offering. Hides: Buffalo scarce; purchases at $10.10 per picul. Cow Hides scarcer, at $13.50 per picul.

CEYLON.—Coffee: Moderate business in Plantation, at about former prices. Native: Market bare of supplies; prices nominal. Cinnamon: Prices maintained by good advices from home markets. Cocoa Nut Oil: Fair business at £34. 10s. to £35 per ton. Coir Yarn in some inquiry, at 20s. to 24s. per cwt. for medium, finer descriptions quoted 27s. to 30s.; supply limited. Plumbago: No transactions; good bright lump £14, and dust £4 to £5.

## TELEGRAMS SINCE LAST MAIL.

(Received by Atlantic Cable, Oct. 26.)

The Pacific Mail Company's steamer *America* has arrived at San Francisco with dates to Sept. 18 from Hong Kong, Shanghai 20th, and from Yokohama 29th. The Duke of Edinburgh, after a most brilliant reception in Japan, left in the *Galatea* for Shanghai on Sept. 16. Sir Harry Parkes was assaulted in Yedo by a Yaconin, who was promptly arrested. The Japanese Parliament had voted the surrender of the estates and revenues of the Daimios to the Mikado; honorary titles to be conferred on them, and to be relieved of the expense of their retainers. [This confirms the report given in our issue of Oct. 22.—Ed. *L. and C. E.*]. Mr. Consul Markham is a passenger by the *America*.

(Received via Galle Oct. 27.)

Hong Kong, Sept. 30.—Grey Shirtings, 6½ catties, 8¼ lb., $2·90; market quiet. Water-twist, 16-24, $142½. Cotton, Bengal, fair medium, $18. Tea firmer—prices check business. Total export (China and Japan), 87,500,000 lbs. Exchange on London, Bank bills, six months, 4s. 6¼d.

Shanghai, Sept. 24.—Grey Shirtings, 6½ catties, 8¼ lb., 2.30 taels. Cotton: Shanghai, 18 taels. Silk moderate demand, but firmer; No. 8, Tsatlee, 570 taels. Settlements since departure of last mail, 2,700 bales. Export to date (China and Japan), from commencement of season, 25,500 bales. Exchange on London, Bank bills, six months, 6s. Freights: Tea, £1 10s.

## COMMERCIAL POSTSCRIPT.

The amount of bullion by the P. and O. Company's steamer *Nyanza*, from Southampton, on the 30th ult., was—in gold, to Bombay, £2,900; to Galle, £20,400; to Madras, £21,879; in silver, to Bombay, £15,000, to Hong Kong, £12.365; to Penang, £14,800; to Singapore, £9,860; total in gold, £45,179; in silver, £52,025.

The following telegrams appeared in the *Daily News*:—

The steam launch *Pauline*, under the command of Captain Kirton, of the Peninsular and Oriental Company's service, has surveyed the Suez Canal throughout, taking soundings all the way. The report is, that the Canal is a sterling success. The least depth in the channel is twenty feet, and the remaining obstructions are being rapidly removed.

Mr. John Pender, who has taken a leading part in the establishment of submarine telegraphy with India, proceeds to Egypt for the opening of the Suez Canal.

Tenders have been invited for bills on Ceylon for Rupees 260,000.

SHIPPING.

Arrivals not in the Tables.—At Gironde, from Bangkok, Glenallan; Oct. 1, off Galveston, from Canton, Walter; 15, at San Francisco, from Yokohama, Horatio Sprague; Sept. 7, at Valparaiso, from Hong Kong, Lima; Oct. 28, off Plymouth, from Bassein, Beautiful Star; 25, at Bremerhaven, from Bangkok, Felicie; 30, at London, from Canton, &c., Douglas Castle; 11, at San Francisco, from Colombo, Voyager; 30, at Falmouth, from Rangoon, Princess Beatrice; 28, at Zierikzee, from Batavia, for Rotterdam, Nestor; Nov. 1, at London, from Singapore, Eleanor.

Departures.—Oct. 27, from London, for Colombo, Teviot; for Hong Kong, Tonbridge; 25, from Sunderland, for Nagasaki, Aztec. Oct 28, from London, for Shanghai, Lahloo; 14, from San Francisco, for Hong Kong, Nellie Abbot; Sept 15, from Monte Video, for Batavia, Courser, Albion; Oct. 29, from London, for Hong Kong, Isles of the South; for Shanghai, Ariel; 25, from Penarth Dock, for Hong Kong, Lena; 24, from Shields, for Galle, Webfoot; 18, from San Francisco, for Hong Kong, Singapore; 30, from London. for Cardiff and Singapore, Milton; 4, from San Francisco, for Hong Kong, Mauritius; from Texel, for Batavia, Waterloo; 27, from Glasgow, for Penang, Hyacinth.

Laid-on.—At London, for Newchwang, Walton; for Penang, Benvoirlich; for Singapore and Penang, Volunteer. At Liverpool, for Singapore, Lizzy. At Glasgow, for Singapore, Lockleven Castle. At Greenock, for Hong Kong, Sunshine.

Spoken.—Johanna Christina, Rotterdam to Batavia, 23 days out, N., 24 W.; Alcyon (Dut. barq.), Rotterdam to Sourabaya, Sept. 31, N., 24 W.; Felicie, Bangkok to Bremen, Sept. 26, 34 N., 34 W.; Niagara (ship), Cardiff to Hong Kong, Sept. 5, 8 N., 24 W.; Elliot, Sunderland to Galle, July 12, 18 N., 25 W.; William Clowes, Colombo to London, Sept. 25, 16 N., 32 W.; Barque, No. 0,321, 2nd d.p., Colombo to London, Oct. 24, 46 N., 24 W.; Jas. Shepherd, London to Hong Kong, Aug. 1, 13 S., 31 W.; Her Majesty, Manila to Queenstown, Sept. 5; Amor (?) (English barque), Manila to Queenstown, Sept. 29, 39 N., 34 W.; Grace Peille, Clyde to Hong Kong, Sept. 16, 12 N., 25 W.; Abot (?), for Galle, Sept. 17, 13 N., 26 W.; Panama, Liverpool to Hong Kong, Aug. 20, 24 S., 28 W.; John Eleanor (?), Ceylon to London, 69 days out, Sept. 8, 11 N., 26 W.

Miscellaneous.—Off St. Helena, Sept. 22, Athole, Gorley, from Sourabaya, for London, not as before reported. Advices from St. Thomas', dated Oct. 13, state that the cargo ex-condemned ship A. Lloret, Gonzalez, from Manila to London, would go forward per Ferdinand Brunim. At Callao, Sept. 19, Camilo Cavour, Asterquia, from Macao and Payta, and sailed 25 for China. At Utsalady, previour to Sept. 27, F. A. Palmer, King, for Hong Kong.

Casualties.—The Kingdom of Belgium, Singapore to New York, is reported ashore in Delaware Bay.

## BIRTHS, MARRIAGES, AND DEATHS.

BIRTHS.

Fraser—On the 6th Sept., at Samarang, Java, the wife of William Thomson Fraser Esq., of a son.

Furniss—On the 31st Aug., at Yokohama, Mrs. Joseph Furniss, jun., of a son.

Hooper—On the 23rd Sept., at Plymouth, the wife of Capt. J. B. Hooper, of China, of a daughter.

Jerdein—On the 26th Oct., at Stoke Goldington Rectory, Newport Pagnel, the wife of the Rev. Charles Jerdein, of a son.

Kustermann—On the 24th Sept., at Singapore, Mrs. F. Kustermann, of a daughter.

MARRIAGES.

Brooke—de Windt.—On the 28th Oct., at St. Michael's, Highworth, Wilts, by the Lord Bishop of Labuan and Sarawak, assisted by the Right Rev. Bishop McDougall, the Rev. J. B. Smeaton, and the Rev. F. Norman, H.H. Charles Brooke, Rajah of Sarawak, to Margaret Lili Alice, only daughter of the late Clayton de Windt, Esq., of Blunsdon Hall.

Jones—Batchelor.—On the 27th Oct, at St. Bartholomew's, Sydenham, by the Hon. and Rev. Augustus Legge, Herbert Jones, Esq., B A., son of the late Richard Jones, Esq., of The Lawns, South Norwood, to Florence Emily, eldest daughter of Henry Batchelor, Esq., of West-hill, Sydenham.

Morris—Caldwell.—On the 9th Sept., at St. John's Cathedral, Hong Kong, by the Rev. Canon Beach, Alfred George Morris, to Sarah Ann, eldest daughter of D. R. Caldwell, Esq., of Hong Kong.

DEATHS.

Haslewood—On the 29th Oct., at Hendon Park, Highwood, Lewis H. Haslewood, aged 63.

Lincker—On the 12th Aug., at sea, on board the N.G. barque *Lorelei*, between Hong Kong and Newchwang, Mr. A. G. Lincker, of Hong Kong, and formerly of Swatow.

Poulson—On the 13th Sept., at Hong Kong, Wilhelm L. T. Poulson, of Elsinore, Denmark, aged 28.

Short—On the 22nd Sept., Howard Samuel, aged five years; also, on the 24th, Alice Maud, aged seven years—children of Mr. James Short, of Madras; and, on the 26th, Katharine, wife of the above. All died of cholera, after a few hours' illness.

Strutt—On the 24th Oct., at Richmond-terrace, Southampton, Capt. William Stru F.R.G.S., Superintendent Union Mail Company, aged 48.

## THE MISSIONARY IN CHINA.'

IN our last issue we noticed an ably-written paper by Mr. KNOWLTON on this subject, and the manifesto addressed to Sir RUTHERFORD ALCOCK by the Missionaries at Peking. In another column will be found an article from the *Globe*, in which the arguments adduced in the last-named document are warmly supported. The only point on which the *Globe* differs with the authors is that of their right to settle in the interior, which, the *Globe* thinks, is based on an insufficient plea, namely, the "favoured nation clause" in our Treaty. It is quite true that there is no provision in the Treaty of Tientsin that directly grants the right of residence in the interior for the purpose of teaching Christianity, and that it is only the fact of Roman Catholics having been previously allowed the privilege that gives our own Missionaries the right to claim a similar indulgence. But, in our opinion, no better ground than this is required. The so-called "favoured nation clause" is as much an integral part of the Treaty as any other, and should be as stringently enforced. The fact that the Jesuits have been permitted to make good their footing in the inmost recesses of the Empire should be, and is, a powerful incentive to good Protestants to obtain similar advantages and opportunities for teaching their own faith; and so long as those who push forward in this path are guided by moderation and discretion, nothing but good can come of their endeavours. As the *Globe* justly remarks, we must not forget that there are Missionaries *and* Missionaries; we must not confuse the able, highly-educated, and intelligent class of Missionaries, whose labour has been so fruitful in good works, with those others whose well-meant but ignorant zeal has so far exceeded the bounds of discretion as to make them a laughing-stock. It is to be hoped that the Home Government will learn to appreciate this distinction. Under the present *régime* peace and retrenchment are to go hand in hand, and all must give way before them—but we trust Christianity is not to be thrown overboard, even to secure these precious results. Sir RUTHERFORD ALCOCK some time since enunciated views on the Missionary question that his Government might well have taken a lesson from, but from more recent indications we fear he has hardly courage to stand by the position then taken. If the cause of Christian Missions and the rights of their ministers and converts are to be thrown over as a sop to the Chinese, and in deference to the narrow-minded, worldly policy of the Duke of SOMERSET and his supporters, a day of reckoning will come, and at no distant date, when the people of England will learn a harsh and unpalatable lesson, when the alternative will be presented to them, either of enduring a series of ever increasing humiliations, not only in China, but before the whole world, or of launching into another costly and unpopular war. The only way to avoid this is to be just to the Chinese, and equally just to those who represent our commerce and our religion in China, by firmly defending all the rights we have acquired, and being always ready to enforce them against the shuffling, deceitful policy of the native Government.

## LETTERS ON THE POLITICAL SITUATION IN CHINA.

A PAMPHLET issued in Shanghai under the above title contains three ably written letters addressed to the editor of the *Daily News*, by Mr. JAMES B. ROBERTSON, in June and July of the present year. It is not at all clear why Mr. ROBERTSON should have selected the *Daily News* as the medium for bringing his views before the public. The letters being avowedly intended as a protest against what the writer mildly terms the "mistaken policy" of our present Government towards China, were far more likely to find their way into the waste-basket than into the columns of a journal devoted to the Liberal Cabinet. *The Times*, though greatly to be blamed for its vacillating course with regard to China affairs, at any rate deserves credit for a degree of impartiality that gives a fair hearing to both sides of the question, and had Mr. ROBERTSON addressed his communications to the leading papers, they would no doubt have been published; but in the *Daily News* they were not. Second-class journals are not so eager to accord publicity to communications that tell strongly against the policy of their own party. Perhaps it was some prevision of the fate that would befall his letters in this country that induced Mr. ROBERTSON to publish them in the *North China Herald*, and to issue them in pamphlet form also. They undoubtedly form a valuable contribution to the discussion now pending on the question of British policy in China. The first is principally devoted to an exposition of the absurd error made by Lord CLARENDON in treating the Chinese Government as though it were the Government of a civilised and Christian nation, and in crediting this "central Government" with all the powers that a central Government in any European State would naturally possess. The entire absence of any public opinion or true patriotic feeling among the people is strongly insisted on; and manifold reasons are adduced for the conclusion that the present policy, in whatever light it may be viewed, is one of retrogression. The second letter is devoted to the origin and objects of that contemptible, but unhappily successful imposture, the BURLINGAME Mission; a subject on which Mr. ROBERTSON'S views are precisely identical with those so frequently expressed in these columns. The third letter contains a general review of British policy in China, and its results, immediate and prospective. And here the writer expresses his conviction that the fate of the present policy is already sealed, for its utter inconsistency has been so clearly manifested, that an adherence to it is impossible, without incurring the danger of another war. In this we entirely agree; yet we could wish that Mr. ROBERTSON had been a little less profuse in his apologies for the GLADSTONE Cabinet. While protesting against their action, he palliates their motives in such phrases as this: "A liberal Ministry, anxious "to perform a generous and praiseworthy part towards all "nations, has suddenly, and without time for consultation with "its officials in China, agreed to a policy which is untenable in "itself, and which is based on erroneous ideas regarding Chinese "progress." Now we do not believe that the line of conduct pursued by Lord CLARENDON arose either from over-haste, or from an excess of generous impulse. It has been, from first to last, an obstinate, unreasoning persistence in carrying out the peculiar views of Mr. BRIGHT regarding our foreign policy; views that will very soon make the very name of England a subject for scorn and derision throughout the world, unless the better sense of Englishmen comes to the rescue, and the degrading GLADSTONE-worship of the present day is once more replaced by that spirit of patriotism that in former times maintained our reputation as a first-class power. We must wait and hope.

## THE TRADE OF SIAM.

WE lately noticed a satisfactory increase in the trade of Saigon, and are glad to find, from recent reports, that the trade of Siam also shows signs of steady progress. A comparative statement of exports during the last three years shows that, although during the year ending 31st July last there was a falling-off in the quantities of one or two of the principal articles shipped to China, the increased shipments to Europe, India, and the Straits are, on the whole, more than sufficient to counterbalance this. The export of rice, for instance, to China alone was about 135,000 piculs less than the preceding year; but the entire export to all parts

Digitized by Google

of the world showed an increase of nearly 274,000 piculs. Paddy shows a slight increase; hides the same. Sapanwood remains stationary; and of other important staples the only ones that exhibit a falling-off are sugar and pepper, and in both cases it is so slight as to be hardly appreciable. Considering that the year 1868 was pronounced to have exceeded all previous years in the value of exports, with the sole exception of 1864, these results cannot be considered otherwise than satisfactory; while most encouraging accounts are received regarding the prospect for the current year. Some apprehensions have certainly been entertained regarding the rice-crops, for, owing to the long-continued drought, supplies lately fell off to such an extent that several steam mills were obliged to suspend work. A sudden change of weather, however, accompanied by copious falls of rain, have completely dissipated these fears, and the production is likely to be at least equal to last year's. The quantity of tonnage finding employment in the Siam trade also increases steadily.

A report compiled by Mr. KNOX, Her MAJESTY'S Consul-General in Siam, conveys much interesting information on the trade of Bangkok. Up to the year 1867 the principal foreign trade of Siam was the export of rice to China. This demand then in a great measure ceased, either from exceptionally good crops in China or from the effect of a decree allowing a free export from province to province of that great Empire, and new markets had to be sought for the rice of Siam. This change threw the export business into the hands of the resident European merchants. In 1868 no less than sixty-nine vessels cleared with full cargoes for Europe, and others sailed for the Mauritius, California, and Australia. Teak was exported from Siam in considerable quantities to China in 1868, and the Burmese foresters, who have hitherto been working for the Moulmein market, have been fast coming over to the Siamese side, where the trees are much more easily got at. They state that some of the forests of Siam produce larger and better timber than those on the Moulmein side. Teel seed, or ramtil (*Guizotia oleifera*), is grown in the northern provinces of Siam. It yields a very bland oil, resembling olive oil in many of its properties; 49,000 piculs were exported in 1868. The total exports of Siam in that year exceeded those of any former year, with the single exception of 1864. The amount of tonnage employed by Siam was greater in 1868 than in any former year, and British vessels had more than their average share of this employment. Consul-General KNOX reports also that there is a great improvement in the build and general appearance of the British ships visiting Bangkok, that they are much better adapted to the trade than their predecessors of four or five years since, the crews very much better behaved, and with far more real sailors among them. 346 vessels, with an aggregate of 142,373 tons, entered Bangkok in 1868, with cargoes of the invoice value of £712,988; and 317 vessels, of 133,655 tons, cleared from Bangkok, with cargoes of the value of £999,817. A large proportion of the cargoes, especially in the entries inwards, were in Siamese vessels. Now that our Consular officials are becoming more apt at mercantile statistics their reports increase in value, and it is a pity publication of them is often delayed for so long a time.

## THE MISSIONARIES AT PEKING.

(THE GLOBE.)

Whatever may be the prejudices which surround the English character, there is deeply set in it an innate love of fair play and an instinctive objection to passing judgment on the *ex parte* statement of one side of a question without listening to what has to be said from the opposite point of view. Knowing this, we have no reluctance in again bringing before the public, not as accuser this time, but as apologist, that *bête noir* of the Chinese *literati*, the Duke of Somerset, and the late *Morning Star*, the Protestant missionary in China. It was too much to suppose that the constant attacks to which the members of that body have recently been exposed by a large section of the English press, the Foreign Minister, and his subordinate at Peking, could be borne by them in silence, more especially as the general and sweeping nature of the charges brought were capable of being disproved as against the whole community, although, doubtless, many might with certainty be fixed on some few of its individual members. The form their utterance has taken is a despatch signed by four missionaries of the London and Church Missionary Societies, resident at Peking, addressed to Sir Rutherford Alcock, with the understanding that it was to be forwarded by him to Lord Clarendon for the information of Her Majesty's Government. Much credit is due to the writers for the very temperate language in which it is couched. They begin by arguing that the real cause of the hostility entertained by the Chinese to Protestant missionaries is not, as stated by Sir Rutherford Alcock, chiefly owing to "the arrogant pretensions of Roman Catholic missionaries," with whom they are confounded, but to the fact of their being foreigners, who are one and all believed to be "encroachers on the rights of others, seekers after money and territory, or opium sellers." As a proof of this they state, and with truth, that almost every abusive placard which has been issued against them has charged them with seeking either some or all of these objects under the cloak of teaching religion and virtue, and they instance the case of one of their number who was driven out of a city in the province of Honan, by a mob led by the native gentry, who shouted after him, "You burnt our palace (Yuen min yuen), you killed our Emperor, you sell poison to our people, and now you come professing to teach us virtue." Thus the writers point out to Sir R. Alcock that instead of their teaching being prejudicial to the interest of commerce, their want of success is chiefly owing to the iniquitous nature of the main branch of our traffic. It will surprise some to learn that "there is very little difference annually between the total value of opium imported from India into China, and that of all the tea and silk exported from China to England and elsewhere." While at the same time the increased facility of transit afforded by the opening of the ports on the Yang-tsze to our trade has cheapened the native drug by one-half, and has trebled the number of smokers.

But they go further, and say that "England, both in its lawful commerce and its political interests," is a gainer, not a loser, by the residence among the Chinese of the missionary families. And they point with honourable pride to the hospitals and schools that have been opened under the auspices of the different societies, and to the assiduous care with which their medical members, often at the expense of health and life, minister to the physical wants of the poor. Much good also arises from their habits of living among the Chinese on a friendly footing, receiving them cheerfully into their houses, diffusing knowledge, and inculcating the practice of religion and virtue. They indignantly repel the assertion that they are desirous of being constantly protected by gunboats and soldiers. "The use of force in connection with missionary operations is most abhorrent to their feelings." All they ask is that the consuls should exert a friendly influence on the Chinese authorities to induce them to protect them when in the interior so long as they comply with the condition of their passports. To show that in most cases this can easily be done they relate how at the request of the English consul at Tientsin the native authorities at that city instantly put a stop to a persecution of native converts which was being carried on at a town 170 miles distant by the local magistrate at the instigation of the *literati*. They next proceeded to a point that must be considered doubtful, namely, their right of residence in the interior. Neither by the English nor French treaties is any such right granted, and the only plea, therefore, on which they can rest their claim is that, as a matter of fact, the Chinese Government has conceded to the Roman Catholic missionaries the right to settle in the interior for the purpose of teaching them religion, and that, therefore, under the "favoured nation" clause of the English treaty, it must be deemed that the same right is ceded to the English missionaries. It is a pity that their claim does not rest on some surer basis. They then go on to defend themselves against the charge which has been so constantly laid at their door of their being only half-educated men, and being quite unfit to interest in any way the upper classes among the Chinese. To this they answer "that nearly a hundred works on science, medicine, history, geography, law, and miscellaneous subjects have been published in Chinese by Protestant missionaries. These works have been composed in a style so acceptable to the learned class, that men belonging to this class, when acting as governors and viceroys, have reprinted at their own expense not a few of them." Further, that all the Chinese dictionaries yet made for English students are the work of Protestant missionaries. To them also are owing one of the best books on China, "The Middle Kingdom;" the translation of the Chinese classics into English, and of Wheaton's international law into Chinese, and the publication in China, as appears by a list recently published, of nearly 700 different works. "Is this the class of men," they ask, "worthy to be branded in the House of Lords as 'rascals or enthusiasts?'" The assertion made by Lord Clarendon, that disputes exist between the Roman Catholic and Protestant missionaries, seems scarcely borne out by the relation of the different cases instanced since the matter giving rise to the first and principal "unseemly difference" was the translation of "Pilgrim's Progress" into Chinese. This work has been translated into a great number of languages, and it has never been thought necessary to expunge the few and short passages that refer to the Roman Catholic religion. The French Consul at Ningpo, however, considered one passage reflected disrespectfully on the Pope, and made a formal complaint to that effect to the British authorities. The writers are right in assuming that such a paltry and foolish complaint cannot be taken as a proof of the existence of dispute between Protestants and Roman Catholic missionaries.

All that is then urged by these apologists is to a great extent true, and there can be no doubt that the assertions and charges made by their opponents were of far too general and sweeping a character. The truth lies between the two extremes. There are missionaries and missionaries. If we look at the four names attached to the despatch of which we have been speaking, we recognise them as the names of men of sound education, "fruitful in every good work," and respected alike by native and foreigners wherever they are known. On the other hand, the members of the inland mission under the guidance of Mr. Taylor are of quite another sort. They do not profess to be educated men. Their prospectus begins by saying that the originators of the mission do not see why men and women who have not received the blessings of education should not be capable of doing good among the Chinese. And, therefore, to test their theory they shipped off to China a number of poor ignorant people, whose illiterateness has made them the laughing-stock of the acute Celestials, and who showed their united discretion by dressing the female members of their association in the recognised costume of the local prostitutes.

## ARRIVALS.

At YOKOHAMA.—From London, Sep. 3, Georges; from Liverpool. Aug. 27, Southern Belle; from Cardiff, 28, Shalimar; Sept. 2, Auburn; Sept. 3, Naval Brigade; from Bordeaux, 2, Byron; from New York, Aug. 25, Moneka (str.).

At HIOGO.—None.

At NAGASAKI.—From London, Ravensbourne.

At SHANGHAI.—From London, Sept. 6, Ornate; from New York, 7, N. B. Palmer; from Newcastle, Aug. 29, Benvenue (reported by telegram).

At FOOCHOW.—None.

At AMOY.—None.

At HONG KONG and CANTON.—From New York, Sept. 10, Arracan.

At MANILA.—From Liverpool, Sept. 1, Peoro Plandosh; 7, Joaquina Victoria; from Newcastle, 3, Mariano, Wastford, Lydia; from Cardiff, 6, Cosmopolitan; from Cadiz, Aug. 31, Elena.

At SINGAPORE.—From London, Sept. 19, United Service (str.); from Glasgow, 15, Roslin Castle; from Liverpool, 15, Tycho Brahe; from Cardiff, 19, Oscar Mooyer; from London, Pactolus Rifle; from Liverpool, Penrith (reported by telegram).

At BATAVIA.—From Newcastle, Sept. 13, Adelaide; 16, Aberdeen; from Cardiff, 11, Patriach Samhiri; from Amsterdam, 8, Sourabaya Packet, Jacob van Lennep; 9, Kitty; from Rotterdam, 9, Europa, Hendrika, Johanna; 11, Catharina Maria; 13, Dronchet II., Neptunis; 16, Noach II., Hellevoetsluis; from Clyde, County of Ayr (reported by telegram).

At PENANG.—None.

At BANGKOK.—None.

At COLOMBO.—From London, Ocean Beauty (reported by telegram).

At GALLE.—From Cardiff, Sept. 29, Lloids.

## DEPARTURES.

From YOKOHAMA.—For Callao, Aug. 27, Harmonides.

From HIOGO.—None.

From NAGASAKI.—None.

From SHANGHAI.—For London, Sept. 8, Sir Harry Parkes; for New York, Argonaut.

From FOOCHOW.—For London, Aug. 28, Magellan; 29, John Milton, Sept. 4, Devaina.

From AMOY.—None.

From HONG KONG and CANTON.—For London, Sept. 1, Vanguard; 7, Grassmere; for Liverpool, Aug. 31, Veronica; for Hamburg, 5, Cecilia.

From MANILA.—For Cadiz, Aug. 30, Pepita.

From SINGAPORE.—For London, Sept. 18, Flora; for Liverpool, 20, Ottawa; for Liverpool and Glasgow, 11, Kinfauns Castle; for Boston, 12, Joshua Loring; for London, Diomed (str.), (reported by telegram).

From BATAVIA.—For Holland, Sept. 8, Bato Sirius; 16, Royal Sovereign; 17, General de Stuers.

From PENANG.—For London, Sept. 9, Ulleswater; 10, Albion.

From BANGKOK.—For Falmouth, f.o., Aug. 28, Benares; for Europe, Sept. 12, G. F. Verwerk.

From COLOMBO.—For London, Sept. 21, Skimmer of the Waves.

From GALLE.—None.

## VESSELS LOADING.

At YOKOHAMA.—For London, none; for New York, Cedric, Carobel, Janet Ferguson, St. Germaine.

At NAGASAKI.—For London, Vampire.

At SHANGHAI.—For London, Diomed (str.), Northampton, L'Emperatrice, Rollo, Pegasus, Fiery Cross, Hindustan, Tamerlane; for New York, Everhard, Nettie Merryman, W. Rickmers, Atma.

At FOOCHOW.—For London, St. Andrew's Castle, Queenof the Ocean, Inarime, Windermere (all full), Osprey, Empress, E. P. Bouverie, Lord Macaulay; for New York, none.

At AMOY.—None.

At HONG KONG and CANTON.—For London, Chetah, Cathaya, Invincible; for NewYork, Dr. Petermann, Rome, Good Hope.

At MANILA.—For London, Oriana, Hindostan; for London *via* Cebu, Asterias; for Liverpool, Oriana; *via* Cebu, Catalina, Westfold, Lydia; for Cork, Hope; for Falmouth, Angela; for New York, George Peabody, Formosa; for Boston, Wild Rover, Archer.

At SINGAPORE.—For London, Empress of India, Medway; for Liverpool and Glasgow, Roslin Castle; for Liverpool, Toronto; for Channel, f.o. Alfred.

At BATAVIA.—For Channel, Veronica, Scindia; for Holland, Catherine Rankin, Hilja; for Rotterdam, Maria, Burg. Hoffmann, Ridderkirk, Bali, Aegidia and Pauline; for Amsterdam, Johan, Atlas, Aimo, Charlie Palmer.

At PENANG.—For London, Mary Falconer, John Paul, Knighton; for Boston, Rainbow.

At BANGKOK.—For Europe, Indiana, Jeverland, Mikado, Preciosa, Solid, Thusnelda.

At COLOMBO.—For London, Passover, Benlide, Ocean Rover; for Boston, Asphodel.

## FREIGHTS AND CHARTERS.

At YOKOHAMA.—There is no vessel loading for London; to New York, £2 10s. to £2 15s.

At NAGASAKI.—For London, £4.

At SHANGHAI.—To London the rate is 30s. per ton of 50 cubic feet; the steamer Diomed is loading at £3 per ton of 40 ft.; to New York the rate is £2.

At FOOCHOW.—To London, £2.

At HONG KONG and CANTON.—Vessels on the berth are loading at £2 5s. to £2 10s. per ton; to New York £1 17s. 6d

At MANILA.—The Angela, for Falmouth or London for orders to a port between Havre and Hamburg, has engaged a full cargo of 8,000 quintals leaf tobacco at £2 10s. per 40 cubic ft., and the James Aikin, for London, loads further 7,000 quintals leaf tobacco at £2 per 50 cubic ft.

At SINGAPORE.—To the United Kingdom the only alteration is a decline of 2s. 6d. per ton.

At PENANG.—To London, dead weight, £2 10s.; measurement, £2 12s. 6d.

At BATAVIA.—To Rotterdam, 44f. to 45f.

At BANGKOK.—To London, £2 10s.

At COLOMBO.—To London, coffee in bags 35s., in casks 55s. to 60s per ton.

## MANCHESTER CHAMBER OF COMMERCE.

At a quarterly meeting of this Chamber, held on the 27th Oct., the condition of the China trade as regards British manufactures came under discussion.

The Chairman announced that Mr. Canny, a merchant in China, and French consul at the port of Chin-kiang, had attended, by request of Mr. D. Chadwick, M.P., and Mr. Watts, to address the Chamber on the subject of our relations with China. (Hear, hear.)

Mr. Canny said he had resided in China for several years, and had had considerable experience of the people and the mandarins. The present was a very important period, and it was of great moment that the questions at issue should be thoroughly discussed and understood. One of the provisions of the treaty concluded in 1858 was that there should be a decennial revision, and the requisite notice before that revision could be undertaken had been given by the English Government. That treaty was of vital importance to the manufacturing interests of England, because it was generally believed that if some reasonable modifications of the treaty could be secured, our exports to China in cottons, woollens, and metals would rise from eight millions sterling per annum to thirty millions. He looked for such an extraordinary expansion of trade when the illegal tolls and imposts which are now levied upon English goods in the interior of China were abolished. An *ad valorum* duty of 7½ per cent. was payable under the treaty; but everybody who had lived in the country knew that that was no indication of the charges actually made. There were barriers at short distances on every road and canal, at which black mail was exacted. He (Mr. Canny) found those illegal dues of tolls so excessive that it was impossible to send goods more than 50 miles into the interior. He determined to test the question, and sent up a cargo of goods with strict instructions to the men in charge that they were not to pay any illegal tolls. The goods were stopped, and he appealed, without success, to the mandarins and the Viceroy. Finally, he placed the matter before the British consul at Peking, who advised the consul to take prompt action, but nothing was done until, some of Her Majesty's war vessels happening to appear off the place, the consul made use of their presence in an indirect manner. As soon as the gunboats appeared the Chinese authorities at once gave way; the goods were allowed to pass into the interior, and the consul insisted upon the punishment of the mandarins who had stopped them. The Grand Canal since then had been open; and the imports of cotton in Chinkiang had risen from 3,900 pieces to upwards of 400,000 per annum. (Applause.) That was a proof of the enormous impetus that might be given to the trade of England if the treaty of Tientsin was only honestly carried out. The tendency of the present Government was rather to shirk the question than to settle it. Lord Stanley, when he was Foreign Secretary, showed a strong desire to meet the difficulty. For ten years the Chinese Government had flagrantly and openly violated the treaty. Let the English Government compel the Chinese to carry out the treaty. That could be done with undue pressure; all that would be needed would be that the English Government should put their case clearly and strongly before the Chinese Ministers.

# Naval and Military.

The Dido, unarmoured screw sloop, 1,268 tons, has been launched at Portsmouth in the presence of the Commander-in-Chief, Vice-Admiral Sir J. Hope, K.C.B., Rear-Admiral Sir. C. Key, Admiral Superintendent of Portsmouth dockyard, Admiral Sir G. Talbot, K.C.B., a large number of naval and military officers and ladies, Mr. Robinson, master shipwright and chief engineer, and heads of departments, as well as a great many of the general public. The ceremony of christening was performed by Miss Key, daughter of the Admiral Superintendent. The Dido is of the Sirius class, wooden built with rolled iron beams, with strengthening iron arch plating next to her water ways, and mid-arch stringing plates. She is fitted with iron water-tight bulkheads and all the latest improvements, and is to be supplied with engines by Messrs. Humphrey and Tennant of 350-horse power. Her length is 212ft.; breadth 35ft.; depth of hold, 19f. 4in. After the launch she was taken into the steam basin to receive her machinery and be fitted out.

Another batch of Government steamers has been put up for sale by auction at Lloyd's captains' rooms. The gun-steamer Ranger, 427 tons builders' measurement, with screw and paddle engines of 80-horse power, was sold for £1,725. The gun-steamer Surly, 337 tons, fitted with engines of 50-horse power, fetched £1,025. The iron screw store-ship Dromedary, 654 tons, with engines of 100-horse power, and stores and fittings, was knocked down for £5,100. For the screw corvette Malacca, 1,034 tons, principally built of teak, with engines of 200-horse power, the biddings offered ranged from £5,000 to £7,800. The auctioneer stated that the reserve price on the ship was £12,000, and he therefore bought the vessel in for the Admiralty, an announcement which was received with cries of "Oh, oh," and laughter.

The *Army and Navy Gazette* says the whole question of naval retirement is still under consideration at the Admiralty. One of the recommendations of the Royal Commission on Military Education will, if followed, have the effect of abolishing, or of very greatly reducing, the establishment of the Council of Military Education. In furtherance of the intentions of the Lords of the Admiralty to have armour-clad vessels stationed along the coast as district guard-ships, so as to habituate men and officers to live within "our iron walls," it has been decided that her Majesty's ship Resistance shall shortly replace the old wooden screw-frigate Dauntless in the Humber.

The Donegal, which is to convey the crew for Sir Henry Kellet's flagship on the China station to their destination, is being completed with all despatch, and she will be out of the hands of the dockyard authorities at Portsmouth next month.

## HOLLAND.

(FROM OUR OWN CORRESPONDENT.)

ROTTERDAM, Oct 27.

The Minister of the Colonial Department, Mr. de Waal, has replied to the section report of the Second Chamber on the East India Budget. His answer is wavering and hesitating, and is evidently written under the influence of the very unfavourable section report. It is very doubtful whether this Budget will pass. In the meantime the principal topic in political circles is still the recalling of Mr. Myer. The general opinion now is that if the Budget should pass Mr. Myer will not be recalled. I hear that the King of Sweden and Norway has conferred the Cross of Commander of the Polestar on Mr. D. de Graaff Polsbroek, our plenipotentiary at the Court of Japan. His Majesty has likewise presented him with a gold snuffbox, ornamented with diamonds. This honour is due to the important services he rendered to the Government of Sweden by concluding on its behalf a treaty with Japan. Mr. Burlingame, the Chinese Ambassador, is expected here in a few days. The negotiations between the Government and Mr. Fraser are still going on, although nothing has transpired as to whether the Ministry is inclined to grant to the company which this gentleman represents the concession for a steam line between Holland and Java *via* the Suez Canal. In the meantime I hear that the Government intends to promote the establishment of a steam line between Java and Australia.

COMMERCIAL.

The market remains very dull for colonial and foreign produce. Coffee: The Dutch Trading Company sold to-day, in public auction, 129,700 b. Java and Padang; the basis of valuation 33½c. to 34c. for good ordinary. The result showed a decline, as 33c. only was realised, which is a fall of 1½c. on last sale. Sugar (Raw): The market is unaltered. Spices: A rather heavy tone has continued to prevail. Tea: Good ordinary China Congou is quoted 90c. to 95c.; ordinary, 85c. to 88c.; good ordinary Java Congou, 90c.; ordinary, 85c. Camphor: The lower prices have led to more demand; Japan, 57c. Long Pepper is quoted 20c. Cassia Lignea in good demand at f.9. Japan Wax dull at f.40 to f.48. Tin: The market is again wavering; Banca has been offered at f.72½, but at the close f.74 is paid; Billiton, floating, f.71½. Java Vanila, 5½ inch, is quoted 14 guilders.

SHIPPING.

ARRIVALS.—Oct. 21, at Brouwershaven, from Tjilatjap, Aletta Augusta; from Akyab, Ellisif; 23, at Brouwershaven, from Bassein, Amity; at Texel, from Batavia, Anna Sophia; 25, at Brouwershaven, from Bassein, Surat, Nicot.—DEPARTURES.—Oct. 22, from Texel, for Batavia, Waterloo; for Samarang, Estafette.

BREAKFAST.—EPPS'S COCOA.—GRATEFUL AND COMFORTING.—The very agreeable character of this preparation has rendered it a general favourite. The *Civil Service Gazette* remarks:—"The singular success which Mr. Epps attained by his homœopathic preparation of Cocoa has never been surpassed by any experimentalist. By a thorough knowledge of the natural laws which govern the operations of digestion and nutrition, and by a careful application of the fine properties of well-selected Cocoa, Mr. Epps has provided our breakfast tables with a delicately-flavoured beverage which may save us many heavy doctors' bills." Made simply with boiling water or milk. Sold by the trade only in ¼lb., ½lb., and 1lb. tin-lined packets, labelled—JAMES EPPS & Co., Homœopathic Chemists, London.—ADVT.

# Monetary and Commercial.

The half yearly meeting of the Singapore Gas Company was held on the 26th ult. The report, which was published in our last issue, having been taken as read, the chairman, Mr. Stephenson, stated that as the Government House was being fitted up for gas, and other public buildings as well, there was likely to be an increase over the consumption last reported. The managers, too, had been able to purchase a large stock of Australian coal, when that necessary mineral was a glut in the market, and had now two years' supply. This had taken a large amount of money, but the company would reap the benefit of it in the future. The profits of the half-year were £1,419, and, after writing off for depreciation of works and plant, and adding the balance brought from the last half-year's account, there remained an available balance of £1,444, out of which the directors recommended a dividend at the rate of 7½ per cent. per annum on the preference shares, less income-tax; and at the rate of 5 per cent. per annum on the original capital, free of income-tax. The motion for the adoption of the report was carried, the dividends were declared, and a vote of thanks to the directors concluded the proceedings.

The directors of the Falmouth, Gibraltar, and Malta Telegraph Company (Limited) have issued their first report in anticipation of the general meeting. They state that the order for the cable has been given to the Telegraph Construction and Maintenance Company, and the sum of £30,000 has been paid to them in accordance with the contract. The directors have been in communication with the Postmaster-General with reference to the transmission of their messages between London and Falmouth, and have obtained the promise of special wires for their traffic. The report also refers to the prospects of the British Indian Telegraph Company's line, and states that the *Great Eastern* has left for Bombay with upwards of 2,200 miles of the Red Sea cable on board. The submersion of the whole is expected to be finished in March, and the Falmouth-Malta cable within a few weeks afterwards, so that the whole line of submarine communication between England and India will be completed sooner than had been originally announced. Sir James Anderson has been appointed managing director of the company, and Mr. E. B. Bright permanent secretary.

The subscription of the Indian Extension Telegraph Company (Ceylon to Singapore) has been closed for applications. The amount applied for, it is stated, considerably exceeds the number to be allotted.

The India, China, and Australia Company, which proposed to lay a light cable from Galle to the Straits, has, we believe, been given up. This course we had anticipated.

At the half-yearly meeting of the Oriental Bank Corporation, held on the 28th ult., the interim dividend of 30s. per share for the half-year ended 30th June last—equal to 12 per cent. per annum—was declared. This dividend is payable on and after the 1st prox. No other proceedings of any importance took place.

## ARTICLES OF IMPORT.

### TEA.

The following is from Messrs. W. J. and H. Thompson's Circular:—

A fair business has been transacted during the past week, but there is still more offering than the trade can take. Prices continue irregular, and lower rates have been accepted for new imports, for all but the finest grades. Fair to fine grades of new season's Tea show irregularity, but generally may be quoted ½d. per lb. lower. Scented Capers are fully 2d. per lb. lower.

Foochow Congous: Broken and dusty siftings have been sold at 7½d. to 8d. Good common may be quoted at 1s. 0½d.; fair, of old import, 1s. 0¾d. to 1s. 1d. Fair to medium, of new import, have been sold at irregular rates, from 1s. 2d. to 1s. 5d. per lb.; good to fine at 1s. 6d. to 2s. per lb., in some cases showing a reduction of ½d. to 1d. per lb. In fine to finest there has been little to offer, but former rates are maintained. Paklings of inferior quality are most difficult to realise. Black-leaf Congous: Good common remains at 1s. 0½d., but there is little on offer; fair, of old import, at 1s. 1d.; medium to good, of new crop, are in moderate demand at 1s. 4d. to 1s. 7d. per lb.; cheaper sales of the medium flavoury classes have been made, but fine and finest have been sold at 2s. to 2s. 4½d. per lb. In Oolongs there is nothing new to report. Scented Orange Pekoes: Fair to good Canton have been sold at 1s. 5d. to 1s. 8d.; fine, 1s. 10d. to 2s. Scented Capers have been difficult to realise at a reduction of fully 2d. per lb. from the first sales made ex Belted Will. Prices have ranged for fair to medium from 1s. 4d. to 1s. 6d. per lb.; good to fine, 1s. 7d. to 1s. 10d.; finest, 2s. to 2s. 3d. per lb. Green Teas: There have not been any fresh arrivals. The Indian sale of the 26th consisted of 5,575 packages. These passed heavily, and prices of most grades showed a reduction of 1d.—Pekoes, 2d. per lb.

### SILK.

The silk market remains unchanged since our last report; prices nominally the same, but are very weak:—No. 3 Tsatlees, 28s. to 28s. 6d.; Red Peacocks, 23s.; low descriptions of Tsatlees are very difficult of sale, as arrivals of such sorts are heavy. Taysaams remain as last quoted. In Maibash no further operations have taken place. The deliveries from the 1st to the 27th ult. have been 2,285 bales China, 410 Canton, 503 Japan, and 301 Bengal; total 3,499 bales.

Digitized by Google

## COFFEE.

A slight improvement was observable in the market for good colouring Plantation Ceylon after the date of our last report; this improvement has been maintained during the interval, but in other grades of Plantation and in Native no alteration is perceptible, prices being on a par with those current for last mail. The supplies at the public sales have been extremely light, and the business has been proportionately small; transactions privately are also limited. In fact, during the past few days there has been an almost entire absence of business in coffee. In other East India discriptions the only transaction reported is a sale of 16 bags Penang at 45s.; 108 bags damaged Manila were offered at auction, and bought in at 56s. per cwt.

The quantity of Ceylon Coffee afloat for Great Britain on the 18th Oct. was as follows:—Plantation, 120,187 cwt., against 84,879 cwt. at the corresponding date of 1868; Native, 35,083 cwt., against 29,370 cwt. The quantity afloat for Europe was—Plantation, 1,167 cwt., against 4.275 cwt.; Native, 2,701 cwt., against 6,341 cwt. The quantity of Coffee landed in the forty-three weeks ended Oct. 23, 1869, was, of Ceylon, 35,301 tons, against 39,422 tons during the corresponding period of 1868; of all descriptions, 63,245 tons, against 61,322 tons. The quantity entered for home consumption was, of Ceylon, 9,110 tons, against 10,314 tons; of all descriptions, 15,687 tons, against 16,149 tons. The quantity exported was, of Ceylon, 22,559 tons, against 25,600 tons; of all descriptions, 39,457 tons, against 37,825 tons. The stock on Oct. 23 was, of Ceylon, 14,726 tons, against 13,497 tons; of all descriptions, 27,421 tons, against 23,680 tons.

## SUGAR.

The market exhibits a slight improvement in the demand for fine qualities, but the commoner and medium sorts are still entirely unenquired for. Prices generally show little or no alteration. No Manila has been offered either at the auctions or privately. At the public sales 2,323 bags brown Penang (duty 9s. 7d.) were bought in at 32s. to 33s. 6d., and 2,126 bags Siam sold, fine brown and low yellow at 32s. 6d. to 34s. 9d. good bright 36s. 6d. By private contract 5,000 bags common brown China have realised 25s. 9d. to 26s. 6d. per cwt.

The quantity of sugar landed in the forty-three weeks ended October 23rd, 1869, was, of Penang, 3,373 tons, against 1,547 tons in the corresponding period of 1868; of Manila, Java, and China, 30,185 tons, against 19,901 tons; the quantity entered for home consumption was, of Penang, 2,251 tons, against 1,379 tons; of Manila, Java, and China, 15,756 tons, against 13,808 tons; the quantity exported was, of Penang, 134 tons, against 121 tons; of Manila, Java, and China, 1,036 tons, against 1,892 tons; the stock on Oct. 23 was, of Penang, 1,318 tons, against 383 tons; of Manila, Java, and China, 41,657 tons, against 29,795 tons.

---

Cotton.—The day after the departure of last mail a dull tone was manifested in the Liverpool market, and quotations fell about $\frac{1}{8}$ per lb. On the 26th ult. there was a slight improvement, and the demand has since become more active, and the decline has been recovered. Quotations are:—American, 10d. to 13d.; Pernam., &c., 11¼d. to 12d.; Santos, 11⅛d. to 12d.; Maccio and Bahia, 11¼d. to 11⅜d.; Maranham, 12d. to 12¼d.; Egyptian, 11⅜d. to 12½d.; Peru, &c., 13d.; Surat, 6¾d. to 11d.; Bengal, Scinde, &c., 7⅜d. to 8⅛d.

Coir Goods.—A large supply of Yarn has been offered at the public sales, and has gone off with good spirit as regards the medium to good qualities, for which £1 to £2 per ton advance was generally obtained, while for fine extreme rates were paid; common sorts in dholls were partly sold at fully previous prices, the remainder being held firmly and bought in. The supply of Fibre has also been large, and partly sold at easier prices. Rope has brought very full rates. 75 bales Ceylon Yarn sold—good, £35 15s.; fine, £47 to £48; superior, £63 to £69 10s.; of 53,350 dholls, &c. (83 tons), about 50 tons sold—common, £25 5s. to £26 10s.; good common, £27 10s. to £27 15s.; good middling to good, £31 to £36; fine, £40 5s. to £44. 482 ballots (2 tons) Ceylon Fibre sold at £26 10s. to £30; of 95 bales Singapore, only 20 bales sold—brush, £26 15s.

Cocoa-nut Oil.—The market is quiet at unchanged rates; we note sales of Ceylon at £41 10s. with three months', and at £40 15s. with 14 days' prompt.

Cutch.—There is a slightly improved inquiry, but prices are unaltered, 1,870 boxes Pegu, equal to about 160 tons, having been sold at 24s. per cwt., and private transactions are reported at the same price.

Gambier.—The market for Gambier continues steady; cubes are realising 21s. to 21s. 6d. per cwt.

Hemp.—The market for Manila is steady, at £63 for fair and good roping.

Japan Wax.—There is an almost entire absence of enquiry; at auction 83 boxes saucers were offered and bought in, good at 80s., soft at 70s. to 72s. 6d. per cwt.

Pepper.—Black: Trang and Penang are in fair request at 4⅛d., and Singapore at 4⅛d. per lb.; about 1,200 bags Penang have been sold for arrival at 3⅞d. White: Singapore, 5⅞d.

Rattans, &c.—There have been no sales of Rattans; 1,482 bundles Singapore were bought in at 4s. 3d. to 4s. 4d. per hundred. In other canes, of 197,000 Tonkin about 130,000 sold at 1s. 1¼d.; ordinary, ¼d.; mouldy, 1⅛d.; 20,500 Partridge partly sold at 3¼d., 30,000 yellow Bamboo bought in at 1¼d., and 6,000 ground Rattans at 1¾d.; of 6,000 Malacca, 4,000 sold at 1¾d. to 2¼d.; 1,000 Borneo sold at 2⅞d.; also 576 Japan Fishing Rods at 1s. to 1s. 2d. each.

Rice.—The market continues extremely dull; the only business has been in garden Siam at 8s. 9d. per cwt.

Spices.—No change has taken place in the market.

Tin.—There is a fair extent of business doing in Straits at £125 on the spot and £124 afloat, cash. A sale of Banca at £127.

---

### Postscript.

Coffee.—Of 444 bags small Manila offered at auction, the sound was bought in at 54s.; but 251 bags sea damaged and repacked sold at 47s., one lot 47s. 6d.

Cinnamon.—32 bales Ceylon sold—first sort, 3s. 1d.; second, 2s. 8d. to 2s. 10d.; third, 1s. 9d. to 2s. 1d.; fourth, 1s. 4d. to 1s. 5d. Cinnamon Chips: 1,138 bags Ceylon sold readily at rather higher prices—common coarse and thick bark, 4¼d. to 4⅜d.; low middling chips, 7d. to 7¼d.; middling, 7¼d. to 7⅜d. Privately also 200 bags have sold at some advance.

Drugs.—Camphor: China and Japan, 95s. to 97s. Galls: China, at auction, all retired. Cantharides: China bought in at 2s. 3d. Gum Damar: Good Batavian sold at 95s. to 98s. Rhubarb: China, 1s. 3d. to 8s.

Essential Oils.—China Anniseed, 9s. 3d.; Cassia, 5s. 7d. to 5s. 8d.

India-rubber.—Straits, 1s. 6d. per lb.

Japan Wax.—At auction, 16 cases mealy saucers sold at 68s. to 69s. per cwt.

Plumbago.—Of 434 barrels Ceylon, about 250 barrels sold, good bright lump at 20s. to 21s. 6d.; middling, 14s. 6d. to 15s.; fine dust, 10s. to 10s. 6d.; fair, 8s. 6d. to 9s.

Rice.—Siam Field at 7s. 7d. to 7s. 9d.; Rangoon, 9s. per cwt.

Sugar.—At auction, 1,300 bags Penang realised 32s. to 32s. 6d.; a parcel of Siam, 36s.; and 13,314 bags muscovado, Manila, Ilo Ilo, 28s. 3d. By private contract large sales of Manila have been effected, including 4,700 bags repacked at 32s. 9d.; washed, 29s.; 5,000 bags clayed at 29s. 9d.; 35,000 bags ditto (duty 8s.), at 30s.; (duty 9s. 7d.), at 31s. 6d.; and 4,000 bags unclayed Ilo Ilo, at 27s. 9d.

---

## NEW YORK MARKETS.

Tea.—There has been a fair demand, and holders being firm rates are maintained on a par with those previously current.

Silk.—The enquiry is moderately active at the following prices:—Tsatlee, No. 3, 4, and 5, $8.25 to $10 per lb.; Tsatlee, Rereeled, Nos. 1, 2, and 3, $9.25 to $10.50; Tsatlee, usual, $7.25; Taysaam, usual, No. 1 and 2, $8.50 to $9; Taysaam, No. 3 and 4, $7 to $7.25; Taysaam, Rereeled, Nos. 1, 2, and 3, $8 to $9.50; Canton, Rereeled, extra fine, $8.50 to $9; Canton, Rereeled, Good No. 1, $7.50 to $7.75; Canton, Rereeled, fair to medium, $7.25 to $7.50; Japan, superior, $10 to $11.25; Japan, medium and good, $8 to $9.

Coffee.—The market for East India descriptions continues dull, the enquiry being still exclusively for Brazil. The quotations are:—Java, duty paid, Government bags, 22c. to 23c; mats, 23c. to 24c.; Singapore, duty paid, 20c. to 22½c.; Manila, duty paid, 16c. to 18c.; Native Ceylon, duty paid, 17½c. to 19½c. gold.

Cordage.—The demand for Manila is quiet, but steady, at the rates given in our last report.

Crackers.—Enquiry dull, 560 boxes Canton No. 1 sold at private price.

Camphor.—Still without transactions; quotations for China, 23c. to 25c. per lb.

Dyewoods.—There is still a good supply on the market, but in the absence of demand prices continue nominal; Sapanwood is quoted $40 per ton currency.

Gambier.—No enquiry; nominal quotation $3.75 gold.

Hemp.—There is a dull market for Manila, and small sales only have transpired at 14c. gold.

India Rubber.—No transactions have been reported in East India.

Indigo.—There is a fair enquiry, and sales to a fair extent have been effected in Manila at $1.10 to $1.50 currency.

Rice.—Rangoon is neglected, and small transactions only have transpired at $5.25 to $5.75, duty paid; and $3 to $3.25 in bond gold.

Spices.—Pepper is higher and firmer, with sales of 200 to 300 bags Singapore, in lots, at 25c. gold; the stock on hand and to arrive is mostly controlled by one house. Mace is held at $1.30 gold and upwards. 4,500 mats Cassia sold on private terms. The other articles are in fair jobbing demand at the following quotations:—Cassia in mats 45c. to 46c., in cases 45c. to 46c., in bond 25c.; Mace, $1.30; Nutmegs, No. 1, 97½c. to $1; Pepper, 25c., in bond, 10c.; Cloves, 26c. to 26½c., in bond, 6½c.; Cinnamon (prime wild), 45c. per lb. gold.

Sugar.—A slightly increased activity is reported in the general market, but no transactions have taken place in East India descriptions. Quotations: Java, Nos. 10 and 12, 12c. to 12½c.; Manila, current clayed and superior, 11½c. to 11⅝c. per lb. gold.

Tin.—The market continues dull, but small sales of Straits have been effected at 32½c. gold; the nominal quotation for Banca is 38c. gold.

---

## SAN FRANCISCO MARKETS.

Tea.—Imports from Jan. 1st to Oct. 1st: China, 678,681 lbs., Japan, 884,999 lbs. Imports for October include 700 packages from China, per Sarah March. The recent advance in Oolongs and fine grades of Japans is well sustained, with a good jobbing trade in progress. Stocks for the most part are said to be below an average. We quote Comet Oolong $1; Japans, 65c. to 70c. for chests and half-chests; small boxes, 5s. and 10s.; fancy and lacquered, 70c. to 77½c.; extra fine chops, 80c. to 87½c. There is a fair demand for Japans, with but limited call for Oolongs. The stock of low grade China Blacks is ample for trade wants. At auction, on 90 days' credit for approved endorsed notes, 225 half-chests Japan sold at 60c. Imports for the past nine months ended 30th Sept., 1,563,680 lbs.

Coffee.—Imports from Jan. 1st to Oct. 1st, Java, 1,010,532 lbs., 70 packages; Manila, 359.255 lbs., 3,395 packages. The quotations are—Java, 24c.; Manila, 16c. to 17c. per lb. These prices must be considered nominal in the absence of transactions.

Cordage.—No sales reported; Manila, 15c. to 17c.

China Matting.—Imports from Jan. 1st to Oct. 1st: 71 bales, 8,807 rolls. We have no sales to record, the trade being liberally supplied with cargo and contract, selling at prices within range of our quotations, viz.:—China 4-4 cargo, $5 to $5.50; 5-4 cargo, $5.50 to $6; 6-4 cargo, $6.50 to $7; 4-4 contract, $8 to $12; 5-4 contract, $9 to $14; 6-4 contract, $11 to $16.

Rice.—Imports from Jan. 1st. to Oct. 1st: China, 22,326,695 lbs. Siam, 3,637,783 lbs.; Batavia, 110,271 lbs. Stocks are heavy and

Digitized by Google

sales of magnitude difficult to consummate. 1,000 mats No. 1 China sold at 6c. to 6½c.; 2,500 mats do. No. 2, 5¾c. per lb. At auction, 1,000 pockets No. 1 Siam, re-cleaned, sold at $5.15; 500 mats China No. 2, at $5.55; 400 mats ditto ditto, $5.40 per 100 lbs. The only import since the 1st Oct. is that per Sarah March from Hong Kong, 22,747 mats.

SUGAR.—Imports from Jan. 1st to Oct. 1st: Manila, 15,383,622 lbs.; China, 1,633,400 lbs.; Batavia, 1,659,457 lbs.; Siam, 40,133 lbs. Quotations: China, 9c. to 10½c.; Manila, 8½c. per lb. No transactions.

TIN.—Banca is quoted 40c. to 42½c. per lb.

## SHIPPING.

ARRIVALS.—Oct. 3, at San Francisco, from Hong Kong, Sarah March; 11, at New York, from Manila, Harriet Erving; at Boston, from Singapore, Humboldt, Aurelia.

DEPARTURES.—Sept. 25, from San Francisco, for Hong Kong, Parsee; Oct. 4, for Hong Kong and Yokohama, China (s.); for Hong Kong, Mauritius; 14, from New York, for Hong Kong, Ariel (s.).

LOADING.—At New York, for Shanghai, Benefactor. At San Francisco, for Hong Kong, Galatea, Nellie Abbott, Singapore.

## FREIGHTS AND CHARTERS.

Freights to the Eastern ports are without alteration.

Current rates of freight for vessels on the berth:—To Yokohama: 32s. 6d. weight, 30s. meast. To Nagasaki: 45s. weight or meast. To Hiogo or Osaka: 40s. weight, 35s. meast. To Shanghai: 40s. weight, 35s. meast. To Hong Kong: 35s. weight, 27s. 6d. meast. To Batavia: 25s. weight, 30s. meast. To Singapore: 30s. weight, 25s. to 30s. meast. To Ceylon: 20s. to 25s. weight, 20s. meast. At New York to China; $12 to $15 per ton of 40 cubic feet.

The current quotations for coal, &c., are as follows:—From Wear or Tyne per keel.—For Hong Kong: £33. For Singapore: £24. For Galle: £22. 10s. From Newport, Cardiff, or Swansea per ton.—For Hong Kong: £1 11s. For Singapore: £1 4s. For Galle: £1 2s.

The Admiralty have invited tenders for the conveyance of 363 tons navy provisions to Hong Kong, and have accepted the Simon for the conveyance of stores to Trincomalee.

## CASUALTIES.

The Rocket, screw steamer, Captain Lobery, from Shields, for Shanghai, has been towed into Lowestoft by the Hallet, steam carrier vessel. The mate of the Rocket, Alexander Watt, reports as follows:—The Rocket left Shields on Monday, the 25th Oct., with eleven hands on on board; and on Tuesday, at 2 P.M., while off Cromer, the wind N. by W., blowing a terrific gale, with heavy squalls of snow and hail, set in; the vessel fell over on her beam ends, with her hatches under water. The helm was ordered to be put a-starboard, but she would not "pay off." The captain and pilot then ordered the boat out, and, with the engineer and a passenger jumped into it, but it almost immediately capsized, and they were drowned. The mate himself, while making a rope fast from the boat, was washed overboard, but was hauled in almost exhausted, as were four others of the crew who had got into the boat which was lost. The mate then ordered the coals to be thrown overboard to lighten the vessel, and on Wednesday, the 27th, the Hallet took the Rocket in tow, about 30 miles east of Lowestoft. About 7 P.M. on that day, during a heavy gale, it became necessary to cut away the foremast to save the ship; but on the 28th she was brought into Lowestoft. The names of those lost were as follows:—Captain Lobery, Pilot Thornton, Marshall (chief engineer), and Davy (passenger).

Advices from St. Helena, dated Sept. 25, state that the Chili, McSkimming, of and from Glasgow, for China, with coals and iron, experienced very heavy weather from Aug. 4 to Aug. 7, in lat. 39 S., lon. 33 E., during which she sprung a leak, and was abandoned in a sinking state, Aug. 23, in lat. 30 S., lon. 39 E. All hands succeeded in getting on board the Tuisko, from Akyab to Falmouth, which vessel landed them, Sept. 21, at St. Helena.

The Niger (s.s.), Jobling, arrived at St. Helena, Sept. 27, from China, Singapore, &c., and proceeded for London, but put back with propeller damaged, and it was thought that the necessary repairs could not be effected at St. Helena.

The Constantia, van Monnom, from Batavia to Rotterdam, put into Simon's Bay, Sept. 17, making nine inches water per hour, and would have to discharge.

The Aurelia, arrived at Boston from Singapore, experienced a S. to N.W. gale, Oct. 4, in lat. 40 N., lon. 68 W., during which she lost bulwarks, &c.

The Chaturanga, Hardy, from Singapore to New York, which put into Bermuda Sept. 24, dismasted and leaky, was discharging her cargo there, Oct. 2, much of it in a very damaged condition,

## MISCELLANEOUS.

Advices from St. Thomas, dated Sept. 29, state that a portion of the cargo ex condemned vessel A. Lloret, Gonzalez, from Manila to London, had been sold as damaged.

At ST. HELENA.—Sept. 20, Her Majesty, Seymour, from Manila, and sailed for New York; 23, Chillingham, Darke, from Hong Kong, and sailed 25 for London.

Off ST. HELENA.—Sept. 18, Vesta, from Bangkok, for Falmouth; 22, Dunedin, or Athole (barq.), from Sourabaya for London.

At TABLE BAY.—Sept. 15, Miranda (str.), Steele, from Shanghai, and left 17 for London.

At MAURITIUS.—Sept. 3, Queen of India, Ware, from Singapore, sailed for London after repairing.

### TRIAL TRIP OF THE STEAMER "HINDOSTAN."

The capabilities of the P. and O. Company's new steamer Hindostan have been tested by a voyage to Cherbourg and back, and the trip has been attended with most satisfactory results. The start was effected on the morning of the 23rd inst., and the ship had completed the run and was anchored off the Isle of Wight on the 25th. A curious fact has been published respecting the two vessels both named Hindostan which have been constructed for the P. and O. Company. The old Hindostan was 235 feet long between the perpendiculars—the new Hindostan is 349 feet. The old Hindostan was of 39 feet beam; her successor is of 42 feet beam, and whilst the first vessel, being of 1,800 tons, was driven by engines nominally of 550-horse power, the second vessel, being of 3,000 tons, has engines of a nominal power of only 600 horses. This is putting plainly the change of length which has been brought into vogue of late years; such proportions give greater speed to the same power, for the first vessel was considerably slower, though with so much more power of machinery for size.

HOLLOWAY'S OINTMENT and PILLS are the most reliable remedies for the blotches, pimples, boils, and carbuncles which, often appearing at the change of seasons, are ever annoying, sometimes dangerous, and always disfiguring. The subtle permeating powers of this Ointment, by repressing both inflammation and irritation, reduce the skin to its natural temperature and colour, whilst radically expelling the cause of the blemishes from the system. The Pills assist the cooling and purifying influence of the unguent by expelling all that is gross from the bowels, and by thoroughly rectifying digestion. Under this treatment every organ throughout the body is compelled to dislodge both irregularities and impurities, whereby the skin becomes soft and silky, the spirits gay, and health robust.

---

KEATING'S COUGH LOZENGES.

THIS UNIVERSAL REMEDY now stands the first in public favour and confidence; this result has been acquired by the test of fifty years' experience. These lozenges may be found on sale in every British colony; and throughout India and China they have been highly esteemed wherever introduced. For COUGHS, ASTHMA, and all AFFECTIONS of the THROAT and CHEST, they are the most agreeable and efficacious remedy; they do not contain opium or any other deleterious drug and may therefore be taken with perfect safety by the most delicate constitution.

Sold in boxes, tins, and bottles of various sizes.

---

KEATING'S

CHILDREN'S WORM TABLETS.

The great remedy for these disorders in Adults and Children can now be administered in the form of A PURELY VEGETABLE SWEETMEAT, at once agreeable and effective.

TESTIMONIAL.

"Batley, Jan. 26, 1869

"SIR,—One of my children, aged two years and four months, being troubled with worms, I was induced to try your Bon Bons. I purchased some from Mr. B. Whitaker, chemist, of Batley, and after taking two only, she voided nine large worms. Two days after another dose, she again voided three more; three of them, the worst, measuring from 8 in. to 9 in. each in length. I consider them a most invaluable remedy, and should be tried by all suffering from worms.

(Signed) "JOHN STENSON.

"Witness, B. WHITAKER.

"To Mr. Keating, London."

Sold in tins and bottles of various sizes.

---

KEATING'S INSECT DESTROYING POWDER.

This Powder is QUITE HARMLESS TO ANIMAL LIFE, but is unrivalled in destroying Fleas, Bugs, Cockroaches, Beetles, Musquitos, and every other species of insect.

Sold in packets, tins, and bottles of various sizes.

☞ The public are particularly requested to observe that all the above preparations bear the Trade Mark as herein shown.

KEATING'S ST PAUL'S CHURCHYARD TRADE MARK.

*Sold in Hong Kong and Shanghai by Watson and Co.*; Singapore, Little and Co and Woodford and Schroeder; Ceylon, Piters and Co. and Mailland and Co.; Penang, *Gazette* office.

## SINGAPORE DOCKS.

THE PATENT SLIP AND DOCK COMPANY execute SHIPS' REPAIRS of all descriptions in the most efficient manner, under the supervision of European Engineers and Shipwrights.

The DRY DOCK (opened in March, 1859) admits two Vessels at the same time, being over 400 feet in length, with a depth of water ranging to 15½ feet. A second DRY DOCK of larger dimensions will shortly be completed, and available for the heaviest Steamers.

Adjoining the above there is extensive WHARF WAREHOUSE, and other accommodation, including every convenience for coaling Steamers, discharging cargo, and storing goods, together with ample MACHINERY and appliances for repairing iron steamers, &c.

Apply at the offices of Messrs. PATERSON, SIMONS and Co., Singapore; or 21, St. Swithin's-lane, Cannon-street, London, E.C.

WM. CLOUGHTON, Managing Director.
New Harbour, Singapore, June, 1868.

## PORT OF AMOY.

SHIPOWNERS, AGENTS, and COMMANDERS are informed that the Dock Company's establishments at the above port afford every facility, at moderate charges, for REPAIRING and SPARRING VESSELS, cleaning and painting iron ships and steamers.

Their large Granite Dock has 286 feet length on the blocks, and at average spring tides can receive vessels of 16 to 17 feet draught. It has a caisson-gate and a powerful centrifugal steam pump, and an engineer's workshop fitted with lathes and tools, driven by steam: iron and brass foundries, boiler-makers' shop, a large smithy and carpenters and boat-builders' sheds. All superintended by resident Europeans.

Their two smaller GRANITE DOCKS can receive, at spring tides, vessels drawing 12 feet.

Spars, timber, and other Dockyard material kept in stock.

Quarters for officers and a DRY GODOWN for stores of vessels under repair.

## FOOCHOW DOCK.

*RIVER MIN.*

THE above granite floored DOCK, of the following dimensions, viz., Length, 300 feet, breadth at bottom, 40, is capable of receiving vessels drawing 13 to 16 feet, as the state of the tides will allow. The Dock runs dry to the blocks, and is pumped out by steam.

The above premises comprise a large Machine Shop containing a

WHITWORTH'S 12-INCH SCREW CUTTING GAP LATHE, DRILLING AND SCREWING MACHINES,

A LARGE SMITHY, &c., &c., &c.

Large Godowns are on the premises for STOWAGE OF CARGO, &c., &c. A large stock of Woods, Metal, &c., &c., always on hand.

The Dock steam tug *Woosung* is available at all times to tow vesse's to or from sea.

JOHN C. SKEY, Superintendent.

## OVERLAND ROUTE.—

# TANJONG PAGAR DOCK COMPANY

(LIMITED).

## VICTORIA DOCK, SINGAPORE.

This Company's Granite DRY DOCK, 450 feet in length, 65 feet width of entrance, and 20 feet depth of water on the sill, was OPENED on the 17th October, 1868. In the high tides of the North-East Monsoon there is a foot to eighteen inches more water.

In connection with the Dock is a complete range of workshops, fitted with steam machinery, driving all descriptions of engineers' tools required in the construction and repair of vessels and machinery, and a foundry for iron and brass castings.

The Company's extensive Wharves and Godowns for receiving and storing cargo immediately adjoin the Dock.

Having an efficient European staff in each department, the Company is in a position to guarantee the best workmanship, executed with every possible despatch, as well as low rates of charges.

These advantages, and the great facilities which the proximity of the Dock to the town offers for the transport of materials, &c., enable this Company to adopt a very low scale of charges for ships' work of all classes.

**LONDON AGENTS.**

Messrs. MACTAGGART, TIDMAN, and CO., 34, Great St. Helens.

### THE MAILS, &c.

The present mail is delivered on its due date. The next inward mail will be due here on the 21st instant, and will bring the following dates:—Yokohama, Oct. 8; Shanghai, Oct. 6; Hong Kong, Oct. 12; Singapore, Oct. 20.

To-day's mail brings no advices from Manila, the steamer from that port to Hong Kong having missed. Various alarming reports are in circulation, and one current at Hamburg says that "Manila has disappeared."

The latest Hong Kong telegrams *via* Galle, are to Oct. 12 (French mail), received on the 7th inst. Those in advance of the succeeding P. and O. mail of Oct. 19 are long overdue.

The Kiachta line is working again, and Shanghai telegrams of the 20th and 26th October were received together this morning.

## List of Passengers.

### PASSENGERS INWARD.

By this mail to Marseilles, per P. and O. steamer *Delhi*, arrived Nov. 12.—From Shanghai: Mr. S. G. Weston, Messrs. L. and E. Cicogini, Mr. C. Bresciana, Mr. A. Milson. From Hong Kong: Mr. Huestris.

To Southampton, per P. and O. steamer *Bangalore*, expected to arrive Nov. 19.—From Shanghai: Mrs. Wright and child. From Hong Kong: Mr. and Mrs. Anderson, child and servant, Mrs. Luicker, Mr. Fevefield, Mr. J. Kyle, Mrs. Sangster, two children and servant.

### PASSENGERS OUTWARD.

Per P. and O. steamer *Tanjore*, from Southampton, Nov. 13.—To Yokohama: Comdr. St. John, R.N. To Hong Kong: Mr. J. A. Drought. To Singapore: Mr. A. D. Forbes. To Ceylon: Mr. H. L. Forbes, Mr. Vanderspar, two Misses Vanderspar, Mr. and Mrs. W. N. Toulmin and two children, Mr. A. W. Crichton, Rev. J. Brotchie, Mr. J. E. Smart.

From Gibraltar.—To Hong Kong: Col. and Mrs. D. J. de A. Barbosa.

Per P. and O. steamer *Delhi*, from Marseilles, Nov. 21.—To Hong Kong: Mr. A. Hewlett. To Singapore: Mr. A. Fraser, Mr. and Mrs. Weir and two children, Miss A. M. Dare. To Ceylon: Mr. and Mrs. H. F. Shipster, Capt. and Mrs. Irvine, Capt. and Mrs. Ballantyne, Mr. Hudson, Mr. W. Douglas, Mr. and Mrs. Newman and three children, Mr. and Mrs. Kriekenbach.

Per P. and O. steamer from Suez, Nov. 28.—To Hong Kong: Mr. C. Weber. To Singapore: Mr. Otto Puttfarcken, Mr. J. H. N. Hulsz.

Per P. and O. steamer *Ripon*, from Southampton, Nov. 27.—To Singapore: Mr. and Mrs. S. Short and three children. To Ceylon: Capt. Gorman, Mr. R. Atkinson, Mr. E. G. Harding, Mr. A. Croome.

P. P. and O. steamer *Nyanza*, from Marseilles, Dec. 5.—To Yokohama: Lady Parker, Miss M. Binns. To Shanghai: Mr. G. A. Lindsay. To Hong Kong: Mr. F. F. P. Foster, Mr. K. D. Adams. To Ceylon: Mr. and Mrs. Cameron, Mr. C. A. Cameron, Mr. and Mrs. J. H. Cheape, Mr. Hambrough.

From Malta:—To Shanghai, Mr. A. E. Petrocochino.

## Summary of News from the Far East.

### JAPAN.

#### YOKOHAMA.

Our advices from this port are now extended to the 18th Sept. The outward mail of July 30 was received at Yokohama on the 16th Sept., with London telegrams to Aug. 18, which it was expected would have a bad effect on the market.

The Duke of Edinburgh was received at Yedo by the Mikado on terms of perfect equality, and after a most satisfactory visit left Yokohama on the 16th Sept. for Hiogo, *en route* to Tientsin. Sir Henry Keppel has also left, having been entertained at a banquet by the British residents of Yokohama previous to his departure for Europe. The Duke of Edinburgh, Sir Harry Parkes, and numerous naval officers were present.

On the occasion of the Duke of Edinburgh's official reception a very high and quite unexpected compliment was paid him, of which the Japanese officials had said nothing to the British Legation. The upper windows of the houses in the street along which he passed were all closed and sealed with paper bands, that no one might "look down" upon him. This is never done in Japan except for the Sovereign. It was done for the Shiogoon when he was virtually the ruler, and now for the Mikado, and, of course, in a Daimio's own capital his people pay him the same respect, but no Japanese Prince ever receives the compliment from his Imperial master; and, trifling as it may seem to Europeans, it was a most significant evidence to the natives of the estimation in which the Mikado held the son of his most useful ally. His Imperial Majesty received his guest in the great audience chamber in the castle, and on perfectly equal terms. Both stood, and the Mikado welcomed his Royal Highness to Japan in a cordial speech. After a suitable reply had been made to the Mikado's welcome, his Majesty said that he hoped in a few minutes to have the pleasure of seeing his guest in another part of the palace, and more privately, and then moved and terminated the interview. The Prince's party then retired from the audience-chamber and refreshments were served in an adjoining room, after which, with Admiral Keppel, Sir Harry Parkes, and the gentleman of the Legation who was acting as interpreter, the Prince was received in a pavilion in the palace gardens. The interview was a long one, and though, of course, there could be no conversation beyond the mere common-places easily imagined between such an entertainer and such a guest it was remarkable for more than one circumstance—chiefly, that for the first time the Mikado heard Japanese spoken to him by a Foreigner. Hitherto both in the case of his Imperial Majesty and the Shiogoon, communication with the Sovereign on the occasion of a Minister's visit has always been through native interpreters. On this occasion it was properly arranged that the medium should be an Englishman, and the Mikado, while treated with all the respect due to his exalted rank, was consequently fully able to appreciate the relative rank of his guest. The Prince offered him a magnificent diamond snuffbox, which he placed in his Majesty's hand himself, and the Mikado received the splendid gift with evident delight, which he repeatedly expressed. That he should accept a present made to him in this manner was another remarkable point. To the Imperial courtiers and State officers he also gave a number of jewels, rings, boxes, &c., which were highly appreciated.

This was the only public appearance of his Royal Highness who, being anxious to see Yedo as thoroughly as possible, took the practical step of seeing it in a manner *incognito*. The weather was very unfavourable, but whenever it was possible he rode out, accompanied only by Mr. Mitford, of the British Legation, and without even the escort of the Legation Guard.

The *Japan Times* says that, according to his Royal Highness' own account, that part of his stay which he most thoroughly enjoyed was the social intercourse, unrestrained by state trammels

Digitized by Google

or official ceremony, which he was able to hold with some of his old friends in the Navy and his new acquaintances ashore. He seemed to visit the Club, particularly the bowling alley, as often as he possibly could, and took part in an important match played between the Navy and the residents. At a supper which followed, "the Duke took the opportunity of expressing his warm and kindly feeling towards us all in Yokohama, and thanked us for the manner in which we had entertained him. He spoke at some length and in a manner which showed that he felt every word he spoke, when he signified his gratification, and the gratification which would be felt by every member of his family, at finding that in this remote part of the world, so many thousand miles from home, the feelings of loyalty and affection to the Throne, to his Gracious Mother personally, and to his House, were so strong and so universal. He concluded a telling speech, of which this is the briefest possible outline, by promising himself the pleasure (and us the distinguished honour) of carrying home to Her Majesty and her family the report that nowhere in his travels had he found those feelings more distinctly manifested than in Yokohama. It is needless to say that this unexpected speech from his Royal Highness gratified every one who was fortunate enough to be present intensely, and was received with the greatest enthusiasm. The accidental nature of the occasion, and the unstudied character of the Duke's speech, gave to his gracefully paid compliment a sterling value, which a set speech at a public dinner could not have; and we hope to be forgiven for so far trespassing over the line which marks the privacy of club life as we have done."

The *Japan Gazette*, in describing the Duke's visit to Yedo, says, "He has been received on equal terms in his Royal capacity by the Mikado; he has had every possible respect paid to him in his representative character by the community; and he has been permitted when 'off duty' to go his own way and do entirely as he liked without any obtrusive following or offensive observation. He acted throughout his stay here in such a manner as to win the regard of all; and before parting, took the opportunity of expressing over and over again his appreciation of Japan and the foreign community. In one circumstance that happened on his visit to the Mikado a proof was given of the rapid breaking down of the old exclusiveness of the Japanese Imperial Court. After the formal interview, the prince, Sir Harry Parkes, and Sir Harry Keppel were asked to see the grounds around the palace. As they were so engaged, a high officer approached, and told them that his Majesty the Mikado was now in a pleasure house in the garden, and would be glad of some conversation with them. They of course went, seats were provided, and they sat some time chatting. It seems—to those who know what the character always attached to the Mikado is and has been by the Japanese, high and low—among the greatest evidences of the real approach to modern views and ideas that have yet been given. Since then an uncle of the Mikado, a Miya, only a few degrees less sacred than the ruler himself, has actually dined at the British Legation to meet the Prince, and attended at a ball after the dinner. With him were two members of the Government, both considered to be among the most enlightened men in the country. In this way, then, the visit of the Duke of Edinburgh may prove a very great advantage; as certainly nothing but such an event could have produced so remarkable a change in the Imperial amenities."

The Mikado, it is stated, has greatly improved in appearance since he first emerged from the absurd seclusion in which his ancestors had passed their lives. He looks much more robust and manly than when Sir Harry Parkes first saw him at Kioto, and is developing, apparently, into a healthy and intelligent man. He is extremely fond of horse exercise, and takes it daily within the palace grounds; and to this, doubtless, is attributable the improvement which was noticed in his personal appearance.

### THE BANQUET TO ADMIRAL KEPPELL.

The farewell dinner given to Sir Henry Keppell by the English residents was evidently highly appreciated by that gallant officer. Mr. Marshall, of the firm of Macpherson and Marshall, one of the firms of longest standing in Yokohama, was the president of the evening, and on his left were Sir Harry Parkes, Colonel Norman, Captain Stanhope; on his right the guest of the evening, H.R.H. the Duke of Edinburgh and Sir Edmund Hornby; at the ends of the cross table were Mr. Grahame, Chairman of the Chamber of Commerce, and Mr. Aspinall, of Aspinall, Cornes, and Co. The vice-chair was filled by Mr. H. B. Lemann, of Gilman and Co., and down the table were placed, at intervals, the other members of the Committee, with guests, officers of the army or navy, on either side of them. The intervening chairs were occupied by subscribers to the dinner, and, altogether, about eighty seats were filled.

The toast of the evening was given in an eloquent speech by the Chairman, and responded to with immense enthusiasm, for which the Duke of Edinburgh was as conspicuous as any one present. Sir Harry replied as follows:—

"Mr. Chairman, Your Royal Highness, and Gentlemen,

"I wish I felt that I deserved one half of the flattering words just spoken by my too partial friend in the chair. Nevertheless, I thank you most heartily and sincerely for the great honour you have conferred on me this evening.

"The command in these seas is an extensive and important one; and I hope that I have never lost sight of the fact that the maintenance of what has been, until lately, a powerful naval force on this distant station, was, for the protection of our trade as well as of the lives and property of British subjects and the upholding of our treaty rights.

"In these Japanese waters the naval duties have been comparatively light and easy. We have had nothing to do beyond attending to the suggestions of our energetic and active Minister, who deserves every support that we can afford.

"It has been different in China, where there are many places so far distant from the seat of Government, that those under me, as well as myself, have been obliged to act on their own and my responsibility; and although some of those acts have not met with the approval of the Government at home, I have had what I value far more—on account of their being better able to judge—the approval of the community of Hong Kong, as well as of that of the Chamber of Commerce at Shanghai, to which intelligent bodies I may add the kind friends who now entertain me.

"In spite of the promotion which awaits me, no naval commander will have left or ever will leave a station with more regret than I shall do this."

At this point the Admiral's voice faltered, and then broke, and he could not proceed. A few moments' respite given him by the vociferous applause of his audience enabled him to control his emotion and to go on. He concluded by saying:—

"I have greatly enjoyed your kind hospitality and society—a society which has been favoured with an unusual number of the fairest of our countrywomen; and I regret very much that thus having been deprived of my flag-ship has prevented my having the pleasure of returning, although in a small way, some of the kindness I have received."

At the conclusion of his speech the Admiral was chaired and carried round the room, preceded by the Prince's piper, and surrounded by the crowd of his admirers. Under cover of the piper's music and volleys of cheers, he then left the room, bowing his acknowledgments and was accompanied by about half the company.

The Autumn race meeting for 1869 had already been fixed for the 14th, 15th and 16th of October, and a very good programme issued, including twenty-one prizes.

---

The following is the text of Sir Harry Parkes's proclamation regarding the spurious or debased gold coin (ni-bous) that has recently got into circulation:—

NOTIFICATION.

British Legation, Yedo, Aug. 26, 1869.

The Japanese Government have given notice to the undersigned that, in order to guard against the circulation of spurious nebus, they are prepared to examine all nebus at present in the possession of British subjects at the various open ports, and to determine the quality of the same, in the following manner:—

On the day after the publication of this notice at each port every British subject should lodge at the British Consulate, within office hours, a statement of the number of nebus in his possession. This statement will be forwarded to the Saibansho, but will not be recognised unless sent in on the day named. On the following day, Sundays excepted, the owner of the nebus will be informed at the Saibansho on what day he may take his nebus there for examination. The nebus, when examined, will be divided into those which are equal to and those which are inferior to the Government standard. The two qualities will be made up in packets, which will be distinguished by different seals or stamps; both qualities will then be returned to the owner, and will be accepted by the Government in payment of duties. *The Japanese Government further engage to exchange for nebus of the Government standard, in so short a time as circumstances shall permit, all those nebus which have, as above, been declared to be inferior quality.*

The Japanese Government will decline, from the date of the publication of this notice at each port, to receive nebus that have not been examined and certified in the above manner. British subjects accepting nebus from this date may satisfy themselves of the quality of the same by taking them to the Saibansho at each port, where they will be examined, and if found equal to the Government standard, will be certified accordingly. (Signed) H. S. PARKES.

The Hiogo papers speak in strong terms of the disgraceful conduct of certain foreigners at Osaka, who availed themselves of the ni-bou notification to attempt a fraud on the Government by buying up all the bad coin they could find during the interval allowed by the Saibansho for foreign merchants to notify what gold they had actually in possession when the proclamation was issued. "How," they ask, "can we accuse this Government of fraud when foreign merchants act thus? We have the greatest satisfaction in stating that the native Government will shortly publish the names of the guilty parties."

### LATER ADVICES BY PACIFIC MAIL.

The Japan news brought by the Pacific mail steamer *America* which arrived at San Francisco on the 20th ult., is a week later than that by the P. and O. mail delivered this day, the dates being, Yokohama, Sept. 29; Osaka, Sept. 24; Nagasaki, Sept. 21. The list of passengers by this vessel was given in our last issue, but no general news was received in time for publication.

Prince Todo, a powerful Daimio, had been assassinated. The Prince was a stanch ally of the Shiogoon, and his murder was on account of some political differences.

An assault on Sir Harry Parkes, in the streets of Yedo, was made by a drunken Yakonin, who was immediately arrested, and will be punished.

It is said that a railroad is to be constructed from Kobe to Osaca, and a telegraph line from Yedo to Yokohama.

The Hong Kong Mint machinery, which, it will be remembered, was purchased by the Japanese, is now in course of erection at Osaka by Mr. T. Waters. We are informed that the coins to be produced will consist of gold pieces of the value of ten, five, and

Digitized by Google

two-and-a-half dollars; silver dollars, half-dollars, quarter-dollars, and ten cent. pieces; copper cents. and mils. The mint is expected to be in operation by February next

The rice and cotton crops throughout the Island of Kiusiu are a failure, and much destitution is felt in consequence. One result has been a series of dangerous riots in Nagasaki, a hungry mob of some 3,000 having pulled down and plundered some rice stores and merchants' houses.

We have been favoured with the following market information from Kobe:—Grey shirtings, 8¼ lbs., 11¾ bous (at Yokohama stocks are small, and the quotation $3.20); yarn, Nos. 28-32, 596 bous (at Yokohama sales have been made at $162 per bale); Turkey Reds, 12 bous; velvets, black in demand at 36 to 38 bous; Taffachelas, market overstocked; camlets, scarlet 56, and black 63 bous; figured Orleans, 29 to 30 bous, large stocks; merinos, in demand at 24 to 26 bous; black cloth. 56-inch, 5 bous per yard; blankets in good demand at 2 bous per pound.

Exchange on London, 6 months' sight, 4s. 5½d. to 4s. 6d. Nibous, 375.

A small steamer called the *Flying Scud* that left Yokohama for Osakoa, the 17th of August, has not arrived or been heard of. She is supposed to have foundered in the severe gale of Aug. 19.

## HAKODADI.

The *Japan Times* says:—The following important intelligence from our correspondent in Hakodadi is worthy of the serious attention of the foreign Ministers. There is not the least room for suspicion of the source whence it was derived, nor can the facts be denied; the designs of Russia upon Yedo have long been known, and as for the present move being consequent upon the recent inevitable disorganisation of the Government of Japan by civil war, this was confessed, and even boasted of. Our correspondent writes:—

Hakodadi, Aug. 23, 1869.—The arrival of a vessel on the 23rd inst. from Saghalien places us in possession of accounts of the most recent movements of the Russians on the island. Two years ago they occupied a settlement in Salmon Cove, a large bay indenting its southern shores, at a distance of forty miles, to the south-east of which lies the town or village of Bussie, a considerable fishing station, inhabited by Inos under Japanese rule. Upon the pretext that military tenure alone could furnish a recognisable claim to legal possession, a Russian force of about 200 men, with guns, ammunition, and provisions, was landed there some two months ago, barracks were at once erected with all the easy ingegenuity characteristic of practised aggression, and Russia now stands overlooking the La Perouse Straits from a fine harbour, to which she has the same legal right as Ahab had to Naboth's vineyard.

From this harbour, at a distance not exceeding that which separates Dover and Calais, the northern shores of the island of Yedo are clearly distinguishable, and the lust of the heart has become the lust of the eye to a Power which makes no pretence to the influence of moral restraint where it can extend territory by any means, fair or foul. The real Naboth's vineyard in this case, without possession of which all the vast territories Russia holds in Northern Asia still leave her heart heavy and displeased, is the fair island of Yedo. During the past few years, since the treaty made by Lord Elgin with Japan has forced the English, French, and American naval Powers so much into these seas, the Russians have gradually relaxed their pretensions to and their hold on this island. The large establishment formerly maintained at this port has never been renewed since it was burnt down some few years ago; the able and accomplished man who was formerly Russian Consul here has been replaced by a student interpreter of equally extraordinary deficiencies, and no traces now exist of the large Russian fleet which, in winter time especially, resorted to this harbour. But the convulsions at Yedo which have nearly been fatal to Japan have revived the old hopes of Russia, and induced her to approach to a point on Saghalien from which, with one bound, she can at any time clutch her intended prey. She knows well enough that internal dissension in Japan has reduced its resisting power to a minimum. After a sleep of six hundred years the revived Mikadoate is not likely to be very successful in rallying at once round its standard the forces of the Empire.

# CHINA.

—o—

## PEKING AND THE NORTH.

(FROM A CORRESPONDENT.)

Mr. Davis, the naturalist, is in Western Szechuen. Some wealthy Chinese intend sending one of the Customs *employés*, lent for the purpose by Mr. Hart, to America and Europe to procure machinery for working cotton. A gentleman of considerable prominence in the foreign community was riding through one of the principal streets in the Tartar city, when a native with a syringe suddenly squirted a stream of water over him. Another foreigner, a missionary, had, the other day, a brickbat sent after him by an unseen hand.

Regarding the treaty with Austria the *Shanghai Newsletter* has as follows:—

The Austrian Embassy has left here, having succeeded after many vexatious delays in getting a treaty signed. An unexpected difficulty cropped up towards the last; the Chinese refused to give to the Emperor of Austria the same title of "Wang-Te" which they accord to their own sovereign, but Baron von Petz very properly declined to continue negotiations on a basis so injurious to the dignity of his nation, and the Chinese finally gave in, as they no doubt intended to do from the first. The terms of the treaty have not been made public, but it is understood that the Austrians have agreed to appoint no mercantile Consuls, and that they have waived any special provision relative to missionaries.

A trial of some agricultural implements worked by steam, imported by Mr. Porter, of the Customs service, was made in the presence of H.E. Shung-How, the Imperial Commissioner. The trial passed off satisfactorily.

The officials are said to be making vigorous efforts to apprehend the murderers of the late Rev. James Williamson; they have been unsuccessful up to the present.

## SHANGHAI.

(FROM OUR OWN CORRESPONDENT.)

SHANGHAI, Sept. 23, 1869.

The English mail of the 30th July arrived per *Sunda* on the forenoon of the 14th inst. The Messageries steamer *Labourdonnais* reached here on the 20th inst. with the French mail of the 5th August. The former brings telegrams by Galle to the 23rd Aug., the latter to 29th idem. We have not had telegrams for some time by Kiachta. A northern correspondent writes:—"There is a belief among the Chinese that Mr. Burlingame has been pressing for further supplies of money, and that in consequence the Chinese have waylaid the courier or cut the wires." The explanation seems far-fetched. The *Sunda* brought $40,00 from Hong Kong and £4,000 from England. The *Costa Rica* had $20,000 on board from Japan.

As regards local news, Shanghai has, since last writing, been unusually dull.

Mr. Seward, United States Consul-General, left by the *Costa Rica*, on the 18th inst., for San Francisco, *en route* to Washington. It is understood that one of his objects in going home is to try and obtain an improved status for the United States Consular Service in China and Japan.

Mr. Thomas Adkins has been appointed H.M.'s Consul at Newchwang. Major Crossmann, R.E., in charge of the Consular and Legation Works Branch, has left for England, *via* Panama.

LEGAL.—The Chief Judge is still in Japan. Appeals from the French Consular Courts in China and Japan will now lie to Saigon, instead of Pondicherry, as heretofore.

An interesting case has been tried at the American Consular Court, in which a Chinaman sought to obtain delivery of eight bales of damaged drills, bought by him and others at auction, but of which delivery was refused, on the ground that the (Chinese) buyers had been in collusion to keep down prices. The Court decided for the plaintiff, as no direct evidence of collusion had been given. It appears from the evidence that instances of combination among Chinese, to let one man buy for all, and thus avoid competition, are not infrequent.

The Settlement was visited on the morning of the 15th inst. with what Chinese call a *Pau-fung*, or burst of wind, accompanied by rain; the barometer fell to 29·46. No material damage was done, beyond a lot of old rickety untenanted houses on the Old Race Course, and in other parts of the Settlement, being blown down.

Baron Rechthofen, the Prussian Geologist, reached Shanghai from the North a few days since. He has traversed since he left Shanghai in March the district between Chinkiang and Chefoo, the country near Newchwang, the Corean barrier, and the great route between the Corean gate, Moukden and Peking. We hear that he is not likely to give up his work in China yet, but have not learned what will be the direction of his future explorations.

The *North China Herald* says:—We have news of the Duke of Edinburgh's arrival in Japan, but he is said to have given up his intention of visiting Shanghai. It is a pity that he should miss an opportunity of seeing a Settlement which has sprung into importance with such unexampled rapidity.

It is said, however, that H. R. H. may visit Peking after all. He was to leave Yokohama on Monday last, and intended, after calling at Osaka, to visit Nagasaki on or about the 19th. The *Salamis* and the *Adventure* were to accompany the *Galatea*.

A serious robbery was committed on the 16th inst. upon some Japanese gentlemen stopping at the Astor House; nearly $2,300 was stolen by a Portuguese in their employ named Da Silva; $2,000 has been recovered. Da Silva will be sent to Macao for trial by the Portuguese Consul-General—Mr. Hanssen—at this port.

The training for the races has commenced, and the programme has been issued; seven events for the first two days, and six for the third day. We had a regatta on the 20th inst.; the weather was favourable, but hot. The course was from Muirhead's Dock to Ming-Hong. Mr. Ashley's *Vision* won the first race, Mr. Fall's *Zephyr* the second.

The driving of the piles for the new bunding in front of the

Digitized by Google

English Settlement has commenced. A meeting of the delegates from the different fire companies was held on the 17th inst., to consider a proposal to receive into the Shanghai Fire Department a company recently formed in the French Concession.

A new road is proposed to be made from Dow's Godown along the bank of the Hwang-pu.

The *Supreme Court and Consular Gazette* says that Messrs. David Sassoons, Sons and Co. have bought the whole of the land property held by the Commercial Bank Corporation at this port, the purchase money amounting to upwards of £120,000 sterling.

A general meeting of the Club was held on the 21st inst., to discuss that perpetually-recurring problem, the financial position of the club. After some discussion, a proposition was submitted that the shareholders should abandon their interest in the club to the members, who, in turn, should relieve them from all liability in respect of the Tls. 48,000 owed to the recreation fund, and should take over liability for Doctor Barton's mortgage, the mortgage on the furniture, the ground-rent and other liabilities, and become on those terms proprietors of the building. The interest on the mortgage is Tls. 3,300, the ground rent Tls. 1,700, and the consolidation of other liabilities will probably involve interest to the extent of another Tls. 1,000. The shareholders abandon Tls. 48,000 of capital. The recreation fund shareholders complete their surrender to the public of the Tls. 48,000 (now hopelessly sunk), at which figure that fund now stands; the public being in turn asked to accept a liability of Tls. 6,000 a-year, to be met by the profits of working the institution." Of course it would be possible to hire a bar and reading-room for a much less sum; but it would be difficult to find a building combining the advantages of the club on such favourable terms. The scheme seems a good one, and will, we imagine, be agreed to. As will be seen from the following resolutions, steps are to be taken to mature it during the ensuing month. After some disussion, Mr. Hannen proposed, and Mr. Miller seconded—"That the proposal of the shareholders for keeping the club open in all its branches, except the boarding department, until 31st Oct. next be agreed to; after which date it be closed by the present proprietors."

Shipping.—The following are the arrivals and departures since my last letter:—From London, Wylo (103 days), Kelso (119 days), Beemah (111 days), Antrim (138 days); from Liverpool, Mikado (114 days); from Newcastle, N.S.W., M.M. Jones (on 13th), and Cœur de Lion (18th). Sailed for London, Tamerlane (10th), Diomed, steamer (12th), Hindustan (13th), Mary Moore (16th), and Pegasus (16th).

There are at present ninety-seven merchant ships in harbour.

The Sailors' Home has at present on its roll of boarders upwards of sixty men—a number unusually high, and almost exhausting the available accommodation of the institution. The *Costa Rica* took 1,000 packages of tea and 120 bales of silk in her last trip to San Francisco, for New York. These are the first teas or silk overland to New York; they go forward by rail.

The *Diomed* took over 1,000 tons of tea and silk.

The complaints are loud about the position taken up by H.M.S. *Zebra*, right in the fair-way, just above the Pootung Point; on swing she blocks up the mid-channel, and stops the river and Tientsin steamers of the Shanghai Steam Navigation Company. The *Zebra*, whenever there is a blow, manages to drag her anchors, to the danger of the shipping in the harbour.

## THE YANGTSZE PORTS.

(FROM OUR OWN CORRESPONDENT.)

Hankow.—Our advices from this port reach to the 18th inst. The water is still from three to four feet deep on the bund, and is oscillating in the most provoking manner, falling an inch one day and rising through nearly the same space on the next. It is reported by the Chinese that heavy rains continue to fall up country upon the vast range of hills, the surface drainage of which runs into the Tung-ting Lake—hence the continuance of the excessive water supply. At the same time the Poyang Lake is affected in a precisely similar way, and its waters rushing into the Yangtsze prevent the rapid escape of the accumulation higher up. Geologists also tell us, that there is a gradual upheaval going on both above and below Hankow, Hankow itself occupying the bottom of the basin thus in course of formation. If this be true, the great inland mart is likely to be visited every year by serious floods, increasing annually in importance. The foreign houses have suffered severely. Many are shored up, and all the compound walls have fallen. From what is even now seen it may confidently be predicted that when the water finally re-enters its proper channel the settlement and suburbs will look as though an earthquake had occurred. The level of the flood is now about 2½ feet below the maximum for the year, and there is every hope that by the time this letter is printed in the *Telegraph* (!) the settlement will again be visible.

The tea season has virtually closed, not more than half the leaf brought into market was bought in Hankow. The remainder was sent on native account to Shanghai, where enhanced prices rewarded the combining power of the Chinese and stultified the action of the Hankow *chasses*. Business is nearly at a standstill, the water completely preventing tracking up the creeks, as the banks are all submerged. The Import market is, as usual, glutted, with every prospect of an exceptionally dull winter, for the natives have totally lost their third crop, and poverty is certain to prevail over Hunan and the adjacent provinces.

Kiukiang.—The green teas are arriving slowly, the rainy and stormy weather having kept the boats back in the Poyang lake.

Nanking.—One of the river barriers to keep out the Yangtsze waters showing signs of coming in, people were got together to aid the authorities in repairing it. A neighbouring mandarin, hearing gongs beating, &c, mustered his retainers, and hastily went to see what the row was; the people at work seeing armed men coming, ran away. The waters, now left to themselves, gained the mastery over the barriers, and soon flooded the country to the extent of thousands of acres.

Chinkiang.—The foreign import trade is increasing since the stoppage of the barrier squeezes. A careful census of the American residents at this port gives the following result:—One consul and family, one marshal, one citizen.

## FOOCHOW.

We (*China Mail*) have received the following statement from a very trustworthy correspondent at Foochow, in a letter dated Sept. 6. We hope that Mr. Sinclair, the Consul, who is investigating the matter of complaint, will not meet with the fate which followed Mr. Gibson's efforts:—

In the *Chinese Recorder* for September it is stated that full reparation is promised by the Chinese authorities for the late destruction of the chapel of the Church Mission at Long-wong; that the District Magistrate has been degraded; and that the yamen runners, under the compulsion of their superiors, are reputed to have contributed at the rate of $20 a head to make good the losses of the mission. This is a statement of the case, as it was understood a fortnight ago; but within a few days past quite a different turn of affairs has occurred. A number of the leading Christians at Long-wong have been arrested—one on a false charge of having beaten a thief so severely as to cause his death. What charges, if any, are made against the others is not known. To give colour to the charge referred to, a thief who was in a dying condition had been brought to the door of the Christian Church and persistently kept there, against remonstrances and efforts to have him removed, until he died.

The Viceroy, who at first promised reparation, has just sent an urgent despatch to the British Consul, demanding that two Christians, whose names are given, shall be given up, to be examined and punished for causing the death of the thief above mentioned, and refusing all reparation in the case of the chapel. The Consul, Chas. A. Sinclair, Esq., is insisting upon the whole case being adjudicated impartially, witnesses being heard on both sides, and full reparation being made for the injury done to the mission premises. The District Magistrate was not degraded, but simply removed; and the Secretary of the Lieutenant Governor put in his place. This Secretary seems determined to carry everything against the foreigners and native Christians.

The consequence of the present attitude of the officials is that the Christians throughout that district are subjected to severe persecution, being obliged in many cases to flee for their lives. The change in the Viceroy's demeanour is remarkable, as he has heretofore appeared to be friendly to foreigners, and disposed to do justice.

## FORMOSA.

A correspondent of the *Daily Press* at Formosa forwards the following intimation regarding a memorial to the late Consul Gibson, which will, no doubt, be liberally responded to:—"A general wish having been expressed to erect a memorial to the late Mr. John Gibson, to be subscribed for by the residents of Amoy and Formosa, marking their appreciation of the able and honourable manner in which he discharged his duties of Acting-Consul at Taiwanfoo, during the recent disturbances, the following gentlemen have kindly consented to act as a committee, and will be happy to receive subscriptions.—J. C. Wardlaw, F. Chomley, Geo. Phillips, John Cass, Henry Smith."

The policy of the Home Government regarding the Formosa question is beginning to bear its legitimate fruits. Another outrage is reported on the part of the truculent Chinese inhabiting the coast, and seems, by the information we have received, to be of a serious nature. Messrs. Pye and Pickering, of the house of Elles and Co., at Taiwan, are the gentlemen who have suffered; the first-named having been compelled to fly into the district inhabited by the Aborigines for safety, while the second is reported as wounded. The accounts to hand are, however, necessarily vague, the correspondent from whose letter we derive them being unable to do more than state the bare facts. It is not known whether Mr. Pickering's wound is serious, nor is the precise locality where the outrage occurred even stated. The only thing certain is that an attack has been made on the gentlemen in question by Chinese. From our knowledge of their personal characteristics we may safely aver that few Europeans would be less likely to cause, by their own indiscretion, a murderous attack being made upon them. Mr. Pickering is well known as one of the very few Europeans who can converse in the Aborigin'al dialects, and is popular amongst the Chinese. He has travelled much in the island, and has uniformly exhibited great prudence and discretion.

Digitized by Google

We may here mention one significant fact which we recently learned from a gentleman who had just left Formosa. The instructions from home exerted so repressive an influence on our negociations subsequent to the capture of Amping, that the Mandarin Liang, to whose obstinate stupidity and anti-foreign obstructiveness the chief part of the misunderstanding was due, *has not been removed from Taiwan*, although this was one of the conditions most earnestly pressed for by the late unfortunate Mr. Gibson.

## HONG KONG.

The London mail of Aug. 13 reached Hong Kong on the 21st Sept., conveying telegrams to the 5th Sept. The present homeward mail brings Hong Kong advices to Sept. 30.

The financial statement for 1868-69 shows the colony to be no longer insolvent, and an effective surplus of $30,000 is estimated for Dec. 1870. This position of affairs was conveyed in the Governor's financial statement to the Legislative Council, which is far too lengthy to be reproduced *in extenso*. We shall notice the details in our next issue.

The *China Mail* has the following comments :—That branch of Colonial income hitherto known as the gambling revenue seems likely from H. E.'s financial statement to become incorporated with our future financial policy, under the name of a Special Fund, to be used not in lessening the ordinary rates and taxes but for purely police purposes on land and on water. His Excellency insinuates rather than openly asserts the principle, that it would be unjust to tax the foreign community in the immense sum that is required to procure efficient protection for the island against crime of native origin—such as piracies, forcible descents with the object of plunder, &c. The main cost of special defence against these special dangers should, his Excellency apparently thinks, fall upon those among whom they arise, and that the best means of attaining that end is by licensing a certain number of gambling houses, on the clear understanding that no part of the money so derived should be included in the ordinary revenue of the colony for ordinary expenditure, but be appropriated exclusively to the prevention of serious native offences, and to promoting the moral and sanitary improvement of the native population. Such in effect seem to be the instructions his Excellency has received from home, and they are quite identical with the principle which the *China Mail* has always avowed in reference to this part of his Excellency's financial policy.

Another, and an unusually daring, act of piracy in the neighbourhood of Macao has to be recorded. The N. G. barque *Apenrade* left Whampoa for New York on the 23rd Sept. At seven o'clock the next evening she was off Pootow Island, about ten miles from Macao, the wind at the time being very light. There were several large junks in the neighbourhood, but they presented nothing to warrant any suspicion of their character. Shortly after seven, however, one of their number, not larger or in any way distinguishable from the rest, taking advantage of the light wind, bore down towards the *Apenrade* to within 200 yards, as if with the intention of crossing her bows. Suddenly, however, the intention of the junk's crew was disclosed by a volley of grape which smashed the *Apenrade's* boats, injured the rigging, and damaged the hull. This demonstration was quickly followed up by boarding. Thirty or forty of the pirates rushed on board the vessel, and commenced firing upon the crew, who were not in a condition to offer any resistance, being taken completely by surprise. The rascals were armed with swords and large French revolvers, which they seem to have obtained from a house in Hong Kong. One of the crew was shot dead, others including the captain and second officer, were wounded, in some cases severely. Having gained possession of the ship, the pirates anchored the vessel, and then proceeded to ransack her. They gathered forty chests of tea, about $30 in money, watches, mathematical instruments, and other property, and would no doubt have completely stripped the vessel but for the appearance of a steamer in the distance. They then sheered off, and a favourable breeze springing up the captain slipped anchor and made for Macao. The gunboat *Principe Dom Carlos* was despatched in quest of the pirates, the second officer of the *Apenrade* accompanying the search, but nothing has been heard of the pirates.

His Excellency the Governor has ordered a memorandum to be prepared by the Superintendent of Police on the comparative criminal statistics of Hong Kong and Shanghai. This is intended as a reply to the communication from Mr. A. J. Johnston, of Shanghai, dated May 13, and published in the *London and China Telegraph* and *Express*. We shall notice it more fully in our next issue.

Judgment has been given by the Hon. J. Pauncefote, Acting Chief Justice, in the case of the Comptoir d'Escompte de Paris *v.* Rodger and others, and F. S. Huffam, official assignee of the estate of Lyall, Still, and Co. This suit, in which the sum of $59,390.12 is claimed, it will be remembered, arose out of what is generally known as the *Min* case. Judgment was for defendant.

At the special general meeting of the Chamber, held on the 20th Sept., the Hon. W. Keswick presiding, the following was inserted as the third rule and regulation of the Chamber, instead of the previous rule :—"That all mercantile firms and persons engaged or interested in the trade of China shall be eligible for admission as members, in the manner hereafter described, and on payment of $50 for firms, and $15 for single individuals for the current year, and a like annual subscription payable in advance on January 1st." The chairman proposed the adoption of the above resolution, and remarked that they were all at one regarding the advisability of extending the usefulness of the Chamber by allowing the admission of all interested in the trade of China; and they could not but regard it as desirable that the sphere of the Chamber should be extended. He proposed that the resolution be adopted by the meeting. This was seconded by Mr. Pyke, and unanimously carried. The meeting then separated.

We learn that Mr. G. Hughes, Commissioner of Customs from Tientsin, changes places with Mr. C. Hannen, Commissioner at Amoy. Mr. Cartwright is transferred from Swatow to Amoy.

The *Mail* has the following remarks *apropos* of the departure for Europe of Baron von Carlowitz :—In the list of passengers leaving by to-day's mail we observe the name of Baron von Carlowitz, a gentleman who has, we believe, for over a quarter of a century resided at Canton and in this colony. As one of the veritable oldest residents, and more than that, one of the most esteemed by all nationalities, who has become identified with the social life of both ports, it is but due to him to express the hearty good wishes which accompany him on his departure; and we do this at the request of numerous friends, supported by our own opinion of the manner in which, as Consular Representative of Prussia and the North German Confederation, he has so well and so long performed his official functions. To one who has witnessed with his own eyes the conversion of Hong Kong from a barren rock into a thriving colony, a farewell must be more serious than to those whose shorter residence has induced less interest in our local fortunes. In wishing him a pleasant voyage and safe return to Europe, we can assure him that he takes with him the sincere regard of a numerous body of friends and acquaintances.

H. R. H. Prince Alfred's visit to the Southern hemisphere seems likely to prove profitable to him in a pecuniary sense. It is already known that he, with one of his suite, has invested in a gold mine in New Zealand, and that in the first month the yield of gold was so great as to increase the value of the investment from £2,500 to £8,000. The latest papers records a continuance of success. The claim in which the Prince took shares is known as the "Long Drive," and we learn that the latest crushing of quartz from it yielded 2,000 ounces of gold from 550 lbs. weight of quartz. This will be good news for H. R. H. when he reaches Hong Kong.

A reverend gentleman is said to be coining money in Canton by the sale of sowing machines. Being of a scientific turn of mind, and a Chinese scholar, he is likely to keep to the windward of other importers. The use of ploughing machines is said now to occupy the attention and time of the reverend speculator in machines. Our German friends have not been so wide awake to import sowing machines as they were to import magenta dye. But large orders for them are, however, now said to have gone forward.

In the *China Mail* we find the following translation of the Royal decree remitting the sentence passed on Mr. Pedro Loureiro by the Court of Macao :—

"Acceding to the supplication which has been submitted to me by Pedro Jose da Silva Loureiro, sentenced to transportation to the West Coast of Africa by decree of the Supreme Court of Macao, under date July 25th, 1866, and taking into consideration the information on the subject furnished by the Chief Judge of the district and by the Governor, under date 8th and 9th January last, and likewise the opinion of the Deputy Attorney General, attached to the Ministry of Commerce, Marine and the Colonies—I am pleased, with the advice of the Council of State, and in conformity with Sec. 7 of Art. 74 of the constitutional charter of the kingdom, to exercise my Royal clemency towards the aforesaid Pedro Jose da Silva Loureiro, accepting as expiation for his crime the time that he has already suffered in prison."

# STRAITS SETTLEMENTS.

## SINGAPORE.

From Singapore we have advices to the 8th Oct. The outward English mail of Aug. 27, and the French of Sept. 2, arrived out on the 30th Sept. and 5th Oct. respectively. The latest London telegrams were dated Sept. 13.

According to the *Straits Times*, "No political questions of much weight have come to the front during the fortnight. There have been two meetings of the Legislative Council, one on the 28th ult. and the other on the 2nd inst. At the first a Bill to exclude from future criminal sentences of imprisonment any direction as to the localities at which the imprisonment should be ordered was introduced, read a third time, and passed. The papers relating to the Bill disclosed a somewhat obstinate determination on the part of the Chief Justice to send all his prisoners to Her Majesty's Gaol for confinement, though under the Local Prisons' Ordinance the Houses of Correction had been appointed the receptacles for criminal offences. According to the Crown lawyers at home, to which the point seems to have been referred, a sentence to one place of confinement cannot legally be carried out at another; so that as Her Majesty's jail is by the

Digitized by Google

'aw of the colony no longer one of the places at which criminal sentences are to be undergone, prisoners specially sentenced to imprisonment there would necessarily have to be released; and one man sentenced in this way at Malacca has actually been set at large.

"At the meeting of Council on the 2nd inst. the Governor announced the appointment of the Judge of Penang to a seat in the Council; the Council then went into committee on the Secret Societies' Bill, and after progress was reported the Legislature adjourned to the 12th inst.

"As stated in our last, a strong feeling prevails here in favour of regulating and not suppressing these societies. Very little opposition, it is anticipated, would be offered to such a registration of purposes, officers, and places of meeting as would afford Government an effective control of them in cases of disturbance, as well as a substantial guarantee for the depredations of their members. The societies under such limitations would of course cease to be secret, but they would probably secure to their members quite as many privileges as they do now—privileges made more valuable by the legal recognition which would be given them.

"A serious anxiety has distracted Singapore for the last fortnight, owing to the predictions of Captain Saxby, R.N., which have doubtless lost none of their extravagance by the journey overland. According to a letter addressed by that gentleman to the London *Morning Herald*, dated 21st December last, excessive high tides were to prevail along the equatorial belt from the 4th to the 7th inst. From the low-lying position of the mercantile part of the town, a rise of eight feet over ordinary spring tides would have involved the semi-submersion of nearly all the godowns in the place, and consequently an enormous destruction to property. Captain Saxby's prediction in some degree gained ground from a similar presentiment among the Chinese, derived no doubt, from their astronomical calculations; and the consequences have been that for the last four days great brick walls have stopped up the doors and windows of our godowns; felt, chunam, and other auxiliaries for the resistance of water have also been in large request; and now, when the dreaded time has passed away without the increase of even an inch to our ordinary spring tides, it is partly comical, partly humiliating, to view the yet unremoved defences that, at the expense of some thousands of dollars have been set up to meet an imaginary evil; however, none can have a laugh at the other—we are all in the same box, have all been equally demoralised. We trust Captain Saxby, when he learns that $10,000 will barely cover the cost of the provisions made here in consequence of his last prediction, will be more careful to give distincter limits to the probable phenomena to be expected from his observations.

"Government House, the source of so much past heart-burning has now been completed, and Governor Ord will take up his residence there next week. It is stated positively that the amount voted by the Legislature has not been exceeded, that is, that the cost of grounds and building comes within $150,000; at this rate the property must be considered a cheap one. But Government House is only one of the subjects which in times past have been selected for remonstrance against the present administration, the new steamer understood to be building at home and for which £23,000 have been remitted from the Treasury was the other. Regarding this last, we have scarcely such a satisfactory account to give—in so far that we are ignorant, and apparently the Governor, too, whether the steamer is to be sent out or not; indeed, whether her construction has been commenced yet or not. At the conference of the Straits Settlements Association with Lord Granville in May last, his Lordship by one report is made to say the 'the steamer would not come out here, but would be resold in England,' and by another that 'no orders for her construction had yet been given.' At a meeting of Council on the 22nd of July last, the Governor was asked if he knew whether the steamer was coming out or no, and he replied that though he had no official information on the subject he believed she was half finished. But the value of this statement is seriously depreciated by a report to hand by last mail, that in answer to an inquiry from the Secretary to the Straits Settlements Association, the Colonial-office had stated that not a timber of the steamer had yet been laid down, and never would be. It is really too bad that we should be tossed about in uncertainty on the subject in this way, and that we should have been put to the expense of borrowing and remitting some $100,000, on which we have had to pay interest, to lie idle in Her Majesty's Treasury. The Governor, apparently, can get no authoritative information on the subject, and if the Association can it is very desirable that they should forward here not reports merely, but authentic copies of their communications with the Colonial-office."

BREAKFAST.—EPPS'S COCOA.—GRATEFUL AND COMFORTING.—The very agreeable character of this preparation has rendered it a general favourite. The *Civil Service Gazette* remarks:—"The singular success which Mr. Epps attained by his homœopathic preparation of Cocoa has never been surpassed by any experimentalist. By a thorough knowledge of the natural laws which govern the operations of digestion and nutrition, and by a careful application of the fine properties of well-selected Cocoa, Mr. Epps has provided our breakfast tables with a delicately-flavoured beverage which may save us many heavy doctors' bills." Made simply with boiling water or milk. Sold by the trade only in ¼ lb., ½ lb., and 1 lb. tin-lined packets, labelled—JAMES EPPS & Co., Homœopathic Chemists, London.—ADVT.

# Commercial Report.

(*For dates see First Page.*)

## CEYLON, STRAITS, JAVA, CHINA, AND JAPAN IMPORTS.

YOKOHAMA.—There had been a continuance of the favourable tone of the market for cotton goods noticed in our last report. Grey Shirtings and Yarns had been in demand at greatly advanced rates, double the business having been done than in the previous fortnight. About 60,000 pieces of Shirtings and 2,000 bales Yarns had changed hands, and an improvement upon this was considered probable. Woollens had also shown a little inquiry, but the actual business had been small, in consequence of prices continuing low. Metals: A limited inquiry for Nail Rod Iron of suitable sizes at $3 to $3.50. Lead continued dull at low prices. Quotations:—Cotton Yarn, 16 to 24, $49 to $50 per picul; 28 to 32, $51.50 to $52.50; 38 to 42, $56 to $57; Grey Shirtings, 7 lbs., $2.60 to $2.67½ per piece; 8 lbs., 4-6, $3.05 to $3.10; Black Velvets, $9 to $9.65 per piece; T. R. Cambrics, $0.90 to $0.95 per lb.; Blankets, $38 to $43 per lb. Later advices (to September 29), *via* San Francisco, report the market still active for Cottons; Yarns were active, and the rates previously current were firmly maintained; Shirtings and Woollen goods were unchanged.

TIENTSIN.—Grey Shirtings had advanced, and were quoted Tls. 2.1.5 to Tls. 2.1.9 for 8¼ lbs. T.-Cloths, 7 lbs., were Tls. 1.6.1½ per piece.

SHANGHAI.—Business had been fairly active since the previous mail, and there had been a considerable amount of foreign speculation. Grey Shirtings: The continued firmness of importers, better news from the northern markets, and the high rates ruling in England, had simultaneously had an effect on prices, the value had steadily advanced, and a rise of about 5 candareens per piece has to be noted. Buyers had been both foreign and native, though the former have predominated, and some of the goods held by the latter were at the close offered for cash at a decline on quoted prices. 7 lbs. were quoted at Tls. 2.0.3 to Tls. 2.0.7 (good sales), 8 lbs. Tls. 2.2.3 to Tls. 2.2.7 (sales of Eagles at 2.3.0—six weeks delivery), and 9 lbs. to 9-12 lbs. Tls. 2.4.5 to Tls. 2.8.5 per piece, very dull. The exports for the fortnight have been moderate, and the present stock, including all arrivals to date, may be named as 1,200,000 pieces. Opinions are divided as to whether this stock, and the further supplies which we may expect during the next two months, will or will not be more than we can dispose of by re-export and otherwise. It seems, however, highly probable that our stock at the end of the year will not be light, and that it will mainly consist of high cost goods. At this date last year the quotations for Grey Shirtings were:—7 lbs., Tls. 1.95 to Tls. 2.0⅝ per piece; 8.4 lbs., Tls. 2.27 to Tls. 2.33; and 9 lbs. to 9.12 lbs., Tls. 2.65 to Tls. 3.10 per piece. T-Cloths: Considering the home cost of these goods, their position was almost worse than that of Grey Shirtings; it had been very difficult to effect sales, even at a reduction in value. The lowest class of 7 lbs. had found buyers at Tls. 1.65 to Tls. 1.67 per piece, while "chop dollars" had changed hands at Tls. 1.90 per piece (only to a small extent); fine Mexicans could not be quoted over Tls. 1.80 per piece, with few buyers. In 8 lbs. 36 in. small transactions are reported at last prices, though a few of the finest goods (XX) had been placed at Tls. 2.45 per piece. White Shirtings: The lower counts (56 to 60 reed) had been most asked for, at an advance of 5 cands. per piece. Sales only to a moderate extent (11 to 12,000 pieces). 56 reed, Tls. 2.15 to Tls. 2.20 (the latter only for finest goods); 60 reed, Tls. 2.25 to Tls. 2.30 per piece; 64 reed, Tls. 2.30 to Tls. 2.40; and 68 reed, Tls. 2.45 to Tls. 2.50 per piece. Drills: Sales of Dutch and English at former rates; American Cloth 5 to 10 cands. per piece higher, at which advance some parcels of damaged and sound had been taken. Holders firm. Sheethings: Moderate sales of English at Tls. 3.20 to Tls. 3.30; American, Tls. 3.60 to Tls. 3.70 per piece. Jeans: Sales of American Cloth at Tls. 3.10 to Tls. 3.12½ per piece—the closing quotation being Tls. 3.15 per piece. English show a rise of 5 to 8 cands. per piece. Dutch also slightly better. Woollens and Worsteds: A few sales of Camlets had transpired at rates showing little change on those last current. Long Ells very quiet, Scarlet lower, owing to the absence of Hankow demand. In Spanish Stripes the business done had been very small, at unaltered prices. Lastings had found buyers to a very moderate extent at former values, one parcel of Scarlet having realised Tls. 13.30 per piece. Sales of Figured Orleans reported to the extent of 4,500 to 5,000 pieces, and of Crape Lustres 1,800 pieces had gone into second hands. Metals.—Iron: Holders continued to press sales, some 14,000 bdls. having changed hands at Tls. 1.80 to Tls. 2.10 per picul, the latter figure for a very good assortment. The business in Bars almost nominal. Lead had changed hands freely at Tls. 5.17 to Tls. 5.35, holders asked Tls. 5.50 for cargo to arrive in December. Coals: The market had continued very dull, and cargoes were difficult to sell.

HANKOW.—Grey Shirtings: During the early part of the fortnight little business was done in these goods, but later on advices from Shanghai had encouraged speculation, and considerable settlements had been made at an advance of 5 candareens per piece. Closing rates:—Tls. 1.98 to Tls. 2.01 for 7lbs., Tls. 2.18 to Tls. 2.25 for 8¼ lbs., and Tls. 2.75 to Tls. 2.85 per piece for 9¾ lbs. White Shirtings not inquired for. T-Cloths: Small business at last quotations, the demand being principally for the finer descriptions. Drills are quieter. Fancy Cottons had received little attention. Woollens and Worsteds.—Camlets: A few sales at lower prices, stocks increased, and demand very languid. Lastings not asked for. Long Ells: Quotations show a decline of 5 candareens to 1 mace per piece for both Scarlet and Assorted colours. Spanish Stripes and Medium Cloths had met with little attention. Figured Orleans: A slight inquiry at previous quotations. Metals.—Lead: The only transaction had been at a slight advance. Quicksilver: No demand. Tin declined slightly, though the stock continued small.

FOOCHOW.—The following had been the transactions during the interval:—1,150 pieces, 8¼ lbs., Grey Shirtings, at $3.10 to $3.15 per piece; 96 pieces Spanish Stripes, assorted, at 85 cents per yard; 100 pieces Assorted Camlets, at $17.25 per piece; and 6,290 piculs Lead, at $7.50 to $8 per picul.

Digitized by Google

HONG KONG.—The following is from Messrs. Olyphant and Co.'s Circular, dated 29th Sept.:—Cotton Yarn: The reduced position of stocks has increased the firmness of holders, and a further improvement in prices is noticeable. Settlements of Nos. 16 24 have been largest, and sales show an advance of $1.50 to $4, while prices realised for Nos. 38 42, for which demand has been strongest, exhibit a rise of $5 to $7.50 per bale. Dealers are still fairly well supplied with Nos. 28/32, and as yet do not show a willingness to advance their ideas for these proportionately with prices for other counts. Piece Goods: No special activity has been displayed in the market; but prices, under the influence of home advices, have remained firm. 7 and 8.4 lb. Grey Shirtings are somewhat dearer for the common makes, the demand for the former being the stronger as this weight is in short stock, and the sales reported have been altogether "to arrive." Holders of 10 lb. goods are showing a desire to quit their supplies, which are rather heavy, while buyers refuse to make offers except at a reduction of 10 to 15 cents per piece. White Shirtings are unchanged, and a sale of 1,450 pieces fine is reported at $4.50 to $7.25 per piece. The commoner makes of 6 lb. and 7 lb. T-Cloths meet with moderate inquiry at an advance of 2 cents per piece, while Mexicans are not so much wanted. The quotations for Drills are higher, and the demand for English and Dutch is moderately active, stocks of the latter have been entirely cleared off and the settlements reported have all been made "to arrive." But one trifling sale of American has been made, at an advance of 5 cents upon last quoted rates, and holders are still demanding prices above quotations. Woollens: The market is weaker, and prices generally are lower. Long Ells have fallen 10 to 15 cents, Blankets are down 20 cents, and rates for Camlets and Spanish Stripes are easier. Metals: Nail Rod, Bar and Hoop Iron have all given way in price. Wire is unchanged. Steel has slightly declined. Lead is still in full supply at low rates. The demand for Tin has slackened and a drop of $1.50 to $2 has taken place. Quicksilver is without change. Coals: Arrivals have been 2,040 tons of Cardiff, 830 tons English and 850 tons Sydney. Sales have been from godown 487 tons West Hartley at $5.88 per ton; 697 tons Layards at $5.90 per ton and 543 tons Brymbo at $5.91 per ton. Some three years ago $15 per ton was offered for these three parcels and refused; the rates now obtained have been at public auction after the Coal has remained on storage since 1866. Ginseng: Inquiry has been slight, and the offers of dealers have been so much below the ideas of holders that no business whatever has resulted. The current quotations were:—Cotton Yarn, Nos. 16 to 24, $137.0 to $142.50 per bale; 28 to 32, $147.50 to $150.0 per bale; 38 to 42, $160.0 to $165.0 per bale; Grey Shirtings, 7 lbs., $2.55 to $2.60 per piece; 8.4 lbs., $2.87½ to $2.93 per piece; White Shirtings, $2.50 to $4.80 per piece; T-Cloths, 6 lbs., $1.90 to $2.10 per piece; 7 lbs., $2.17½ to $2.60 per piece; 8 to 8.4 oz., $2.75 to $2.85 per piece; American Drills, 40 yards, 15 lbs., $5.15 to $5.25 per piece; Dutch Drills, 40 yards 14 lbs., $4.70 to $4.85 per piece; Medium, Ladies' and Habit Cloths, $1.15 to $2.0 per yard; Long Ells, $7.70 to $7.80 per piece; Camlets, SS. Scarlet, $16.25 to $17.0 per piece; SS. Assorted, $15.80 to $16.0 per piece; Blankets, $0.45 to $0.60. Iron—Nail Rod, $2.70 to $2.75 per picul; Lead, $6.25 to $6.70 per picul.

BATAVIA.—Prices had undergone no material change. The inquiry for Cotton Goods generally was by no means active, and as the season during which most business is usually transacted was far advanced, there was little chance of any material improvement until early next year, by which time the great falling off in supplies would probably make itself felt, and an advance in values follow.

SINGAPORE.—Advices of a reduction in Home prices of cottons caused importers to place their goods more freely on the market, and prices had again given way. The transactions had been very small, buyers holding out for still lower rates. 8¼ lbs. Shirtings had declined to 2.87½ to 2.85. T-Cloths had not given way to the same extent, but the demand was very weak, and confined to the lighter weights. Madapollams without change; sales small. Drills in good inquiry. White Shirtings in no demand; sales trifling. Imitation Irish Linens in small inquiry. Cambrics without alteration. Brocades, Damasks, Lappets, and Mulls dull; no sales. Dyed Shirtings, plain and figured, sold to a small extent at fair rates. T. Red Cambrics very dull, stocks heavy, few sales. Sarongs, Batticks, and Handkerchiefs cleared off to some extent at very low prices. Grey Yarn is lower, stocks small, sales confined to No. 40's, no supply of the lower numbers. Metals in very little demand.

PENANG.—There is no improvement to register in the tone of the market; in fact, the prices realised for the greater part of the goods disposed of show somewhat more weakly than those given by last advices. Grey Shirtings: 6 lbs. at $16; 7 lbs. goods, $51½ to $54; 8¼ lbs., $61½ to $63 per corge. Grey Long Cloths: 7¼ lbs., at $56; 10 lbs., $72. No Grey Madapollams on the market. Grey T-Cloths had been a little more inquired for; sales of 5 lbs., at $32½; 6 lbs., at $39; superior, at $44; 7 lbs., $45 to $45¼ per corge. White Shirtings dull; fine, $86 to $110; medium, $65 to $86 per corge. In Yarns there had been scarcely any business; of Grey Mule the market was almost bare; Turkey Red also in very light stock, no sales; Green Yarn, No. 40, $83 per bale.

COLOMBO.—The following is from Messrs. Geo. Wall and Co.'s Report:—We have still a dull market. The extent of the decline is indicated by the following quotations for Grey Shirtings, to which class of goods the very limited business of the fortnight has been almost exclusively confined. Grey Shirtings: 39 inch 7 lbs., 11s. to 11s. 3d.; 8¼ lbs., 13s. 9d.; 45 inch 8 lbs., 13s. 9d.; 9 lbs., 15s. 9d. to 16s.; 10 lbs., 18s.; 11 lbs., 20s. 6d.; 50 inch 10 lbs., 17s. 9d. to 18s.; 11 lbs., 19s. to 19s. 6d. The market is affected to some extent by auction and private sales of considerable parcels of goods more or less damaged. Grey Drills 28 by 30 yards: A sale of 10 bales at 14s. 6d. has been effected.

## CEYLON, STRAITS, JAVA, CHINA, AND JAPAN EXPORTS.

### TEA.

YOKOHAMA.—Business had again been limited, and settlements did not exceed 2,000 piculs, the greater portion of which was settled before the last mail left. Prices were unchanged, and the native dealers showed no willingness to make concessions; arrivals moderate, and stocks on offer not very heavy. The Mary Lee and George Becker had sailed with 750,956 lbs. for New York; the Cedric, Phæton, Janet Ferguson, and Carobel were loading for the same port. Advices *via* San Francisco to the 29th September report a slight improvement in the inquiry for America, and a consequently increased business; good common was quoted $24; medium, $27; good medium, $31; fine, $35; finest, $39.

SHANGHAI.—Black: A much smaller business had been transacted than in the previous fortnight, occasioned no doubt by the ready and daily increasing supplies, and by the rise in exchange. The market had been a languid one, and the tendency of prices lower. With very few exceptions the stock on offer consisted of characterless descriptions of Tea, better in quality and condition than they probably will be on their arrival in England. The tendency of the market had been to discriminate too much between parcels possessing scarcely any real difference in quality or home value, and to pay accordingly for them, a state of affairs more closely resembling the operations in the year 1865 and 1866 than any since then, a discrimination proved to be unprofitable in the London market of the past four years. Settlements for the fortnight, 18,000 chests; re-shipments on owners' account, 890 chests; stock, 86 chops, or 29,000 chests. Quotations (duty paid, exchange at 6s. per tael, and freight at £1. 10s. per ton):—Hohow, common to fair, 1s. 0¾d. to 1s. 2½d. per lb.; Oonam, common to good, 1s. 1½d. to 1s. 3½d.; Ningchow, fair, 1s. 2½d. to 1s. 4½d.; Oopack, common to good, 1s. 2½d. to 1s. 5½d. Green: Some business had been transacted, but many buyers held aloof for lower prices, and the market for common to good kinds must be considered easier. A liberal quantity had been bought for England, to which country rather full shipments of Fychow and Moyune Teas had been made. The stock remained unaltered, but liberal supplies of Moyune Teas were close at hand. Prices: Fychow, Tls. 32 to 37; Teenkai, Tls. 38 to 43; Moyune, Tls. 35½ to 45½; Pingsuey, Tls. 32; Shanghai-packed Tls. 26 to 32. Settlements for the fortnight, 26,000 half-chests; Stock, 75 chops, or 46,000 packages.

HANKOW.—The following is from Messrs. Drysdale, Ringer, and Co.'s report:—We have to advise but a small business done during the fortnight, as the teamen have demanded rates above the ideas of buyers, and, failing to get their prices, have shipped for sale in Shanghai. Arrivals since our last have been unusually heavy for the advanced period of the season, and have covered our previous deficit, the export to date as per Customs being equal to what it was at corresponding date last year, leaving a stock on hand of 8,000 chests and 1,400 half-chests, against 1,540 chests and 540 half-chests at same time in season 1868-1869. The change in the weather has doubtless allowed some chops to come forward, which were previously kept back by the heavy rains, but it is evident from the very inferior quality of the bulk of late arrivals, that Hongmen have brought as much as possible forward to meet the demand for low priced teas which has now been current for some time past. Two chops of very inferior Oonams, which cannot rank as common black leaf, are reported settled at 14½—equal to 1s. 1d. laid down in London; and if buyers continue but a short time longer to pay such rates, our export for season will doubtless be fully equal to that of last year. Closing rates show an advance of ½ tael per picul on last mail rates. We now quote Shuntam-packed tea 16 to 16½. Leeling and Oopack common to fair, 17¾ to 18¾; fair to good, 19 to 20; common Oonfas, 18 to 18½. Settlements: 8,600 chests, 3,100 half-chests.

KIUKIANG.—Black Teas: Arrivals had been large, and the proportion of Hohow Teas had been much greater than is usual at the season. None of the parcels had been offered for sale. Quotations were—Ningchows, Tls. 17; Hohows, nominal. Export from 1st January to 18th Sept., 1869, 11,745,208 lbs.; ditto ditto, 1868, 13,962,218; Stock, 2,500 packages.

FOOCHOW.—Messrs. Odell and Co.'s Circular is as follows:—Congou: In the early part of the interval the active demand on English account, noticed in our last, continued, but since the arrival of the mail of 30th July, buyers seem to have almost entirely withdrawn from the market, and the few settlements made since then have been principally on Australian account. The stock is increasing, but the Teamen are very firm holders, and for the present refuse to make any concession in price. Souchongs have been in fair inquiry at full prices. Oolongs: Two buyers for the American market have commenced operations, and during the fortnight have purchased about 49,600 ½-chests on a basis of Taels 20.8 to 22.8 for fair to good cargo kinds, fine and finest grades bringing extreme rates. The rates paid, though not much higher than for an average of years, are much above those expected to rule, owing to the continued unfavourable advices received of the state of the home markets. The Teamen seem very sanguine that the total supplies for the season will be short fully 30,000 half-chests. Scented Teas have been in moderate inquiry at our last quotations. Settlements for the fortnight have been:—Congou, 35,358 chests, at Tls. 9.3 to Tls. 26.8 per picul, ship off; Souchong, 3,999 chests, at Tls. 18.3 to Tls. 32.8; Oolong, 49,660 ½-chests, at Tls. 18.3 to Tls. 36.8; Scented Teas, 8,417 boxes, at Tls. 21.3 to Tls. 25.8; Flowery Pekoe, 310 chests, at Tls. 20.8 to Tls. 38.8.

CANTON.—A steady business was reported in all kinds of Canton-made Teas at fully former prices for Scented Caper and Gunpowder, and at an advance of about one tael on the medium grades of Scented Orange Pekoe. Nothing had been done in country Congous, there being none in stock. Canton settlements, from Sept. 11 to Sept. 25:—Canton District Congou, 500 boxes, at Tls. 19 to Tls. 25; Scented Orange Pekoe, 5,500 boxes, at Tls. 15½ to Tls. 34; Scented Caper, 9,000 boxes, at Tls. 14 to Tls. 26; Canton Greens, Gunpowder, 5,000 boxes, at Tls. 15 to Tls. 28; Young Hyson, no sales; Country Greens, no stocks.

### SILK.

YOKOHAMA (Sept. 28, *via* San Francisco).—The last European advices being unfavourable to Japan Silks, prices had slightly declined. Arrivals since Aug. 28 about 1,400 piculs, chiefly of Hank sorts, which, however, were in general so badly reeled that nearly one half the purchases had been rejected on inspection. Net settlements about 750 piculs Hanks, 75 Oshiu, and 40 Koshiu—or, in all, 865 piculs—leaving in stock about 1,000 piculs. The Japanese being anxious to sell, prices for the medium and inferior Hanks had receded about $20; but best sorts were scarce, and in demand at full prices. Total settlements since beginning of season,

Digitized by Google

about 3,350 bales, against 4,800 last year same date. Quotations (all charges paid at exchange 4s. 6½d.):—Mybash and other Hanks, extra, 34s. 3d.; best, 31s. 8d. to 33s. 3d.; middling, 29s. 5d. to 31s. 4d.; inferior, 26s. 4d. to 28s. 3d.; Oshiu, extra, 35s. 4d.; best, 31s. 4d. to 33s. 11d.; Koshiu, middling, 25s. 6d. to 27s. 5d. Silk Worms' Eggs: Total arrivals 925,000 cards at Yokohama and 50,000 at outports, making 975,000, against 1,800,000 last year. Total settlements 550,000, mostly annuals. The stock consisted mainly of Bivoltini, which were offered at very low rates, say $0.25 to $0.75, with few buyers. For good annuals, which were scarce, high prices ruled, best Oshiu and Sinchiu green being quoted $3.50 to $4.50 per card; common to good green, $2.75 to $3.25; inferior green, $1.75 to $2.50; annual white, $2.25 to $3.50.

SHANGHAI.—Messrs. Skeggs and Co.'s Circular, dated 23rd September, is as follows:—There has been an active market throughout the fortnight, and, although settlements are estimated at only 2,200 bales, considerably more has been purchased, but rejected owing to the damp condition of the bulk. Exchange has also interfered with business to some extent, having ranged from ½d. to 1d. higher than last mail's rate. Chop Silks have been taken at an advance of Tls. 5 as follows:—Koo-fong-sing thirds at Tls. 572½; Dragons, Tls. 567½; Yakee, Tls. 560; Donkey, Tls. 557½; Incense, Tls. 550; Blue Flag, Tls. 520; and Red Peacocks, Tls. 467½; whilst all medium and good descriptions maintain previous rates, common sorts only being perhaps a shade easier, but quotations can scarcely be altered. In all other descriptions the market may be considered unchanged, although higher prices are asked for Kahing and Chincum Taysaams.

CANTON.—The home advices not having proved so favourable as was expected, the principal buyers had withheld purchases. Holders at the same time were firm. The fifth crop produce was arriving daily, and holders of the accumulated stock would probably be forced to accept lower rates. Re-reeled Côten-Gown were quoted $640; Re-reeled Mahang, $525; Re-reeled Tonquin, $440 per picul. The stock was estimated at Loongkongs, 150 bales; Tsatlee reels, 450 bales; Kowkongs, 200 bales; Cumchucks, Lacklows, &c., 70 bales; and 200 bales of inferior descriptions.

## JAVA, STRAITS, AND CEYLON PRODUCE.

BATAVIA.—Arrack is in fair request, but transactions limited, at f.125 per leaguer. Coffee: No transactions of importance. Ordinary Java quality f.32 per picul. Gum Damar in less favour, and few buyers at over f.46 per picul. Hides in good request at last quotations. Sugar: The principal transaction had been in the Government sale of 95,000 piculs, held on Sept. 13; the bulk of the assortment consisted of qualities unsuitable for the European markets, and the average rate paid was f.15.95 per picul for No. 14. Tin: An auction of 5,000 piculs Billiton to be held on Oct. 12.

SINGAPORE.—A moderate business had been done during the fortnight. Gambier, after departure of last mail, receded to $3.20 and $3.17½, but had since recovered, and the last purchases had been made at $3.20 per picul. Black Pepper difficult to obtain in quantity, and the parcels coming to hand had been taken up at $7.05 to $7.12½ per picul. White Pepper also scarce, $11 per picul paid for delivery. Pearl Sago declined; small grain, $3.25 to $3.20. Sago Flour also slightly lower, a small cargo of Borneo bought at $2.60 per picul. Bontyne Coffee, $12¾ to $18 per picul. Tapioca, $4.50 to $4.70 for Pearl; $4.65 to $4.90 for Lump. Hides in fair demand, $11⅛ paid for picked Tringanu. Tin bought to a considerable extent for Europe and America, $31⅜ to $30⅞ per picul.

PENANG.—The demand for Tin had subsided; $29.75 per picul closing price. No Black Pepper had come forward, the only transaction at $7 to $7.25 per picul. Small arrivals of White Pepper secured at $9.75 to $10 per picul—scarcely first chop.

COLOMBO.—Coffee plantation: A fair amount of the new crop was on the market, and the samples for the most part were of fair average quality, though generally in a damp condition, owing to the excessively wet weather which had prevailed. We have to report several transactions at prices ranging from 10s. 6d. to 11s. 6d. per bushel. Native was still quoted at 48s. to 49s. per cwt. free on boa-J, but this must be considered as quite nominal as the market was quite bare of supplies. Cinnamon: Price well maintained, but the choice was becoming more limited. We quote 22d. to 24d. per lb. Cocoanut Oil in fair demand, at £34 to £35 per ton. Coir Yarn: The decline of 1s. to 2s. in the Home market had checked business. Plumbago: The wet weather had greatly interfered with mining operations, and the supply on offer was limited. Good bright Lump £14 to £15. 10s., and Dust £4 to £5 per ton.

At SINGAPORE.—From London, Oct. 3, Pactolus; 7, Rifle; from Liverpool, 3, Penrith; from Glasgow, 6, Eliza Thornton; from Swansea, Sept. 28, Oliver Cromwell; from Cardiff, Oct. 2, Affghan; from Hamburg, 2, J. W. A. Lorenzen; Northam Castle, Grecian Queen (reported by telegram).

At BATAVIA.—From Rotterdam, Sept. 23, Voorlichter, Jason; 24, Noord Braband; 25, Acolus, Jannelje; 26, Graafstroom, Kennemerland, Professor v. d. Boon Mesch, Susanna, Jedo, India; from Amsterdam, 18, Stad Docum; 21, Nederland and Oranje; 23, Luctor et Emergo; 24, Wilhelmina and Clara; 26, Bestevaer; from Glasgow, County of Ayr; from Liverpool, 28, Syringa.

At BANGKOK.—No advices.

At PENANG.—None.

At SAIGON.—No advices.

At COLOMBO.—From London, Oct. 2, Elfin.

At GALLE.—From Newcastle, Oct. 5, Adelaide; from Cardiff, 7, Ardanza; 15, Mirella.

## DEPARTURES.

From YOKOHAMA.—For New York, Sept. 15, George Becker; 16, Mary Lee; for Callao, 9, Queen of Nations; 11, Star of India; 13, Senator Webber; 15 Queen of Nations.

From HIOGO.—None.

From SHANGHAI.—For London, Sept. 11, Tamerlane; 12, Diomed (str.); 13, Hindostan; 16, Mary Moore, Pegasus; 17, Imperatrice; 2 , Fiery Cross.

From FOOCHOW.—For London, Sept. 12, Queen of the Ocean; 13, St. Andrew's Castle; 14, Windermere; 16, Inarime; 17, Empress; for otterdam, 16, Deerfoot.

From AMOY.—For Channel, Sept. 10, Polar Star.

From HONG KONG and CANTON.—For London (via Singapore, &c.), Sept. 18, Diomed (str.); for England, 23, H.M.S. Rodney.

From SINGAPORE.—For London, Sept. 29, Diomed (str.); 30, Empress of India; Oct. 2, Medway; for Falmonth, Sept. 25, Alfred.

From BATAVIA.—For Holland, Sept. 19, Grootmeester, National, Helena, Arabia, Maassluis, Gutenberg, Tonia, Kosmopoliet II., Mentor, Maria Adolfina, Senior; for France, 25, Asie Mineuer.

From PENANG.—For London, Sept. 28, Mary Falconer; Oct. 2 (*via* Mauritius), Diomed (str.); for Boston, Sept. 28, Rainbow.

From COLOMBO.—None.

From GALLE.—None.

## VESSELS LOADING.

At YOKOHAMA.—For London, Crown; for New York, Phæton, Cedric, Janet Ferguson, Carobel.

At HIOGO.—For New York, Ravensbourne.

At SHANGHAI.—For London, Northampton, Rollo, Lorton, Wylo, Ornate, Dhollarah, Whimmera; for New York, Willy Rickmers, Everhard, Nettie Merryman, Atma, James P. Stone.

At FOOCHOW.—For London, E. P. Bouverie, Lord Macaulay (full), Osprey, Ceylon, England's Glory, Carmarthenshire, Columbus; for New York, Ada.

At AMOY.—None.

At HONG KONG and CANTON.—For London, Cathaya, Invincible, Gauntlet; for New York, Dr. Petermann, Oliver Cromwell, Good Hope.

At SINGAPORE.—For Liverpool and Glasgow, Roslin Castle; for Liverpool, Affgham, Toronto.

At BATAVIA.—For Holland, Catharine Rankin, Hilju, Norsk Flag; for Amsterdam, Europa, Johan, Atlas, Aimo, Charlie Palmer, Herman de Ruyter, Dordrecht II., Saya, Crawshay Bailey, Tasmania, President Plato, Utinia, Jan Pieterszoon Koen, Alexander II.; for Rotterdam, Maria, Burg Hoofman, Ridderkerk, Bali, County of Forfar, T. D. Marshall, J. L. Enthoven, Noach II.; for Channel, Veronica, Scindia, China; for United States, Sharpsburg.

At PENANG.—For London, John Paul, Knighton, Benvenue.

At COLOMBO.—For London, Passover, Benledi, Ocean Rover, Southern Cross, Samuel, City of Paris; for London, via Tuticorin, Helen Finlayson, Elfin; for Boston, Asphodel.

At GALLE.—For London, Lincelles.

## FREIGHTS AND CHARTERS.

At YOKOHAMA.—To London, £4 per ton; to New York, £2 10s. Employment for shipping is very dull, and several vessels have left Japan for Callao, to load guano for England.

At HIOGO.—The Ravensbourne is circulated for New York, but no rate is fixed.

At NAGASAKI.—To London £4, to New York £3 10s.

At SHANGHAI.—There is no improvement to report; rates remain 30s. to London and £2 to New York.

At FOOCHOW.—To London, £2; to New York, £2 5s.

At HONG KONG.—The Gauntlet is engaged full at £1 15s. to London.

At SINGAPORE.—There is no vessel on the berth for London. To Liverpool, and Liverpool and Glasgow, the rate is £1 12s. 6d. dead weight, £1 17s. 6d. light freight.

At BATAVIA.—To Continent f.43.90 f.45.

At PENANG.—To London the rate is for tin £1 10s. per ton; sugar, £1 17s. 6d.; measurment, £2 7s. 6d.

At COLOMBO.—To London dead weight, £2 5s. to £2 10s.; coffee in casks, 55s. to 60s.; in bags, 35s. to 40s.

## CASUALTIES.

The Bella Rose Foochow to Melbourne, and the Devonport, London to China, are reported by telegram from Hong Kong as totally lost in the China Sea.

## COMMERCIAL POSTSCRIPT.

The amount of bullion by the P. and O. Company's steamer *Tanjore*, from Southampton, on the 13th inst., was—in gold, to Alexandria, £3,000; to Galle, £1,800; to Bombay, £30,800; to Madras, £6,738; to Calcutta, £20,000; in silver, to Bombay, £15,500, to Hong Kong, £300; to Shanghai, £2,950; total, in gold, £62,338; in silver, £18,750.

The notorious French coolie ship *Tamaris* is reported by the West India mail to have put into Martinique.

### SHIPPING.

ARRIVALS NOT IN THE TABLES.—Nov. 13, at Deal, from Bangkok, Lord Collingwood; 10, at Marseilles, from Singapore, Isaure; 13, at London, from Colombo, &c., Avery; 14, from Foochow, Serica; from Shangai, Guinevere; at Liverpool, from Singapore, Downe Castle; at Falmouth, from Bangkok, Sarah Anderson; from Akyab, Matterhorn; at Queenstown, from Manila, Alexandrina; from Rangoon, Lady Emma Bruce; at London, from China, Falcon, Golden Spur.

DEPARTURES.—Nov. 13, from London, for Galle, Great Basses.

LAID ON.—At London, for Colombo, Prince Alfred.

SPOKEN.—Zephyr, Manila to New York, Sept. 7, 31 S., 14 E. Athole, Sourabaya to London, Oct. 23, 27 N., 30 W.

CASUALTIES.—The Bedforshire, Langford, from Cardiff to Singapore which was reported Nov. 8 as having put back to Cardiff for repairs, had her hawsepipes, sheer streak, and part of covering board carried away by her chain having got foul of some wreck whilst she was at anchor in Penarth Roads, Nov. 6.

MISCELLANEOUS.—At Madeira, Oct. 17, Bangkok (str.), Haffenden, from the Clyde and left for Singapore.

## LATEST TELEGRAM.

(RECEIVED AT THE "LONDON AND CHINA TELEGRAPH" OFFICE, VIA GALLE, NOV. 7.)

GALLE, OCT. 27.—Severe earthquake at Manila; every building shaken; walls thrown down; many accidents in Manila and the neighbouring provinces.

CARGO FROM CHINA AND JAPAN.—The Pacific mail steamer *America*, which arrived at San Francisco on the 20th Oct., brought the following cargo:—634 bags sugar, 8 packages treasure ($29,300), 178 packages drugs, 60 packages clothing, 300 bags coffee, 400 bales hemp, 11 packages camphor wood trunks, 30 packages rice flour, 5 packages cuttlefish, 2,898 packages 30 jars tea, 179 packages candy, 4 packages paddy, 20 packages oysters, 4 packages japanware, 1 case books, 22 packages lacquered ware, 24 packages plants, 5,252 bags rice, 10 packages wine, 261 boxes eggs, 54 packages fish, 250 packages beans, 564 packages yams, 25 packages lily roots, 12 packages woodenware, 342 packages arrowroot, 10 packages oil, 115 packages sweetmeats, 90 packages bamboo shoots, 15 packages olives, 208 packages fruit, 26 jars anchovies, 50 packages paperware, 30 boxes soy, 23 boxes opium, 25 packages paper, 32 packages paper, 32 packages shoes, 50 packages lamp oil, 230 packages ginger, 19 packages silk, 7 packages cotton, 9 packages vermilion, 693 packages merchandise.

## RAILWAYS IN CHINA.

ALL who possess any substantial knowledge of China—and we regret that it is impossible to include in this category any member of Mr. GLADSTONE'S administration—are well aware that if we ever succeed in introducing railways and telegraphs into that country it will be in spite of the opposition of the Government, and not by the aid of their goodwill. In other words, it is as plain as a pike-staff, to all except those who turn a deaf ear to everything but Mr. BURLINGAME'S blandishments, that the Chinese people will gladly welcome us foreigners with our Western civilisation, if only their rulers will allow them to do so. The Government are ready enough to adopt such European improvements as will strengthen them in warlike art. They are glad to establish arsenals and build gunboats on the European model, simply because these will enable them, as they believe, successfully to resist all other European innovations; and in the BURLINGAME mission, as in all else, this has been their sole aim and end. Fortunately for us, however, the people themselves are more liberal and more open to conviction. Already the more enlightened section begins to believe in the value of railway communication, and we learn that such strong representations have been made in favour of a line between Shanghai and Soochow that even the Mandarins have had to make at least a show of giving way, and have promised to sanction the construction of such a line, on the stringent condition, however, that it shall be carried out entirely without foreign aid. The scheme will be remembered as an old one, which was extinguished for the time by the decidedly hostile tone in which the Peking Government replied to Sir RUTHERFORD ALCOCK'S communication on the subject of railways. It is now revived in this new form; the native merchants, not only at Shanghai, but in the city of Soochow itself, have expressed a strong desire to see it carried out; and, as we have said, the local authorities express themselves willing to facilitate it if it can be accomplished solely with native resources. This stipulation, it seems to us, is very far from being a prohibitory one, if the central Government endorses the concession of its local subordinates. If undertaken by a purely Chinese company, that company will surely find the means of procuring such foreign assistance as it may require to complete the line, and nothing can prevent it from being a means of ultimately introducing foreign science and improvements. The one obstacle to be dreaded is that, when all else is satisfactorily settled, there will be found to be a hitch at head quarters—that in fact the central authority will *not* sanction it; and of course the spirit that at present rules our attitude towards China will not permit the exercise of any pressure, so in that case another chance will be hopelessly lost. Still, without being very sanguine as to the result, we may venture to hope that the Soochow Railway will at some not very distant day be an accomplished fact; and that once in operation, it needs no prophet to foretell the swift and certain driving home of the wedge that is to admit us into the very heart of the Empire.

## SILK CULTIVATION IN JAPAN.

IT is always gratifying to find our Consular or diplomatic officials in the East taking advantage of their position and influence to promote the interests of commerce. In the early times of our intercourse with China there was too much reason to complain of indifference in this respect, for many members of these services, though fully alive to the importance and dignity attached to the discharge of their magisterial and diplomatic functions, were prone to regard mere trade with contempt, if not with absolute aversion. But all that is now changed. Of late years our Ministers and Consuls have vied with one another in collecting statistics and compiling reports on the trade of the various ports, until their observations have come to be regarded as highly important contributions to the history of our commercial intercourse with China and Japan. In several cases, gentlemen attached to one or other of the Legations have made extensive tours for the purpose of collecting information, and the result of one such journey, recently performed in the island of Niphon, is now before us. With the laudable view of acquiring and disseminating a more intimate knowledge of the silk culture as practised in Japan, Messrs. ADAMS and WILKINSON, of the British Legation at Yedo, made a tour through the principal silk districts of that country in June and July of the present year; in order to increase the practical utility of their observations, they were accompanied by three experienced silk-inspectors of Yokohama; and Mr. ADAMS having compiled a most interesting report of the journey for presentation to his chief, it was transmitted to the Yokohama Chamber of Commerce, and published in pamphlet form by that body. In characterising Mr. ADAMS'S report as "most interesting," we have by no means erred on the side of extravagant laudation, for his account of the culture of the silkworm and the manner of preparing its produce would be read with interest even by persons entirely unconnected with the silk trade. The first noticeable thing in the report is the uniform kindness, civility, and attention experienced by the travellers at every point of their journey, not only from the general populace, but from the much dreaded "Yakonins" and retainers of Daimios. This presents a marked contrast with the treatment recently experienced by foreigners travelling in China. Some very unfavourable symptoms were observed in the condition of the silk districts, of which the most serious is an increasing prevalence of a parasitic disease termed "Uji," for which no remedy appears to be known, and which seems to be at times almost as disastrous in its effects as the silkworm disease that has lately prevailed in Europe. Another serious evil is the great carelessness with which many operations are performed that demand extreme nicety and skill; but improved machinery, and a better system of management, would soon cure this, as well as a loss arising from the present defective mode of drying the cocoons. On the other hand, some very encouraging signs of improvement were noticed, such as a largely increased cultivation of the mulberry, the erection of buildings specially for rearing silkworms, and the establishment of "inspection-offices" for the proper examination of the silk before sending it into the market. On the whole, there seems every prospect of a gradual but steady improvement in the silk trade of Japan. We may conclude our brief notice of Mr. ADAMS'S pamphlet with a hope that this will not be his last contribution to our knowledge of Japan.

---

THE Indo-European Telegraph Company (SIEMEN'S line) have now the entire length of their wires completed, with the exception of some trifling links near Teheran. The line runs from Lowestoft, by submarine, to Nordeney, thence to Berlin, Odessa, Warsaw, and Kertch to Teheran and Bushire, thence by Persian Gulf Cable to Kurrachee. The scale of charges is not yet fixed, but it will certainly be lower than the present rates. The line will probably be opened on the 1st Dec. Telegrams announce the completion of the first section of the new Persian Gulf cable.

---

THE steamer *Rocket*, which left Shields for Shanghai on the 24th Oct., was towed into Lowestoft during the late gale, with loss of the Captain, Engineer, &c. She proceeds shortly, under the command of Captain ROPER, *via* the Suez Canal.. The *Rocket* has been despatched by Mr. JAS. BEAZLEY, of Liverpool, and is intended for local employment. She is consigned to Messrs. A. R. TILBY and Co., of Shanghai.

## CONSULAR REPORTS ON TRADE.

A BLUE-BOOK just issued contains (in continuation of the series of Reports presented to the House of Commons in July last) the Reports on the trade of Tientsin, Chinkiang, and Tam-suy for the year 1868. Mr. MONGAN, who has long been conspicuous for the ability with which he treats all matters having reference to commerce, gives an exhaustive account of the condition of the port under his jurisdiction, and the result she deduces from his observations must be considered more promising for the future than satisfactory as regards the present. The two rebel raids of last year devastated whole districts on the fertility of which the commerce of Tientsin mainly depends; and the ravaging of an entire province, with the plundering and partial destruction of five cities, could not but be felt as a heavy blow. Yet with all this havoc to record, Mr. MONGAN'S Report contains, as we have said, good promise for the future; for even in the face of these untoward circumstances, the total trade of the port for 1868 appears to have largely increased in comparison with the previous year, although it fell short of the year 1866, when no disturbances of any kind happened to interrupt the tranquillity of the province. This being the case, it is by no means unreasonable to expect that so long as it enjoys immunity from such disturbing influences, the trade of Tientsin will exhibit steady and rapid progress. The first section of the Report before us is devoted to a brief historical sketch of the political events of local importance which affected the commercial interests of the port during the year; and this consists chiefly of a record of a series of miserable tragedies that need not be dwelt upon here, though it forms a valuable *addendum* to the other information contained in the Report. Passing then to shipping and navigation, we find that in 1868 more foreign shipping was employed in the trade of Tientsin than in any former year, the increase in tonnage, however, being entirely in steamers. The direct trade with England was represented by three sailing vessels, averaging about 530 tons, against one of 460 tons in the preceding year; and Mr. MONGAN gives some figures showing that the cost of importing piece-goods by this method is about equal to, but certainly not more than, the cost of conveying them from Shanghai to Tientsin. This fact needs only to be fairly considered to ensure a rapid development of the direct trade. Of both steamers and sailing vessels the largest proportion bore the English flag. Besides this, there is much interesting information regarding the rice trade and other traffic carried on by native junks, which, like that in foreign bottoms, shows a steady increase. Turning to imports, we find that, as compared with 1867, there was a very great advance in the value of cotton piece-goods imported, a slight falling off in that of woollens, and a considerable decline in that of opium; but the aggregate value of these three great staples, and all other foreign imports, in the latter year exceeded that of the former more than three-quarters of a million sterling. Mr. MONGAN expresses an opinion that Tientsin consumes more cotton piece goods than any other of the open ports, Shanghai not even excepted, if the re-exports be deducted from the imports; and yet the teeming millions of the working classes of this country do not wear English cotton cloth, the more durable homespun product being universally preferred by them to our more elegant-looking but less serviceable fabrics. Under the head of exports less produce and more treasure was exported in 1868 than in 1867; but taking the aggregate values of both, there was an increase of about half a million sterling in the former year, the total value being close on £1,870,000. This included only 480 tons of coal—that mineral which would prove such a vast source of wealth to the port could permission be obtained to work the mines; to the difficulties that all endeavours in this direction have met with Mr. MONGAN makes but a brief passing allusion, evidently feeling very strongly on the subject, but convinced that with the present attitude of our Government no hope of progress can be entertained. He incidentally notices the increased use of GRANT'S Trans-Mongolian line, which in 1868 transmitted 1,158 messages between England and China, against 856 in the previous year. The total trade of the port—import, export, and transit—he estimates at a trifle over eight millions sterling. We cannot dismiss this report without once more commending the clear, able, business-like manner in which it is framed.

The other two Reports in the volume are of minor importance. That on Tam-suy, by Mr. H. F. HOLT (Vice-Consul) shows the total imports and exports in 1868, in foreign vessels, to have been under a quarter of a million sterling. Notwithstanding the smallness of his field of observation, Mr. HOLT finds room for some interesting and thoroughly practical remarks and suggestions, and generally takes a hopeful view of its future. Mr. ALLEN'S Report on Chinkiang applies also to a limited field, though one of rather more importance than Tam-suy. Here also the figures are satisfactory, especially as regards Imports, which figure for Tls. 5,693,980, and show an increase of 70 per cent. over the previous year, including opium, or, if the drug be left out of the question, an increase of no less than 450 per cent., a ratio which, if continued, would soon bring the port into an important position. The Exports are trifling—only Tls. 442,000, but these also show a slight though perceptible increase, especially in the most important article, silk piece goods. The foreign shipping is of course almost exclusively confined to the steamers of the river companies, but these, it seems, charge such high rates of freight that small vessels of the "lorcha" class and schooners are gradually creeping in, and taking a share of the traffic when despatch is not a *sine quâ non*. Further development in this direction may be expected.

## THE HONG KONG CENSUS.

THE "Amended Census Return" for the 30th June last, published in the *Government Gazette* of the 11th Sept., is worthy of a passing notice. The first thing that strikes one is the exceeding smallness of the proportion of Britons to the total population of this British Colony; the latter being represented by the figures 121,979, while the number of fixed British residents (that is, not counting crews of ships in harbour and soldiers of the garrison) was only 759. Of course, in an Asiatic colony, a large preponderance of native over European residents is a matter of course, but then it would be supposed that at any rate the English would outnumber all other "foreign" nationalities. But here again we are at fault; under the head of "European and American fixed residents," we find Portuguese come first, with 1,150, or nearly four hundred above the English. The Germans are third in point of number, being 153, and Americans fourth, with 115. The French are but 56; Danes and Italians twelve each; while the Spaniards, Swiss, and Austrians figure for the still more insignificant numbers of nine, six, and four respectively. It may be doubted, however, whether many of the Portuguese are not wrongly classed as "Europeans" simply; it being an open question how large a proportion of the natives of Macao are entitled to be so considered. And it is very evident that these are not included in the 997 persons set down as "Goa, Manila, Indian, and others of mixed blood." The garrison exhibits a smaller figure than in many previous census returns, being but 763, all told. The Chinese inhabitants of the colony number 114,280, of whom no less than 7,235 are in the employ of Europeans, and as the latter (excluding, of course, women and children) are 1,148, we have an average of 6·32 Chinese employed by each European resident. By the way, this may not be quite correct, for sixty-three Europeans and Americans had the misfortune to be in gaol at the time the census was taken, and it is not quite clear how many, if any, of these come under the denomination of "fixed residents." Perhaps it depends upon the term for which they were committed to "durance vile." The Chinese, however, occupied their full share of the gaol accommodation, for we find that nearly four hundred of them were provided with free lodgings. Of the remaining Chinese population—that is, the portion neither in European employ nor in prison—nearly one-fourth (22,530) are described in the census as "boat population," from which it would seem that even when domiciled under the British flag they do not relinquish the amphibious habits so dear to the Celestial nature.

THE interchange of the Treaty of Friendship, Trade, and Navigation between the King of the BELGIANS and the Supreme King of SIAM has taken place at the Belgian Legation, the respective plenipotentiaries being the Baron BEAULIEU and Sir JOHN BOWRING.

MR. HENRY JEFFARD TARRANT, formerly of Hong Kong, has been appointed Acting Chief Justice at Maulmain.

## EXHIBITION OF EASTERN PRODUCTIONS OF ART.

There is now open in the Palais de l'Industrie, in the Champs Elysées, Paris, the Third Exhibition of Art Manufactures, organised by an excellent society, *L'Union Centrale de l'Art Appliqué*, composed of artists, art manufacturers, and professors, who are making most laudable and successful endeavours to do something more for improvement and taste in decoration of all kinds, using the term in its widest signification, than official schools, colleges, and Imperial factories have done in the present day. The plan of the society is similar to that of the South Kensington Museum; it has a library and museum of art and art products, ancient and modern, open to all the world, and its exhibitions include all these things. The Exhibition now open, and which is to remain open all the current month, comprises an admirable collection of superior French products of all kinds, while the retrospective portion is devoted, this year, to Eastern products of all epochs. It is not surprising that China and Japan figure largely, for French art at the present moment is more indebted to these than any other foreign countries for its decorative novelties. The collection the bronzes, china, enamels, lacquer work, silks, &c., is superb, of great collectors of these works, and they are numerous in France, having contributed their choicest specimens. After having examined the retrospective galleries, it is highly interesting to inspect the French productions which owe their inspiration to Eastern sources; the most numerous examples are to be found in the porcelain and *faiences* class, in which are innumerable specimens of direct copies of Chinese and other ware, exhibiting very high qualities both as regards body, design, colour, and glaze, and many more which show the application of Oriental principles to modern art. One feature which forms one of the most artistic claims of the Chinese—namely, the mounting of bowls and vases on stands of carved wood, always in keeping with the main object—has been completely naturalised by our neighbours, and thus their beautiful productions gain enormously in importance, while the designs of the French carvers are in themselves highly artistic. In this and other classes Persian, Indian, and other influences are also very perceptible. The newest adoption of peculiar Eastern arts is to be seen, however, in the production of true *cloisonné* enamels, as applied to small objects of art and personal decoration, and of incised bronze work, with gold and silver inlays, after the manner of the Chinese and Japanese. These are the work of the house of Christople and Co., and of M. A. Falize; the colours of the enamels are brilliant, and the work seems to be perfectly solid and well executed, and the designs and execution of the bronzes are admirable. M. Falize has applied the Japanese system to many small objects with great artistic ability, and there is little doubt that his productions will form the starting-point of a new fashion in jewellery and other ornaments. It is not gratifying to the pride of artists of the nineteenth century that they do not succeed in establishing a style in ornamental productions; but, in the absence of originality and invention, the Union Centrale deserves all possible praise for collecting examples of past art, and doing all in its power to lead designers not to copy servilely, but to make legitimate use of the art of other countries.

---

From late advices from Washington we learn that Mr. Low, the new United States Minister to China, was expected in that city to receive his final instructions before leaving for Peking. These instructions, it is understood, will be based specially on the Burlingame Treaty, and in order the more fully to carry out this policy, he will not proceed to China by the Pacific, but by the overland route, to give him an opportunity, while passing through Europe, of conferring with, and receiving advice from, Mr. Burlingame. From this it is evident that Mr. Ross Browne's experiences or opinions will not be allowed to have any weight with the U. S. Government as regards its China policy.

---

We beg to call the attention of Subscribers interested in Ceylon to the Export Supplement which we furnish with this issue, containing the particulars of cargo by each vessel for ports in Ceylon, including the P. and O. steamers. The subscription is 12s. per annum.

---

The allowance to recruits for the Ceylon Rifle Regiment is, we understand, to be reduced from £2 to £1.

---

It seems there is to be no delay in thoroughly testing the value of Chinese labour in the Southern States, Mr. Koopmanschaap having already contracted for four or five shiploads of coolies, to be conveyed across by the Pacific Mail Company. The first experiment is to be made on rice and sugar plantations in Louisiana, cotton lands being considered less suitable. The principal features of the agreements to be signed by the coolies, are—a five years' term of service; wages (payable in gold) at $9 per month (of twenty-six working days); half of the wages payable monthly, the other half to accumulate in the employer's hands until the close of each year, as a guarantee against absconding; passage money, and any sums advanced, to be repaid out of first earnings; comfortable quarters and good rations of rice, pork or beef, and tea; and a small patch of garden ground is to be allowed to raise vegetables, &c. If a sufficient number of coolies can be found to accept these terms—which we can hardly doubt—and if the emigration is decorously conducted, and good faith is kept on either side, there is every reason to expect the movement will be a beneficial one to the landowners. The negroes however are of a different opinion, and have already set on foot what promises to be a formidable agitation against the invasion of yellow labour.

---

The credulity of Her Majesty's Ministers will, we should think, be a little shaken by the news brought by the present mail. It is now quite evident that the Duke of Edinburgh will have no State reception at Peking, and that if he goes there at all it will be as "a private individual," for whom the arrogant officials will no doubt find some method of showing their contempt. In fact, the mere denial of a proper reception is a gross insult, to begin with. Such are the fruits of a blind credence in Mr. Burlingame's representations, and a policy based upon them. What a contrast this to the truly regal honours paid to the Duke in Yedo, where—as may be read in our mail news—a distinction was shown him never before vouchsafed to any but the Mikados themselves, or the Shiogoons in the days of their pride and power. We hope the lesson will be taken to heart in the quarters where it is most needed.

---

We are glad to note that there is a prospect of the entrance to the river at Osaka being permanently improved. The *Royal Minstrel* takes out four iron steam dredging-machines, shipped by Messrs. John R. Hooper and Co., to Messrs. Alt and Co., of Japan, and these we are informed are intended to be applied to the above purpose. The rails, trucks, and other materials for a tramway are also being sent out; it is to be laid between Osaka and the landing place at Tem-po-san (inside the bar), to facilitate the conveyance of goods. This is an important step in the right direction.

---

Such of our readers as are interested in the Philippines will have received with regret the tidings conveyed in the telegram from Manila, which appears in another column. Immediately on receiving it we communicated the substance of it to as many of our subscribers connected with Manila as possible. It affords a sort of negative satisfaction that though "accidents" are alluded to, there is no distinct reference to any loss of life, which we may therefore hope has been averted.

---

In our issue of the 18th ultimo we noticed a scheme to lay a telegraph cable from Possiet Bay, on the south-east coast of Siberia, to Japan and down the China coast. According to *The Times'* City Article of Saturday, a concession has been granted by the Russian Government to carry this out immediately, and a company is in course of formation for that purpose.

---

The vessels intended to be despatched by the Messageries Imperiales for the opening of the fortnightly service in July next are the *Ava*, *Meikong*, *Pe-ho*, and *Yang-tse-keang*. These vessels are of large size and full power, and have several improvements in the cabin accommodation for the convenience of passengers.

---

The Suez Canal has not as yet found favour with our underwriters. At present, the Marine Insurance Offices and the members of Lloyd's hesitate to accept risks on goods shipped by vessels going through the Canal at any lower rates than those charged for the voyage round the Cape.

## HOLLAND.

(FROM OUR OWN CORRESPONDENT.)

ROTTERDAM, Nov. 7.

To-day the debate upon the East India Budget is to be opened in the Second Chamber of the States General. The political news is thus likely to become somewhat more interesting than it has been for some time past. A few days ago the Chinese Embassy arrived at the Hague; it is composed of Messrs. Anson Burlingame, Plenipotentiary; Che-Tajen, second Minister; Sun-Tajen, third; two interpreters; M. Emile Deschamps and Mr. McLeavy Brown, secretaries. The Ambassadors have had several interviews with the Minister of the Foreign Affairs, Mr. Roest van Lunburg.

Prince and Princess Henry started on the 26th ult. from Walferdange (Luxemburg) for Brindisi, where they will go on board H.M.'s steamer *De Valk*, bound for Constantinople. After visiting the Sultan, they proceed to Alexandria and Port Said, to be present at the festivals attending the opening of the Suez Canal.

The efforts made by the Royal Netherlands Steam Company to raise a loan of fl.5,000,000, in order to establish a steam line between Flushing and New York, have not met with success. Only fl.3,000,000 was subscribed, and this sum is to be devoted to the improvement of the lines on the Mediterranean and Baltic Seas, which have already been established several years.

The Minister of Justice intends to lay before the members of Parliament a Bill for abolishing capital punishment.

The Government has granted a concession to Mr. W. Cornell Jewett for a direct telegraphic communication between Holland and Washington.

### PRODUCE MARKETS.

The result of the last auction of Coffee held by the Trading Company was, as I reported, a decline of about 1½c. At this decline an increased demand is likely to spring up for these Java sorts, in anticipation of which the market looks firm; but the intimation by the Trading Company, prior to their late sale, that the quantity to be offered at their November sale will not exceed 109,000 bags, affords the certainty that the stock available for the wants of the trade till next year, including the stock on warrants, reaches to about 426,000 bags, against 272,000 bags at the corresponding date last year; in view of which it seems doubtful whether any improvement of prices can be looked forward to. I may here mention that it is a matter of consideration with the Dutch Government to proceed in future with the sale of the coffee imported on their account by weekly public auctions, instead of ten monthly sales a year, which is the mode of realisation at present. If the contemplated new measure be decided on, it will probably be carried into effect next year, and the arrivals for the Trading Company will then successively be disposed of immediately they come to hand. There is little or no change in other articles of produce, which continue on the whole to exhibit but little activity.

COFFEE.—Since the auction the quotation for good ordinary Java has been 33c., and for ordinary 31c. to 32c., at which rate many numbers of the public sale continue to be inquired for. Total stock of coffee 600,900 bags, against 472,500 on Nov. 1, 1868. Floating, 156,800 bags, against 102,400 bags in 1868.

SUGAR (RAW).—The scantiness of the available stock on hand in our market causes ready sale to be made of what is offered. The following parcels have changed hands:—207 baskets Batavia, per Vesta, afloat, No. 4/11, soft and very soft quality, on secret terms; 252 do., stored, No. 9, soft and very soft quality, supposedly at f.32¼; 410 do. Cheribon, stored, nearly No. 13¾ (vacuum pan sugar), fine ground, good and fine quality, on secret terms; besides which some parcels have been sold from second hands. The market value of floating shipments of Java, of the new crop, ranges in the proportion of f.½ below September.

TEA.—The market is firm in the face of the public sale of 3,725/4 and 114/12 chests Java, to be held at Amsterdam on the 17th inst.

TOBACCO.—Sales have been closed by secret tender of 60 bales Java Blitar Djailey, 68 do. GC., 821 do. Kawi, 201 b. BD/H., 92 do. D, 82 do. MB, 149 do. VI/ Kedirie. The public sales of Java, to be held here to-morrow and on the 5th inst., embrace in the aggregate 12,303 bales of sundry head-marks, and those of Amsterdam on the 9th inst. 7,910 B. Our stock of Java on the 1st was 40,959 bales.

SPICES.—A better demand prevails for Nutmegs and Mace, prices of which have, consequently, improved a little. Nutmegs, No. 1, are held for 105c., No. 2 for 101c., No. 3 for 85c. Mace D 185c., E 180c. A further advance is not deemed unlikely, as stocks are getting very reduced. Amboina Cloves can be bought, No. 2 and 3 respectively, at 29c. and 26c. Stocks on warrants in the Trading Company's stores: Nutmegs, 3,752 casks; Mace, 302 casks; Cloves, 2,855 casks; Cinnamon, 62 packages; Pepper, 603 bags.

RICE.—No transactions from first hands since my last. The demand is dormant.

RATTANS.—Sales have been closed from first hands of 462 piculs, ex Utrecht, and 106 piculs, ex Eva Johanna.

BANCA TIN has undergone a material reduction. Sales have been closed at f.72¾, and even at f.72. The import is offered for delivery, ex the spring sale of 1870, at f.67. The demand remains quiet; no sales of Billiton are reported. Stock on warrants on the 1st, 110,617 slabs, against 140,759 slabs in 1868. Total stock in second hands, 29,949 slabs.

HIDES.—Sales have been closed here, afloat per Delft, from Padang, of 7,191 Cow Hides and 319 Buffalo, on secret terms.

JAVA INDIGO.—The pretty heavy arrivals which have rapidly succeeded each other of late caused prices to rule easier in the sales lately made, but the article continues to look healthy. 29 chests have changed hands.

JAVA VANILLA.—A public sale comprising 29 chests, or 1,400 kilo., ex Bezœkie, took place here on the 27th ult. This parcel has been currently sold at f.5.30 to f.14, according to quality. Some business has been doing by private contract at full prices.

ARRACK.—Sales have been closed by secret tender of 76 casks Batavia, ex Haamstede, 111 casks, ex Sir George Pollock, and 25 casks, ex Gerard Pieter Servatius.

### SHIPPING.

ARRIVAL.—Oct. 28, at Zierikzee, from Batavia: Nestor.

DEPARTURE.—Nov. 1, from Texel, for Rangoon: Indien.

PASSENGERS INWARD.—From Java, per Nestor: Messrs. Boermeyer van Jerkinghoven and family, Baron van Reede van Outshoorn and family, Van Spange and family, Henneses and family, Mrs. Van Hoven, Messrs. Brandts and Kok; per Kanagawa: Mrs. Pottger and family, Mr. Kooyker; per Aletta Augusta: Messrs. S. L. Polak, A. J. L. Weisbecker and family, Stufflers; per Medea: Messrs. Van der Feltz and family, Willinck and family, Krabbe, Kroeze, Van der Ven, Van Broekhuyzen, Pabst van Leschen, Sprenger, Cantervisscher and family, Noordewier, Mrs. Dickson; per Anna Sophia: Mr. Cocrengel and family.

PASSENGERS OUTWARD.—For Java, per Estafette: Mr. Heldering and family, Mr. W. F. Brandes; for Melbourne, per Cornelius Gips: Messrs. S. B. Game and Thomas Jackson.

## BIRTHS, MARRIAGES, AND DEATHS.

### BIRTHS.

ANTROBUS—On the 5th Nov., at Eaton-hall, Congleton, the wife of J. C. Antrobus Esq., of a son.

BARTON—On the 15th Sept., at Hong Kong, the wife of Mr. Zephn. Barton, of a daughter.

CORNELL—On the 8th Nov., at the Elms, Sutton, Surrey, the wife of T. E. Cornell, of a son.

DESLANDES—On the 10th Sept., at Shanghai, the wife of Mr. E. J. Deslandes, of a son.

FABRIS—On the 12th Sept., at Shanghai, Mrs. Edward A. Fabris, of a daughter.

GORDON—On the 5th Sept., at Hankow, the wife of W. G. Gordon, Esq., of a son.

LAPRAIK—On the 2nd Nov., at Glenmore House, Surbiton, the wife of John S. Lapraik, of Hong Kong, of a daughter.

LEAKE—On the 12th Nov., at 25, Westbourne-terrace, Hyde-park, the wife of W. Martin Leake, of Kandy, Ceylon, of a son.

MYBURGH—On the 4th Nov, at 6, Palace-gardens-terrace, Kensington, the wife of Philip Myburgh, Esq, barrister-at-law, of a son.

NACKEN—On the 16th Sept., at Hong Kong, the wife of Rev. Johannes Nacken, of the Rhenish Missionary Society, of a son.

SMITH—On the 24th Oct., at 52, Beaufort-street, Chelsea, the wife of Geo. Smith, of London and Shanghai, Esq., of a daughter.

STEWART—On the 22nd Sept., at Foochow, the wife of Mr. J. A. Stewart, M.D., of a son.

TOWSE—On the 2nd Nov., the wife of William Bockwith Towse, Esq., of Fishmongers' Hall, of a son.

### MARRIAGES.

MULHOLLAND—DOBBIN.—On the 12th Nov., at St. Peter's, Dublin, by the Rev. G. A. F. Patton, A.M., William Mulholland, Esq, of Singapore, to Rebecca, youngest daughter of the late William Dobbin, Esq., of Kildarton, Co. Armagh.

### DEATHS.

ALLEN—On the 19th Sept., at Hong Kong, Charles Arthur, son of Rev. Young J. Allen, aged 6 years and nine months.

BLAMPIED—On the 12th Sept., at Shanghai, of heart disease, Henry Blampied, late chief officer of the *Maggie Lauder*, aged 28.

CAMPBELL—On the 11th Nov., at Ellerslie, Streatham, Montgomerie Anne, the beloved wife of Patrick Campbell, Esq., Oriental Bank Corporation, in her 33rd year.

DICK—On the 21st Sept., at Hong Kong, Margaret Lawrie, wife of Thomas Dick, Esq., Commissioner of Customs, aged 34.

EARL—On the 2nd Oct., at Clove Hall, Penang, Captain A. H. Earl, of Singapore, Marine Surveyor for Veritas, &c., aged 33, deeply regretted. Friends will please accept this intimation.

HARRISON—On the 30th Oct., at Scarborough, Edward Harrison, late of Glover and Co., Japan, second son of David Harrison, Esq., of Walbrook, London, aged 34.

LANE—On the 9th Nov., at Oatland's Park, Weybridge, Thomas Ash Lane, late of Grove End House, St. John's-wood, and Hong Kong, aged 44.

LYNE—On the 14th Sept., at Yokohama, Alfred William Charles, youngest son of A. E. Lyne, Military Store Department, aged 13 months.

MATHEWS—On the 20th Sept., at Hong Kong, aged 34 years, of dysentery, John James Mathews, of Waterford, fourth engineer of the P. and O. s.s. *China*.

PATERSON—On the 24th Oct., at sea, on board the s.s. *Deccan*, John Paterson, Esq., R.N.R., Superintendent Peninsular and Oriental Company, Calcutta, aged 56.

ROUGH—On the 5th Nov., at Motcombe House, East Moulsey, Surrey, W. H. Rough, Esq., barrister-at-law, only son of the late Sir William Rough, Chief Justice of Ceylon.

## BOARD OF TRADE RETURNS.

The Board of Trade returns for September purport to show a decrease of £661,515, or about four per cent., in the declared value of our exportations compared with the corresponding month of last year. The preceding returns for some time past have purported to show an increase, but the present one is more in harmony with the symptoms observable in the commercial world. The falling off appears entirely under the head of cotton goods and yard and linen manufactures, while woollens and worsteds, as well as iron, exhibit an increase. For the first nine months of the year the aggregate exports are stated as under:—Nine months, 1867, £137,202,497; nine months, 1868, £133,804,263; nine months, 1869, £142,707,536. The exports for the month are stated as follows:—Sept., 1867, £16,145,584; Sept., 1868, £17,027,240; Sept., 1869, £16,365,725.

The value of the imports is given to the 31st August only; the figures for the month of August are:—1867, £20,753,168; 1868, £20,285,457; 1869, £20,559,578; while for the eight months they present the following results:—1867, £129,042,787; 1868 £153,637,733; 1869, £148,583,064. Thus it will be seen that for the month of August there has been little variation between the present and preceding years. The quantities imported are returned to the end of Sept., and from these it appears that there has been an increase in cotton and wheat compared with the corresponding months of the two previous years.

Digitized by Google

We annex a summary of those figures which relate to our Import and Export trade with China and other countries in the Far East :—

## IMPORTS.

### TEA.

## ARTICLES OF IMPORT.

### TEA.

There has not been much alteration in the market during the interval. At one time the low range of prices current led to a rather better business both for home consumption and export, but the last few days the market has again become very dull, and it is difficult to effect sales at former prices for most kinds. The large quantity of Tea now due makes the trade buy with caution, as they look for a better selection when the ships come in. The stock of the United Kingdom on the 30th ult. was estimated at 72,280,000 lbs., against 68,000,000 lbs. last year, and the quantity afloat at 52,207,480 lbs., against 61,179,000 lbs. last year. Within the past few days there has been an extensive show of samples of China Tea per recent arrivals, but at present little business transacted beyond a selection of some parcels of good and fine Congou at previous terms.

Red-leaf Congous: Siftings have sold at a further decline of ½d. to ¼d. per lb. Broken-leaf have shown but little change; there has been rather more inquiry for good common the last day or two, and the quotation is now 1s. 0½d. per lb. Fair to good old season's Kaisows have sold from 1s. 1d. to 1s. 3d. per lb., in small quantities. In New fair to good kinds have been difficult of sale, even at a decline of 1d. per lb. Fine have only been in moderate demand, but the few parcels of choice quality command extreme prices, 2s. 11d. per lb. having been paid for one parcel. In Pak lings there has been a fair amount sold at the very low prices last quoted. Black leaf kinds, fair to good common, have been sold from 1s. 0½d. to 1s. 0¾d. per lb., being rather easier prices. In Old season's good to fine a few sales have been made from 1s. 1½d. to 1s. 3d. per lb. In New season's the sales of similar quality have been at ½d. to 1d. per lb. decline. Fine have not been in much request, but finest command a ready sale at 2s. to 2s. 4d. where they take the fancy of buyers. Canton make—common quality has been sold at 1s. to 1s. 0½d. per lb., fair to good 1s. 1d. to 1s. 2d. Oolongs—old Teas have fetched rather better prices, there being few under 1s. per lb. In new, fair to good have been much depressed, and have sold at very low prices at public auction. Souchongs remain without change, the quality this season is generally inferior. Flowery Pekoes are in request, but the supplies on offer are limited. Scented Teas—Capers: Canton kinds have been in over supply, and prices for all but the finest qualities have given way 2d. to 3d. per lb. Foochow kinds are in demand. Orange Pekoes: Canton kinds have been fairly saleable in small quantities, at about previous prices. Foochow kinds: Old Teas have been dull of sale at about 1s. 2d. per lb.; in new there has been some business at about former prices. In Uncoloured Japan there is nothing new to report. Green Teas: In the absence of fresh arrivals, and there being scarcely any demand for export, transactions have been limited. Pingsueys of good quality have been saleable in small lots at about former prices. The Fychow kinds have been difficult to move, and at public sale sold at lower prices.

### SILK.

The market has been wretchedly flat and depressed since the Public Sales last month, and prices have shown great weakness; on some days hardly any business has been done, and generally but very little; a slightly better feeling has within the last two or three days, however, shown itself, but whether it will last remains yet to be seen. There is some little inquiry for 4¼ to 5 Taelees at 23s. to 21s., and for the coarse kinds of Taysaam, which latter are scarce. In Japan Silk there is occasional business, but only at the previously quoted low rates; and in Cantons less firmness, partly owing to the mixed and inferior quality of the Silk offering; Tsatlee reels are 6d. easier than last mail, and Loong Kongs of finest size hardly bring former rates, the medium and mixed sorts being especially difficult of sale. In Bengal Silk very little business is doing. The great fall in the value of European Silk, and the large quantity offering, sensibly affects the position of both Bengal and Japan Silk on this market, and accounts in a great measure for the decline and the difficulty of moving them. The deliveries of silk last month were very small again, but the annexed stock figures are worth attention, there being a marked decline in the total quantities on hand. The stock on the 30th ult. was, of China, 16,143 bales, against 21,685 at the corresponding date last year; of Canton, 2,239 bales, against 2,3 0; of Japan, 5,732 bales, against 2,874; the total stock of all descriptions being 27,500 bales, against 31,236 bales.

#### THE CONTINENTAL MARKETS.

For a considerable time business at Lyons has been at a very low ebb, but a little more life has appeared there of late, although quotations are very irregular. The amount of Silk entered by the registrars during the first week in October was 57,0[illegible]8 kilogrammes, against 52,072 in the corresponding week of last year; in the former amount there were 18,536 kilogrammes Arganquis, 14,648 kilogrammes Trames, and 23,824 kilogrammes Raw Silk. The accounts from Marseilles are still very bad, there being, in fact, scarcely any business at all doing. Matters seem to be improving at Avignon, but we have no special news worth recording. The news received in France from Japan, the last bearing date Aug. 8th, represents transactions in silk-worms' eggs as very difficult, the quantity of cards received this year up to the above date being only 20,000 against more than a million during the same period last year. The *Moniteur des Soies* believes that the Japanese have not increased their production, and that it is to be feared that the supply for the approaching season will be very insufficient. Naturally, such being the opinion of those who should be well informed on the subject, holders are not inclined to make any diminution in their demands, but, on the other hand, buyers still decline to deal on terms so high as they are at present. It is very important for the trade that the unsatisfactory position should not continue; but nothing but the pressing want of the manufacturers, or the arrival of good supplies, is likely to produce a change.

### COFFEE.

The condition of the market for Ceylon is precisely that which characterised it at the date of our last report; medium and ordinary qualities are in but little inquiry, and are obtainable at slightly lower prices, while superior descriptions are moderately active, and maintain previous rates. Native is entirely out of demand, and little has been offered at the public sales or sold privately. The prices paid for Plantation at the last auction were—triage, 33s. 6d. to 35s.; small, 61s. to 61s. 6d.; low middling brown and grey, 64s. to 67s.; bold do., 70s. to 71s. 6d.; middling coloury, 67s. 6d. to 74s. 6d.; bold do., 82s. to 83s.; pea-berry, 67s. to 79s. 6d. A sale of 243 bags Singapore (Campar) at 47s. is the only transaction in that description reported.

### SUGAR.

The market during the interval has been steady, but no great amount of activity has been displayed; prices exhibit but little alteration. Of Manila at the auctions, 3,000 bags ordinary unclayed (duty 8s.) sold at 30s.; 2,500 bags clayed (duty 8s.), at 30s.; 9,900 bags ditto (duty 9s. 7d.), at 31s. 6d.; one-third sound, the remainder damp and washed; and 13,314 bags Muscovado, Ilo Ilo, at 28s. 3d. By private contract large sales of Manila have been effected, including 4,700 bags repacked at 32s. 9d.; washed, 29s.; 5,000 bags clayed at 29s. 9d.; 35,000 bags ditto (duty 8s.), at 30s.; (duty 9s. 7d.), at 31s. 6d.; and 4,000 bags unclayed Ilo Ilo, at 27s. 9d. In other descriptions of East India Sugar no business has been transacted since our last report.

---

Coir Goods.—At the last sales the supply of Yarn offered was of fair extent, but mostly of undesirable qualities, two-thirds of the bales being damaged, and the dholls. all of common quality. The sales went off steadily at previous rates. 31,816 dholls. (40 tons) common Ceylon Yarn was chiefly bought in at £25 to £26, only 8 tons rather better quality selling at £26 10s. to £27; 41 bales sold, middling, £31; good, £37 15s.; fine, £43 10s. to £59 5s.; superior, £71. 15 bales damaged Singapore Fibre sold at £22 5s. to £27 5s. for fourth to first class. Kitool Fibre: 155 bundles Ceylon partly sold at 5¾d. per lb.

Cocoa-nut Oil.—The market for Ceylon is steady at £40 per ton.

Camphor.—Prices exhibit an upward tendency; at auction 91 packages China were held for extreme rates, and were eventually bought in, while 200 tubs Japan realised 96s. to 97s. per cwt.

Cutch.—Shortly after our last issue a strong demand arose, and a good business has been done at full prices, the latest transactions showing an advance of 1s. per cwt.

Gambier.—There is not very much inquiry, but the market is steady, holders not pressing sales. At auction 541 baskets and 842 mats Cubes partly sold at 21s. to 21s. 6d. per cwt.; privately, sales of block at 17s. to 17s. 1½d., ex ship.

Galls.—There is an almost entire absence of inquiry for both China and Japan, and we have no business to report.

Gums.—Benjamin: Of Siam 59 cases in auction part sold—small almond, part dark and rather drossy, at £8 10s.; clean solid block bold almond, £20 to £21; 139 cases Sumatra partly sold—ordinary to fair thirds, £4 to £5; middling to fine seconds, £8 2s. 6d. to £10 12s. 6d. per cwt. Copal: Steady; 13 cases soft Manila in auction sold at 35s. 6d. per cwt.; 13 cases hard retired. Damar: In auction 158 cases Batavia partly sold at 95s. to 98s. per cwt. for good bold pale, being firm. Gamboge: Steady; at auction 13 cases good fair pipe, rather run and part blocky, sold at £16 to £17 2s. 6d. per cwt.

Hemp.—The activity in Manila existing for some time past has entirely subsided; and the extreme prices recently established have given way. There have been no transactions in Manila by private contract; but in auction of 971 bales, per Southern Cross, 600 bales sold at prices showing a reduction of £2 to £4 from the late highest point. 89 bales Boluzan sound bought in at £66; second-class damaged sold at £63. 311 bales Sorsagon sold, sound at £63; damaged, £61 to £62 15s. 397 bales OO chiefly bought in at £58, 120 bales damaged being sold. 144 bales RR common brown sold at £55 10s.

India-rubber.—There has been no business in East India.

Japan Wax.—There is still an absence of any extensive inquiry; a few sales of saucers are reported, medium yellowish at 75s., mealy at 68s. to 69s.; good fair at 77s. 6d.

Oils.—Anniseed: Small sales made at 9s. 3d. per lb.; 8 cases at auction. Cassia: Has brought about former rates; 22 cases in auction partly sold at 5s. 7d. to 5s. 8d. per lb. Citronelle: Sells slowly, but is not cheaper; of 45 cases in auction a few sold at 2⅝d. per oz. Lemon Grass: Quiet; 20 cases in auction retired.

Plumbago.—Ceylon: Lump sells more readily, otherwise the market is unchanged. Of 1,509 barrels in auction, about half sold, rather small to good bold lump 14s. 6d. to 23s.; chips 9s. to 14s., and dust 8s. to 10s. 6d. per cwt.

Pepper.—Black: Demand active, especially for arrival, and higher prices have been paid; at auction Acheen sold at 4¼d. to 4½d.; Trang at 4⅜d. to 4½d.; Singapore at 4½d. White: Penang at auction sold at 5⅝d. per lb.; Singapore at 6d. to 6⅛d. for good bright, 5⅞d. to 5¾d. for fair bold

Rice.—The dulness in the market is still without relief; the business since our last report has been almost exclusively in Bengal. Quotations are—Siam field, 7s. 7½d. to 7s. 9d.; garden, 8s. 9d.; Saigon, 9s.; Necransie, 8s. to 8s. 6d.; but, in the absence of transactions they must be considered as merely nominal.

Sapanwood.—The inquiry is inactive; 119 tons Manila in auction part sold, middling quality at £7 10s. to £8 12s. 6d.; 24 tons Ceylon obtained £9 7s. 6d. to £9 10s. per ton.

Sticklac.—Siam has been sold at slightly lower prices, viz., 55s. for fair but rather woody quality. No business in other descriptions.

Shells.—Mother-o'-Pearl: At auction 463 cases Manila all sold—good, £8 5s. to £8 7s. 6d.; bold, £8 10s. to £9 5s.; 1 case fine Japan brought £10 per cwt. Tortoise: Without material change; 6 cases Singapore at auction sold—middling to good at 12s. to 17s. per lb.

Tin.—Owing to the reduced rates current in Holland, prices for

Digitized by Google

Straits have further receded; the current quotations are, Straits on the spot and afloat, £116, Banca £116 per ton, showing a decline of £8 to £9 per ton upon those given in our last report. The quantity of Straits afloat for Europe is estimated at 990 tons, against 1,029 tons at the corresponding date last year, and the stock at 1,500 tons, against 1,390 tons.

POSTSCRIPT.

COFFEE.—At auction 10 barrels 10 cases 784 bags pale Manila were withdrawn and bought in at 54s. to 55s., except 180 bags sea-damaged, which sold at 47s. 6d. to 49s. 6d.

RICE.—An improvement has been exhibited in the demand for floating cargoes of Siam. A floating cargo of 650 tons (in gunnies) Field Siam, per Lord Collingwood, arrived off the coast, has been sold at 7s. 6d., ex ship in London. An arrived cargo of 360 tons (in mats) Field Siam, per Vesta, at 7s. 4½d., ex ship London. The cargo of 1,100 tons (in bags) Field Siam, per Mikado, September sailing, at 8s., landed in London or Liverpool. The cargo of 1,200 tons (in mats) Field Siam, per Benares, September sailing, at 7s. 10½d., landed in London or Liverpool.

SUGAR.—Penang: At auction of 1,255 baskets 39 bags common brown 160 baskets sold at 28s. 6d., the remainder bought in at 26s. to 29s. Manila: In auction 1,675 bags unclayed Zebu, were bought in at 27s. 6d. By private contract 8,000 bags clayed (duty 9s. 7d.) have been sold at 31s. 6d., 100 tons unclayed Zebu, at 27s., and 3,000 bags Taal at 26s.

## ARTICLES OF EXPORT.

### WOOLLEN GOODS.

The following is Messrs. Hayter and Howell's monthly statement of the estimated exports of Woollens shipped to China and Japan from London and Liverpool:—

## FREIGHTS AND CHARTERS.

There has been no material alteration in berth freights to the Eastern Ports since our last issue; there is still but little doing; coal freights from the Northern outports remain without animation, rates ruling very low.

Current rates of freight for vessels on the berth:—To Yokohama: 32s. 6d. weight, 30s. meast. To Nagasaki: 45s. weight or meast. To Hiogo or Osaka: 40s. weight, 35s. meast. To Shanghai: 40s. weight, 35s. meast. To Hong Kong: 35s. weight, 27s. 6d. meast. To Batavia: 25s. weight, 30s. meast. To Singapore: 30s. weight, 25s. to 30s. meast. To Ceylon: 20s. to 25s. weight, 20s. meast. At New York to China; $12 to $15 per ton of 40 cubic feet.

The current quotations for coal, &c., are as follows:—From Wear or Tyne per keel.—For Hong Kong: £33. For Singapore: £24. For Galle: £22. 10s. From Newport, Cardiff, or Swansea per ton.—For Hong Kong: £1 11s. For Singapore: £1 4s. For Galle: £1 2s.

The Admiralty have invited tenders for the conveyance of sundry small stores to Hong Kong.

## CASUALTIES.

The Kingdom of Belgium, which was reported aground in Delaware Bay, arrived at New York without apparent damage.

The Aztec (brig), Varney, which sailed from Sunderland, Oct. 25, for Nagasaki, arrived in the Thames Nov. 2, and was taken into the Millwall Docks with damage to taffrail and main chain, and loss of maintopmast, having been in collision with a brig.

A telegram, dated Oct. 27, received Nov. 6, from Galle, states that the Devonport, from London to Shanghai, had been wrecked in the China Sea; crew saved and the wreck subsequently sold.

The Bedfordshire, Langford, which sailed from Cardiff, Nov. 1, for Singapore, put back to Cardiff for repairs.

The Agathe Johanne, from Cardiff to Hong Kong, put into Simon's Bay, Oct. 3, leaky, and requiring repairs to topsides.

The Chusan, from Foo-chow-Foo, arrived at Singapore previous to Oct. 20, with serious damage, having been in collision with the Joseph Sprott, from Shanghai; the Chusan would have to dock for repairs. The Chusan sailed from Foo-chow-Foo for London Aug. 17.

The Ferdinand and Louis, Vogelzang, from Sourabaya to Amsterdam, put into Ramsgate Nov. 10 leaky, and with compasses out of order; she had also lost three men by scurvy, and the remainder of the crew were down with the same disorder.

Advices from Amsterdam, dated Nov. 10, state that the Catharina Elisabeth, Brakke, from Sourabaya, struck the ground in entering Nieuwe Diep, but did not appear to have sustained any damage.

Advices from Capetown, dated Oct. 4, state that the Constantia, V. Monnom, which put into Simon's Bay, Sept. 17, leaky, had been again surveyed, and her copper found to be much damaged: a quantity of the cargo—coffee, sugar, &c.—had been landed in a damaged state and sold.

The Sea Snake, Christophersen, from Bangkok to Falmouth, with rice, which put into Port Elizabeth, Aug. 5, in a distressed state, had discharged and sold a large quantity of her cargo; the necessary repairs had been effected, and she was ready for sea with about 5,000 bags sound rice o board, when she went ashore during the gale of the 18th and 19th Sept., and broke up; master and seven hands drowned; wreck and cargo sold 22nd Sept.

The Turkish Empire, Barclay, from Colombo to London, which put into Port Elizabeth Aug. 6, leaky, had repaired and was ready for sea, but having laboured heavily during the gale of Sept. 19 she commenced to leak afresh, and about 220 tons of her cargo was taken out of her and transhipped into the Cambria (str.), for Plymouth; the Turkish Empire, after again undergoing repairs, sailed Sept. 30.

## MISCELLANEOUS.

Advices from Amsterdam, dated Oct. 29, state that a further quantity of 1,330 bags rice, and 2,185 bundles canes, ex Nereus, den Broeder, from Saigon to Falmouth, which put into Simon's Bay, July 25, leaky, &c., had been sold in a damaged state.

Advices from St. Thomas', dated Oct. 13, state that the cargo ex-condemned ship A. Lloret, Gonzalez, from Manila to London, would go forward per Ferdinand Brumm.

At ST. VINCENT, C.V.—Oct. 19, Appin (s.s.), Russell, from the Clyde, and left 20th for Singapore.

At CALLAO.—Sept. 19, Camilo Cavour, Asterquia, from Macao and Payta, and sailed 25th for China.

At UTSALADY, previous to Sept. 27, F. A. Palmer, King, for Hong Kong.

Off ASCENSION.—Sept. 29, Nyassa, from Singapore, for Liverpool.

At ST. HELENA—Oct. 1, Villa de Comillas, Luzarraga, from Amoy, and sailed for Havana; Noach, Looyen, from Batavia, and sailed for Rotterdam; 2, Nederland and Oranje, Phaff, from Batavia, and sailed for Schiedam; Henrietta Geertruida, Boer, from Batavia, and sailed 5 for Amsterdam; A. W. Stevens, Ingraham, from Hong Kong, and sailed 3 for New York.

Off ST. HELENA.—Oct. 4, from Singapore, Jungfrau, for Salem; 7, Black Prince, from Foochow, for London; 11, Falcon, from Foochow, for London; Queen of India, from Singapore, for London.

Off CAPE POINT.—Sept. 4, Athole, from Sourabaya, for London.

At ALGOA BAY.—Sept. 30, Turkish Empire, Barclay, from Colombo, sailed for London after repairing.

At MARTINIQUE.—Oct. 14, Tamaris, Cazalis, from Macao, and sailed for Havana.

The FORWARD Ho! which sailed from London Oct. 23 for Shanghai was reported off Falmouth Oct. 31.

## THE "WILHELMINE EMMA."

As announced in a recent issue, Messrs. Wingate and Co., of Whitchurch, Glasgow, have just completed this exceedingly handsome vessel to the order of Messrs. Miller Brothers, of Glasgow, for Messrs. Siber, Bremwald, and Co., Japan. A number of important improvements have been introduced into her construction, a short account of which may not be uninteresting. The Wilhelmine Emma is a spar-decked screw steamer of 620 tons gross register; she is built as a composite up to main deck, viz., iron frames with teak planking and coppered; from main to spar deck she is a complete iron vessel; the iron plating is flush with the outside planking, and so neatly has this been effected that it can scarcely be observed where they join. Messrs. Wingate have not, we believe, patented this important novelty, but we may mention that this is the first vessel ever built on this principle, and they claim for it the following advantages, namely, the combination in the highest degree of the strength and stiffness of an iron with the anti-fouling and buoyant properties of a composite ship. The objection to the planking of timber being carried up to the spar deck is that in a hot climate the seams open, and require to be frequently re-caulked. This has been hitherto sought to be obviated by composite vessels having iron topsides, but an ugly break or projection always marked where the iron and timber met. Messrs. Wingate therefore deserve credit for introducing this improvement, which we are sure only requires to be seen by shipowners to be fully appreciated. The vessel is fitted with a pair of improved surface condensing compound engines of 100-horse power nominal. Several novelties are likewise here embodied; the engines can either be worked as compound high and low pressure engines, or as ordinary condensing engines, the change by an arrangement of the valves being instantly effected. Engineers will be able to appreciate the advantages of this system when entering a port where frequent slowing and stoppages are necessary. Messrs. Wingate have had most satisfactory results from their compound engines, almost exceptionally so in fact; the consumption of Scotch coals averaging less than 1¾lb. per indicated horse power per hour. The Wilhelmine Emma is fitted with every appliance for economising labour, including steam-winches and windlass, a steam launch, &c., and has most elegant passenger accommodation, fitted up in polished hardwood, with painted glass panels; while every attention has been paid to secure proper ventilation. She is classed sixteen years A1 at Lloyd's, and we have no doubt, will prove a profitable ship to her enterprising owners; while she cannot fail to further increase the fame of her builders in the East, where their work is already well and favourably known. The Wilhelmine Emma passed down the Clyde on the 6th inst. with a full cargo, and proceeds to her destination, under steam, *via* the Cape of Good Hope.

## TRIAL TRIP OF THE "SIN NANZING."

In a late issue we reported the launch of the Sin Nanzing, a new paddle steamer, built and engined by Mr. John Elder, Glasgow, to the order of Messrs. Robinows and Marjoribanks, for Messrs. Trautmann and Co., of the North China Steamship Company. The Sin Nanzing successfully completed her trials for speed and for economy in the consumption of fuel on the 30th ult. The dimensions of this vessel are:—Length between perpendiculars, 225 feet; beam, 32 feet; depth of hold to spar deck, 23 feet 3 inches. Her engines are on the compound principle, for which the firm of Elder and Co. have been so long distinguished; they are diagonal, and have four cylinders. The stipulations were that speed of the vessel on trial, with 100 tons dead weight

Digitized by Google

on board, should not be less than 14 knots per hour, on a consumption not exceeding 25 cwts. of coals; and that the speed on a second trial, with 668 tons dead weight on board, should not be less than 10½ knots, on a consumption not exceeding 20 cwt. per hour. The first stipulation was successfully performed on the 25th ult., the distance run being twenty-eight nautical miles. The trial for the second stipulation came off on the 30th ult. The result was that on a run of upwards of ninety nautical miles the speed was 10·86, instead of the stipulated 10·5 knots per hour. Besides this the consumption of coal was only 18¼ cwt. per hour, instead of the permitted 20 cwt., showing an economy in consumption of fuel over what was required of nine per cent. Had the whole of the permitted fuel been used, the speed would have been still more in excess of what was stipulated by about as much more. As it was, an agreed upon premium for the actual excess was won by the builder. Had the Sin Nanzing realised only what had been stipulated, it would have furnished another most convincing proof of the correctness and great practical value of the principle of steam expansion, which was introduced by the firm in the construction of marine engines, now some fifteen years ago. But, when the dimensions of this vessel are considered, the actual results obtained furnish the strongest demonstration which has yet been given of the immense superiority of the compound engines over those of the common type.

## LAUNCHES.

On the 4th inst. there was launched from the west shipbuilding-yard of Messrs. Charles Connell and Co., at Overnewton, Glasgow, a very finely modelled composite ship of 1,000 tons, built for Messrs. Robertson and Co., of London, to class AA 16 years at Lloyd's and 20 years in the Liverpool Underwriters' Register. She was named Eme on moving off. The Eme has been specially designed by Messrs. Connell and Co. to attain the greatest speed, being built expressly for the China tea trade. She is to be commanded by Capt. John J. Ganion late of the Falcon.

On the 6th inst. there was launched from the building yard of Messrs. Scott and Linton, Dumbarton, Clyde, an iron sailing ship of about 750 tons register, for Messrs. J. and R. Grant, London, to class AA at Lloyd's, and twenty years in Liverpool Book. This vessel is intended to form one of their East India fleet, and has, with a view to going through the Suez Canal, provision for auxiliarly steam power. She was gracefully named the Inverishie, by Miss Evelyn Grant.

Messrs. Connell and Co., Overnewton, have in frame a composite ship of about 1,000 tons register, which when completed will form an addition to the fleet owned by Messrs. Craig, of Glasgow. The vessel is intended for the Java trade.

Messrs. A. C. Stephen and Sons, shipbuilders, Kelvinhaugh, Glasgow, have on hand a composite spar-decked screw steamer, of about 450 tons, for the China and Japan trade. She is to class 16 years A1 at Lloyd's, and will have engines of 70-horse power nominal, on the compound principle of high and low pressure. She is a remarkably fine vessel, with teak spar-deck. It is expected that she will be launched about the end of December.

The P. and O. Company's new steamer Hindustan sailed on the 3rd inst. for Calcutta, *via* the Cape of Good Hope. The vessel will be employed in the Company's Calcutta and Suez service.

# THE BEST ROOFING MATERIAL.

# NAGASAKI PATENT SLIP.

THIS SLIP IS NOW AVAILABLE FOR DOCKING SHIPS OF 1,200 TONS OR UNDER.

ALL WORK CONNECTED THEREWITH, AS ALSO IN THE

SHIPWRIGHTS, JOINERS, BOAT BUILDERS, SPAR MAKERS', AND GENERAL DEPARTMENTS,

IS UNDER

THE SUPERINTENDENCE OF EXPERIENCED EUROPEANS.

The Slip has been most substantially built, in a perfectly landlocked and secure position, and has been pronounced by competent authority to be equal to any existing construction of the same kind.

Charge for three days' use of the Slip, $1 per ton, and all labour, material, &c., supplied on moderate terms. For further information apply to

GLOVER AND CO., MANAGERS,

NAGASAKI, JAPAN.

NOTICE.

MORRIS'S DIRECTORY for CHINA, JAPAN, and the PHILIPPINES, &c., to be published on the 1st Jan., 1870, contains a Revised List of the Foreign Residents at all the open Ports of the China Sea, including Saigon, which has never yet been included in any similar work; together with the Time Tables of the different Steamship Companies, Rates of Postage, Local Ordinances, and such other matter as will be useful to all interested in the China trade. No trouble or expense has been spared to make this the most accurate publication of the kind ever offered to the public.

Price, complete in one volume, 11s.

Orders received by the Publisher of the "London and China Telegraph," 2, Cowper's-court, Cornhill, E.C.

HOLLOWAY'S OINTMENT and PILLS need only a single trial to make known their capabilities; no outside sore or inward inflammation can long withstand the cooling, purifying, and healing influences exerted by these twin medicaments. Be the ailment of recent or chronic, grave or slight, painful or simply annoying, it will succumb before the curative virtues of these noble remedies, which can be rightly applied by any person who will attentively read their accompanying directions, which are propounded in the plainest language, void of technical terms, and printed in the most legible characters. To the man of business confined to his counting house, and harassed by engagements, these Pills are invaluable; for the man of pleasure, addicted to free living, they are peerless.

AMSTERDAM INTERNATIONAL EXHIBITION, 1869.—THE GRAND DIPLOMA OF HONOUR, being the First Prize, and superior to the Gold Medal, has been awarded to LIEBIG COMPANY'S EXTRACT OF MEAT; which likewise carried the first prizes at the Paris and Havre Exhibitions.

A single trial will at once convince the consumer of the great superiority in flavour, strength, and clearness over all other Extracts of Meat, thus fully showing the correctness of the received high distinctions.

Every genuine jar bears Baron Liebig's signature.

## SINGAPORE DOCKS.

THE PATENT SLIP AND DOCK COMPANY execute SHIPS' REPAIRS of all descriptions in the most efficient manner, under the supervision of European Engineers and Shipwrights.

The DRY DOCK (opened in March, 1859) admits two Vessels at the same time, being over 400 feet in length, with a depth of water ranging to 15½ feet. A second DRY DOCK of larger dimensions will shortly be completed, and available for the heaviest Steamers.

Adjoining the above there is extensive WHARF WAREHOUSE, and other accommodation, including every convenience for coaling Steamers, discharging cargo, and storing goods, together with ample MACHINERY and appliances for repairing iron steamers, &c.

Apply at the offices of Messrs. PATERSON, SIMONS and Co., Singapore; or 21, St. Swithin's-lane, Cannon-street, London, E.C.

WM. CLOUGHTON, Managing Director.
New Harbour, Singapore, June, 1868.

## PORT OF AMOY.

SHIPOWNERS, AGENTS, and COMMANDERS are informed that the Dock Company's establishments at the above port afford every facility, at moderate charges, for REPAIRING and SPARRING VESSELS, cleaning and painting iron ships and steamers.

Their large Granite Dock has 286 feet length on the blocks, and at average spring tides can receive vessels of 16 to 17 feet draught. It has a caisson-gate and a powerful centrifugal steam pump, and an engineer's workshop fitted with lathes and tools, driven by steam: iron and brass foundries, boiler-makers' shop, a large smithy and carpenters and boat-builders' sheds. All superintended by resident Europeans.

Their two smaller GRANITE DOCKS can receive, at spring tides, vessels drawing 12 feet.

Spars, timber, and other Dockyard material kept in stock.

Quarters for officers and a DRY GODOWN for stores of vessels under repair.

CANADIAN NEWS, every Thursday, contains all the latest news from the New Dominion.

Price 2d., post free, 3d.
Office: 11, Clement's-lane, Lombard-street, E.C.

COMPTOIR D'ESCOMPTE DE PARIS.

KEATING'S COUGH LOZENGES.

THIS UNIVERSAL REMEDY now stands the first in public favour and confidence; this result has been acquired by the test of fifty years' experience. These lozenges may be found on sale in every British colony; and throughout India and China they have been highly esteemed wherever introduced. For COUGHS, ASTHMA, and all AFFECTIONS of the THROAT and CHEST, they are the most agreeable and efficacious remedy; they do not contain opium or any other deleterious drug, and may therefore be taken with perfect safety by the most delicate constitution.

Sold in boxes, tins, and bottles of various sizes.

KEATING'S CHILDREN'S WORM TABLETS.

The great remedy for these disorders in Adults and Children can now be administered in the form of A PURELY VEGETABLE SWEETMEAT, at once agreeable and effective.

TESTIMONIAL.

"Batley, Jan. 26, 1869.

"SIR,—One of my children, aged two years and four months, being troubled with worms, I was induced to try your Bon Bons. I purchased some from Mr. B. Whitaker, chemist, of Batley, and after taking two only, she voided nine large worms. Two days after another dose, she again voided three more; three of them, the worst, measuring from 8 in. to 9 in. each in length. I consider them a most invaluable remedy, and should be tried by all suffering from worms.

(Signed) "JOHN STENSON.
"Witness, B. WHITAKER.

"To Mr. Keating, London."

Sold in tins and bottles of various sizes.

KEATING'S INSECT DESTROYING POWDER.

This Powder is QUITE HARMLESS TO ANIMAL LIFE, but is unrivalled in destroying Fleas, Bugs, Cockroaches, Beetles, Musquitos, and every other species of insect.

Sold in packets, tins, and bottles of various sizes.

☞ The public are particularly requested to observe that all the above preparations bear the Trade Mark as herein shown.

TRADE MARK.

Sold in Hong Kong and Shanghai by Watson and Co.; Singapore, Little and Co. and Woodford and Schreeder; Ceylon, Piters and Co. and Mailland and Co.; Penang, *Gazette* office.

### THE MAILS, &c.

The next inward P. and O. mail, due on Monday next, the 29th, will bring dates as follows:—Yokohama, Oct. 11; Shanghai, Oct 13; Hong Kong, Oct. 19; Singapore, Oct. 26; Galle, Nov. 2. Telegrams in advance of it were received *via* Galle on the 16th instant.

The interruption in the Kiachta line is now accounted for by serious inundations, whereby 50 versts of the Siberian telegraph line were destroyed, and Kiachta cut off from all communication for some weeks. Since the telegrams noticed in our last (Shanghai, Oct 26), others have been received, but without dates.

## List of Passengers.

### PASSENGERS INWARD.

By this mail to Marseilles, per Messageries Imperiales steamer *Mœris*, arrived 20th Nov.—From Yokohama: Messrs. Davies, Megrin, Bertothe, Sedavilli, Isidore, Syd, Bertoletti, Civilta, Biffi, Gaudolfi, Menegazzi, Furet, Chiajsella, Goletti, Barcita, Culty, Michie, M. and Mdme. Meazza. From Malta—To Shanghai: Mr. A. E. Petrocochino.

## Summary of News from the Far East.

### JAPAN.

#### YOKOHAMA.

Our advices from this port are to the 3rd Oct. The English mail of Aug. 5 had arrived out. As frequently happens by the French mail, we have received but a meagre budget of news, and there seems to be nothing of great importance.

We find the following paragraph in the *Japan Times*:—We hear from Yedo, with deep concern, that Sir Harry Parkes was attacked by an assassin, on the night of Wednesday, the 22nd Sept., and are happy to congratulate him on his escape. He was returning to his Legation, escorted by two of his foreign guard only and by the usual native mounted Yakonins, when, about 7 P.M., and not far from the foreign concession, a man suddenly drew as he passed him, and made a cut a him with his sword. Sir Harry saw the gleam of the weapon and touched his horse with the spur; the animal immediately bounded forward and took him out of danger. The assassin was quickly secured and proved to be a Hosokawa man. A companion, who did not draw, escaped. The man was perfectly sober, and denies that he was the offender. We are not likely to hear more about it.

A telegraph (says the *Japan Gazette*) is about to be established between Yokohama and Yedo. The apparatus has all arrived, and we believe also the gentleman to superintend its working. A code has been invented for sending messages in Japanese as well as in English, and it is so simplified that with a little application Japanese will easily understand the signals and be able to use them for native messages.

The following is also from the *Gazette*:—A wholesale series o executions have taken place in Yedo. We hear that of Ennomoto's force over one hundred men were beheaded during the last few days. The officers say that they were not decapitated as rebels, but for thefts and depredations of which they had been guilty. As to Ennomoto himself, he has been sentenced to decapitation, as have also Ogasa-wara Iki-no-kami, Nagai Gemba-no-kami, and one or two others who were at the head of the Tokugawa party at Hakodadi. Satsuma and Choshiu have both pleaded for Ennomoto; and although we believe no decisive answer has been given, the probability is that his life will be spared.

The wreck of the British ship *Hamilla Mitchell*, lost on the Leuconia Rocks, has parted amidships, and gone down in seventeen fathoms of water, with all her treasure on board untouched, amounting to some £40,000.

The appeal to Judge Horn by made by Messrs. De Coningh, Vernede, and Co., from a decision of the Consular Court given in 1868 in favour of Messrs. Hudson, Malcolm, and Co., has been decided against the appellants, thus confirming the judgment of the Consular Court.

#### HIOGO AND OSAKA.

From the *Hiogo and Osaka Herald* we copy the following account of H. R. H. the Duke of Edinburgh's reception at Osaka.

H. R. H. the Duke of Edinburgh arrived at the mouth of the river in H. M.'s despatch boat *Salamis* at 8.30 A. M. on Sunday Sept. 19.

Immediately after she had anchored, A. A. J. Gower, Esq, H.M.'s Consul, went off to her in a very elegant barge, belonging to the Prince of Iwami No Kami, accompanied by Mr. Tamaguchi, Commissioner of Foreign Affairs, who, on behalf of the Government, placed the Temple called "Hongwanji" at the disposal of his Royal Highness during his stay at Osaka. The Duke, however, felt compelled to decline the gracious offer, but not disacknowledged, however, in consequence of his necessarily having to return to Kobe on the same evening.

His Royal Highness landed at the Custom-house wharf at 11.30 A.M., attended by Admiral Keppel, Captain Stanhope, and several other officers. The Japanese Militia were drawn up and

Digitized by Google

presented arms very creditably; but owing to the Prince appearing in plain dress, upon arriving at the Consulate, where another company was drawn up, some slight blundering occurred.

Several Samourai, representatives of Daimios, sent in their cards, anxious to be received, but only Mr. Governor Zohzuzugi Shohsy, and Mr. Tnoyne Bundo, the Governor of the Mint, were admitted to an interview; and after they retired, the Prince and his party partook of Mr. Gower's hospitality, that is to say, they tiffined with him; this finished they proceeded upon an equestrian excursion to the Mint, w' e H. R. H. was shown round by the Superintendent, John Waters, Esq.; and afterwards they explored the *Castle*, and ascended the pagoda; thence, upon an invitation of the Government officials they adjourned to a Tea-house and partook of some refreshment. Returning to the British Consulate at 5 P.M., H. R. H. took his departure in the steam launch for the *Salamis*, which had steam up ready to take them back to Kobe, where H. R. H. had previously invited to dinner on board the *Galatea*, Wutu Yonoski, the Governor of Hiogo.

---

### NAGASAKI.

H. R. H. the Duke of Edinburgh arrived at Nagasaki on the morning of the 24th Sept. in the *Galatea*, accompanied by Admiral Keppel in the *Salamis*. The following day the Royal Standard was hoisted, which was immediately saluted with twenty-one guns from the Japanese fort. At half past one H. R. H. gave audience to the Governor, the Consular Corps, and to a deputation from the British community, when the following address was presented:—

"May it please your Royal Highness—We, the undersigned British subjects resident at Nagasaki, rejoice on this occasion to have the privilege of testifying our loyalty to the Throne and our appreciation of the honour now conferred upon us by the presence of your Royal Highness.

"Although comparatively exiled in this remote part of the globe, the attachment to our country remains unaltered; and we cherish the hope that, amid the more brilliant recollections of foreign travel, your Royal Highness will retain the knowledge that even in no part of Her Majesty's dominion does there exist a stronger feeling of loyalty or a higher respect for the Queen and Royal family than in the small community of British subjects in Nagasaki."

The following reply was made by his Royal Highness:—

"GENTLEMEN,—I thank you sincerely for the address you have presented me.

"In the Queen's name I thank you for the expressions of loyalty to her Throne and family which it contains; and I rejoice to find that neither sojourn in a distant land, nor separation from your native home, has in any degree diminished the allegiance which, as good and faithful subjects, you owe your sovereign."

His Royal Highness next repaired to the British Consulate, where a sumptuous repast was prepared for him by Mr. Flowers, H.M.'s Consul. Admiral and Lady Keppel likewise honoured Mr. and Mrs. Flowers with their presence on this occasion. His Royal Highness met with a most hearty reception from all members of the community. He was cheered on his landing, and a grand illumination prepared to welcome him. The illumination was a great success. It is the first of the kind that has ever been seen at Nagasaki. The whole front of the bund was lit up, and the private bungalows on the hill, which had a charming effect. There were numerous devices, the most conspicuous being V.R. and A. Every one appeared to vie with each other in rendering homage to the Prince. There was no distinction of nationalities; the Dutch at Decima were as hearty in contributing to his welcome as the British were at Ora.

The Japanese authorities were not backward in testifying their respect to the Prince. They placed a guard at his disposal, and invited him to a Japanese spread, which H.R.H. had to decline, as his stay was so short. The Governor, however, gave him a few presents of native production, such as porcelain, &c. The Japanese appeared much pleased with the Prince's bearing, and no doubt his visit will leave a favourable impression on their minds.

H.R.H. left on the 27th ult. for Chefoo in the *Salamis*, accompanied by the Admiral, on their way to Peking.

---

## CHINA.

—o—

### SHANGHAI.

(FROM OUR OWN CORRESPONDENT.)

SHANGHAI, Oct. 6, 1869.

The London mail of the 13th Aug. came to hand per *Aden* on the 26th Sept. We have telegrams by her *via* Galle to the 5th ult. and by Kiachta to the 7th ult., to hand on the 2nd inst. The delay by this route was caused by floods near Lake Baikal, which had destroyed nearly thirty miles of line; communication was only restored by means of boats.

The *New York* arrived yesterday, bringing about $400,000 from San Francisco.

Mr. Wade was expected to arrive by the *New York*, but has been detained. He is positively looked for by the next U.S. mail. Sir Edmund Hornby is still in Japan. Mr. Medhurst, H.B.M.'s Consul, has returned. With the change in the monsoon the date of departure of the mails is changed also. The English and French mails leave five days earlier. The weather is beautiful; the thermometer averages in the day 75 deg., and 90 deg. during the night.

From the Shanghai papers we learn that the great excitement of the week has been the prevalence of an extraordinary idea among the Chinese that black men are posted in the church compound to catch and kill passers-by about midnight. Notices to this effect have been posted up over the settlement, and have occasioned intense excitement. The object, they say, is to complete the number of eighteen victims, one to be buried at the foot of each pillar, to add to the stability of the building. The foundation of this wonderful idea probably is that the two Indian watchmen have caught a Chinaman loafing in the compound, and have thrashed him, or have been levying black mail from solitary passengers.

The police took down from a wall a placard which announced that a foreign firm had engaged to give Tls. 12,000 to a number of black men to provide six boys and six girls to be buried alive under the new church; that five or six had already been got, and as many more were still wanted; that the foreign firm had agreed to hold the kidnappers free of all legal responsibility. All over the settlements there were flying rumours: Chinamen had been killed; black men had been seen dragging a body about the compound; some Chinese had been thrown into the church pond, &c. The effect of such notifications and rumours became apparent shortly after, when Chinese began to hang round the walls of the church compound, and ere long to crowd inside. By midday the crowd that thronged the porch of the church and the arcades round it could be counted by hundreds. A glance at many of them showed that they had come in from the country. The faces were indicative generally of eager curiosity mingled with fear; though here and there a shopkeeper or employé of some foreign hong was careful to show by his jest and smile his superiority to such homespun terrors. Messrs. Penfold, Stripling, and Fowler, of the Municipal Police force, were soon among them, seeking good-humouredly to reassure them. The people were freely admitted into the church, as well as into the vaults underneath, where the heating apparatus is. Those that went down into the latter came up looking as pale as if they had seen something horrible, and were eagerly questioned by the bystanders, but could, of course, give no authentic account of the horrors below. The crowd carefully examined the stone floors of the arcade round the church, where spots of varnish had stained some of the stones, and were evidently taken for blood by many of the anxious questioners. Having thus given this satisfaction to the public anxiety, the police authorities cleared the compound, and a foreign constable was detailed to debar further intrusion. It says much for the spirit of confidence that pervades our native police force, that while the bulk even of their educated countrymen display such childish terror, some of them volunteered to guard the compound during the night.

Mr. Alex. Johnston, Municipal Secretary, sent a requisition to the chief engineer to order the services of the steam fire-engine to pump dry the pond in the church compound, and thus give the Chinese ocular demonstration that there were no dead bodies at the bottom.

The pumping was stopped by the church trustees, Messrs. Forrest, H. B. M.'s Acting Consul (during Mr. Medhurst's absence), Michie, Bell, and Krauss, upon the grounds that it was simply pandering to Chinese superstition. The trustees' action has met with general condemnation on the part of the community, and upon the return of Mr. Medhurst assuring proclamations were obtained from the Taoutai through the English Consul. They have soothed the alarm to a very great extent.

We have been informed that the Taoutai has had two men flogged for the share they took in creating the rumours which have caused so much excitement; but we trust the Consuls will not be satisfied without some more reasonable security against a recurrence of the offence.

A change has taken place in the Taoutaiship of Shanghai. His name is Tu; he comes from Nanking. He was exceedingly popular there; a demonstration took place on his departure.

We hear that Ting Futai is expected to visit Shanghai in a few days. One of his motives is supposed to be to send a number of Chinese students to the West.

We have now again ample means of communication with Japan. The P. and O. Company have started a semi-monthly line, and the Pacific Mail Steam-ship Company runs three boats a month. The former are not subsidised over this route, but the latter has a special contract with the United States Government for this Shanghai line, under which the character of the three steamers, *New York*, *Costa Rica*, and *Oregonian* is defined as "United States Mail Steamers," subject to the rules, and entitled to the advantages of such subsidised vessels.

The property known as the Clarendon Hotel has been sold by auction for T's. 4,200, at which figure we presume it was retired. For Mr. Alt's bungalow, at Nagasaki, there was only one *bona fide* bid of $1,000, and the property was withdrawn.

The export of silk up to the last English mail was 19,723 bales.

Nothing further has been done in the matter of the Club scheme, to which we referred in our last issue, but the matter is believed to be under consideration. A very general impression prevails that the new scheme involves personal responsibility on the part of members for the Club debts. But we believe that nothing of the kind is contemplated, and that members would be no more liable for the encumbrances than they are now.

The *North China Herald* says :—

We are glad to learn that the Duke of Edinburgh has changed his intention of striking Shanghai out of the programme, and that we may positively look for his arrival between the 20th and 25th inst. The reason he was going to pass Shanghai by was that he had been told so little enthusiasm had been shown at the meeting held to consider the manner of his reception that it was unlikely he would be warmly welcomed. The community are indebted to Mr. Medhurst for removing this impression, and for explaining to him that the proceedings on the 16th August were quite a type of the ordinary Shanghai meeting, to which every one comes to listen, few to talk, and which always winds up with the appointment of a committee. The Duke was to have been at Cheefoo about the 30th Sept., to go from thence to Taku and Peking. We regret very much to learn that he persists in his intention of visiting the capital incognito; for, we can only repeat, the Chinese understand no such arrangement, and will construe the affair to mean that their own Government would not pay him honour. As we said before, he will probably reach Shanghai about three weeks hence. There is, therefore, still ample time to arrange for a reception which we doubt not will enable the Prince to carry away as favourable an impression of the good feeling of Shanghai as of the other places he has visited during his tour. A meeting is called at H. B. M. Consulate, on the 7th inst., to receive the report of the Committee appointed to concert measures for his reception. We hear that the programme is to comprise performances by the Concordia Amateurs, and the A. D. C., a cricket match, a ball, &c., &c.

A meeting of the Rowing Club has been held to discuss the best locality for the regatta. It was decided by a majority of eighteen to four to keep to the old water on the Soochow Creek. It is true the bend there is objectionable, and a source of frequent doubt and dispute. But in other respects the creek is far preferable. The public can see nothing of a race on the river and a good number of spectators is all important to give life to any sports.

A Ningpo correspondent writes :—You have often written dirges over the decline of Ningpo; but what think you of the bodily removal of a firm from hence to Chinkeang?—Chinkeang which used to be regarded as the most hopeless port in China. Yet the phenomenon is occurring. By-the-bye, the disease from the fell ravages of which the wealthy foreign trade in China has become reduced to its present moribund condition is discovered to be Hart disease; and unless you political doctors of the press can restore the organ to its proper position, and confine its action to its proper functions, there is no hope for the patient.

The *Shanghai Daily News* informs us that "the British Naval officers have been converted into amateur colporteurs, the senior officer now in port having received by the last mail, through, if not from, the Admiralty, a large parcel of tracts for distribution in the 'sink of iniquity.' A number of them are, we believe, already flying free over the settlement." We give this statement as likely to afford some amusement, it being, we believe, quite true.

SHIPPING.—The Taunton, from London, 116 days, is the only arrival to record. The departures are Fiery Cross, for London, on the 26th ult., and the Everhard, on the 25th ult., for New York, both taking tea. The Lizzie Iredale, Tavistock, Dhollerah, Wylo, and John Lidgett are loading for London at £2 a ton, and the Willy Rickmers, for New York, at a slight advance on that figure.

## THE NORTHERN PORTS.

A Chefoo correspondent writes :—The *Adventure*, Captain Raby, R.N., arrived here on the 29th Sept., with Lady Keppel, and part of the suite of his Royal Highness the Duke of Edinburgh, and H.M.S. *Salamis*, bearing the flag of the Honourable Admiral Sir Henry Keppel, arrived here on the following day with his Royal Highness the Duke of Edinburgh and his suite. Immediately after the *Salamis* had anchored the Duke landed with Admiral Keppel, without attracting any unusual attention, and after quietly walking round Yentai hill he entered one of the English merchant's houses, where he partook of some refreshment. He afterwards strolled through the Chinese town, making a few purchases, and returned on board the *Salamis* to dinner. It was intimated that the Duke desired to preserve an *incognito* during this first visit to Chefoo, as, the *Galatea* not being here, he was the guest of Admiral Keppel, and thus no address was presented on his landing.

Peking is excessively "quiet"; there is not a word new from this quarter.

Further news from Tientsin confirms the view that the attack on Messrs. Williamson and Hodge was the work of simple robbers. One of the men, who confesses to having received their watches as his share of the plunder, has been caught, and gives the following account of the circumstance. He saw them go on board, when a woman standing near pointed out some money which they were carrying in a handkerchief, and remarked that they were going up country. The prisoner at once collected a party of five Shantung men, and they decided on following up and robbing the boat. They followed it with this design, keeping it in sight; and on their way picked up eight other men, raising their total number to thirteen. The prisoner says he is a disbanded brave, and has been out of employment for some time.

H. B. M.'s Consul at Tientsin has had a letter from Admiral Keppel by H. M. gunboat *Dove*, requesting him to get twenty boats ready for the conveyance of the Duke of Edinburgh to Peking. The *Salamis* and *Adventure* are to accompany him to Taku; the latter, it is said, to take Sir R. Alcock home. Our correspondent adds :—Business is dull; but 8¼ lbs. are quoted at Tls. 2.20. If the Shanghai market keeps firm, ours will respond; but the dealers here fear large supplies will come forward from your port, and, as usual, be drawn against and thrown upon this market at something less than they cost in Shanghai. The weather is delightful; thermometer 75 in the shade.

## THE YANGTSZE PORTS.

A Hankow correspondent writes :—There is nothing to say, for the excellent reason that nobody is able to do anything whatsoever. Locomotion is impossible except in boats, business is at a standstill, because all the towing paths are deep under water, and no goods can be carried into the interior; the tea season is practically over, and the merchants are grumbling sadly at the small quantity settled here, and at the prospect of an utterly dead and dull winter, in consequence of the poverty of the natives, whose third crop is hopelessly lost. Even the sportsmen are to be pitied, for the flood has driven the snipe into inaccessible regions, and quail alone go to fill the bags. I do not know how the pheasant season promises, but a large party is going up to-morrow in boats to King-kow, whither the *Leven* is bound for her quarterly artillery practice. The *Leven* will tow the house boats, and the Jacks will have a fine time of it skylarking over the country as beaters. Up to the present they have led a hard life, unable to go on shore, and without even the secondary excitement of seeing anything going on in the settlement, always excepting the rise of the water, the crashing of walls, and the quaking of verandahs. The Amateur Dramatic Company have announced four performances for the coming season, and this appears to be our only chance of domestic amusement for the winter

Another correspondent says :—The abomination of desolation still exists at this cheerful port. The flood decreased about four inches last week, but is now again rising, and the level is only about a foot and a-half below the highest point. The weather is becoming too cold for canoes, setting apart the fact that we hate the very sight of them, and one's out-door recreation is limited to a "constitutional" up and down the verandah. We are looking forward to the prospect of skating about the streets in the winter. Croquet sets and mowing machines are not in great demand.

A Chinkeang correspondent writes :—I see you advocate the idea of a railway from Chinkeang to Chingkiang-pu, but I fear you will have hard work to make the idea take root, much less blossom and bear fruit. The Chinkeang folks are too few and feeble; the Chinese are too idiotic; and the officials at Shanghai, like Galleo, care for none of these things. If there were a Consul at Chinkeang, the thing might be, but as it is I see little hope or chance of it.

A Kiukiang correspondent writes :—Water keeps much about the same level; that is, there is a road all along the Bund, but one half is still under water, and we have had nothing but bad weather for the last fortnight. Monseigneur Baldus, the Roman Catholic Bishop of the Kiangsi province, died last night, from an attack of acute dysentery. His health had been far from good for some time past, and he was repeatedly urged to try a change; but no arguments could induce him to desert his post. Over thirty years, some twenty of which were passed in Honan, of Missionary labours, were thus brought to a peaceful close.

## FORMOSA.

We are glad to be able to state, on undoubted authority, that the account in our last issue (copied from a Hong Kong paper) of another outrage on foreigners in Formosa was entirely without foundation, and that both the gentlemen named as sufferers are safe and well. The rumour arose probably out of some mistake; but however this may be, it seemed credible enough, for the present policy of our Government towards China is only too likely to produce such fruits, especially in Formosa.

## HONG KONG.

Our advices from this port extend to Oct. 12. The outward mail of Aug. 27 was received there on Oct. 7th. There is very little news of interest; the following items are from the local papers :—

Admiral Sir Henry Kellett has arrived in H.M.S. *Rinaldo*, to assume command of the British fleet in China and Japan, in place of Admiral Keppel. Salutes were fired from the *Princess Charlotte*, and from the U.S. corvette *Iroquois*. Admiral Kellett, we are happy to say, is in good health.

We understand that steps are being taken by a number of prominent residents to entertain Admiral Keppel at a complimentary parting dinner on his arrival at Hong Kong. Although not exactly a "public" proceeding, a knowledge of this fact will give great satisfaction to the gallant admiral's numerous friends and admirers.

A most interesting account of the proceedings of the Portuguese gunboat *Camoes* appears in the last *Boletim da Provincia* of Macao. She succeeded in capturing the junk which committed the *Apenrade* piracy, but was compelled through stress o

Digitized by Google

weather to abandon her. Several articles marked with the name of the vessel were recovered, but the pirates unfortunately escaped; the crew of the *Camoes* appear to have behaved with great gallantry.

We learn from Whampoa that a strike of the Chinese dock labourers, which caused much inconvenience to the Hong Kong and Whampoa Dock Company, is at an end. It appears that the strike originated with a gang of boiler makers from Hong Kong, one of whom was arrested on a charge of theft. The whole gang hereupon struck work, and induced the Whampoa men to join them in standing out for the release of the prisoner. The matter having been referred to H.B.M. Consul, a Chinese officer was sent down in the gunboat *Feiloong*, and on a demonstration being made to apprehend the ringleaders, the entire gang submitted after a short delay, and turned to at their work in the dock on Thursday last. The promptitude with which the *Feiloong* was despatched to Whampoa, and the activity of the Chinese official sent down in her, with the material assistance rendered by Capt. Francis and his chief officer and their men, have been effectually of service in this matter.

Some experiments have been attempted at the Peak with an electric light, which has been arranged with a view to lighting up the mountain on the night of the illumination. To judge of the light as it appeared from the Queen's-road, the experiment would seem to have been far from successful, and some great improvements will be necessary before it will be of any use whatever for the purposes of illumination. The experiments, however, seem to have had the effect of putting the police in a perfect state of fever. Reports of an attack at the Peak flew to Central Station from all quarters of the town, and the force was under arms ready to march, when the Captain Superintendent, who had been dining out, arrived in a breathless condition, just in time to see the last glimmering ray of the experiment disappearing over the Peak. He bethought himself of the Duke, and repeated to himself, in an under tone, "sold."

An extraordinary rumour has become current among the Chinese in this colony, to the effect that the Duke of Edinburgh has been captured by the Japanese, and will only be set free on the payment of a ransom of two hundred thousand dollars. This rumour, it is said, is also flying about in the City of Canton, and is in fact the topic of the day. It is supplemented by a statement to the effect that the British Government intend going to war on the subject.

From Captain Owen, of the *Petchelee*, which vessel has just arrived from Liverpool, we learn that, on Sept. 23, in lat. 2.53 N., long. 110.25 E., he spoke the British barque *Eastern Chief*, from London, bound to Nagasaki. The ship was then in charge of the chief officer, the captain having jumped overboard and been drowned. It was further reported that the deceased captain had first shot a seaman, and then sprang over the side. A boat was lowered to try and save the unfortunate man, but after pulling about for an hour the search proved useless. No particulars were given of the affair.

The following circular has been issued at Amoy, with reference to the late Consul Gibson:—

The foreign residents of Formosa and Amoy have subscribed to erect a monument to the late Mr. John Gibson, H.B.M.'s Acting Consul at Taiwan, in recognition of his able services during the late disturbances there.

It has since come to their knowledge that Mr. Gibson's mother and sister were dependent upon him for their support, and are placed in straitened circumstances by his death.

They therefore desire to increase their subscriptions, and raise a sum which would enable them to continue in some measure the support which the late Mr. Gibson's relatives have now lost.

About $1,000 have been already raised in Amoy for this object, and the committee now invite the assistance of the communities of Hong Kong and the other ports in China. Committee: Messrs. J. C. Wardlaw, F. Chomley, George Phillips, John Cass, Henry Smith.

Subscriptions will also be received by the Hon. J. B. Taylor, Hong Kong, the Oriental Bank Corporation, the Hong Kong and Shanghai Banking Corporation.

Amoy, October 1, 1869.

## UNION INSURANCE SOCIETY OF CANTON.

The third ordinary meeting of the above society has been held; Mr. Duncanson in the chair. Present: Hon. Messrs. Keswick, Taylor, and Rowett, Messrs. Lemann, Forbes, Chrichton, Kaye, Sassoon, Berwick, Olmsted, André, Vickers, Belilios, W. Hart, G. Thomson, and others.

The Chairman said that he believed there would not be much opposition to what had to be proposed at the present meeting, and read the report, as follows:—

"The directors have much pleasure in placing before the shareholders the third half-yearly report of the affairs of the society, terminating June 30 last, and showing at that date, as per accompanying statement, a balance at credit of $547,263.82, together with a sum representing paid-up capital of $250,000. From this sum the directors recommend the distribution of a dividend of $500 per share, which on 250 shares will absorb $125,000, and a further sum of $62,500 to be set apart for apportionment hereafter amongst contributing shareholders. Of the balance, they propose, in accordance with the terms of the deed of settlement, placing $250,000 to reserve fund, and carrying forward on current account $109,763.82. From the 1st July to date, further net premia, amounting to about $170,000, may be considered as earned, and will appear in due course to the credit of the society. Including the total losses of the steamer *Fungshuey*, and the British ship *Hamilla Mitchell*, the subsequent claims paid to date, together with such as are pending, may be estimated, as far as can be well ascertained, at about $70,000. All vessels on which the society had accepted insurances for the year 1868, with the exception of one time policy for $24,000, which expires on the 20th Dec. next, have reached their destinations, and the risks now at stake are principally confined to homeward bound ships, for the arrival of which sufficient time has not yet elapsed."

The report was unanimously adopted.

Mr. Lemann proposed, in accordance with the terms of the report, that the dividend of $500 per share be declared; which motion, having been seconded by Mr. Hart, was carried.

Mr. André wished to know whether the society could not establish branches at Bangkok.

The Chairman replied that this question had been under the consideration of the directors for some time. Were the risks likely to be good? The directors were rather of the opinion that they would not pay; and their society was but a young one yet.

Mr. André said that would be for the directors to say whether the risks were good or not.

Hon. Mr. Taylor proposed a vote of thanks to the directors and the secretary for their able management; which, having been duly seconded by Mr. Kaye, was unanimously carried.

The meeting then separated.

## IN BANKRUPTCY.

*Re* LYALL, STILL *and* Co., *Bankrupts*, *Exparte* LIEBERT *and* LEVITA.—Judgment.

This is a motion under section 96 of the Bankruptcy Ordinance (No. 5 of 1864), for the purpose of determining the claim of Messrs. Liebert and Co. against the official assignee in the above bankruptcy, to the sum of $4,975.62 alleged to be the balance of proceeds of the sale of certain goods pledged by Messrs. Lyall, Still and Co. to the Oriental Bank Corporation, to secure their account current. The bank, after satisfying their claims, paid the above balance, on the 28th of May, 1868, to the official assignee. These goods consisted of: Firstly, 220 bales of Grey Shirtings ex *Canadian*; secondly, 70 bales Grey Shirtings and 10 of T-Cloths, ex *Serica*. The motion also includes a claim to the sum of $1,016, alleged to be the proceeds of the sale of 7 bales of prints, part of a shipment of 18 bales, ex *Merse*, which had come to the hands of the official assignee in specie, and had been sold by him. The whole of these goods were shipped by the claimants to Messrs. Lyall, Still, and Co. under very special terms and conditions, contained in a correspondence, which is part of the evidence in this case, and substantially embodied in the heading of the invoice of each shipment. The heading of the invoice in the case of each shipment is as follows:—

"Invoice of bales forwarded to Messrs. Killick, Martin and Co., London, for shipment per , and consigned to Messrs. Lyall, Still and Co., Hong Kong, for realisation. Proceeds to be remitted to Messrs. , London, to meet Messrs. George Lyall and C. F. Still's acceptance for £ against this shipment, and bought to order and for account of whom it may concern." It was admitted at an early stage in the argument that the correspondence above referred to and the form of invoice were conclusive evidence of an agreement whereby the vendors secured to themselves an equitable lien upon the proceeds of the goods to the extent that might be necessary to cover the acceptances given for the purchase money. It is clear that the title of the assignee being merely derivative he must, as between himself and the claimants, stand in the place of the bankrupts, and take the property subject to all equitable liens to which it would have been subject in their hands. This being conceded, and the seven bales of prints sold by the official assignee having been clearly identified as part of the shipment of eighteen bales ex *Merse*, no further opposition was offered to the claim of the vendors to the sum of $1,016. But, with regard to the sum of $4,975.62, stated to be the balance of the proceeds of the goods ex *Canadian*, *Ariel*, and *Serica*, sold by the Oriental Bank Corporation, it was urged on behalf of the official assignee that this sum could not be identified as part of such proceeds, but consisted of moneys paid to the bank by Messrs. Lyall, Still and Co. out of mixed funds, and that in fact, owing to the mode of realisation of the goods, their actual proceeds could not be traced, and the trust had therefore been destroyed. The evidence of Mr. Berwick, manager of the Oriental Bank Corporation, was to the effect that the bills of lading, properly endorsed, were deposited with the bank to cover the account current of Messrs. Lyall, Still and Co. That on the arrival of each ship the goods were landed and stored to the order of the bank in the godowns of Messrs. R. S. Walker and Co. That Messrs. Lyall, Still and Co. were allowed to effect the sale of them. That, as sales were effected, and the proceeds paid to the bank, the latter granted delivery orders. The evidence of Mr. G. F. Maclean, who was at the time the resident partner of the firm of Lyall, Still and Co., was to the same effect; on cross-examination he stated that they effected the sales through their comprador, who received the proceeds, and that they paid the equivalent of them to the bank sometimes by cash, sometimes by comprador's orders, and sometimes by cheque. It is argued, therefore, that these payments by Messrs. Lyall, Still and Co. to the bank on account of the proceeds of the goods may have been made out of mixed funds, and are not necessarily the actual pro-

Digitized by Google

ceeds of the goods, against which alone any trust can attach. It seems to me, however, that such a contention cannot prevail. The case must be decided on the principles laid down in Pennell *v.* Deffell, 23 L.J., ch. 115, and Frith *v.* Cartland, 34 L.J., ch. 301. I have been pressed on behalf of the official assignee with a recent decision of Chief Justice Smale, in a similar motion, *ex parte* Henderson and Co., where the claimants had been unsuccessful, but on referring to the facts of that case I find a manifest distinction. There it appears that the money claimed could not be identified as the proceeds of the particular shipment, but it is stated in the judgment to have been the balance of a sum paid to a third person by the comprador of Messrs. Lyall, Still, and Co., out of moneys forming a "general mass, entirely confused and undistinguished as to the sources from which it was made up." In this case, however, it is otherwise. The property in the goods passed to the bank on the delivery of the bills of lading endorsed, and the bank were the sellers. Whether they employed Messrs. Lyall, Still, and Co., or any other brokers or agents to effect the sale, the money received by them on account of such sale must be considered to be the "proceeds" within the meaning of the heading of the invoice. The title of the bank, as purchasers for valuable consideration without notice, has never been contested as to such portion of the proceeds as they retained to satisfy their own claims, but the title of the official assignee to the surplus of $4,975 62c. paid over to him, is subject in my opinion to the equitable lien of the claimants, who are entitled to have the same applied *pro tanto* in discharge of the acceptances given for the purchase money of the goods. The order of the Court, therefore, is that the official assignee pay to the claimant the sum of $1,016, being the proceeds of seven bales of prints ex *Merse*, and the sum of $4,975 62c., being the balance of the proceeds of the goods ex *Canadian*, *Ariel*, and *Scrica*. The costs of both sides to be paid out of the estate.

### MANILA.

### THE EARTHQUAKE.

MANILA, Oct. 4.

On Oct. 1, at half past eleven A.M., the inhabitants of this place were put in great fear by an unusually long oscillation of the earth; this began by violent trembling for five seconds, followed by a movement from S.S. east to N.N. west, which lasted strongly for about fifty seconds, and after a short pause two shocks of a few seconds. Had the trembling continued half the time of that of the oscillation there is not a building in Manila but would have been thrown down. Fortunately, such was not the case; nevertheless, the movement has shaken every building here; large rents are to be seen in nearly every house, all the churches and public buildings are more or less rent from top to bottom, and several houses have partially fallen in; in Cavite, and the neighbouring provinces, the reports are rather worse than in Manila; up to the present we hear of only six lives lost, but hundreds of contusions from the falling of bricks, &c.; many houses have suffered in their strength, and during our present heavy rains it is very likely many will gradually fall in. On the 2nd and 3rd two oscillating shocks were felt at about 6 and 8 P.M., but fortunately of only a few seconds' duration, and causing no further damage than the falling of some walls already tottering from that of the 1st inst.

At sea the shock of the 1st inst. was felt by vessels a hundred miles out from the coast.

## IMPORTS.

SHANGHAI.—A large and chiefly speculative business had been transacted in Grey Shirtings and T-Cloths, and prices were at one time raised above their former level; the market subsequently became very quiet, and prices at the close were nominally on a par with those last current. Grey Shirtings: Stocks had not been increased by any arrivals; but deliveries and re-exports had been only to a moderate extent. Prices were Tls. 2.04 to Tls. 2.07 for 7 lbs., Tls. 2.24 to Tls. 2.27 for 8.4 lbs., and 9 lbs. to 9.12 lbs., Tls. 2.45 to Tls. 2.85 per piece. White Shirtings: The lower counts had been in better request, and best 60 reed were worth Tls. 2.35 per piece. T-Cloths: The comparative cheapness of these goods had attracted speculators, who invested largely at what seem moderate figures. The Chinese dealers were still chary of paying higher rates, but there was a fair demand at current prices. Drills: American slightly weaker, owing to barter transactions. Best Dutch had found buyers at Tls. 3.72 per piece, and English were as last quoted. Fancy Goods: Sales of Dyed Brocades reported at Tls. 3.20 per piece, and the demand had continued. Woollens: There is very little fresh to report. Camlets were very dull of sale. Some Scarlet Long Ells, MM. Chop, had been sold at Tls. 5.95 to Tls. 6.05 per piece. Figured Orleans firmly held for higher rates. Metals—Nail Rod Iron: The business in Nail Rods had been small, scarcely 5,000 bundles having changed hands at Tls. 2.0 to Tls. 2.05 per picul for fair assortments. Bar Iron quite neglected; no transactions had transpired. The market for both descriptions was very dull, but quotations were nominally unaltered. Lead was again quiet, L.B. saleable in small lots at Tls. 5.25. Coals: The market had continued quiet, the only arrivals being a cargo of Formosa and one from the Russian coast. Quotations:—White Shirtings, Tls. 2.1.5 to Tls. 2.9.0; T-Cloths, 6 lbs., Tls. 1.3.5 to Tls. 1.6.0., 7 lbs., Tls. 1.6.5 to Tls. 1.9.2, 8 to 8-4 lbs., Tls. 2.0.0 to Tls. 2.4.0, American Drills, 40 yds., Tls. 3.9.5 to Tls. 4.1.0, American Jeans, 30 yards, Tls. 3.1.0 to Tls. 3.1.5, American Sheetings, 40 yards, Tls. 3.6.0 to Tls. 3.7.0, English Drills, 40 yards, Tls. 3.5.5 to Tls. 3.8.5, Dutch Drills, 40 yards, Tls. 3.5.0 to Tls. 3.7.2, Camlets, English, S S, per piece, Tls. 11.5.0 to Tls. 12.5.0, Spanish Stripes, per yard, Tls. 0.5.5 to Tls. 0.8.0, Medium Broad and Habit Cloth, Tls. 0.9.0 to Tls. 1.3.5, Long Ells, Scarlet, per piece, 6.2.5 to 6.3.0, Assorted, Tls. 6.5.0; Iron: Nail Rod, small size, per picul, Tls. 1.8.0 to Tls. 1.9.5, fair to good assorted, Tls. 2.0.2 to Tls. 2.0.5, Hoop, Tls. 1.7.0 to Tls. 1.8.0; Flat and Round, Tls. 2.1.0 to Tls. 2.2.0, Lead, per picul, Tls. 5.0.0 to Tls. 5.2.0, Tin Plates, per box, Tls. 4.5.0 to Tls. 4.8.0, Steel, per tub, Tls. 3.2.0 to Tls. 3.4.0.

HONG KONG.—Late advices from the northern and coast ports had induced more inquiry for Raw Cotton, and considerable quantities had found buyers at a slight advance on last quotations. Stocks were light, and holders firm. Yarn continued in request, and we quote a further advance of $5 to $7.50 per bale. Cotton Goods generally were weaker, and 7 and 8.4 lb. Grey Shirtings were 3 to 5 cents lower. Large sales of 6 lb. T-Cloths had been made at $1.97 to $2.0, and the stock was much reduced. Common 7 lb. were wanted at former rates. Dutch and English Drills commanded last quotations, but American were not much inquired for. Camlets and Lastings of best makes wanted, but buyers refused all inferior qualities. Long Ells and Spanish Stripes neglected. Lead very firm, with sellers of small parcels of L.B. at $6.50 per picul. Tin tended downwards. The only sale of Coal had been one cargo of Sydney at $5.25 per ton.

## EXPORTS.

### TEA.

The following reports are from Messrs. Olyphant and Co.'s Circular:—

SHANGHAI.—Black Teas: Business in these descriptions was quite suspended for a few days after the arrival of the English mail of the 13th August, but a concession on the part of the Teamen of about one tael per picul has since led to the settlement of 15,400 chests. The present stock is estimated at 51,000 chests. Quotations are Tls. 15 to Tls. 19 for low common to common Hohow; Tls. 19.50 for common black leaf; Tls. 20 to Tls. 20.50 for Teas rather superior to common; and Tls. 21 to Tls. 22 for fair medium kinds. Green Teas have been in fair demand, principally for American account, finest Moyunes of fancy make having been especially in favour. For these very full prices have been paid, but for other kinds—fine Moyunes and Twankis—we may quote a decline of about one tael per picul, making the fall from opening rates about Tls. 3. Settlements since the 23rd Sept. amount to 26,500 half-chests, and the stock now stands at 69,000 half-chests.

FOOCHOW.—Settlements since despatch of the English mail amount to 14,318 chests Congou at Tls. 10.3 to Tls. 26.3 o.b.; 868 do. Souchong at Tls. 19.55 to Tls. 26.8 o.b.; 1,657 half-chests Ooloongs at Tls. 28.55 o.b.: 308 chests Flowery Pekoe at Tls. 21.55 to Tls. 44.8 o.b.; and 2,060 boxes Scented Tea at Tls. 8.8 to Tls. 21.8 o.b. Congous had been coming in more freely, and holders were displaying more willingness to meet the views of buyers, but no actual decline could be quoted. Holders of Ooloong were very firm for prices last quoted for cargo grades, and the only purchase has been one fine "string" containing an assortment of the several qualities. Stocks amounted to 63,378 chests Congou, 5,825 do, Souchong, 45,675 half-chests Ooloong, and 3,622 boxes Scented Teas. Receipts of Congou are 88,000 chests, of Souchong 8,000 chests, and of Oolongs 44,000 half-chests short of those to same date last year.

AMOY.—No settlements of Tea have been reported during the interval, and holders of Oolongs seem rather disposed to make some concessions, though not enough as yet to lead to a resumption of operations. Stocks amount to 2,481 packages Congou, and 49,460 packages Oolong. The receipts of the latter to date amount to 61,676 packages, as against 105,203 packages to same date last year.

CANTON.—The market for all kinds of exports has been very quiet since the departure of the English mail. In Teas the transactions have been very trifling, and partly taken for shipment to South America. Prices remain unchanged, and although the Teamen are disposed to take advantage of reported increased cost of the leaf to advance their prices here, the limited demand has, however, prevented them from succeeding.

### SILK.

SHANGHAI.—During the interval a large business had been transacted, and settlements were estimated at fully 2,000 bales. Prices had remained very firm, but no actual advance can be quoted. The market was very bare of all good or best classes, the unsold stock of 5,500 bales being chiefly composed of common and very undesirable parcels. The export to date was about 19,500 bales, against 31,550 to same period last season, showing a decrease of fully 12,000 bales.

CANTON.—Unfavourable news from France had caused an almost entire suspension of business; since the arrival of the English mail there had been no settlements whatever reported, and offers previously made had been withdrawn. The silkmen refused to make any concession in prices, but were anxious to dispose of the accumulating stocks. Nothing doing in Re-reels; we quote strictly No. 1, $570 to $575, with no demand.

ARRIVALS.

At Shanghai.—From London, Oct. 5, Taunton.

At Hong Kong and Canton.—From London, &c., Oct. 2, United Service; from Cardiff, 6, Cymbeline; from Newport, 3, Emerald; from Havre, 4, Taffarette; from London, Star of the North (reported by telegram).

At Bangkok.—From Newcastle, Sept. 6, Jeverland; 22, Gironde.

At Singapore.—From London, Oct. 26, Otter; from Liverpool, Naworth (reported by telegram).

At Saigon.—From Bordeaux, Oct. 1, Aurelie; from Marseilles, Sophie.

At Colombo.—From London, Oct. 17, Ocean Beauty; from Sunderland, 21, Elliotts.

DEPARTURES.

From Shanghai.—For New York, Sept. 26, Everhard.

From Foochow.—For London, Lord Macauley, E. P. Bouverie.

From Manila.—For London, via Cebu, Sept. 21, Asterias; for Liverpool, via Cebu, Catalina; for New York, 14, Formosa.

From Bangkok.—For Europe, Aug. 28, Benares; Sept. 12, Vorwek; 27, Indiana; for Falmouth, 18, Mikado.

From Saigon.—For Bordeaux, Sept. 16, Rosendael.

From Colombo.—For London, via Tuticoren, Oct. 20, Helen Finlayson.

## SHIPPING POSTSCRIPT.

Arrivals not in the Tables.—Nov. 16, off Dungeness, from Batavia, for Amsterdam, Presto; 15, at Bremerhaven, from Rangoon, Johanne Wilhelmine; Nov. 15, at Havre, from Akyab, Arctic; 18, at Brouwershaven, from Batavia, Nederland and Oranje; from Sourabaya, Van d. Palm; 21, in the Downs, from Penang, Ceylon; 20, at London, from Bangkok, Sarah Anderson.

Departures.—Nov. 17, from Liverpool, for Yokohoma, Caractacus; for Shanghai, Duke of Abercorn; 19, from London, for Colombo, &c., Queen of Devon; for Hong Kong, Taitsing; for Hong Kong and Canton, Maunelita; for Yokohama, Eliza Shaw; 18, from Cardiff, for Galle, Athole; 17, from Liverpool, for Singapore, Dorette; from Sunderland, for Galle, Glance; 20, from London, for Hong Kong, Sir Lancelot; for Shanghai, Spindrift; 19, from Cardiff, for Singapore, Bedfordshire, after repairing; 18, from Glasgow, for Singapore, Lochleven Castle; from Cronstadt, for River Amoor, Otto and Antonie.

Laid on.—At Glasgow, for Singapore, Edinburgh Castle; for Batavia and Sourabaya, Dunmore; at Liverpool, for Shanghai, Doune Castle; for Yokohama, Albatros.

Spoken.—Dinna (?), Colombo to London, Sept. 11., 29 S., 12 E; Tamerlane, Shanghai to London, Sept. 14, off Cape Turnabout; Fair Leader, London to Hong Kong, Sept. 12, 1 N., 22 W.; British ship, No. 8,425, 4th d. p. (Langford?), to Japan, 112 days out, Oct. 14, 40 N., 18 W.; Beulah (?), of London, Bordeaux to Batavia, Nov. 14, 45 N., 9 W.; City of Aberbeen, Shanghai to London, Nov. 6, 11 N., 25 W.; Bertha (schooner), of Stettin, for Amoor River, Aug. 15, 40 N., 138 E.; City of Aberdeen, from Shanghai, Nov. 6, 11 N., 25 W.; Ihosio-maran, Aberdeen to Nagasaki, Sept. 15, 2 S, 19 W.; Ilex (Nor. barque), Newcastle to Ceylon, Sept. 25, 15 N., 26 W.; Belle of Southesk, London to Singapore, Oct. 26, N., 25 W.; Père de Famille, Toulon to Cochin China, Oct. 13, 11 N., 26 W.; Early Bird (ship), Dundee to Singapore, Sept. 15, 1 S., 22 W.; War Cloud, Ceylon to London, Sept. 17, 25 S., 53 E.; Crutze (Dutch ship), Batavia to Amsterdam, Sept. 21; Theresa, Macao to London, Sept. 2, 21 S., 67 E.; Falcon, Foochow to London, Sept. 22, 33 S., 30 E.; Vrede, Batavia to Amsterdam, Oct. 15, 19 S., 3 W.; Cheshire Lass, Foochow to London, Sept. 7, 27 S., 52 E.; W. S. Lindsay, Shanghai to London, Oct. 9, 25 S., 6 E.; Burgomeester van Middelburg (Dutch barque), Batavia to Middelburg, Sept. 12, 24 S., 59 E.; Blenheim (barque), Singapore to London, Sept. 14, 23 S., 61 E.; Sultan (barque), Singapore to London, Sept. 28, 34 S., 28 E.; Peter Rickmers, Hong Kong to New York, Sept. 30, 36 S., 24 E.

Casualties.—Advices from St. Helena, dated Oct. 27, state that the Alida, Amers (in charge, the master, Dyker, having died), from Padang to Amsterdam, put in there on the 17th, with crew refusing duty, but after caulking topside, proceeded 21st. The William Fruing, Chevalier, from Manila to London, put into Table Bay, Oct. 6, with loss of main and mizen topmasts, sails, &c. The Spindrift, from London to Shanghai, went ashore on the 21st inst. in East Bay, Dungeness, and became full of water.

Miscellaneous.—At St. Helena, Oct. 13, George Treat, Ginn, from Penang, and sailed for London; 14, Kortenaar, Pot, from Batavia, and sailed for Rotterdam; Decapolis, Almond, from Shanghai, and sailed for London; 15, Augusta and Gustave, Bertand, from Saigon, and sailed for Bordeaux; 18, Dunmail, Thompson, from Hong Kong, and sailed for London; Jupiter, Kiewit, from Batavia, and sailed 19, for Amsterdam; Delft, Kettel, from Padang, and sailed 19 for Rotterdam; 19, Verena, Hudson, from Manila, and sailed for London; 20, Argo, Timmerman, from Batavia, and sailed for Rotterdam; Antje, v. d. Hoog, from Batavia, and sailed for Amsterdam; 21, Bastiaan Pot, Zetteler, from Batavia, and sailed 24 for Rotterdam. Off St. Helena: Oct. 14, Melbrek, from Shanghai, for London; Etha Rickmers, from Canton, for New York; 22, Blenheim, from Singapore, for London; 26, Nieuwerland, from Batavia, for Dordt; 17, Star of China (English ship), from Shanghai, for London; Wild Deer (English ship), from Shanghai for London, with master dead.

## LATEST TELEGRAMS.

(Received via Galle Nov. 16.)

Shanghai, Oct. 13.—Grey Shirtings, 6½ catties, 8¼ lb., 2.25 taels. Cotton: Shanghai, 19 taels. Tea, unchanged. Silk settlements during the fortnight, 4,450 bales. Export to date (China and Japan), from commencement of season, 29,500 bales. Exchange on London, Bank bills, six months, 6s. 0¼d. Freights: Tea, 50s.

Hong Kong, Oct. 19.—Grey Shirtings, 6½ catties, 8¼ lb., $2.85c. Water-twist, 16-24, $1.50c. Cotton, Bengal, fair medium, $18½. Tea, limited business. Total export (China and Japan), 94,000,000 lbs. Exchange on London, Bank bills, six months, 4s. 6¼d.

Advices from Suez fully justify the doubts we have all along expressed as to the possibility of the Canal being completed to its full depth in time for the opening ceremony. The largest vessel that attempted the passage drew only nineteen feet, yet we find that many grounded between Port Saïd and Ismailia, and some could not proceed beyond the latter place. The P. and O. *Delta*, drawing only 15½ feet, touched frequently, and the *Latif* grounded, and had to return. The banks are said to be much damaged. It is rumoured that between Ismailia and Suez the Canal is still shallower, and according to our private advices great consternation prevails. The Canal is clearly not navigable for large vessels, and our often-expressed conviction—that before it is completed to the full depth of twenty-six feet many months must elapse, and much more gold be buried in the desert sands—is fully corroborated.

## BIRTHS, MARRIAGES, AND DEATHS.

BIRTHS.

Allen—On the 1st Oct., at Shanghai, the wife of Mr. J. W. Allen, of a daughter.
Gye—On the 26th Sept., at Nagasaki, the wife of James Gye, Esq., of a son.
Lay—On the 27th Sept., at Kiukiang, the wife of William Hyde Lay, H.B.M.'s Acting Consul, of a son.
Lamache—On the 27th Sept., at Bangkok, Mrs. E. Lamache, of a son.
Leake—On the 12th Nov., at 25, Westbourne-terrace, Hyde-park, the wife of W. Martin Leake, of Kandy, Ceylon, of a son.
Overweg—On the 6th Oct., at Shanghai, the wife of C. W. Overweg, Esq., of a son.
Scheibler—On the 12th Nov., the wife of George Scheibler, Esq., of Camberwell, of a daughter.
Thomas—On the 4th Oct., at Shanghai, the wife of the Rev. J. Thomas, of a daughter.

MARRIAGES.

Allen-Baker.—On the 4th Oct., at Shanghai, by the Rev. Canon Butcher, Mr. Henry Allen to Miss Ellen Baker.
Truelsen—Norris.—On the 23rd Sept., at Ningpo, Johannes J. G. Truelsen, of Ningpo, to Martha, only child of the late James Nash Norris, Esq., of London.

DEATHS.

Crowe—On the 27th Oct., in the island of Ceylon, George, third son of Alexander Crowe, Esq., of Woodcote Grove, Epsom, in his 26th year.
Hayes—On the 16th Nov., Joseph Hayes, late of Hong Kong, aged 31, eldest son of Joseph Hayes, dentist, late of Soho-square.
Lancaster—On the 14th Sept., at Chefoo, Capt. William Lancaster, late master of the British barque *Cardiganshire*.

Breakfast.—Epps's Cocoa.—Grateful and Comforting.—The very agreeable character of this preparation has rendered it a general favourite. The *Civil Service Gazette* remarks:—"The singular success which Mr. Epps attained by his homœopathic preparation of Cocoa has never been surpassed by any experimentalist. By a thorough knowledge of the natural laws which govern the operations of digestion and nutrition, and by a careful application of the fine properties of well-selected Cocoa, Mr. Epps has provided our breakfast tables with a delicately-flavoured beverage which may save us many heavy doctors' bills." Made simply with boiling water or milk. Sold by the trade only in ¼ lb., ½ lb., and 1 lb. tin-lined packets, labelled—James Epps & Co., Homœopathic Chemists, London.—Advt.

# Foreign Intelligence.

## GERMANY, &c.

(FROM OUR OWN CORRESPONDENT.)

HAMBURG, Nov. 16.

Herr Camphausen, the new Prussian Minister of Finance, wins golden opinions every day from all political parties, and gives promise of becoming the most popular man of the day amongst his fellow-countrymen. In his first speech in the House of Representatives he took the Liberals quite by storm by stating that he relied on their support and assistance in carrying out his measures of financial reform, and that *he should resign office when he found he no longer enjoyed the confidence of the House.* This is a principle enunciated for the first time from a Minister in Prussia, and is so much in the spirit of true Constitutional Government that it made a great hit, and he was loudly applauded by all parties, but more especially by the ultra-Liberals and Democrats. In his financial statement, which he prepared in a wonderfully short space of time, he accepted the budget as laid before the House by his predecessor in office, showing a deficit of 5½ millions of dollars, and hoped to be able to cover it without any increase of taxation, formally withdrawing the Bill introduced by Baron von der Heydt for raising the income tax and the others proposed by the late Minister by 25 per cent. He stated that the public debt of Prussia amounted to $424,389,000, and the sum annually applied to its amortisation was $8,661,000. Now, he was of opinion that in case of need a part of the latter sum could very well be applied to getting rid of the deficit, without at all injuring the national credit or doing an injustice to the public creditors, as it would only be a temporary postponement required for a great national purpose under exceptional circumstances and in an unforeseen emergency; and he felt sure that their patriotism would induce them to forego their pressing their claims for the moment, if it should be found needful to ask them to do so. (Applause.) But he hoped to be able to restore the equilibrium in the revenue and expenditure without the necessity of appealing to the patriotism of the country; and then he entered at considerable length into the measures of financial reform that he proposed, which consist mainly in two parts, the first being a conversion of the present Four per Cent. and Four and a-Half per Cent. Loans (which, by the terms of their emission, are repaid at par by annual drawings of the bonds), into an unredeemable Consolidated Fund, like the French Rentes or the English Consols, bearing 4½ per cent. interest, which would enable the Finance Minister of the day, without hampering the action of Government, to apply the surplus in good years to the repayment of the National Debt, and in bad seasons to meet the expenditure of the State without incurring a deficit. By means of this conversion he calculated on an annual saving of 3½ millions. (Applause.) His second proposal was the sale of some of the domains and other State property, that from various causes brought in but a trifling and unremunerative return in proportion to their value. These could be extended to any amount, but he should propose for the present to limit it to about two millions, which, with the above 3½ millions, would be sufficient to cover the deficit and enable him to start fair and take into his consideration what further steps could be taken to improve the finances of the country and reduce by degrees the burthen of taxation.

As the House of Representatives willingly gave their consent to both these proposals, the Minister has taken time by the forelock, and already commenced by offering for sale by tender a mining property and iron works called the "Königs-Hütte," in the province of Silesia, which scarcely pay the working expenses, and in some years not even that. Seven tenders were received, the lowest bid being $700,000 and the highest $1,306,000, which latter has been accepted, the purchaser being Count Hugo Henkel von Donnersmark, a large landed proprietor in those parts, and himself otherwise extensively engaged in mining operations; so that the new Finance Minister has every reason to be pleased with the result.

Another subject of paramount importance that has been for some time looming in the distance has now approached so near that it must be very soon grappled with, and cannot be deferred much longer. I allude to the position of Count Bismark, who, though uniting in his person the highest appointments under the Crown—viz., Prime Minister of Prussia, Chancellor of the North German Confederation, and Minister for Foreign Affairs, continues to reside at his Tusculum in the country, at a distance of a hundred and fifty miles from Berlin, when Parliament is sitting; changes of Ministers have been made, and others expected to follow, and affairs of grave importance have to be negotiated every day. It is said that the question has now been ventilated in the highest circles, and found to be most anomalous and inconvenient to the public service, that the Count should be enjoying his *otium cum dignitate* in the country when there is no much for him to do in the metropolis. Public opinion has long since pronounced its verdict of "intolerable," and now that it is taken up in the most illustrious quarters it is expected that the Count will very shortly be called on to resign his appointments or fulfil their duties with his former energy, or else to make his election between remaining Chancellor of the Confederation or President of the Prussian Cabinet. Should he resign the latter post, his successor is already said to be Count Eulenburg, the present Minister of the Interior, who is no doubt well known to many of your readers in the Far East as formerly the head of the diplomatic mission sent by Prussia to the Courts of Siam, China, and Japan.

The King of Prussia has conferred the Order of the Red Eagle on Herr von der Heyde, of Bremen, late Consul at Singapore for the North German Confederation, in testimony of the important services rendered by him in his Consular capacity.

The Copenhagen papers state that during the late visit of the Chinese Embassy to the Danish capital Mr. Burlingame engaged several young Danes, hitherto clerks in commercial establishments, for the Chinese Custom House service on very liberal terms. They are to receive a salary of £1,000 per annum, several months' leave of absence to give them time to perfect themselves in the English language, and a free passage out by the overland mail.

### COMMERCIAL.

For Cassia Lignea there is a continued active demand, and the 1,800 chests lately arrived direct per Feiga from Canton have been all sold by the importers at 13¾ sch. bco., by which the stock in first hands has again been cleared off. Pepper is in request, and higher. 2,000 bags of Penang, lately to hand *via* London, have been disposed of. Rice is dull of sale, and the transactions have been on a most limited scale. The Tea market is in a satisfactory state. Pecco is in much request, and some hundred chests have changed hands at higher prices. A part of the gunpowder ex Feiga, consisting of 1,000/16 chests, have been sold. Congou rules firm, but the demand at present is feeble. Spelter is still totally neglected, and prices nominal.

### SHIPPING.

SAILED.—Carl and Auguste, to Singapore; Catherine, Devonshire, and Wohldorf, to Hong Kong; Undine, to Rangoon.

LOADING.—Robert Rickmers and Anna, for Shanghai; Penguin and Hydra, for Hong Kong; Mozart, for Macassar and Hong Kong.

## HOLLAND.

(FROM OUR OWN CORRESPONDENT.)

ROTTERDAM, Nov. 18.

COFFEE.—The trading Company has announced a public auction of 109.277 b. Java.

TEA.—The auction of 3,725/4 and 114/12 chests Java, held in Amsterdam, has given the following result:—Boei sold at 68c. to 90c.; Congou Boei, 86c. to 96c.; Congou, 81c. to 117c.; Kempoei, 94c. to 95s.; Souchong, 87c. to 135c.; Pekoe Congou, 125c. to 152c.; Pekoe Souchong, 93c.to 155c.; Pekoe Kempoei, 117c.; Soepoey Pekoe, 137c. to 165c.; Pekoe, 236c. to 362c.; Schin, 66c. to 111c.; Thunkay, 110c. to 122c.; Hysant, 143c. to 150c.; Uxim, 133c. to 142c.; Joosjes (g.b.), 138c.; Joosjees (f.b.), 139c.

INDIGO.—To-day 129 ch. were sold at very firm prices.

TOBACCO.—36 b. Java K W V M ex Medea have changed hands.

TIN.—Banca is quoted 68f. on the spot.

SHIPPING.—Arrival: Nov. 15, at Texel from Samarang, Philips van Marnix. Departure: Nov. 17, from Texel for Java, H.M.'s ship Java. The Noach I. has been chartered to convey troops to Batavia.

## THE CHINESE IN CALIFORNIA.

The correspondent of the *Standard* at San Francisco writes as follows of the present condition and treatment of Chinese in that city:—

"I cannot more accurately define the present position of the Chinese in California than by recording the reception given to two merchants of that nationality when visiting one of the theatres here recently, at the invitation of two prominent citizens. Mr. Boucicault may be gratified to learn that 'Formosa' was the play selected for the delectation and improvement of the Asiatic mind. Their appearance in a private box was the signal for an outburst of ruffianism from the gallery. It was 'the gods *versus* the Celestials,' and, for a time at least, the former had all their own way. The occupants of the boxes and pit did their best, indeed, to drown the shrieks, whistles, groans, and howling of the unwashed, by setting up a counter current of applause, and several respectable citizens went to the Chinamen's box, desiring them to remain, and assuring them of protection. For twenty minutes the performance was interrupted. Barrett, the actor, came forward, and was supposed to have said that any well-behaved patron of the house was entitled to stay there, but nobody could tell that he was speaking except by the movements of his mouth, so great was the uproar. An excited gentleman in the dress circle got up and reiterated the same idea; he was rewarded by a torrent of hisses and caterwauling. It was not till a large force of police had been stationed in the gallery that the play was allowed to proceed. And yet disgraceful as was the scene, the Chinamen could tell that every respectable person in the house desired them to stop through the performance. In spite of this occurrence 'John's' position is improving every day. The Pacific Mail Steam-ship Company's monthly steamers usually bring from 800 to 1,500 Chinamen. A few months back the arrival of these vessels always drew together on the wharf a crowd of idlers, rowdies, loafers, and 'bummers,' and lucky was that Chinaman who escaped with simply a black eye or the loss of his tail. The sportive ruffians of this band were always pleased when a Celestial came along 'packing' his worldly possessions at either end of a long pole resting on his shoulder (in the well-known manner so often depicted on the tea-chests, &c.), because by simply cutting down the packages at one end, the balance was destroyed and the device frustrated. By the time that poor 'John' had readjusted his goods at that end he was sure to find that the other had been similarly treated, and this practical joking could be kept up for an indefinite period. The few guardians of the peace looked on indifferently, and too often belonged to the class which delighted in persecuting the Chinaman. Now all this is changed. A 'Chinese Protection Society' has been organised by a number of humane citizens, who station themselves, with an additional body of police, on the wharf on the arrival of the steamer, and see that the Chinamen is not molested. It is not too much to say that five years ago such an association could not have been a success, not because the better classes wished themselves to maltreat Chinamen, but because they looked with apathy on those who did. Acts of cruelty are constantly being perpetrated, even now, on inoffensive Chinamen walking through the streets, but in some cases lately they have taken courage, turned round, and defied their persecutors. An Irishman recently assaulted a Chinaman in the streets; the latter faced round, and, after some cautious sparring, managed to put the astonished Milesian completely *hors de combat*. The crowd of bystanders made a ring, and would allow no interference from outside. This also proved a great change in public opinion."

## HONG KONG FINANCE.

BY the last mail we received Sir RICHARD MACDONNELL'S financial statement for the current year, a document that presents some features well worthy of consideration. In the first place, the colony is once more solvent; once more able to pay its debts—including the odious military tax,—and still show an actual, tangible, *bonâ fide* surplus; and this without any screwing or pinching, without (as Sir RICHARD takes care to point out) any fleeting benefit from the disposal of the colony's capital, namely, its land, and—above all—without taking into consideration any portion whatever of the License fees taken under the so-called "Gambling Ordinance." What, then, has rescued the colony from bankruptcy? Various beneficial influences, it seems, have been at work, but the chief and permanent cause of this improved financial condition is the much-abused Stamp Act, which, since it came into operation at the latter end of 1867, has steadily increased the revenue. The outcry raised against this most necessary measure (which we supported from the first) has long since died away, and we believe there are now few differences of opinion as to the expediency of retaining it in the estimates. Thus the permanent means of the colony are now made to meet all its liabilities, and leave a substantial though not very imposing balance in hand.

As we have already stated, the revenue from the gambling licenses has no part in bringing about this greatly-desired result. Yet not a little good has been done with that also, though in a different way. Positive orders, we are told, have been issued by Her MAJESTY'S Government that these receipts should form a special fund, no portion of which should be expended in defraying any expenditure that ought justly to be borne by the ordinary resources of the colony. In other words, it must not be applied to reduce taxation, but, on the contrary, is to be used only to achieve results beneficial to the Chinese population and the colony generally, such as could not possibly be accomplished out of the utmost limit of taxation yet reached. The suppression of crime is evidently one such object; and in furtherance of this, it is found desirable to increase the police force, both by land and water, and to carry a telegraph round the island, building new police and telegraph stations to be connected thereby, and thus form a circuit of defence. But, in order to carry out the proviso above described, the colony will still find as large a sum out of its ordinary revenue for police purposes as in any previous year, only the amount required in excess of this being paid out of the "special fund." Education, and the general moral culture of the Chinese population, is another object to which part of these receipts may well be devoted, and accordingly school-houses, lecture-rooms and so-forth will be instituted, and a handsome contribution given to the Chinese hospital. Even after all this, there will still be a balance of $14,000 left at the credit of the special fund at the close of the current year, leaving ample scope for further beneficent measures of a similar nature. We cordially agree with the Governor in his view that any further reduction in the license fees, which would only benefit the licensees, would be absurd; that to permit a perpetual and unmeaning accumulation of them would be equally unjustifiable; and that, therefore, they should be liberally but judiciously expended in improving the moral and sanitary condition of the Chinese population, such good works as these being certain to react beneficially on the colony generally. We cannot too heartily congratulate the colonists on being once more solvent, and on having inaugurated a wise and liberal financial policy, which will have lasting good effects.

## COMPARATIVE MORALITY.—HONG KONG AND SHANGHAI.

WHEN the Duke of SOMERSET bestowed on Shanghai that elegant appellation that has aroused so many indignant feelings, his Grace hardly foresaw the extent of the storm that his words would raise. We have evidently not seen the last of it even yet. From the "sink of iniquity" itself, the commotion has spread to Hong Kong, and has caused the appearance there of a Government paper on the "Comparative criminal statistics of Hong Kong and Shanghai"—that is, a memorandum drawn up by Mr. DEANE, the Superintendent of Police, to refute certain statements injurious to the moral character of the Hong Kong community, which were contained in a letter from Mr. A. J. JOHNSTON, that was published in the *London and China Express* of the 8th July last. Mr. JOHNSTON, as Secretary of the Shanghai Municipal Council, considered that the duty devolved on him of defending the much-maligned model settlement against its ducal detractor; and the letter in question was certainly a bold and ingenious vindication, for which Mr. JOHNSTON has earned the thanks of the Shanghai community. Mr. JOHNSTON'S misfortune was that he could not dispel the black cloud that seemed to envelope Shanghai morals, without casting a somewhat blacker one on the morals of the neighbouring colony; a disagreeable necessity which, to speak frankly, he seems to have accepted without much hesitation. His comparative statement showed clearly enough, supposing the figures to be all correct, that the foreign population of Hong Kong required a police force in the proportion of one constable to every seven, to keep them in order, whereas in Shanghai one to every 120 foreign residents sufficed. Then, again, he demonstrated that the number of "serious crimes" committed by foreigners in Hong Kong bore ten times as great a proportion of their total number as in Shanghai. These were the two main points of comparison, but there were several minor ones equally unfavourable, and altogether Kong Kong came but poorly out of the ordeal.

We can hardly be surprised, therefore, to find that however satisfactory these deductions might be to the Shanghai community, they were several degrees less acceptable in Hong Kong; and of the justice of this view the memorandum before us affords, it must be owned, ample evidence. Mr. DEANE, while in no way doubting the efficiency of the Municipal Council of Shanghai, and, indeed, while praising its "excellent administration," requests permission to issue a formal contradiction to what he very plainly describes as the "erroneous statements" and "inexcusable misrepresentations" contained in their Secretary's letter. In the first place, he shows that Mr. JOHNSTON'S estimate of the foreign population of Hong Kong is entirely inadmissible, as he has taken the total exclusive of soldiers and seamen, classes who require a large share of the police supervision, and furnish a very considerable proportion of the crime of the colony. It is only fair that these classes should be included, and as the foreign population then becomes more than double Mr. JOHNSTON'S estimate, this at once gives an error of over fifty per cent. in all his comparative statements. Again, in computing the proportion of police to population, Mr. JOHNSTON set aside the native police as only serviceable against Chinese criminals, and assumed the foreign part of the force to be required solely to cope with foreign offenders—a most unfair conclusion, for the European and native police act indiscriminately as a whole, their proportion to the entire population being 1 to 191, and that of the foreign police to foreign residents about 1 to 70, in place of one to seven, as stated by Mr. JOHNSTON. Besides this, Mr. JOHNSTON makes no allowance for the large force required for the harbour, the Kowloon side, and the outlying villages; in this respect Hong Kong contrasts very strongly with Shanghai, where there is only a small level and compact space, and a native population to be watched, whose comparatively peaceful and docile character enables them to

Digitized by Google

be governed with peculiar facility, especially as the Chinese authorities lend material assistance on the spot. In Hong Kong there is no such help. The resident population is far larger than that under supervision of the Anglo-American Council at Shanghai, whilst it is, moreover, continually recruited with professional criminals from the most restless and turbulent provinces of the Chinese Empire, so that Hong Kong may be said to be in a constant state of siege *from without*. Taking these facts into consideration, Hong Kong does seem to have been rather hardly dealt with. But after all, there is no great harm done, for no reader of the letter in our columns would for a moment imagine that it was written with other than the best motives, or with any intention to misrepresent facts; while Mr. DEANE'S memorandum most effectually removes any unjust impressions that may have arisen from it regarding the amount of crime existing among foreigners in Hong Kong.

WE have noticed, at different times, two pamphlets put forth by Mr. ALFRED WADDINGTON in support of his scheme for an inter-oceanic railway across the British possessions in North America, and on the last occasion (July 12, 1869) we protested against the doubt and incredulity with which the proposition had been received in many quarters. It would seem that Her MAJESTY'S Government are now quite impressed with its feasibility, for, as will be seen by the intelligence given in another column, they are strongly urging the expediency of British Columbia entering the Dominion, and one of the inducements held out is the prosperity that would accrue from a railway connecting the East and West provinces. At Montreal the scheme of the "Canadian Pacific Railroad" has actually been published. The length of the line is 2,500 miles, and the proposed capital twenty millions. Being some five hundred miles shorter than the United States' lines, it would of course in that respect be preferable as a Western route to Japan and China.

THE Bishop of VICTORIA has been preaching at York and elsewhere in aid of the Church Missions to China and Japan, and has delivered some lectures with the same motive. One of his chief objects, it seems, is to raise a sum of £1,000, for the purpose of improving and enlarging the Hong Kong Orphanage for European and half-caste children, towards which, we believe, he has already accumulated some £250; and should these efforts be crowned with success the collapse of the institution, which has of late appeared imminent, will be averted. On the whole, it seems to us more than doubtful whether its downfall would be any great calamity, and that a good many of the Bishop's hearers might possibly be less liberal with their donations were they made fully aware of *all* the results achieved by the Orphanage since its foundation, more particularly as regards the manner in which the training given to female half-caste orphans has been utilised. Zeal in a good cause is always praiseworthy, but we cannot help thinking that a more worthy object might have been found for the good Bishop's exertions.

THE deplorable condition of the Indian telegraph system has proved a serious drawback to the usefulness of our *Telegraphic Extra*, and we can only express our deep regret that its value to subscribers should thus have been lessened by causes entirely beyond our control. Some of the telegrams have been delivered in an utterly unintelligible form, others have been delayed, and one appears to have miscarried altogether. Early next month, however, the Indo-European line will come into operation, by which we are positively assured that messages will be regularly and correctly delivered in from twenty-four to forty-eight hours; so there is every reason to believe that our present difficulties will be of very short duration.

SHOULD Congress be favourably disposed, there is every chance of the Pacific Mail Service between San Francisco, Japan, and China becoming fortnightly instead of monthly. The New York Chamber of Commerce has decided to memorialise Congress for a subsidy in aid of the proposed semi-monthly steamers.

IT is stated that Mr. BURLINGAME, while at Copenhagen, engaged a number of young Danish gentlemen for the Custom's Service. They have a liberal leave of absence, to be devoted to studying the English language before going out.

THE ratifications of the treaty of friendship, commerce, and navigation between the King of SWEDEN and NORWAY and the Supreme King of SIAM have been exchanged at the Swedish Legation by the respective plenipotentiaries, the Baron HOCHSCHILD and Sir JOHN BOWRING.

THE annexation of the Straits Settlements to the Diocese of Labuan, which we announced some months since as about to take place, was formally notified in the *Gazette* of the 15th instant.

THE appointment of Mr. THOMAS ADKINS, late Her MAJESTY'S Vice-Consul at Shanghai, to be consul at Newchwang, has just been gazetted.

## THE ETHNOLOGICAL SOCIETY.

At a meeting of the Ethnological Society on the 9th inst., Professor Huxley, President, in the chair, a paper on "The Chinese Race; their Language, Government, Social Institutions, and Religion," was read by Mr. C. T. Gardner, of H.M.'s Consulate, Shanghai. There was a goodly number of members present and some strangers.

Mr. Gardner opened with a few desultory remarks upon the language, comparing some of the ancient characters with the Hebrew and the Egyptian. He seems to have discerned traces of similarity in form, and even sound, between the *Aleph* of the Hebrew, which mean an "ox's head," and the Chinese character for *ox*, which in its original form was simply an oval figure with two jutting horns. Also between the *shin* of the Hebrew and the *shan* ("three-peaked mountain") of the Chinese. On these points his position is very assailable, but as regards the Egyptian he appears to have more substantial ground for his assertion. Passing to the subject of Government, Mr. Gardner displayed a very large number of facts as to the manner in which the country is divided into communities, the patriarchal system prevailing in all, and the influence and effects of guilds and trades-unions among the Chinese. He explained how in each parish or hundred the head-man, a native of the locality, often sided with the people against the superior mandarin, who is always a man of a different province from that in which he exercises his authority.

The various social institutions were touched upon, and the religion of the Chinese very briefly. As to the influence of foreign intercourse, Mr. Gardner was inclined to believe that it had had the effect of producing much misery, in throwing many of the natives out of employ, as, for example, in the use of foreign shipping, and he was convinced that the introduction of railways into China on a large scale would have a similar tendency. On these and some other points there were several dissentients; but, upon the whole, the lecture was exceedingly full of interesting and suggestive matter, and received much approbation.

Captain Sherard Osborn remarked that he could not agree with Mr. Gardner in looking upon the introduction of any European improvement as detrimental to the Chinese, and he believed that, on the contrary, all our intercourse had acted beneficially, and that railways and telegraphs, which would eventually be constructed there, would be beneficial also. When he remembered the fertile valley of the Yang-tsze on his first visit, and the subsequent desolation produced by the rebellion and the catastrophe of the changing of the course of the Yellow River, which has recently occurred, with the consequent destruction of life and property, he could not but believe that had European engineers been on the spot much might have been done towards preventing or ameliorating this latter calamity.

After some further remarks from Capt. Osborn, a gentleman whose name we did not catch made some pertinent observations on the want of centralisation in the Chinese Government, and the narrow and contracted views produced by the numerous small guilds and close communities in the country.

Professor Summers expressed his satisfaction on hearing so good a paper, and offered a suggestion that in viewing the Chinese language more attention should be given by philologists to the constructions and idioms of the spoken language, and less to the mere characters. He stated that some similarities exist between the Tibetan, Mongolian, Siamese, and even Sanscrit, and the Chinese; and that on some future occasion he would be happy to place the result of his studies in this direction before the society.

Dr. Leitner and Dr. Hyde Clarke also addressed the meeting on the subject of the general study of comparative philology upon sound principles. Dr. Leitner, who has brought from Lahore a native of Yarkand who speaks Turkish, Tibetan, and Chinese, has collected numerous vocabularies which will promote this study.

Professor Huxley concluded with the observation that China appeared to him to have, with the largest means, produced the least possible results in civilisation. They had vast examinations, which tested little but the memory, and a system of bribery surpassing that of the United States.

## INDUSTRIES OF THE CHINESE EMPIRE.

The inventions, discoveries, and industries of China have always been a source of much interest, not only to the Anglo-Chinese, but to all who interest themselves in the progress of civilisation and the arts; but the information obtained and disseminated on the subject has always been unsatisfactory, owing to many intervening causes, such as the difficulties of the language in which such discoveries and occupations are recorded, the doubtful character of some of the native accounts, the jealousy of the Chinese manufacturers and workmen, and the small amount of literary power, scientific knowledge, and want of leisure amongst the Europeans in China.

The memoirs published under the auspices of the Dutch East India Company about the year 1665 contained the first trustworthy accounts of Chinese industry, and at a later period the missionaries did a good deal in the same way, but less for practical industry than for the sciences and agriculture. In our own day very valuable contributions to a practical history of Chinese civilisation have been made by many hands, English and foreign; but still the information has been incomplete and unsystematic, and it is certain that during the last three centuries the Western world has been inventing and discovering processes which were practised by the Chinese and other Eastern nations perhaps as early as that time when Alfred the Great first tried to introduce the civilisation of Italy and France amongst his rough, but not ready Saxons. It is of no use lamenting what cannot be mended, but it is satisfactory to find that at last we are likely to learn something positive, not only about what the Chinese were doing centuries ago, but also concerning the methods at present in use by them.

One of the most valuable contributions to this end is a work, the production of two able pens, those of M. Stanislaus Julien, the famous Chinese scholar, and of M. Paul Champion, chemical professor.*

M. Stanislaus Julien has translated from the *Thieu-kong khai-wou*, the second edition of which bears the date of the year 1637, and other Chinese works, the most interesting and apparently trustworthy accounts of the industries of the country, a work of immense labour as well as research, and in illustration of the text has added fac-similes of thirteen engravings from the work already named. This portion of the work alone would be highly valuable, but it is rendered much more so by the notes and comments of Mr. Paul Champion, who not only applies scientific tests to the native statements, but checks and compares the ancient accounts from his own personal observation. M. Champion visited China as a delegate of the Acclimatization Society of Paris, and two years since he undertook a journey to that country with purely scientific and technological objects in view, and fortified by the counsel and advice of the very able and industrial chemist, his former master, Mr. Payen.

In his preface M. Champion, in opposition to a belief pretty generally entertained, asserts it is beyond question that the industries which are now practised in China are precisely similar in their methods and their results to those which existed centuries ago in the same country. We think, however, that this conclusion requires a little modification; M. Champion himself says at page 79, "Amateurs know all those magnificent inlaid bronzes of which only rare examples now exist even in China;" and again, at page 250, "They say that the secret of this manufacture (that of cloisonné enamels) is now lost; this is true if it refers to the production of pieces comparable to the admirable ancient enamels, but they produce now in China small objects which are in no way inferior to the ancient either as regards finish or brilliancy;" and he adds in a footnote that he saw made at Peking a small object in enamel which would easily be mistaken for an ancient production. Lastly, M. Champion says very little about the porcelain manufacture, upon which the opinion chiefly rests; doubtless he could not make his way into the Imperial factories.

Wherever he could obtain admission, there M. Champion went, and he gives us the result of his observation and scientific knowledge in clear concise language. In some cases the obstacles which he had to overcome gave him great trouble, and, although he did not succeed in all cases, he made his way into workshops where probably no European was ever before admitted, and has collected a large amount of highly interesting information. Amongst the chapters containing the largest amount of practical information, we may mention those on coal and other fuel, mineral and vegetable colours, lacs, varnishes, and oils, the treatment of metals of all kinds, on paper and ink making and printing, on agriculture, and on the condition, abilities, wages, and food of the Chinese working classes.

A considerable portion of the information is certainly to be found distributed here and there, especially in English books and periodicals, but there is much that is new, a large amount of scientific information which was much wanted, and, finally, the whole matter, including M. Stanislaus Julien's learned translations and M. Champion's notes and comments, is arranged together in the simplest, and, at the same time, most practical manner. We are a little jealous that so good a book is not from English hands; but as our own countrymen have left the ground open, we are geratly pleased to see it occupied by two such able men as these.

* "Industries anciennes et modernes de l'Empire Chinois, d'apres des Notices traduites du Chinois," par M. Stanislaus Julien, Membre de l'Institut, et accompagnées des Notices Industrielles et Scientifiques, par M. Paul Champion, &c.; 8vo., 254 pages. Lacroix, Paris, 1869.

## Monetary and Commercial.

The liquidation of the China firms who failed in 1866, &c., have not yet been completed, but up to the present time they have yielded as follows:—Buchanan, Hamilton, and Co., 5s.; Fletcher and Co., 5s. 6d., with 6d. to follow shortly; Scott, Bell, and Co., 7s. 6d.; Lindsay and Co., 7s. 3d., and 3d. to follow, making the 7s. 6d. guaranteed by the friends of the partners.

The half-yearly meeting of the Chartered Mercantile Bank of India was held on the 16th inst. A report will be found in another column. The statement of accounts to June 30 show a nett profit for the half-year of £50,282, out of which £30,000 had been paid in the last dividend of 4 per cent. The deposits show an increase, and now stand at £2,844,589; bills payable, notes, &c., £5,161,383; reserve fund, £150,000. To represent these sums and the capital, £750,000, there was coin and bullion, £2,015,366; cash at call, &c., £849,478; Government securities £547,109; land and house property, £220,916; bills receivable &c., £5,322,784. The directors' report states that "the business of the bank continues to be sound and satisfactory, although the profit is relatively less than in the first half of previous years, owing to the unfavourable course of exchange throughout the East."

Advices have been received stating that the boxes of specie recovered from the wreck of the *Carnatic*, in the Gulf of Suez, by the divers of Lloyd's Salvage Association, contained about £26,000. Three of the boxes are not marked, but the others have been identified.

Tenders for £200,000 in bills on India were received on the 17th, when the amounts allotted were—to Calcutta, £182,500, and to Madras £17,500. The minimum price was fixed, as before, at 1s. 11d., and tenders at 1s. 11¼d. will receive about 29 per cent., above that price in full. These results show a slight diminution in the demand.

A rather large amount of Mexican dollars (upwards of £100,000) has just been purchased for China at 59¼d. per oz., a rate which had been purely nominal for some time past. The market is now entirely bare, and were any further demand to occur, the price would of necessity rise so as to permit the importation of dollars from the Continent. In the present depressed state of the China exchanges, however, this is hardly likely to happen.

## CHARTERED MERCANTILE BANK OF INDIA, LONDON, AND CHINA.

The half-yearly meeting was held on the 16th inst., at the offices of the Corporation, Old Broad-street; George G. Nicol, Esq., in the chair.

The Chairman observed that, as regarded figures, the accounts, which, as usual, spoke for themselves, were satisfactory. The liabilities showed an increase chiefly in the deposits, which had increased very considerably. The assets stood in a more satisfactory position as to amount, but that position was so far unsatisfactory in their not having been able to employ the whole of them. There was an increase of about £900,000 in coin and bullion standing against securities, which, though not conducive to profit, was an evidence of the sound position of the bank. The proprietors might feel some disappointment at the results of the profit and loss account for the half-year, but the disappointment of the directors was greater. Down to four or five months since the board hoped and expected to present to the shareholders a very satisfactory account, and the reason they had not done so might be ascribed to the very unfavourable state of trade in the East, and in China especially. The season in China had opened late, and altogether the causes of depression in trade had been greater than for many years past. He had himself been connected with China for upwards of a quarter of a century, and had never, during the whole of that period, known a season in every way so exceptional. The exchanges had been singularly unfavourable, and to these circumstances they might attribute the unsatisfactory state of affairs; still, considering the extraordinary difficulties they had had to encounter, the shareholders would, he apprehended, agree with him that the profit they had earned, which was about equal to 15 per cent., was encouraging.

Although it usually happened that the first half-year was better than the second, they had every reason to hope that the current half-year would be better than the past, and it was satisfactory to know that although they had not been able to make much profit, they had made no loss. There was only one account still unadjusted, which in all probability would not be closed till the end of the year. Upon that there might possibly be a loss of about £1,200, and that, so far as they knew, was the whole. They had always a standing committee to examine the assets of the bank, and he was happy to be in a position to give the meeting the satisfactory assurance that of all the large amount of bills and securities held by the bank there was not one shilling in danger. (Cheers.)

Amongst the causes of the unsatisfactory state of the accounts to a certain degree was the extreme irregularity, and the annoyance they had been subjected to in consequence of the telegraphic communication, as an illustration of which he might mention that that morning that had received a telegram twenty-two days from Galle. He was happy to say that there was now every reason to believe that direct telegraphic communication with India was on the eve of completion, and that they would soon be in direct communication with Singapore. When that was accomplished he had no hesitation in saying that banking in India and China would be as safe as banking here, as they would be in constant communication with every branch. Therefore, in every point of view, the completion of the direct telegraphic communication was of the utmost importance to them. The only other matter he had to refer to was the proposition of the directors to fill up the vacancy in the direction caused by the retirement of Mr. George May by the election of Mr. C. J. Erskine.

A Shareholder inquired whether the £1,200 mentioned as possible loss was applicable to this year's profits only, and whether the old losses which had so long hung as a clog about them had been completely cleared away.

The Chairman: The £1,200 applies solely to this year. The outstanding old debts have not been provided for in the present accounts. He expressed a hope at the last meeting that if 1869 was a good year, they would be enabled to provide for the whole of the losses. But they had been disappointed, for so far it had not been a good year, and they had only been able to carry forward £20,000 against those losses. How much more they might be in a position to carry forward at the close of the year he could not say, but the balance remaining after the present year would be very trivial. In conclusion he moved that Mr. C. J. Erskine be elected a director. This was carried unanimously, and the meeting separated.

## ARTICLES OF IMPORT.

—o—

*(For Quotations see Table of Prices Current.)*

### TEA.

The followiug is from Messrs. A. Capel and Co.'s Circular, dated 18th inst. :—

The market during the past fortnight has been without improvement; the supplies have been in excess of the requirements of buyers, and although there has been a moderate amount of business, yet a large proportion of the heavy arrivals remains unsold, whilst prices have ruled very irregularly for those which have found buyers, more especially for the medium Kaisow kinds, the value of which is generally uncertain. Common Teas, owing to a few export orders, have been firmer. The public sales of the 16th instant comprised 23,996 packages, of which 21,318 packages were sold without reserve.

Red-leaf Congous: Siftings show no alteration. Broken-leaf kinds have sold at full prices. Fair to good common have ruled rather dearer, at 1s. 0½d. to 1s. 0¾d. per lb. Fair to good Kaisows have been very difficult of sale; prices have been irregular, in some instances the decline has been 1d. to 2d. per lb. Fine have been without change, finest continue in request. There has been no alteration in Pak Lin Teas. Some few parcels of Amoy Tea have sold at 1s. per lb. for half-chests, and 1s. 0½d. per lb. for boxes. Black-leaf kinds: fair to good common have been rather firmer at 1s. 0¾d. to 1s. 1d. per lb. In old season's fair to good kind there has been no further change. The sales of new season fair to good have been to some extent from 1s. 2d. to 1s. 7d. per lb., prices varying to the extent of 1d. per lb. for same quality. Fine have sold to a moderate extent from 1s. 8d. to 1s. 11d.; finest have been in request up to 2s. 6d. per lb. for export. Canton-make: Some sales of common to fair quality have been made from 1s. 0½d. to 1s. 1d. per lb., being rather lower prices. Oolongs: Common to good qualities continue depressed; a few finest have been taken for export. Souchongs: Sales of fine have been made at full prices, owing to their scarcity; common to fair of old season have sold at low prices. Flowery Pekoes: A few of recent import have realised high prices. Scented Teas: Capers—Canton kinds have been in over supply, and sales difficult to make, and prices must be quoted 1d. per lb. lower. Foochow kinds have been wanted at previous prices. Orange Pekoes: Canton kinds—the long leaf have sold from 1s. 6d. to 2s. 3d. for good to fine quality. Imitation Foochow kinds, 1s. 6d. to 2s. 2d. per lb. Foochow kinds have been more difficult of sale, and prices must be quoted rather lower for all qualities. Uncoloured Japans remain without alteration. Green Teas: The arrivals, per Miranda, have been placed on the market, and a fair proportion found buyers, chiefly the Pingsuey kinds, at about previous prices. Canton kinds: Common Gunpowders have been difficult of sale, but good qualities have been in fair request at good prices.

The following is from Messrs. Shepard, Harrison and Rehden's Circular:—During the early part of the past fortnight the market was quiet, but prices ruled firm, the supplies offered being smaller than at any time since the opening of the season, yet sufficient for all requirements; during the past week 16,000,000 lbs. have come to hand, which has caused buyers to act cautiously. The business transacted from the late arrivals has been chiefly in medium to good medium black-leaf, and the few parcels of finest Ning Chow Congou, which latter have realised extreme rates; Ooanfa kinds have sold 1d. per lb. lower. Red-leafs continue as difficult of sale as ever, with the same irregularity in prices as noticed in our previous circulars. Latest telegrams to 27th October from China report supplies increasing, owing to the high prices given for common Congou, and the total export for season 1869-70 instead of being less, as was so strongly predicted, is likely to prove little short of last season's. For export to Russia buying has been confined to finest quality; to other parts of the world but little has been done.

Black.—The grades of red-leaf below common have sold easier, low Foochow Siftings selling at 6d. per lb.; inferior to good flavoury kinds rule at 1s. to 1s. 0½d. per lb. Superior old season's Kaisow kinds at 1s. 1d. to 1s. 1½d. per lb.; new season's Kaisow kinds to medium Kaisow, of which large supplies are offering, have sold with much difficulty at 1d. per lb. decline; fine Kaisow is scarce, and full prices are paid. Paklings and Tayshan leaf show no change. Black leaf: Good common has been in small supply, no arrivals of importance having yet taken place; in other grades of old season's there has been no demand; the new season's have been freely offered the last few days, mostly of medium to good medium kinds, but transactions so far have not been large, though importers are willing sellers; fine has been in moderate request, and for finest Ning Chow kinds 2s. 1d. to 2s. 6d. per lb. has been paid. Souchong: There has been a general inquiry for finest, which is scarce; arrivals being small, the few to hand have sold at 1s. 11d. to 2s. 3d. per lb. Oolong: Only fine and finest, pungent and brisk burnt kinds, are saleable; other grades continue to be forced off at ruinous rates. Scented Tea: Canton Orange Pekoe: The Maitland brought 15,000 boxes, the bulk consisting of medium to good medium quality, which have sold at 1d. to 2d. per lb. decline, but fine and finest have maintained previous extreme rates. Caper: Prices have further given way, bringing quotations to a low standard for so early in the season, say 1s. 2d. to 1s. 3d. for good to medium, 1s. 4d. to 1s. 7d. for good medium to fine, 1s. 8d. to 2s. per lb. for finest. Foo Chow Orange Pekoe has been in steady demand, and Caper is without change.

Green.—The supplies ex Miranda have been on the market the past day or two, mostly Ping Suey kinds; desirable parcels are finding a ready sale at about previous prices, but common qualities are heavy of sale at lower rates. Old season's, with the exception of Moyunes, have been neglected.

### SILK.

The following report is from Messrs. Kilburn, Kershaw, and Co.'s Circular:—

We are, at last, enabled to report a slight improvement in the Silk market, and a generally better feeling than has been shown for many weeks; there is no real activity, but, at the same time, a fair daily business doing in desirable qualities of Asiatic Silk, with a recovery of 6d. to 1s. on Tsatlees from the lowest point at the beginning of the month, and a slightly improved consumption: at 28s. 6d. to 29s. for best chop 3rd Tsatlees; 24s. to 24s. 6d. for best No. 4, and 24s. for "Red Peacock," there has been business doing; as also at 20s. 6d. to 23s. 6d. for common to best "Ka Hing Taysaams." Canton silk has also improved, and some fine parcels of "Loong Kong" have been sold at from 21s. to 22s. 3d.; and ordinary to best No. 1 Tsatlee reel at 19s. to 19s. 9d., the finer qualities bringing 20s. to 22s. Japan Silk has shown no change, but is not weaker, nor prices lower than last quoted. Bengals are still as difficult as ever to move; some fine filatures have been sold at 24s. 6d. to 25s., but even at these apparently low quotations the buyers seem indifferent. Good medium native Silk is very scarce, and asked for; but the mixed wasty sorts are all but unsaleable, on account of the difficulty there is in getting such Silk thrown. The deliveries from 1st to 16th inst. are, China, 1,593 bales; Japan, 312; Canton, 181; Bengal, 243; total, 2,329 bales. In the same period of last year the total deliveries were 2,003 bales.

### COFFEE.

We have again to report the absence of any material change in the market for East Indian Coffee. The supplies of Plantation Ceylon at the public sales have been moderate in amount in the aggregate, but have contained a somewhat unusual quantity of medium and inferior descriptions which, not being in request, have sold but slowly, and at a decline on last mail's rates. Good and superior qualities have realised steady prices, and continue to sell readily. Native Ceylon is still out of demand, and the sales have been limited in extent at easier prices. The following were the rates realised at the last public sales:— Plantation triage, 45s. to 55s.; small grey, 56s. to 58s. 6d.; fine ordinary grey, 60s. 6d. to 62s. 6d.; low middling grey and dull, 66s. to 67s. 6d.; bold do., 69s. 6d. to 70s. 6d.; small coloury, 60s. to 62s.; middling coloury, 67s. 6d. to 74s. 6d.; bold do., 75s. to 80s. 6d.; good middling bold, 82s. to 83s.; pea-berry, 67s. to 76s. Native Ceylon: Small and ordinary, 45s. to 47s.; good ordinary, 49s.; real good ordinary Ouvah, 50s.; good bold, 56s. to 56s. 6d.; pea-berry, 50s. to 54s. 6d. Small private sales of Plantation are reported, at prices corresponding with those of the auctions. In East India descriptions of Coffee other than Ceylon we have to report an entire absence of business.

The quantity of Ceylon Coffee afloat for Great Britain on the 15th Nov. was as follows:—Plantation, 73,380 cwt., against 61,748 cwt. at the corresponding date of 1868; Native, 20,304 cwt., against 20,942 cwt. The quantity afloat for Europe was—*nil*, in both years. The quantity of Coffee landed in the forty-six weeks ended Nov. 13, 1869, was, of Ceylon, 36,647 tons, against 41,686 tons during the corresponding period of 1868; of all descriptions, 64,779 tons, against 64,639 tons. The quantity entered for home consumption was, of Ceylon, 9,566 tons, against 10,949 tons; of all descriptions, 16,739 tons, against 17,385 tons. The quantity exported was, of Ceylon, 24,349 tons, against 28,317 tons; of all descriptions, 42,102 tons, against 42,570 tons. The stock on Nov. 13 was, of Ceylon, 13,727 tons, against 12,407 tons; of all descriptions, 25,258 tons, against 21,016 tons.

### SUGAR.

Within the past few days the inquiry has fallen off, and holders remaining firm at the current rates, which are higher than buyers are disposed to pay, almost all offers at the public sales are being bought in.

The quantity of sugar landed in the forty-six weeks ended Nov. 13, 1869, was, of Penang, 3,888 tons, against 1,610 tons in the corresponding period of 1868; of Manila, Java, and China, 32,625 tons, against 21,380 tons; the quantity entered for home consumption was, of Penang, 2,435 tons, against 1,481 tons; of Manila, Java, and China, 18,171 tons, against 14,664 tons; the quantity exported was, of Penang, 193 tons, against 128 tons; of Manila, Java, and China, 1,252 tons, against 1,957 tons; the stock on Nov. 13 was, of Penang, 1,639 tons, against 337 tons; of Manila, Java, and China, 41,466 tons, against 30,353 tons.

Cocoa-nut Oil.—The market for Ceylon is quiet at the current rates, which exhibit a decline of about 10s. per ton on those of our last report. The quantity of Ceylon afloat, for Great Britain, on the 15th inst., was 18,225 cwt., against 26,058 cwt. at the corresponding date last year.

Cutch.—The demand has again subsided, and to effect sales lower prices have had to be submitted to. In auction 123 cases 1,103 boxes 819 bags fine Pegue partly sold at 24s. to 25s., and 320 bags good quality Penang at 21s. to 23s. per cwt. Privately, 400 boxes fine Pegue sold at 25s. per cwt.

Camphor.—The upward tendency manifested in prices at the date of our last has not been maintained; owing to the announcement of a sale of 5,000 tubs Japan in Holland has caused the enquiry here to be suspended until its result is made known. A few sales of Japan at 95s. per cwt. constitute the only business concluded.

Galls.—No transactions have taken place, and quotations must be considered nominal.

Gums.—Benjamin: At auction, 59 cases Sumatra part sold—good seconds, £10 2s. 6d. to £10 5s.; fair ditto, £8 15s.; 3 cases Bombay sold—dark, £7 5s. per cwt. Copal: Quiet; 49 cases at auction were retired. Damar is cheaper and heavy; at auction 112 cases good pale Singapore partly sold at 88s.; 134 cases Batavia partly sold, fine bold pale at 93s. to 95s. per cwt. Gamboge: 27 cases Gamboge half sold, fair pipe, £16 to £16 2s. 6d.; middling, part dark, much run, £11 15s. to £12 10s. per cwt., being cheaper.

Gambier.—Sells slowly on barely former terms; 1,076 bales 1,340 mats 18 tons in auction partly sold—fair block, broken, 15s. 9d. to 16s. 6d.; good pale Rhio Cubes, 21s. 6d.; dark Cubes, 18s. 6d. per cwt. Supply in the market increased; buyers very cautious.

Hemp.—Common to fair roping has realised £57 15s. to £59 10s., good £62 to £62 10s., superior £64.

Digitized by Google

HIDES AND SKINS.—At the last sales there was only a moderate demand for East India Hides for home use and a limited one for export, and prices, with few exceptions, ruled in favour of buyers. 4,359 Dry Penang Ox and Cow Hides offered, 2,823 sold—Heavy, 8d.; extra Heavy, 7¾d.; Small and Calf, 8¾d. to 9½d.; Thirds, 6¾d. per lb. 341 Ceylon Hides offered and sold—Light and Small, 7½d. per lb.; 2,747 Singapore and Penang Buffalo Hides offered, 513 sold—Light, 6½d. to 6⅝d.; second class, 5d. to 5½d. per lb. 1,094 Rangoon Buffalo Hides offered; none sold.

JAPAN WAX.—The market continues dull; the only sales have been a few lots fair saucers at 77s. 6d. per cwt.

PLUMBAGO.—A large proportion of the Ceylon offered by auction has consisted of dust and chips, for which lower rates have had to be accepted, but lump has sold readily, and at better prices. 1,789 barrels in auction mostly sold—fine bright bold lump, 26s. 6d. to 27s.; middling to good do., 17s. 6d. to 22s. 6d.; middling to fine chips, 10s. to 16s.; low to very fine dust, 4s. 9d. to 13s. 3d. per cwt. The quantity of Ceylon afloat for the United Kingdom on the 15th inst. was 26,809 cwt., against 17,085 cwt. at the corresponding date last year.

PEPPER.—Black is still the subject of speculation. Singapore is comparatively scarce, and brings full prices. In auction 761 bags sold at 4½d. to 4⅝d. per lb. for good bright. Penang is now less in request, both on the spot and afloat. In auction 307 bags Acheen sold at 4½d., and 744 bags damaged W.C. at 4½d. for first class. Afloat 6,000 bags Penang have sold—August sailing at 3⅞d. to 3 15-16d., and October at 3⅞d. per lb. White is pressed for sale, and lower prices have resulted. In auction 2,360 bags Singapore partly sold, fair to good, 5⅛d. to 5⅜d.; 95 bags Penang were retired. For arrival 300 bags Singapore sold at 5⅜d. per lb.

RHUBARB.—China has sold with marked irregularity. In auction 209 chests chiefly sold—good middling, 3s. to 3s. 5d. per lb. for the flat, 2s. 9d. to 3s. 2d. for the round; low flat and round, 10d. to 11d.

RICE.—The only sales on the spot have been 1,700 bags wevilly Rangoon at 8s. 6d., and 1,400 bags Field Siam at 7s. 4½d. cash.

SPICES.—Cinnamon: The demand has fallen off, and prices have rather a downward tendency. In auction 151 bales only partly sold: good, first sort, 3s. 7d.; third, 1s. 4d. to 2s. 3d.; and fourth, 1s. 2d. to 1s. 3d. per lb. Chips are also less in request, but former prices have been realised for part of 1,795 bags in auction; coarse bark sold at 4½d. to 4¾d.; thin ditto, 5d.; middling to good middling thin shavings, 7½d. to 7⅝d.; good, 9d. per lb. Cloves: Zanzibar have lost the slight improvement mentioned in our last report. In auction 3,057 bags Zanzibar, only partly sold; middling to good fair brought 2⅞d. to 3d.; 5 casks Amboyna partly sold at 5½d. to 5¾d. per lb. Of stalks, 275 bales Zanzibar realised 1½d.; a few lots 1⅝d. per lb. Mace: Is lower. In auction 12 cases Penang, partly sold, fair to good fair, rather bright 3s. 2d. to 3s. 3d. per lb.; 4 casks Java were retired. Nutmegs: Late prices are barely supported. 62 cases Penang in auction, part sold; 67 to the lb., 3s. 10d., 80 at 2s. 7d., and 82 at 2s. 5d. per lb. Privately, sales of Penang, 110 to 118 to the lb., at 1s. 8d. cash.

SAGO.—Prices of small are steadily maintained, but large has declined fully 2s. per cwt.; at auction, of 847 boxes 110 bags offered, 200 boxes good small pearl, of fresh import, sold at 18s. 6d., and 78 boxes large import, 1865, at 20s. Privately about 400 boxes good small pearl have been sold at 18s. 6d. Sago Flour: Of 703 bags Singapore, only about 100 bags sold at 14s.

SAPANWOOD.—The demand has not improved, and of the parcels offered at auction the greater part was retired. 54 tons from Bombay, Siam character, partly sold at £8 to £8 12s. 6d. per ton; 24 tons Manila sold at £8 7s. 6d. Of 29 tons Ceylon 8 tons sold at £7 to £8.

TIN.—Straits and Banca have slightly recovered from the depression prevailing at the date of our last report, and are now quoted, Straits, £118, Banca, £117 to £118 per ton.

## NEW YORK MARKETS.

TEA.—The enquiry is extremely dull, and transactions since we last reported have been quite of a retail character. The following are the current rates:—Hyson: Common to fair, 90c. to $1.10; superior to fine, $1.15 to $1.35; extra fine to finest, $1.40 to $1.65. Young Hyson; Canton made, nominal; common to fair, 82c. to $1.65; superior to fine, $1.15 to $1.35; extra fine to finest, $1.40 to $1.70. Gunpowder and Imperial: Canton made, nominal; common to fair, $1 to $1.15; superior to fine, $1.25 to $1.50; extra fine to finest, $1.60 to $1.80. Hyson Skin and Twankay: Canton made, nominal; common to fair, 75c. to 80c.; superior to fine, 85c. to 88c.; extra fine to finest, 90c. to 95c. Uncoloured Japan: Common to fair, 80c. to 90c.; superior to fine, 95c. to $1.05; extra fine to finest, $1.10 to $1.25. Oolong: Common to fair, 70c. to 78c.; superior to fine, 85c. to $1.15; extra fine to finest, $1.20 to $1.60. Souchong and Congou: Common to fair, 79c. to 80c.; superior to fine, 90c. to $1.05; extra fine to finest, $1.25 to $1.50. Orange Pekoe: Common to fine, 70c. to $1. The total receipts of Tea from China and Japan in the United States from Jan. 1 to Oct. 6, 1869, were as follows:—Greens, 18,560,150 lbs.; Japans, 9,817,592 lbs.; Souchongs, 1,826,376 lbs.; Oolongs, 9,882,878 lbs.; other sorts, 263,748 lbs.; total, 40,350,744 lbs. The stock on Jan. 1 was 9,577,014 lbs., which, added to the above total, gives a result of 49,927,758 lbs. Subtracting from this total the exports from Jan. 1 to Oct. 6, 4,081,815 lbs., and the withdrawals for home consumption during that period, 31,843,186 lbs., there remains a total of 14,002,757 lbs., representing the stock on the last-named date. The receipts from Sept. 21 to Oct. 6 amounted to 953,497 lbs., the withdrawals for home consumption to 1,557,432 lbs., and the exports to 427,982 lbs.

COFFEE.—A cargo consisting of 6,436 bags Native Ceylon, per Lady Turner, has been offered by public sale; 1,106 bags were disposed of at 27⅛c. to 27⅞c. for peaberry, 25⅛c. to 26½c. for bold, 18¼c. to 19c. for triage, and 21c. to 25c. for other grades (gold 60 days prompt). The remaining portion of this cargo has been disposed of by private sales, the rates paid not being made public. In addition 200 mats Manila at auction have realised 17½c. gold, and a small but steady business is doing in Java at the current rates, viz., 22c. to 22½c. Government bags, and 22¾c. to 22½c. Government mats (gold, duty paid). The activity in Rio descriptions continued. The stock of Manila on the 1st inst. was estimated at 3,775 bags, against 4,679 bags on Nov. 1, 1868; of Java (Government) at 943 bags, against 1,436 bags of Java (mats) 43,391 mats; stock 1868 *nil*, of Ceylon *nil*, against 100 bags in 1868.

CORDAGE.—A quiet but steady business is reported in Manila at 24c. to 25c. per lb.

CRACKERS.—No business reported; the nominal quotation for Canton is still $2.75 to $2.80 per box of 40 packages.

CAMPHOR.—No transactions in China or Japan.

DYEWOODS.—A small business has been transacted in Sapanwood at the former price of $40 per ton currency.

GAMBIER.—Business very limited at 3¾c. per lb. gold.

HEMP.—The entire stock of Manila has been bought up and is held by speculators, who decline to operate under 14½c. gold; buyers will not pay this price, and await further arrivals; there has consequently been an entire absence of business since our last report. The stock of Manila on the 1st inst. was estimated at 5,357 bales, against 10,936 bales at the corresponding date of 1868, and 8,061 bales in 1867.

INDIA RUBBER.—Nothing doing in East India.

INDIGO.—A steady business continues to be transacted in Manila at $1.15 to $1.45 currency.

RICE.—The market for East India descriptions is very dull; the only sale reported is of 500 bags Rangoon for export at $3 gold in bond.

SPICES.—A fair business is being transacted at the current quotations, which rule as follows:—Cassia in mats 45c. to 45½c., in cases 44c. to 45½c., in bond 25c. to 26c.; Mace, $1.30; Nutmegs, No. 1, $1 to $1.12½; Pepper, 25½c., in bond, 10c. to 10½c.; Cloves, 26c. to 26½c., in bond, 6c. to 6½c.; Cinnamon (prime wild), 46c. per lb. gold.

SUGAR.—The market for East India continues quiet, the only sale since we last reported being of 3,222 bags Manila, per W. G. Russell, by private contract, price not stated. The current quotations are:—Java, Nos. 10 and 12, 11½c. to 12c.; Manila, current clayed, and superior, 10¾c. to 11¼c. per lb. gold. The stock of Java on the 1st inst. was 310 baskets, against 310 baskets at the corresponding date last year; of Manila 96,700 bags, against 31,283 bags.

TIN.—Straits Pig is in fairly active demand at improved prices; sales are reported of 850 slabs at 33¼c. gold, and 200 slabs on private terms. Banca is quoted nominally 38¼ gold, but no business has transpired.

## SAN FRANCISCO MARKETS.

TEA.—Imports from Jan. 1st to Oct. 16th: China, 678,681 lbs., Japan, 884,999 lbs. There is a good trade demand for Japans, with moderate sales; also for the better grades of Oolongs, for which there is a steady demand at the late rise. Stocks for the most part are said to be below an average. We quote Comet Oolong $1; Japans, 65c. to 70c. for chests and half-chests; small boxes, 5s. and 10s.; fancy and lacquered, 70c. to 77½c.; extra fine chops, 80c. to 87½c. The steamer Constitution sailed on Oct. 30 with 8,000 chests for New York, ex Pacific Mail steamer America.

COFFEE.—Imports from Jan. 1st to Oct. 16th, Java, 1,010,532 lbs.; Manila, 359,255 lbs.; Ceylon, 3,650 skins. We have no transactions of importance to record. Stocks are liberal, yet importers do not seem inclined to force sales under present circumstances. Prices of both Java and Manila are nominal in the absence of business. The Voyageur has arrived from Ceylon, with a full cargo of 3,650 bags. This is the first considerable importation of Ceylon ever received at this port. A few sales ex this shipment are reported at 29c. per lb. Java, O.G., is quoted 23c.; and Manila, 16c. to 16½c. per lb.

CORDAGE.—Sales have been effected of 25,000 lbs. Manila on private terms.

CHINA MATTING.—Imports from Jan. 1st to Oct. 16th: 71 bales, 8,807 rolls. We have no sales to record, the trade being liberally supplied with cargo and contract, selling at prices within range of our quotations, viz.:—China 4-4 cargo, $5 to $5.50; 5-4 cargo, $5.50 to $6; 6-4 cargo, $6.50 to $7; 4-4 contract, $8 to $12; 5-4 contract, $9 to $14; 6-4 contract, $11 to $16.

RICE.—Imports from Jan. 1st. to Oct. 16th: China, 22,326,695 lbs., 23,487 packages; Siam, 3,637,783 lbs.; Batavia, 110,271 lbs. The Cotherstone's cargo of Siam, recleaned, was offered at public auction, on the 25th Oct., on 60 days' credit. Of the entire offering of 3,000 mats and 2,000 bags, only 250 packages were disposed of, and those at the low price of $4 17½ per 100 lbs. duty paid: the balance withdrawn for lack of purchasers. Otherwise we note sales, in lots, of 10,000 mats China at 5½c. to 6¼c, and 1,500 bags recleaned Siam, the balance of a cargo per Albany at $5 5 per 100 lbs.

SUGAR.—Imports from Jan. 1st to Oct. 16th: Manila, 15,383,622 lbs.; China, 1,633,400 lbs., 60 packages; Batavia, 1,659,457 lbs.; Siam, 40,133 lbs. Imports include the John Banks' cargo of 900 tons from Manila to the California Refinery. The sales embrace the cargo of the Wave Queen from Bangkok, 5,400 packages, say 750,000 lbs. Siam, to the San Francisco Refinery upon terms withheld. At auction, upon sixty days' credit, 214 bags Siam, clayed, light colour, at 9c. to 9¼c.; also, 113 bags very dark Siam for refining purposes, at 5c.—all ex Cotherstone, from Bangkok. Quotations: China, 9c. to 10c.; Manila, 7c. to 8c. per lb.

TIN.—Sales have been effected of 120 pigs Banca on private terms current quotation for Banca is 40c. per lb.

## SHIPPING.

ARRIVALS.—Oct. 12, at San Francisco, from Colombo, Voyager; 20, from Batavia, Anna; from Bangkok, Wave Queen; 21, at Boston, from Manila, Sooloo; 23, at San Francisco, from Manila, John Banks, 25, at New York, from Shanghai, Tycoon; 29, at San Francisco, from Yokohama, Letitia; 31, at New York, from Singapore, Kingdom of Belgium; Nov. 2, from Manila, Endeavour; 4, at San Francisco, from Manila, Portinscale; 12, at New York, from Manila, Her Majesty.

## FREIGHTS AND CHARTERS.

Since our last issue berth freights to the Eastern Ports have ruled about the same; in coal freights from the Northern outports rates in a few instances rule a trifle higher, but business continues very dull.

Current rates of freight for vessels on the berth:—To Yokohama: 32s. 6d. weight, 30s. meast. To Nagasaki: 45s. weight or meast. To Shanghai: 40s. weight, 35s. meast. To Hong Kong: 35s. weight, 27s. 6d. meast. To Batavia: 25s. weight, 30s. meast. To Singapore: 30s. weight, 25s. to 30s. meast. To Ceylon: 20s. to 25s. weight, 20s. meast. At New York to China; $12 to $15 per ton of 40 cubic feet.

The current quotations for coal, &c., are as follows:—From Wear or Tyne per keel.—For Yokohama: £2. For Shanghai: £2 1s. For Singapore: £25. For Galle: £23. From Newport, Cardiff, or Swansea per ton.—For Hong Kong: £1 10s. For Saigon: £1 5s. For Singapore: £1 5s. For Galle: £1 3s.

## CASUALTIES.

The Blair Athol, Pearson, from Shields to Singapore, put into Falmouth, Nov. 18, with loss of anchor and chain. The Bedfordshire, Langford, from Cardiff to Singapore, which was reported Nov. 8 as having put back to Cardiff for repairs, had her hawsepipes, sheer streak, and part of covering board carried away by her chain having got foul of some wreck whilst she was at anchor in Penarth Roads, Nov. 6.

## MISCELLANEOUS.

At TENERIFFE.—Oct. 27, Nestor (str.), Drenning, from Liverpool and left for Mauritius, Singapore, China &c.

At MADEIRA.—Oct. 17, Bangkok (str.), Haffenden, from the Clyde, and left for Singapore.

# THE BEST ROOFING MATERIAL.

BRABY & CO. ALSO MANUFACTURE SHEET AND PERFORATED ZINC, ROOFING FELT, GALVANIZED BUCKETS, AND ALL OTHER ZINC AND GALVANIZED IRON GOODS, ILLUSTRATED LISTS OF WHICH WILL BE SENT FREE ON APPLICATION.

F. BRABY & Co.

(LIMITED),

BRABY'S GALVANIZED IRON HOUSES.

FITZROY WORKS, EUSTON ROAD, LONDON · AND AT IDA WHARF, DEPTFORD, S.E.

## SINGAPORE DOCKS.

THE PATENT SLIP AND DOCK COMPANY execute SHIPS' REPAIRS of all descriptions in the most efficient manner, under the supervision of European Engineers and Shipwrights.

The DRY DOCK (opened in March, 1859) admits two Vessels at the same time, being over 400 feet in length, with a depth of water ranging to 15½ feet. A second DRY DOCK of larger dimensions will shortly be completed, and available for the heaviest Steamers.

Adjoining the above there is extensive WHARF WAREHOUSE, and other accommodation, including every convenience for coaling Steamers, discharging cargo, and storing goods, together with ample MACHINERY and appliances for repairing iron steamers, &c.

Apply at the offices of Messrs. PATERSON, SIMONS and Co., Singapore; or 21, St. Swithin's-lane, Cannon-street, London, E.C.

WM. CLOUGHTON, Managing Director.
New Harbour, Singapore, June, 1868.

## FOOCHOW DOCK.

*RIVER MIN.*

THE above granite floored DOCK, of the following dimensions, viz., Length, 300 feet, breadth at bottom, 40, is capable of receiving vessels drawing 13 to 16 feet, as the state of the tides will allow. The Dock runs dry to the blocks, and is pumped out by steam.

The above premises comprise a large Machine Shop containing a

WHITWORTH'S 12-INCH SCREW CUTTING GAP LATHE, DRILLING AND SCREWING MACHINES,

A LARGE SMITHY, &c., &c., &c.

Large Godowns are on the premises for STOWAGE OF CARGO, &c., &c. A large stock of Woods, Metal, &c., &c., always on hand.

The Dock steam tug *Woosung* is available at all times to tow vessels to or from sea.

JOHN C. SKEY, Superintendent.

## PORT OF AMOY.

SHIPOWNERS, AGENTS, and COMMANDERS are informed that the Dock Company's establishments at the above port afford every facility, at moderate charges, for REPAIRING and SPARRING VESSELS, cleaning and painting iron ships and steamers.

Their large Granite Dock has 286 feet length on the blocks, and at average spring tides can receive vessels of 16 to 17 feet draught. It has a caisson-gate and a powerful centrifugal steam pump, and an engineer's workshop fitted with lathes and tools, driven by steam: iron and brass foundries, boiler-makers' shop, a large smithy and carpenters and boat-builders' sheds. All superintended by resident Europeans.

Their two smaller GRANITE DOCKS can receive, at spring tides, vessels drawing 12 feet.

Spars, timber, and other Dockyard material kept in stock.

Quarters for officers and a DRY GODOWN fo stores of vessels under repair.

HOLLOWAY'S PILLS and OINTMENT.—HEALTH AT ALL TIMES.—The journey from infancy to age is beset with dangers from accidents or diseases, nearly all of which may be remedied by the use of the excellent medicaments discovered and invented by Professor Holloway. The Pills cast out the countless impurities which are constantly gaining admission into the stomach and circulation. The Ointment cools and soothes inflammatory tendencies, disperses diseases of the skin, and heals ulcerations, irrespective alike of their depth or duration. Both Pills and Ointment are carefully prepared vegetable extracts, uncontaminated by any mineral matters whereby the thousand evils which were engrafted on the constitution by mercury and antimony are altogether avoided, and secondary illnesses are unknown after Holloway's treatment.

| Yokohama... | Black Watch | A1 12 yr. | E.I.D. | With des. |
| Do. & Hiogo | Lochnagar... | A1 | E.I.D. | With des. |

For Freight or Passage apply to NORRIS and JOYNER, 60, Cornhill, E.C.

---

Steams all the way.

GLASGOW to SINGAPORE, HONG KONG, NAGASAKI, and YOKOHAMA. The new Clyde-built powerful composite screw Steamer EASTERN ISLES, 16 years A1 at Lloyd's, 598 tons register, 120 H.P. nominal, 600 H.P. indicated; JAMES KNIGHT Commander (who has had a lengthened experience in the trade), will receive goods till 29th Nov. (unless previously filled), and sail and proceed to sea on the 1st Dec.

Freight payable on delivery of bills of lading. Each package to be distinctly marked with the name of the port of destination, or ship not responsible for mistakes in delivery. The description of goods to be specified in all the bills of lading. Parcels, 10s 6d. to 21s. Has very handsome accommodation for first-class cabin passengers. Rates to Singapore, £75; Hong Kong, £90; Nagasaki and Yokohama, £100—exclusive of liquors. A plan of the cabin may be had on application to the agents.

For rates of freight apply to ALLAN C. GOW, and Co., 87, Union-street, Glasgow.

---

To follow the "Granville." Will meet with immediate despatch.

DIRECT for COLOMBO, the magnificent clipper ship RIVER INDUS, AA1. 1,045 tons register; G. SHEARER, Commander; West India Docks. This splendid vessel, built in 1868, is well known for her rapid passages and the good order in which she always delivers her cargo, and from her high class can be strongly recommended to shippers of fine goods.

For Freight or Passage apply to LIVINGSTON, HOLDING, and BRIGGS, 31, Great St. Helen's, Bishopsgate-street, E.C.; or to JOHN C. CAMPBELL, 22, Great St. Helen's, Bishopsgate-street, E.C.

---

Malabar Coast. To follow the "Dione." Will meet with the usual quick despatch

DIRECT for COCHIN, CALICUT, MANGALORE, and CARWAR, the beautiful clipper ship ANN LUCEY, A1 11 years; 270 tons register, 450 tons burthen; WILLIAM NOBLE, Commander; West India Docks. This magnificent vessel, so well and favourably known in the Ceylon trade, presents the finest opportunity to shippers.

For Freight or Passage apply to JOHN C. CAMPBELL, 22, Great St. Helen's, Bishopsgate-street, E.C.; or to LIVINGSTON, HOLDING, and BRIGGS, 31, Great St. Helen's, Bishopsgate-street, E.C.

Mate's receipts must be left before bills of lading can be signed.

L. H. and B. will not be responsible for demurrage on Craft sent alongside without their instructions.

N.B.—Shippers are particularly requested to have the Port for which the goods are intended distinctly marked on the packages, to prevent delay and confusion on delivery.

---

Malabar Coast. To follow the "Ann Lucey." Will meet with the usual Quick Despatch.

DIRECT for COCHIN, CANNANORE, and CARWAR, the favorite clipper ship QUEEN of CEYLON, A1 10 years, 422 tons register, R. ATKINSON, Commander; West India Docks. This magnificent vessel, so well and favourably known in the Ceylon trade, presents the finest opportunity to shippers.

For Freight or Passage apply to JOHN C. CAMPBELL, 22, Great St. Helen's, Bishopsgate-street, E.C.; or to LIVINGSTON, HOLDING, and BRIGGS, 31, Great St. Helen's, Bishopsgate-street, E.C.

---

To sail on the 25th Nov.

FOR SHANGHAI, the splendid composite clipper HUNTLEY CASTLE, A1 14 years, 623 tons register; W. STEWART, Commander; East India Docks.

For Freight or Passage, apply to SHAW, MAXTON, and Co., 2, Royal Exchange-buildings, London, E.C.

---

To follow the "Huntly Castle."

FOR SHANGHAI, the well-known clipper FALCON, A1 13 years, 793 tons register; J. L. DUNN, Commander; East India Docks. Has excellent accommodation for passengers.

For Freight or Passage apply to SHAW, MAXTON, and Co., 2, Royal Exchange-buildings, London, E.C.

---

Regular Line of Packet Ship.

FOR HONG KONG, the well-known Clipper BLACK PRINCE, A 1 17 years, 750 tons register; WILLIAM INGLIS, Commander; East India Docks. Has superior accommodation for passengers.

For Freight or Passage, apply to SHAW, MAXTON, and Co., 2, Royal Exchange-buildings, E.C.

### THE MAILS, &c.

The present homeward mail is one day late, owing to the *Syria* having experienced bad weather in the Mediterranean. The next (P. and O.) mail, due on the 13th Dec., should bring the following dates:—Yokohama, Oct. 24; Shanghai, Oct. 27; Hong Kong, Nov. 2; Singapore, Nov. 9; Galle, Nov. 18. Telegrams *via* Galle, in advance of this, which should have been received ten days ago, are not yet to hand.

*Via* Kiachta we have Shanghai telegrams to Nov 3, received on the 25th instant. By Atlantic Cable, telegrams were received on the 23rd inst. in advance of the Pacific mail with dates from Shanghai to Oct. 19, Yokohama Nov. 1. These will be found in the usual place.

## List of Passengers.

### PASSENGERS INWARD.

By this mail to Marseilles, per P. and O. steamer *Syria*, arrived Nov. 28.—From Yokohama: Mr. Bosolo. From Shanghai: Mr. and Mrs. Fearon, two children, and servant, Mr. Hawtrey. From Hong Kong: Capt. and Mrs. Baker, Mr. Latham, Mr. Friorino, Mr. Montenegro, Mr. Yrango. From Galle: Lieut. Boddam.

To Southampton, per P and O. steamer *Pera*, expected to arrive Dec. 3.—From Hong Kong: Mr Bevis, Mrs. Denny and child, Mr McDonald, Mr. Clellan. From Batavia: Mrs. Blake. From Singapore: Mr. Harrison, Mr. Kennedy, Mrs. Stoker, Mr Robb. From Galle: Mr. Bayley, Mr. Gregory.

To Gibraltar.—From Galle: Lieut. Burton.

By last Bombay mail to Marseilles, per P. and O. steamer *Nyanza*, arrived Nov. 19.—From Penang: Mr. and Mrs. Quintin.

### PASSENGERS OUTWARD.

Per French mail steamer *Moeris*, from Marseilles, Nov. 27.—(Booked from London), to Shanghai: Miss Terry.

Per P. and O steamer *Ripon*, from Southampton, Nov. 27.—To Yokohama: Miss Beard To Singapore: Mr. and Mrs S. Short and three children. To Ceylon: Capt. Gorman, Mr. R. Atkinson, Mr. E. G. Harding, Mr. A. Croome.

From Gibraltar.—To Hong Kong: H.E. Ant. Ferreira de Lacerda.

Per P. and O. steamer *Nyanza*, from Marseilles, Dec. 5.—To Yokohama: Lady Parkes, Miss M. Binns. To Shanghai: Mr. G. A. Lindsay. To Ceylon: Mr. and Mrs. Cameron, Mr. C. A. Cameron, Mr. and Mrs. J. H. Cheape, Mr. Hambrough.

From Malta —To Shanghai: Mr. A. E. Petrocochino.

Per P. and O. steamer from Suez, Dec. 12.—To Yokohama: Mr. Yendo. To Hong Kong: Mrs. G. Sharp. To Singapore: Mr. Oscar Kirchofer.

Per P. and O. steamer *Bangalore*, from Southampton, Dec. 11.—To Hong Kong: Mr. J. W. Harding, Mr. H. B. Neill, Mr. F F. P. Forster, Mr R. D. Adams. To Singapore: Miss J. Everest. To Penang: Mr. and Mrs. Miss Mr. C., Miss E., and Master De Morny. To Ceylon: Lord Elphinstone and Brother.

Per P. and O. steamer *Tanjore*, from Marseilles, Dec. 19.—To Hong Kong; Mr. M D. Collier, Mrs. S. A. Collier.

Per P. and O. steamer from Suez, Dec. 26.—To Ceylon: Col. E Steward, Captain Hon. Corry.

Per steamer *Achilles*, Captain Russell, from Liverpool, Nov. 20.—For Singapore Mr. C. Gerlach. Mr C. A. Irvine, Mr. R. Crasemann, Mr. R. Hunter. Mr O. St. John For Hong Kong: Mr Macintosh, Ensign Mathias. For Shanghai: Mr. E Crasemann, Mr. and Mrs. P. Boveschlin, Mr. Richards.

Per Pacific mail steamer *America*, for China and Japan, from San Francisco, 4th Nov.—Rev. D. C. Green and wife, Mrs. S. O. Dalrymple, S. C Farnham and wife, J. K. Caird, Miss Caird, C. Blethen, Mrs. M. Lewis, Mrs N. Arnold. F. Abegg, C. G. Dinsmore, Dr. D. B. Simmons, wife and child, B. S. Kellogg, Prof. D. R. Ford, Gen. Tom Thumb and wife, G. P. Spooner, W. H. Morse, F. Schellhas, C. J. Western and wife, Gee We, wife and servant, Miss Phillips. Fred. Brown. W. J. Ede, Mrs. V. D. Collins and infant, S. L. Brower, Miss M. Wepper, Mrs. B. Edwards, C. H. Bryant, R G. Vivian, Chan Wan, T. Hamburg and wife, Commodore Nutt, Ned Davis, N. J. Langdon, Miss Minnie Warren, S. Bleeker and wife, J. Denmeade, Mrs. Baker and daughter, V. W. Perry, and about 1,000 Chinese.

## Summary of News from the Far East.

### JAPAN.

#### YOKOHAMA.

The present mail brings advices from this port to the 10th Oct. The English mail of Aug. 13 arrived out on the 29th Sept., conveying also London telegrams to the 5th Sept. The *Japan Times* gives the following summary of news:—

The sensation of the fortnight we must call, we suppose, the arrival of the Austrian Embassy, which reached this place on the 2nd inst. The *Donau*, Captain De Viplingen, and the *Herzog Friedrich*, Commander Von Pitner, are the vessels comprising the squadron under the command of Rear Admiral Baron Von Petz. The Baron Von Petz carries credentials as Envoy Extraordinary and Minister Plenipotentiary, and is associated diplomatically with the captain and commander of the *Donau* and *Herzog Friedrich*, Dr. Scherzer, Herr Catlice, Consul-General at Shanghai, Herr Xantus, Baron Ivor Kaas and Baron Herbert. Monday, the 5th instant, being the anniversary of the birth of His Majesty, the Emperor of Austria and King of Hungary, a royal salute was fired by all the ships of war in port as well as by the Japanese fortress at Kanagawa in honour of the occasion. We have no doubt but that the Embassy will be received with the cordiality and courtesy displayed by the present Japanese Government to foreigners of all nations, and that the object of the mission will be successfully achieved.

The *Cleopatra*, a large vessel from Saigon with rice, carrying Austrian colours, arrived a few days before the Embassy, and had consequently, to wait outside the harbour limit until special permission was given by the Japanese Government for her to come in.

We have great pleasure in being able to report that the prospects of our import trade continue to improve, at least so far as our principal cotton staples are concerned. There is now no doubt that the native crop of the raw material has failed, and that we shall have to supply the country's wants. These are, however, compared to the demand in other better developed markets, much smaller than most merchants out of Japan seem to believe, and a very small importation from China of additions to our already superabundant stocks would at once break down the trade again. If we can only be left alone for a little while we can do very well, for our constituents as well as for ourselves; but if our friends elsewhere will persist in imagining that they know the trade better than their agents on the spot the result to look for is loss from double freight, enormous warehouse and insurance charges, and interest on capital engaged. But to persuade people of this has always been among the chief difficulties of Yokohama merchants, and if their constituents will not listen to them they certainly will not to us, so it is of little use our wasting more ink on the subject.

Digitized by Google

The Currency Question has entered into a new phase, which we were just in time to indicate in our last. We then mentioned that the Oriental Bank Corporation had assisted the Japanese Government in the selection of competent officers to take charge of their Mint for them, and that it was in contemplation to issue a Japanese dollar, of slightly higher touch than the Mexican and of its full weight. The issue will also include a gold ten-dollar piece, which will be a legal tender as well as the silver unit, and, of course, all the necessary subsidiary coins will be provided. The patterns from which the dies are to be cut in England went home by the American mail. They are very handsome pieces and magnificent specimens of the goldsmith work in which the Japanese excel. We shall shortly be in a position to discuss the details of this change and to predicate its probable results; meanwhile it is satisfactory, to know that some solution to the long-vexed *boo, niboo*, and *kinsats*' questions will be attained.

Sir Edmund Hornby is still here, and we hope is still more strongly convinced than on the occasion of his last visit that a branch of the Supreme Court should be established in Yokohama. A decision of his is likely to lead to an interesting trial. He has, on appeal, declined to admit the award of Mr. Acting Consul Robertson, in the case of the *New York* versus the *Ocean Queen*, in which, sitting as an arbitrator, he ordered payment of $10,000 damages from the former to the latter. It appears, first, that the Arbitration Court was improperly constituted; secondly, that its award was vicious, inasmuch as it gave more damages than were claimed; and thirdly, that in his capacity of Acting Consul, Mr. Robertson had no jurisdiction over the Arbitration Court to reduce the damages awarded, and no power to enforce payment of such reduced damages. Therefore, his lordship granted a rule to show cause why the Consul should not return to the owners of the *Ocean Queen* the money he has paid over to the owners of the *New York*. The case will be argued in Shanghai six months hence, Mr. Robertson being in England. Recollecting Sir Edmund's strong adjuration to us to appeal to Courts of Arbitration, instead of to Courts of Law, on the occasion of his last visit here, we cannot help expressing the wish that he would be good enough to tell us how a Court of Arbitration may be so constituted and conducted that its awards may may not be thus upset.

We must not omit to record, with the same pleasure that all his friends, foreign and native, cordially feel, the return from America of that distinguished scholar and philanthropist, Dr. J. C. Hepburn, who, we are glad to be able to say, has come back to us with renewed health and strength. Dr. Hepburn is of that class of missionaries who do only good, and of whom we cannot have too many.

The following paragraph is from the *Japan Gazette*:—"Mr. Barnard, the barrister, was lately assaulted in the public streets by Mr. Urquhart, a gentleman who was a witness in a recent trial, and to whom the learned counsel applied epithets of a very damaging character. In his defence Mr. Urquhart simply pleaded the provocation he had received. His lordship, whilst upholding the majesty of the law by inflicting the punishment on Mr. Urquhart of a fine of $25, clearly gave Mr. Barnard to understand that he had overstepped the bounds of propriety, and hoped it would be a warning to him. The fine was paid by public subscription."

## CHINA.

### PEKING.

#### A COURT INTRIGUE AND ITS RESULTS.

**An extraordinary political intrigue at the capital, resulting in a breach between Prince Kung and the Empresses Regent, and the summary execution of an eunuch holding a high position at the Court, is thus detailed in the *China Mail* of the 18th ult.:—**

A highly sensation occurrence, which may largely influence the course of internal events in China, has taken place within the last few weeks, and has powerfully interested all classes of Chinese. Persons in any degree "behind the scenes" as regards political gossip in connection with the Court of Peking have long been aware of rumours dealing very freely with the relations existing between the younger of the Empresses Regent and a eunuch of the palace. Whatever might the cause of this individual's favour, it was well known that his influence was immense, and that many leading officials owed their posts to his nomination. The Chinese have suffered too much, however, from eunuch-cabals not to look with intense distrust on any tendency in that direction; and not unnaturally, a feeling of rivalry between even Prince Kung and the palace favourite was commonly spoken of. The career of the Empress's minion has at length been suddenly cut short, by one of those swift and remorseless acts which Asiatic statecraft always holds in store. The eunuch—whose name was Ts'ing Ngan—was commissioned, as we learn, about two months ago, by his Imperial mistress to proceed to Nanking and Soochow, ostensibly for the purpose of laying in a provision of silks and embroidery for the approaching nuptials of the young Emperor, but in reality, it is thought, with some secret political errand to accomplish also. However this may be, the eunuch reached the capital city of Shantung about the middle of September, travelling with an imposing retinue, and presented himself in state to the Governor of the Province. Whether forewarned from Peking or not, the Governor appears to have looked upon the eunuch with a hostile eye, and had indeed, lawful ground for suspicion under any circumstances, as the palace eunuchs are not entitled to travel abroad unless in the train of the Imperial family. On being asked for his official authority for the journey he was prosecuting, the eunuch was compelled to acknowledge that he had none to produce. The provincial Governor hereupon detained him pending reference to Peking, and the courier who carried the report of Ts'ing Ngan's arrival at Tsi-nan Fu to the capital brought back almost instantly a decree signed by the Emperor himself, ordering the eunuch's immediate execution. This sentence was carried into effect at Tsi-nan Fu, without a moment's delay, on or about the 25th of Sept. So much of the affair has already become public among the Chinese, the news having spread with unexampled rapidity; but what were the proceedings which took place before the death-warrant was obtained, or what degree of antagonism may have been promoted between Prince Kung and the Empresses in consequence of this affair, will probably long remain a subject of mere conjecture. The whole story serves to remind us of that fact which a certain section of the public world only too willingly forget, viz., that China is subject to a despotism of the true Eastern pattern, and that the "Arabian Nights" continue as much as ever to be the type of her domestic history.

### TIENTSIN.

(FROM OUR OWN CORRESPONDENT.)

TIENTSIN, Oct. 5.

The *Salamis*, with the Duke of Edinburgh and Admiral Keppel, arrived here on Saturday, the 2nd inst., and left for Tung-chow the same evening at nine o'clock, in boats previously prepared for them. At two P.M. yesterday (Oct. 4) they had only reached a point about sixty miles above Tientsin—very slow progress. The Duke did not land at Tientsin at all, but is expected to do so on his way back. He travels incognito, and I believe intends neither to receive from, nor pay a single visit to any mandarin or official. This is wise, as far as it goes, for having refused to receive him officially, they have no claim to any recognition from him; but it is a pity he has visited the capital at all.

It was arranged, when the Duke left Japan, that he should visit the Ming Tombs, and the Great Wall at the Nan-Kow Pass; both are well worthy of a visit, but whether the arrangement will be carried out I cannot at present say. The two places are a good way apart, and it would take at least three days to make the excursion from Peking. It is rumoured that the Queen was averse to the Peking visit, but that at the same time the choice was left to the Duke. Another bit of news that may interest your readers (and serve as a good example to other youths away from home), is that his Royal Highness has written home from this port to his Royal mother, his brother, and sister (Princess Louise.)*

Our crops this season in the north, both of spring and autumn, are again short, and as usual food for the poor will be dear.

I believe only one of the murderers of the late Rev. James Williamson has been apprehended, although the names and descriptions of four others were given by the man in custody. The evidence so far seems to show that plunder was the sole motive for the crime.

### SHANGHAI.

(FROM OUR OWN CORRESPONDENT.)

SHANGHAI, Oct. 12, 1869.

I wrote you on the 6th inst. by the *Labourdonnais*. Since then there has been a general stagnation of news; the town-talk is of course, the approaching visit of H.R.H. the Duke of Edinburgh. We have telegrams by Kiachta as follows: London, Sept. 14, to hand on the 8th inst.; and London, Sept. 21, received yesterday. The English mail of Aug. 27 is due to-day.

The Municipal Council met on the 7th. The Watch, Works, and Finance Committees laid reports before the Council. The *North China Daily News* comments on these reports as follows:—"The reports by the different committees bear witness to a great deal of thoughtful care, and to the initiation of many reforms which tend gradually to improve the moral and sanitary condition of the settlement. New drains have been constructed in various streets, and it is satisfactory to learn that those which have been reconstructed on the principle suggested by the late Mr. Clark keep fairly clean notwithstanding the very slight fall which the formation of the land permits.

"New fire wells are in course of construction, and a hole is to be dug in the bed of the Yang-king-pang, to secure a supply of water there at low tide. The erection of landing stages opposite the various streets abutting on the bund has commenced; and the French Council has been asked to join us, according to a previous understanding, in bringing the frontage of the two bunds at the mouth of the Yang-king-pang into line, to secure an even flow of water along the river face.

"We notice that Mr. Kingsmill is getting on favourably with the new plan of the settlement which has been entrusted to him,

*According to a telegram published in another column, the Duke had arrived at Shanghai, where he met with an enthusiastic reception.

Digitized by Google

and that its completion is awaited, before the Land Re-assessment Committee commence their labours. An immense improvement has been effected in the rounding off of various street corners, and we hope other proprietors will follow the liberal example of those who have permitted the change. As we remarked some time ago, measures are being concerted for the exclusion of inflammable material, such as kerosine oil and gunpowder, from the settlement; and the godowns on Pootung point are, we believe, suggested as a convenient store for such articles. Arrangements have been made to renew the excellent chain-gang system; it remains only with the Mixed Court to sentence prisoners to that punishment. A project for bringing the slaughter-houses under control has been mooted, and a still more effectual check will be thus provided against the provision of bad meat for our food."

The Hong Kong Government and the Council have arranged an amalgamation, so far as the working is concerned, of their respective post-offices; the main features in the amalgamation are:—

*a.* That the two postmasters, and their respective assistants, be required to render to each other mutual assistance on the arrival and departure of all mails, so as to lessen the time occupied in manipulating such mails. The postmaster in whose office the work is being actually performed, at any time, to be for that time the head officer, and to exercise control.

*b.* That each office shall, at its own cost, provide a staff of at least five coolies, on the understanding that the services of the entire body of coolies are to be placed at the disposal of either office on the arrival and departure of mails.

*c.* That all letters received at the local post-office from Hong Kong, or for despatch to Hong Kong, shall be handed over to the British postmaster, to be dealt with exclusively by the British post-office.

*d.* That all letters (Government correspondence excepted) received at the local post-office, addressed to or sent from all other places whatever, not ports of the United Kingdom, shall be dealt with by that office.

*e.* That all unpaid, or insufficiently prepaid letters, which may be received at the local post-office for despatch by contract packets, be handed over to the British postmaster to be dealt with according to his instructions.

The Council are about to connect their police-stations by telegraph. We are glad to see this, as the fears of Feng Shui may be lessened—so far as telegraphs are concerned—in the eyes of the natives. The Council are extending the Contagious Disease Act in a modified form, by bringing native brothels under their supervision.

Dr. R. Alex. Jamieson has furnished the Council with a valuable report on the sanitary condition of Shanghai. Such a report has been long needed. I am glad to see that the Council intend building their sanitary arrangements for next year on it. The Committee appointed at the meeting held a month ago have at last made known their programme for the reception of Prince Alfred. As we mentioned last week we have to thank our Consul, Mr. Medhurst, for obtaining for us the privilege of a visit from H.R.H. On his return from Nagasaki Mr. Medhurst at once communicated with the other members of the committee, and a meeting was called for last Wednesday, when the proposed addresses were read and agreed to, and the following programme accepted. The first day will be devoted to the public ceremony, consisting of a reception and the presentation of an address from British residents and another from residents of other nationalities. In the evening is to be given a representation by the Amateur Dramatic Corps. On the second day a cricket match between the officers of the fleet and the S.C.C., with a *déjeuner* on the ground, is proposed, and in the evening the Concordia Club will invite his Royal Highness to a theatrical and musical entertainment. For the third day, which it is understood will be the last of his stay, a ball has been agreed on, and it is also propose to illuminate the Bund. The Customs authorities also contemplate the erection of a "gorgeous" triumphal arch on their jetty, in the expectation that his Royal Highness will land at that point, which decidedly is the most convenient on the Bund. On the suggestion of one of the committee it was arranged that the ball should also be in honour of Admiral Keppel, as the time will be too short to give a separate farewell entertainment to the gallant and popular Admiral.

The excitement about the demons in the new church has died away. A proclamation has been issued by the new Taoutai, and it is said that he has had two men flogged for the share they took in creating the rumours.

It will be remembered that in one of Mr. J. B. Robertson's letters to the London *Daily News* he stated that Mr. Burlingame's credentials are drawn up in the old form, accrediting him to the Western Governments as tributary States, although this objectionable feature is not reproduced in the translated version, on which those Governments would, of course, rely. The *N. C. Daily News* of yesterday published the following translations; the first [A] is "the official version, on the strength of which Mr. Burlingame has been accepted in Europe as 'High Minister Extraordinary and Plenipotentiary' from the Emperor of China to his Imperial, Royal, and Republican brethren of the West. The second [B] is a less euphistic translation, which we now offer for the consideration of those who have been dazzled by the former, and which is chiefly remarkable for the entire absence of allusion to the 'High Minister Extraordinary and Plenipotentiary' who is introduced by the first."

A

"His Majesty the Emperor of China salutes (Her) Majesty (the Queen) of (England). In virtue of the commission We have with reverence received from Heaven, and as China and foreign nations are members of one family, we are cordially desirous of placing on a firm and lasting basis the relations of friendship and good understanding now existing between us and the nations at amity with China.

"And as a proof of our genuine desire for that object, we have specially selected an officer of worth, talents, and wisdom. Anson Burlingame, late Minister at our capital for the United States of America, who is thoroughly conversant with Chinese and foreign relations, and in whom, in transacting all business in which the two Empires of China and (England) have a common interest, we have full confidence as our representative and the exponent of our ideas.

We have also commissioned Chih Kang and Sun Chiaku, high officers with the honorary rank of the second grade, to accompany Mr. Burlingame to England, where Mr. Burlingame with the two so appointed will act as our High Minister Extraordinary and Plenipotentiary.

We have full confidence in the loyalty, zeal, and discretion of the said three Ministers, and are assured they will discharge satisfactorily the duties entrusted to them, and we earnestly request that the fullest credence and trust may be accorded to them, that thereby our relations of friendship may be made permanent, and that both nations may enjoy the blessings of peace and tranquillity, a result which we are certain will be deeply gratifying.

B

H.M. the Emperor of China to H.M. the Sovereign Ruler of (Great Britain) greeting.

Our title to universal sway has been reverently received from Heaven. (Regarding) the central and outer nations as one family, we have been considerately mindful of the lesser States in amity with us; and for the purpose of consolidating and rendering permanent the existing good understanding with them we have made special selection of good, capable, and intelligent officers to visit together (Great Britain), namely, the recently resident U.S. Minister at Peking, Mr. Burlingame—who, from his acquaintance with the circumstances of both Chinese and foreigners, will, in the management of the international business between the two countries, prove there is reason to expect a competent exponent of our views as to what requires adjustment (lit. what is warped)—and Chekang and Sun Chiakuh, of the 2nd grade in rank.

The appointment of officers all taken from the class of high functionaries who are selected by reason of special fitness for posts of importance attests the sincerity of our friendly sentiments. All three officers being, as we know, of tried fidelity, zeal, and painstaking in care, they are sure to manage satisfactorily. We do hope, therefore, that you will extend to them all frankness, so that by the interchange of unreserved confidence means may be found for placing friendly relations upon a lasting basis,—to the enjoyment by all in common of peace and tranquillity, a result which will cause you, we entertain no doubt, very great rejoicing.

Dated Tung-chi 6th year, 12th month, 6th day.

Mr. Wade did not arrive by the U. S. mail as expected, having been detained, but may be looked for by next steamer.

Sir Edmund Hornby is not expected to return to Shanghai till the beginning of November.

The launch of the third steamer built at the Kiangnan Arsenal took place on Tuesday afternoon, in the presence of Ting, Footai, and a number of native officials. She is thus described by the *Recorder*:—"Her length over all is 167 feet; beam, 27 feet 3 inches; depth of hold, 13 feet 2 inches; and gross tonnage, 650. Her frames are made of Singapore, Malava, and white oak, filled in solid, fore and aft, with yellow pine, and caulked inside and out. She is planked oak, and her deck is of teak. Her engines are horizontal direct acting, of 125-horse power, nominal. She has two boilers, each capable of being worked up to 30 lbs. of steam, and is fitted with Griffith's patent hoisting propeller. She is brig-rigged and flushed decked, and carries aft four 24 lbs. Dahlgren brass guns; midships, one 68 lbs., smooth bore; forward, four 24 lbs. Dahlgren guns; and as a bowchaser one 42 lbs. breech-loading rifled gun. When in the water she presented a very pretty appearance indeed, and when rigged, will rival the other two boats; her bow is round, which for that class of boat is certainly the prettiest, and we may safely say that in every respect she is a credit to her builders. We must not forget to mention that she was launched with her engines in her, and will make a trial trip in a few days."

One of the daily papers says that three new Customs cruizers, twin screws of 500 tons each, are shortly expected out for service on the China coast, one being for service on the northern, one the southern, and the third on the central station. Two of them will very shortly be here, having left home in June; the other was to leave in August. As soon as the one intended for the central or Shanghai division arrives the *Kwashing* will, we understand, be dismantled, by taking out her guns and reducing her crew, and she will be confined to harbour duty.

A new Chinese gunboat, the *Man-wing-ching*, built at the Foochow arsenal, arrived here during the week from that port. We believe she is entirely officered and manned by natives.

Business generally in the North of China is dull. The late "spurt" seems to have been quite speculative, and has been followed by the usual reaction. At Hankow nothing more will be done this season; the cotton and rice crops are almost destroyed, and the prospects for the winter very bad. The Japan crops of rice and cotton are no better, and as a result imports will surely suffer. Money is very dear among the natives, and much bullion is going out of the country to purchase rice. The cry of "short tea crop" has now subsided, and it is generally thought the crop

Digitized by Google

will be pretty nearly equal to last year's; while silk keeps up, and shippers are still bold.

The Gas Company is getting out of its difficulties, having got rid of all unallotted shares at par, and will soon be able to pay off the whole debenture debt, with, perhaps, a dividend for the current year; the consumption has greatly increased.

### CHEFOO.

A Chefoo correspondent writes:—The *Adventure*, Captain Raby, R.N., arrived here on the 29th Sept, with Lady Keppel and part of the suite of his Royal Highness the Duke of Edinburgh; and H.M.S. *Salamis*, bearing the flag of the Hon. Admiral Sir Henry Keppel, arrived here on the following day with his Royal Highness the Duke of Edinburgh and his suite. Immediately after the *Salamis* had anchored the Duke landed with Admiral Keppel, without attracting any unusual attention, and after quietly walking round Yentai Hill he entered one of the English merchants' houses, where he partook of some refreshment. He afterwards strolled through the Chinese town, making a few purchases, and returned on board the *Salamis* to dinner. It was intimated that the Duke desired to preserve an *incognito* during this first visit to Chefoo, as, the *Galatea* not being here, he was the guest of Admiral Keppel, and thus no address was presented on his landing.

### HANKOW.

(FROM OUR OWN CORRESPONDENT.)

Since last I wrote, the water, which was then by latest accounts falling, has continued to rise, until it now is but two feet below the maximum for the year. And when I thus describe the condition of the river I have said all that can be said about Hankow, for the simple reason that incidents, whether social, domestic, commercial, or even political, are rendered impossible so long as locomotion is impeded, as at present. The market continues glutted with all descriptions of imports, and prospects for the winter are looking gloomier and gloomier.

It is reported amongst native circles that Li Hung Chang is soon to be removed from his present vice-royalty to the province of Szechuen. It is difficult to say whether he is more trusted or distrusted by the Government. His judgment and energy are implicitly relied upon, but his rapidly increasing power makes him an object of suspicion. In fact, the talents that make him valuable have at the same time made him formidable. But foreigners have nothing to hope from Li: he is Conservative to the back-bone, and would now gladly turn the guns which foreigners have made for him at Nanking, against every Western intruder into China. The Peking Cabinet, however, are not quite assured of this; and so they think it politic to shift him about, so as to prevent his taking deep root anywhere.

### HONG KONG.

The latest date from this port is the 19th Oct. The outward French mail of Sept. 2 was received on the 14th Oct. Few events of importance had transpired during the week. The following items are from the *China Mail*:—

Mr. John McLeavy Brown, secretary to the Burlingame Mission, arrived here from Europe, *en route* to Peking, on the 14th inst. The object of his return is a subject of much speculation.

That the affairs of the Mission required some trustworthy agent at Peking, whither Mr. Brown has proceeded, was a very natural and, we believe, well-founded supposition; but it was not to be expected that so able a diplomatist as that gentleman would reveal the objects which induced his return to China. We are, however, able to state that the rumour of his resignation was totally unfounded, and that there is a possibility that the frame of mind in which the Chinese authorities are represented to be is not so antagonistic to all of Mr. Burlingame's proceedings as has been imagined. One thing is at least certain—the speedy and we believe we may say totally unexpected visit of Mr. Brown to Shanghai will enable him at once to disprove the *possibly* absurd and injurious allegations brought against him and the eminent sinologues who share the responsibility of the translation of Mr. Burlingame's letter of appointment. We do not hesitate to express our own conviction that his and their rendering is the correct one. We have not yet seen a copy of the Chinese original, but it is more than probable that the translation "lesser States" in the *North China Daily News*' version is a simple case of straw-splitting based on the supposed difference in status between two characters. At all events, Mr. Brown has but to furnish the Chinese text, and every sinologue in China may satisfy himself of the truth, or otherwise, of the assertions made. The general public might refuse to believe the dictum of one or two; but every port in China, not excluding Hong Kong, has residents capable of accurately judging of the merits of the controversy, and their united testimony would be irresistible. It is greatly to be hoped that this opportunity will be afforded. We differ distinctly from Mr. Burlingame's policy, but we shall be glad to find that the well-known scholars above alluded to, with Mr. Brown, stand clear of an imputation which goes beyond the limits of mere literary controversy, and touches them as men of honour and probity. Again, we repeat the solution lies in the hands of Mr. Burlingame's friends.

A paragraph appears in the *London and China Express*, received by the French mail, that makes necessary a reference to the almost forgotten case of *Regina* v. *Saint*. The writer of the paragraph refers to the fact, of which our readers are aware, that steps were taken by the representatives of the Crown here to apply to the Privy Council for leave to appeal against the judgment of the Chef Justice, on the demurer by the prosecution; and it concludes with saying, "We are surprised that Sir R. MacDonnell should have sanctioned any further proceedings. As it is, perhaps the right to appeal will be granted, but we cannot for a moment doubt that the Judicial Committee will confirm Judge Smale's decision in every particular." As the paragraph will be read read in Hong Kong, we deem it right to state that the Crown a short time ago gave formal notice to defendant of its intention to enter a *nolle prosequi* in each of the two pending criminal informations against him, viz.:—one at the instance of the King of Portugal, and the other on behalf of Senor Horta; and also that the appeal against Chief Justice Smale's judgment on demurrer *in re* Amaral would not be further proceeded with. The formal declaration to this effect is to be made to the Supreme Court at the Criminal Sessions which commence on the 20th, when the Acting Attorney-General, the Hon. H. E. Pollard, will state the reasons why this course has been adopted by the Crown. We make this statement simply in correction of a paragraph written in unavoidable ignorance of the present state of the case; otherwise we should have remained silent upon it until it again comes formally before the Court.

The *Camoens*, Portuguese gun-boat, has captured the junk which pirated the N. G. barque *Apenrade*. Owing, however, to the heavy weather she had to be abandoned and sunk.

Great preparations continue to be made for the reception of H. R. H. the Duke of Edinburgh.

The Gibson memorial fund subscriptions have up to the present time reached over $2,000.

## PHILIPPINES.

—o—

### MANILA.

The advices from Manila are to Oct. 12. There are no very full accounts of the earthquake, but such as have come to hand show that the statements already published by us were in no degree exaggerated, as the following extract proves:—

Manila has been visited with another very severe earthquake,—as severe in its force as that of June 3, 1863, but owing to there being no cross oscillation, all the waves going in one direction, the destruction of property has not been so great. Still a number of the public buildings have suffered terribly, and, both inside and outside the city, many private houses have been damaged. Casualties to persons, considering the extent of the misfortune, have not been many, a few killed and wounded are reported up to latest date. The earthquake occurred at the busiest part of the day, about half-past eleven, in the forenoon of Oct. 1, during a very heavy shower; and with the recollection of 1863 uneffaced from their memory, the terror and fear of the inhabitants is more easily imagined than described.

## JAVA.

—o—

### BATAVIA.

Accounts from Samarang, Cheribon, &c., give sad accounts of fever epidemic. Houses and boats are deserted, and labour cannot be procured for loading ships and general purposes. Our readers may remember the sweeping condemnation Our Special Correspondent lately passed on the sanitary condition of Samarang, and warning the Government and inhabitants to see to it.

The press has suffered a severe loss in the death of Mr. H. J. Lion, late editor of the *Batavia Handelsblad*, the "Nestor" of editors in the East. A Conservative paper, the *Sourabaya Nieurs-bode*, has entirely collapsed.

The Samarang Chamber of Commerce has, in the presence of delegates from those of Batavia and Sourabaya, had discussions on the sugar culture system, which is at present occupying the attention of the Dutch Houses of Parliament.

Government has commenced proceedings against the Sourabaya papers for libel, said papers having stated that Governor-General Meyer had received private orders not to appoint natives to places with a salary of $120 per month to the detriment of European candidates.

## STRAITS SETTLEMENTS.

—o—

### SINGAPORE.

The outward mail of Sept. 10 arrived on Oct. 14 with telegrams to Sept. 28. The dates are now down to Oct. 2 The *Straits Times* gives the following summary of news:—

The new Government House now shelters the representative of Royalty. His Excellency moved in last week, and beyond a little

Digitized by Google

trimming up, the work may be said to be complete, and be ready for the reception of the Duke of Edinburgh when he comes. According to our advices from China, the Duke will probably not be here for three weeks or a month yet, and, as he has a good deal of lost time to make up, his stay will doubtless be short.

A good deal of attention has been given to the Secret Societies' Bill, which has been introduced into Council and read a second time. A pretty general belief prevails that the Governor is wrong in seeking to carry through, with so much haste, a measure which he himself admits to be an instalment merely. After waiting two years to legislate at all and with all the information within our reach which it is possible to obtain,—the opportunity should be availed of to pass such a measure as will be of real value to the community, and by its statesman like features serve in some measure to vindicate the settlement from the reproach of crude and ill-digested legislation, which the productions of its Councils have hitherto earned for it. Another subject which has occupied some attention, outside the Council, is the progress of the steamer which was ordered now about two years ago for the public service of the Straits, and for which £23,000 was remitted from the Colonial Treasury in February last. For some mails back various reports have been received casting doubts upon the steamer's being under progress at all; and last mail's advices render it almost certain that the steamer never really has been ordered, and that the colony has been put to the expense of borrowing and remitting the money for no purpose whatever. Neither is this the worst feature in the case; there is grave reason to fear that, by reason of compositions paid to various parties for unfulfilled engagements, we may in the end get only a very small portion of our money back again—one debit note for £400 came by last mail for money paid in this way to the gentleman who was to superintend its construction.

## PENANG.

The arrangements for the reception of the Duke of Edinburgh are nearly complete. A worthy Chinese, Kan Sin Tat, has placed a new house at the disposal of H.R.H. The Governor is supplementing the fittings, &c.

The death of Mr. Logan, the editor of the *Penang Gazette*, is universally regretted. The funeral was attended by nearly every European in the settlement; and the principal Chinese, Malays, and other Asiatics of almost every race and creed were present, not excepting even the priests of their various religions. J. R. Logan arrived in Penang in 1839, and since that time he has been a constant resident of the island and province. He was a fellow of the Geological Society, member of the Asiatic Society, corresponding member of the Ethnological Society of London, and of other literary and scientific societies. He was also the editor and principal contributor of the *Journal of the Indian Archipelago*, eleven volumes of which have been published.

We understand that nothing is to be be done with regard to the new territory to the east of Province Wellesley, ceded to us lately by the Rajah of Quedah, until his Excellency the Governor next visits Penang, which will probably be after the visit of the Duke of Edinburgh.

## CEYLON.

—o—

### COLOMBO.

The currency question still engages attention, but in London the Government measure for introducing the rupee in place of £ s. d. is considered to be practically passed, and the banks connected with the island are sending out rupee notes in place of the pound notes.

The Galle harbour scheme continues to be a subject of controversy; the *Colombo Observer* publishes a report by Messrs. Halliley and Donnan, showing how the necessary revenue to meet interest and sinking fund can be raised. They proposed to levy 2s. per ton on coals landed and tonnage dues, up to a maximum, in case of the great mail companies' steamers, of 6d. a ton—to be reduced to 4d. as the increased resort of steamers renders reduction possible. It is quite clear that 6d. per ton would not be too high a price to pay for the benefits of perfect safety and smooth water which would always allow easy coaling and the transhipment of goods; for the fourteen P. and O. steamers which now visit Galle 110 times per annum on their voyages between Calcutta and Suez, Bombay and China, and from and to Australia are valued at £1,267,000; the rough estimate of the value of the silk, opium, indigo and other goods they carry being twenty millions sterling. This leaves out of view the steamers of the Messageries and other companies with their cargoes, and the great increase in steam navigation which may be expected to ensue on the opening of the Suez Canal. As regards coal ships Messrs. Halliley and Donnan mention the significant fact that the average detention of such ships in Galle Harbour during the calm weather of the North East monsoon is only twenty-six days against fifty-two, or exactly double during the prevalance of the South-West monsoon, when the ocean swell comes rolling into the harbour. It is clear, therefore, that coal ships could afford to pay enhanced tonnage rates for the benefit of calm water all the year round. Doubts being still entertained whether from the contour of the coast and the direction of the swell, the breakwater so elaborately reported on by Major Clarke and Mr. Hutton Gregory can ensure perfectly smooth water inside, the Governor has taken the wise course of appointing a Commission, composed of the leading engineering and nautical authorities in the Island, the Surveyor General being Chairman, to consider the best form of breakwater for securing quiet water so as to permit of coaling, transhipping &c., easily and safely in all weathers.

# Commercial Report.

—o—

(*For dates see First Page.*)

## CEYLON, STRAITS, JAVA, CHINA, AND JAPAN IMPORTS.

YOKOHAMA.—The market, which we last reported active with improved prices, had become quiet for all staples and prices had slightly receded. The market, however, closed firm, importers showing no anxiety to realise. About 1,500 to 1,800 bales of Yarn had changed hands, together with from 25,000 to 30,000 pieces of Shirtings. The further decline in the value of native currency had doubtless tended to some extent to cause a depression in the market. Metals: A limited inquiry was made for Nail Rod Iron of smallest sizes at $3.10 to $3 50. Lead continued dull at low prices. Quotations:—Cotton Yarn, 16 to 24, $51.50 to $52.50 per picul; 28 to 32, $53 25 to $54.50; 38 to 42, $57 to $58; Grey Shirtings, 7 lbs., $2.60 to $2.65 per piece; 8 lbs., 4-6, $3 to $3.10; Black Velvets, $9 to $9.65, good chops saleable; T. R. Cambrics, $0.90 to $0.95 per lb.; Blankets, $0.38 to $0.45 per lb.

SHANGHAI.—There had again been a large business in the chief staples between the departure of this and last mail; as far as Grey Shirtings and T-Cloths are concerned mainly speculative. For most other goods the demand had been of a steady character, and prices had risen or fallen in answer to the wants of the trade. Grey Shirtings: At one time Tls. 2.31 per piece was obtained for Dewhurst's 8-4 lbs. Eagles on moderate credit. Subsequently a reaction took place, and similar goods were offered and sold (by speculators) at Tls. 2.27 per piece on short delivery. At the close there were more Chinese sellers than buyers. Prices were Tls. 2.0.4 to 2.0.7 for 7 lbs., Tls. 2.2.2 to 2.2.7 for 8-4 lbs., and Tls. 2.4.5 to 2.8.5 for 9 to 9-12 lbs. T-Cloths: Speculators had turned their attention to these goods, owing to their comparative cheapness, and a large business has resulted in them at in some cases an advance on last quotations. Prices—Tls. 1.35 to 1.68 for 6 lb., Tls. 1.60 to 1.92 per piece for 7 lb., and Tls. 2.05 to 2.45 per piece for 8 lb. 36 in. White Shirtings: About 8,000 pieces (chiefly lower counts) had found buyers, and for special chops a slight advance had been obtained. The demand was not extensive, but *bona fide*. We quote 56 reed Tls. 2.15 to 2.20; 60 reed, Tls. 2.30 to 2.35; 64 reed, Tls. 2.35 to 2.40; and 66 reed, Tls. 2.48 to 2.55. Drills: The demand had fallen off. Quotations:—American, Tls. 3.95 to 4.04; English, Tls. 3.55 to 3.80; Dutch, Tls. 3.55 to 3.73 per piece. Sheetings: American Cloth improved, fair sales at Tls. 3.60 to 3.75; small sales of English at last values Jeans: Sales of all kinds reported at about former rates; American Cloth. Tls. 3.10 to 3.13; English, Tls. 2.95 to 3; Dutch, Tls. 2.85 to 2.95 per piece. Fancy Goods: There has been a fair business in all classes of these goods, prices showing no material change. Camlets: The chief change to note was the rise in value of C.P.H. Scarlet, which were worth Tls. 13.30 per piece: Green also advanced 15c.; Black declined 25c. per piece. In other colours no alteration. Long Ells: Only small sales quoted, prices for ordinary Scarlet at one time declined to Tls. 5.95 per piece, then recovering to Tls. 6.05 per piece; C.P.H. Orange showed a fall of 25c., and Gentian 10c. per piece. In other Woollens there was little of interest to note. Metals: Both Bar and Nail Rod Iron had been inquired for. The former had changed hands to the extent of about 800 piculs at Tls. 2.15 per picul, and of the latter some 7,000 bundles had found buyers at Tls. 1.85 per picul for German Manufactured Iron up to Tls. 2.05 per picul for fair English assortments. Stocks of both descriptions heavy. Lead: Quiet. Coals: Receipts fully equal to demand, prices had not varied; American, Tls. 9.75; Newcastle, Tls. 5.90 to Tls. 6 from shipside.

HANKOW.—The comparative low rates ruling for Grey Shirtings led to purchases upon speculative account of all offering, by which means an advance of one mace per piece had been established. Grey T-Cloths neglected and difficult of sale. Grey Drills sold at a reduction of five candareens per piece. White Shirtings better supported, advanced five candareens per piece. All Fancy Cottons only saleable in small parcels. Lustres in better request, and about one mace per piece dearer. Woollens difficult to quit. Camlets declined two mace per piece. Fair sales of Lastings. Long Ells very heavy of sale, and price showed a further fall. Lead, after advancing four mace, dropped, in consequence of an injudicious sale to previous rates, but had since rallied two mace per picul. Quotations: Grey Shirtings, 7 lbs. to 7-2 lbs. per piece, Tls. 2.02 to 2.10; 8-4 lbs. to 8-6 lbs., Tls. 2.24 to 2.28; Grey T-Cloths, Tls. 1.30 to 2.30; White Shirtings, Tls. 2.15 to 2.60; Spanish Stripes, per yard, Tls. 0.55 to 0.59; Medium Cloth, Tls. 0.95 to 1.15; Broad Cloth, Tls. 1.10 to 1.50; Camlets, SSS, per piece, Tls. 10.50 to 11.56; SS., Tls. 11.60 to 12.60; Lastings, Tls. 10.70 to 11.40; Long Ells, Tls. 6.15 to 6.50; Lead, per picul., Tls. 5.40 to 5.60; Nail-rod Iron, Tls. 2.65 to 2.85.

FOOCHOW.—Sales are reported of 1,000 pieces 8¼ lbs. Grey Shirtings at $3.10, and of 1,000 pieces 7 lbs. at $2.45. Quotations are:—Grey Shirtings, 8¼ lbs., $3.10; 7 lbs., $2 45. T-Cloths, 7 lbs., $2.45; 6 lbs., $2.20. Coals: No sales. Lead: Difficult of sale at quotations—Large Pigs, $7½; small, $7 per picul.

HONG KONG.—The following is from Messrs. Olyphant and Co.'s Circular, dated Oct. 18:—Cotton Yarn: Arrivals small, but settlements aggregate largely, and stocks in consequence are still further reduced. Purchases have been freely made at advancing rates, and with increased firmness on the part of holders, a high range of prices has been established. Nos. 16/24 now command rates $3 to $7.50 over last quotations; Nos. 28/32 are $3 dearer, while Nos. 38/42 have realised $2.50 to $5 higher figures. The market closes strong with an active demand. Piece Goods; The firmness of the market last advised has not been sustained, and, though a fair business has been transacted, rates for the staple manufactures are in some instances weaker. The demand for

Digitized by Google

8-4 lb. Grey Shirtings for shipment has subsided, and dealers have bought principally to prepare themselves against future wants; 7 lb., though in small stock, have been comparatively neglected, and prices of both these weights have given way 2½c. per picul; 10 lb. goods are dull of sale, at a greater reduction. Common White Shirtings are in fair demand at former rates, whilst fine White kinds are neglected. T-Cloths have commanded increased attention, 6 lb. of common makes and 7 lb. Mexican having been considerably dealt in at former values. 7 lb. of lower qualities, however, are not wanted at a slight decline. 8 lb. are in full supply, and have fallen 5c. per piece. There are no Chintzes on offer, and first arrivals are likely to meet with quick sale. Values of English and Dutch Drills have been sustained, and a moderate demand still keeps up; stocks of the latter having been entirely cleared off. Holders of American goods are still firm, though inquiry has slackened and dealers are showing less disposition to buy than heretofore. Woollens: Holders have shown a willingnese to quit their goods at ruling rates, and a fair business has resulted in most articles, though the only improvement noticeable in any description of these fabrics is in superior Lastings, which are now held at rates 25c. to 50c. dearer than previous quotations. Long Ells have been fairly taken. but prices remain unchanged. Spanish Stripes and Blankets are lower, Camlets have been moderately dealt in at former rates. Metals: The supply of Nail Rod Iron is large and prices have given way 5c. per picul. Bar and Hoop Iron are firmly held for an advance. Lead has been moderately taken at slightly enhanced values. Tin is somewhat firmer, owing to a demand for the northern markets. Quicksilver shows no change. Coal: The market is lifeless, and quotations are lower. Arrivals have been 2,147 tons of Cardiff, of which 1,450 tons come to consumers. Sales, 2,000 tons Cardiff, at $8 per ton. No inquiry for Anthracite. Ginseng: Dealers have shown very little desire to operate, and a very quiet interval has ensued for the article. The only transaction has been the settlement of 6 barrels clarified at about $200 per picul. Quotations—Grey Shirtings, 7 lbs., $2.55 to $2.57½; 8.4 lbs., $2.85 to $2.88; White Shirtings, $2.50 to $3.60; finer qualities, $4 05; T-Cloths, 6 lbs., $1.95 to $2.00; 7 lbs., $2.20 to $2.25; 8 to 8-4 lbs., $2.70 to $2.80; Spanish Stripes, Scarlet, 70c. to 75c.; Assorted, 68c. to 73c.; Long Ells, per piece, Scarlet, $7.70 to $7.90; Assorted, $7.70 to $8; Blankets, 50c. to 54c.; Camlets, SSS., $13.50 to $14; SS. Assorted, $15.50 to $16.25; S. $17.25 to $17.75. Iron—Nail Rod, $2.50 to $2.65. Lead, $6.40; L. B., $6.40 to $6.50; W. B., $6.75 to $7.

SINGAPORE.—Messrs. Boustead and Co. report as follows:—There has been rather more general demand for cotton goods since the date of our last advices, and as importers are not anxious to force sales at present low rates, prices are firm at about last quotations. 39 inch Grey Shirtings: The demand for 8¼ lbs. has not been large; sales at $2.85 to $2.90; 7 lbs. and 6 lbs. placed at $2.52½ and $2.15 to $2.20 respectively. 45 inch: 7 lbs., $2.50 to $2.55; 8 lbs., $2.87½. 39 inch White Shirtings: Fine descriptions of well-known makes in rather more inquiry; several sales reported, but at low rates; 64 reed placed at $3.05 to $3.15. 36 inch White Spots sold to small extent at $2.90. 45 inch White Cambrics: No. 24s, 16 by 16, in demand; sales at $20 to $21 per corge; finer qualities more inquired for, and 15-16 slightly firmer, being worth $32 to $32½; 30 inch White Madapollams in demand; sales at $23½ to $24 per corge; 33 inch Imitation Irish Linens: Sales reported at $2.10 to $2.12½. 32 inch Grey T-Cloths: Light weights in request; sales of 4 lbs. at $1.40, 4½ lbs. at $1.52½; 5 lbs. very dull at $1.60 to $1.62½; 6 lbs. in fair inquiry at $1.85; 7 lbs. in large stock and dull at $2.15 for ordinary. 32 in Grey Maddapollams: 2¾ lbs. sold at $21; 3 lbs., at $22½. 30 inch Grey Drills: In better demand; 12 lbs. to 12⅜ lbs. English sold at $85 to $85½, 14 lbs. at $93 to $94; heavy weights of Dutch sold at $94. 32 Turkey Red Cambrics: Very quiet, sales very limited at last rates; Mulls in no demand, and nominal. Grey Yarn: 18-24 sold at $130 to $131; 30's out of stock and are worth $131, 40's declined to $150. Coloured Yarns: Green placed at $90, Yellow at $82½, Imperial Red at $85. Woollens of all descriptions very dull, rates nominally unaltered. Metals: Copper Sheathing is dull at $26, Yellow Metal at $21½, both articles in full supply; Nail Rod Iron dull at $2.50; Pig Lead sold at $6.10 and wanted at $6, but most holders are firm at $6.25; Tin Plates and Brasswire very dull. Coals: Weaker; North Wales $4¾, Cardiff $7½.

PENANG.—Grey Shirtings: Sales of 6 lbs. at $46; 7 lbs., $52 and $51; 8¼ lbs., $62½ and $59 per corge. Grey Long Cloths inactive; quotations nominal. Grey Madapollams: Market bare; no arrivals; quotations nominal. Grey T-Cloths: Prices weaker, by reason of Singapore imports. Sales of 6lbs. at $39 to $40—7 lbs., at $45½ to $44 per corge. In other weights no business. White Shirtings continued difficult of disposal; sales of Fine, at $88 to $95; medium, at $65 to $72½; and of some goods 23 yards length at $50 per corge. White Cambrics: Very weak; sales of No. 50's at $28 and $27½ per corge. No. 15-16: declined, opening at $33 and closing at 32 40 per corge. Grey Sheetings: Moderate sales, at $94 per corge. In Amerscan Drill, Dyed and Figured Shirtings, Mull's, and Brocades: No transactions. Grey Mule Yarn market bare, quotations nominal. In other Twist sales effected of Turkey Red, No. 40, at $145; Imperial Red, No. 40, at $80, $81, and $82½; Green assorted, at $82½ per bale of 200 lbs. A good demand for Gold Thread, and considerable sales at $49½ cash and $51 credit. Iron and Steel had not moved, but a sale of Pig Lead reported at $6¼ per picul. Yellow Metal goes off very slowly at $23 per picul. A sale of Spelter reported at $6½ per picul.

COLOMBO.—Messrs. Geo. Wall and Co.'s report is as follows:—In the absence of recent advices of any kind the decline noticed in our last has continued to progress in most descriptions of goods. This tendency has been aggravated by the eagerness of importers to anticipate possible worse rates by immediate sales. Our quotations give the value at which we close. Grey Shirtings: 39 inch 7 lbs., 11s. 3d.; 8¼ lbs., 13s. 9d.; 45 inch 8 lbs., 13s. 9d. to 14s.; 9 lbs., 15s. 6d. to 15s. 9d.; 10 lbs., 17s. 6d. to 18s.; 11 lbs., 20s. to 20s. 6d.; 50 inch 10 lbs., 17s. 6d. to 17s. 9d.; 11 lbs., 18s. 6d. to 19s. Grey Longcloths: 40 and 45 inches, 1s. 6d. Prints: A good many parcels have been placed of Regatta and White gro. Prints at a reduction on recent values.

## CEYLON, STRAITS, JAVA, CHINA, AND JAPAN EXPORTS.

### TEA.

YOKOHAMA.—A fair amount of business had been done, almost entirely for the American and Californian markets, and full prices had been maintained. At the close, however, a slightly easier tendency was noted, although no reduction in prices had been obtained. Settlements, chiefly of medium grades (common and fine leaf being scarce), amounted to about 5,000 piculs. The weather had greatly retarded arrivals, and stocks were therefore small. The Cedric had sailed for New York and Boston with 384,822 lbs., and the P.M.S.S. Co.'s steamer America took 32,624 lbs. for New York, and 71,599 lbs. for San Francisco. Quotations: Common, nominal; good common, $22 to $23 per picul; medium, $25 to 26; good medium, $27 to $30; fine, $31 to $33; finest, $36 to $37; choice, nominal.

SHANGHAI.—Black: The market remained very quiet for some days after the departure of the last English mail, and business was transacted at a decline in rates. Later on competition rather hardened prices, and increased the demands of holders. Latterly prices had again weakened, consequent on the liberal supplies, and the uncertainty as to what dimensions the export may assume if the existing range of quotations were maintained. Settlements for the fortnight, 27,000 chests; reshipments on owners' account, 2,000 chests; stock, 151 chops, or 51,000 chests. Quotations, duty paid, exchange for credits, six months' sight, at 6s. 0¾d. per tael, and freight at £2 10s. per ton:—Hohow, common to good, Tls. 17¾ to 21½, equal to 1s. 0½d. to 1s. 2½d.; Oonam, common to fair, Tls. 19 to 21½, equal to 1s. 1d. to 1s. 2½d.; Ningchow, fair to good, Tls. 20½ to 22½, equal to 1s. 2d. to 1s. 3½d.; Oopack, Tls. 20½ to 23, equal to 1s. 2d. to 1s. 3½d. Green: An important business had been transacted during the fortnight. Common to medium descriptions showed a decline of about one tael per picul; finest kinds no change in rates. The bulk of the settlements was destined for New York, but a liberal quantity had been bought for the English market. The following were the quotations: Moyune and Teenkai, Tls. 33 to 45½; Fychow, Tls. 27 to 37; Pingsuey, Tls. 36 to 41¾; Shanghai-packed, Tls. 25. Settlements for the fortnight, 54,000 half-chests; re-shipments on owners' account, 6,700 half-chests; stock—60 chops, or 62,000 half-chests.

HANKOW.—The following is from Messrs. Drysdale, Ringer, and Co.'s report:—Owing to the change usual at this season of the year in the time of departure of the mail, we have to report on the business which has transpired during nearly three weeks. For a few days after date of our last a fair business was done, principally in common Oanfas at 18 to 18½, but as supplies then came in more freely than anticipated, demand fell off, and during the latter part of the time under notice but little has been done. Supplies have again been heavy for the advanced period of the season, making our Export one million and a-half pounds in excess of what it was at corresponding date of last year. The quality of all the late arrivals is very inferior, and there has not before been such a large quantity of common Tea brought to this port, a considerable proportion of which will not rank at home as Common Black Leaf. Shipments to Shanghai for sale on native account amount to 18,000 chests, the bulk of which have gone forward without being generally offered, as Teamen found the state of our market did not admit of their obtaining offers to cover cost. The early settlements were made at prices fully equal to last quotations, but closing transactions show a decline of Tls. 1 to 1½ per picul, with a downward tendency. We quote Shuntam packed, Tls. 15 to 15½; Oopack kinds, common to fair, Tls. 16½ to 17½, fair, Tls. 18 to 18½, good, none on offer; Oanfas common, Tls. 17 to 18. Settlements from 16th September to 6th October: 4,600 chests, 800 half-chests at Tls. 15 to 17, equal to 1s. 1½d. to 1s. 2¾d.; 6,400 chests, 600 half-chests at Tls. 18 to 19, equal to 1s. 3¼d. to 1s. 4d.; Total, 11,000 chests, 1,400 half-chests.

KIUKIANG.—Black Teas: Arrivals had continued liberal, but only two small parcels had found a buyer on this market. Quotations—Ningchows, Tls. 16½ to 17½; Hohows, nominal. Export from 1st Jan. to 8th Oct., 1869, 12,633.930lbs.; ditto from 1st Jan. to 8th Oct., 1868, 14,953,414lbs. Stock, nil. Green Teas: Large arrivals were expected, but only a portion of the quantity looked for had arrived. Only two settlements had been made, these being at rather lower prices. Export from 1st January to 8th Oct., 1869, 3,709,217lbs.; ditto from 1st Jan. to 8th Oct., 1868, 2,757,524lbs. Stock, nil.

FOOCHOW.—Congous: With large receipts from the country and increasing stocks, buyers, as a rule, had demanded lower rates; but the teamen being unwilling to accede, only moderate settlements had resulted, a fair proportion of which were on Continental account. Total supplies were not likely to be much under those of last season, though much would depend on the rates ruling at this port during the succeeding few wee . Souchongs had been in fair inquiry at previous currencies. Oolongs: The demand on American account had continued, and about 18,000 half-chests had been settled at fully previous quotations. Scented Teas continued in fair demand at late rates. Settlements for the fortnight:—Congou, 30,192 chests, at Tls. 9.8 to Tls. 27.8 per picul, ship off; Souchong, 2,437, chests, at Tls. 18.8 to Tls. 27.8; Oolong, 18,278 ½-chests, at Tls. 19.5.5 to Tls. 28.8; Scented Teas, 6,374 boxes, at Tls. 8.8 to Tls. 26.8; Flowery Pekoe, 834 chests, at Tls. 20.8 to Tls. 44.8.

AMOY.—About 1,700 packages Congous had found buyers at $16½ to $18 per picul, and the remaining stock of about 3,800 packages was of very inferior quality. The market for Oolongs for America was reopened on the 8th Oct., and 30,082 packages had since been settled at $18 to $22 for common to fair cargo, $22½ to $25½ for good, and $27 to $32 for superior to fine. Buying still continued at these figures, from which no reduction was expected. The stock amounted to about 23,000 packages. Arrivals were 45,700 packages short as compared with the same date last season, and this deficiency would probably not be reduced as the season advanced

CANTON.—There had not been any further arrivals of Country Congous, and the enquiry for all descriptions of Canton made Teas had been very moderate. Holders, however, had shown no desire to press sales, and purchases made had been at about last quotations. Stocks were light, but in view of the export, and unfavourable home advices no im-

Digitized by Google

creased demand was looked for, without some concessions on the part of the Teamen.

## SILK.

YOKOHAMA.—Business had been fairly current during the interval. The course of prices had fluctuated somewhat, but they close at fully last quotations, and even with some advance in best silks. These latter were as scarce as ever, and the settlements chiefly consisted of parcels of current to common hanks at $750 to $650. Settlements about 800 bales. Silkworm Eggs: Total settlements estimated at 700,000 cards, leaving a stock of about 300,000, chiefly bivoltinis. Quotations: Best green $3.75 to $4.53; good green $2.50 to $3.25; common green $1.75 to $2.25; bivoltinis 30 cents to 75 cents; whites too scarce to be quoted.

SHANGHAI.—The following is from Messrs. C. J. Skegg's and Co's Circular, dated 12th October:—The French mail which left here on the 6th instant took 1,786 bales, out of the 2,500 estimated settlements to that date. Prices had been very strong, and in fact generally showed an advance of about Tls. 5, although in some cases even more might be quoted. Choopings No. 3's were taken at Tls. 572½, San Meh's Cat chop "Powling" at Tls. 552½ and Red Peacocks at Tls. 470. During the last few days business has been on a more moderate scale, dealers still trying to force up prices, whilst buyers have conceded the higher exchange, thus comfirming a rise equivalent to Tls. 5 to 10 per picul. Chooping's chop has fetched Tls. 575 (equal to 30s. 3d.), and Tls. 580 has been paid for the same without the Nos. 3½ and 4's. It may be said that all Tsatlees have come under the above advance, although it is more noticeable in common sorts, which have been in greater demand. Taysaams share the upward movement, very ordinary No. 2 Kahings finding buyers at Tls. 435 (equal to 23s. 2d.), while Tls. 10 to 20 more is wanted for best chops. Settlements for the three weeks are estimated at about 3,500 bales, of which nearly 1,000 go by sailing vessels.

## JAVA, STRAITS, AND CEYLON PRODUCE.

BATAVIA.—Arrack—f.120 to f.125 per leaguer; sales, and in good demand. Cloves—f.18 to f.20 per picul; dull. Coffee—Java, f.31 to f.32.50 per picul, according to quality; the Government sale at Padang averaged as follows:—49,000 piculs, No. 1, f.37.12 per picul; 2,200 piculs, No. 2, f.14.05 per picul. Cubebs—f.16 to f.17 per picul; nothing doing. Gutta-percha—f.60 to f.120 per picul, according to quality; market bare. Gum Damar—f.48 to f.48.50 per picul; sales; supplies. Hides—Cow, 35c. to 40c.; Buffalo, 23c. to 28c. per pound, according to quality. India-rubber—f.90 to f.100 per picul; sales, and scarce. Indigo—Sales at Samarang, f5.25 to f.5,35 per lb. for first quality. Mace—f.100 to f.115 per picul; wanted. Nutmegs—f.105 to f.115 per picul; sales. Pepper—Black, f.18 to f.18.50; White, f.30 per picul; no stocks. Rice—First quality, f.155 to f.165 per coyang; second, f.125 to f.130; cargo, f.100 to f.115. Rattans—Borneo, f.10.50 to f 13; Dadang, f.8 to f.8.50 per picul; sales. Sapanwood—Java, f.3 to f.3.50 per picul; sales. Sugar—No. 14 and lower, f.16.50 to f.16.75 per picul: Nos. 15-20, f.15.50 to f.15.75. The Government sale averaged as follows:—25/m piculs Samarang, f.15.66; 35/m piculs Sourabaya, f.15.91; 35/m piculs Passaroeang, f.25.53. Total average of 95/m piculs., f. 15.71 per picul for No. 14; the average price paid for the different numbers was as follows:—30,000 piculs, No. 14 and lower, f.16.31 per picul; 65,000 piculs, No. 15-20, f.15.24. Tin—Billiton: An auction of 5,008 29-100ths piculs averaged f.74.48 per picul.

SINGAPORE.—Gambier, good demand, but at rather lower prices; about 22,000 piculs engaged for at $3.20 to $3.10 per picul. Black Pepper in good demand, but supplies on a small scale, worth $7⅛. White Pepper out of supply, worth $11. Sago flour: No arrivals of Borneo or Sarawak; sales of Siak and Linga at $2.50 to $2.47½; no contracts for Singapore manufacture. Pearl Sago, in good demand, large contracts at $3.25 to $3.30 for small grain, and $3.35 to $3.40 for medium and large. Tapioca in less inquiry; sales of flake at $4.50 to $4.55; pearldull at $4½. Buffalo Hides—in brisk demand at $10¾ to $11½ for Singapore, no Java obtainable. Buffalo Horns—lower, purchases at $10¼. Gum Damar—Arrivals of 350 boxes brought $16⅞ to $17¼ according to quality. Rattans—Arrivals of 2,000 piculs inferior Banjermassen brought $4.80, sales of other kinds at $4½ to $5. India-rubber—without arrival, worth $36. Gutta Percha—Arrivals have brought $70 to 65 for best. Camphor—No arrivals, worth $50½. Cassia Lignea—Small sales at 21½. Cubebs—dull, worth $7¼. Coffee—Arrivals and sales of Bontyne at $12.55, supplies on the market unsold. Nutmegs—No arrivals, worth $50. Mace—worth $55; none on the market.

PENANG.—Black Pepper: Nearly out of season, and only small arrivals had come forward; a small lot of Acheen offering at $7.15c. per picul. White Pepper: In small quantities, taken at $10¼ to $10⅛ per picul. Tin: Slightly lower, the demand for China having ceased, and that for India considerably moderated. The prices ranged between $30.25c. and $29.75c. per picul, at which latter price the market closed weak. Mace had risen a little; purchases of No. 1 at $68 to $76; No. 2, at $62; and No. 3 at $40 per picul. Nutmegs scarce. Hides in spare supply, and higher; Buffalo, $10.20 to $10.50; Cow, $14 to $14.50 per picul. Horns: Scarce, and wanted; arrivals all taken at $10.60 per picul. India-rubber continued to come forward in small quantities, which found buyers at $36.25 to $36 per picul. Gutta Percha: Not offered. Sugar: In excellent demand at an advance in prices; Penang, No. 1, $6.60 to $6.90; No. 2, $5.50 to $6.; No. 3, $4.50 to $5 per picul.

COLOMBO.—Coffee plantation: Owing to the return of fine weather the market had been well supplied, and a fair amount of business had been done at 10s. 6d. to 11s. 6d. per bushel, the latter being an extreme figure for fine mountain Plantation. Native: Buyers offered equivalent to previous quotations of 48s. to 49s. per cwt., f.o.b., but sellers, in view of the extremely short supplies, were asking 2s. per cwt. advance on those rates which had not been paid. Cinnamon: Scarce and good qualities could not be purchased under 23d. to 24d. per lb. Cocoanut Oil: A few small transactions at previous rates. £34. 10s. to £35 per ton, f.o.b. Coir Yarn: no transactions. Plumbago: mining operations still restricted, and little or no business doing.

## ARRIVALS.

At Yokohama.—From Cardiff, Sept. 26, James Cheston; from Havre, 27, Clarisse.

At Shanghai.—From London, Oct. 9, Dundonald; from Liverpool, 7, Aracan, 9, Tycho Brahe; from Newcastle, Lois.

At Hong Kong and Canton.—From London, Oct. 6, River Eden; 16, Star of the North; from Liverpool, 9. Petchelee; from Cardiff, 7, ymbeline, San Fernando; from Glasgow, 7, Marchioness of Londonderry; from Hamburg, 6. Hong Kong.

At Manila.—From Liverpool, Oct. 2, Victoria, from Cadiz, 5; andida.

At Singapore.—From London, Oct. 22, Otter; from Liverpool, 30, Carwhim; from Glasgow, 13, Norham Castle; from Cardiff, 18, Von Berg; from Amsterdam, 18, Grecian Queen; from Cadiz, 22, Natividad.

At Penang.—None.

At Colombo.—None.

At Galle.—From Cardiff, Oct. 28, Viligant.

At Batavia.—From Amsterdam, Sept. 30, Hertog Bernard; Oct. 1, Cornelia; 6, Libertas; 11, Sinbad; 10, Java; 14, Kandanghauer; 6, Zeebleom; from Rotterdam, 6, Jacob and Helena, Maria Sarah; 14, Johana Christ an, Laurens Koster: 15, Alblasserdam; from Liverpool, 9, Perpetua; from Flushing, 14, Stad Middleburg; from Shields, 14, Signe, from Boston, 11, Cashmere; 14, Rocket.

## DEPARTURES.

From Yokohama.—For New York and Boston, Oct. 3, Cedric.

From Shanghai.—For London, Oct. 2, Rollo (Cleared).

From Foochow.—For United States, Oct. 3, Ada.

From Hong Kong and Canton.—For London, Sept. 28, Chetah; Oct. 6. Cathaya; 7, Invincible.

From Manila.—For Liverpool, via Cebu, Oct. 7. Westfold; 9, Lydia, via Capetown; 8, Oriana, for Boston; 3, Wild Rover; 12, Mariano.

From Singapore.—For Liverpool, Oct. 8, Toronto; for Liverpool and Glasgow, 9. Roslin Castle; for Boston, Argonaut.

From Penang.—None.

From Colombo.—For London, Oct. 28, Benledi; 30, Passover.

From Batavia.—For Holland, Oct. 3, Nieu Waterweg; 4, Zephir, 5. Strathblane; 10, Electric; 11, Vier Gezusters; 12, Concurrent Glenduror; 14, Baron v. P. v. Rosendal; 15, Sumatra; 16, Ellen, Norsk Flag, Atlas; 19, Veronica.

## VESSELS LOADING.

At Yokohama.—For London, Crown; for New York, Carobel, Germaine, Herbert Graham, Janet Ferguson, Mystic Belle, Pnæton.

At Shanghai.—For London, Barbadian, Corea, Dhollrah, Lizzie Iredale, Lorton, Northampton, Ornate, Tavistock, Wemmera, Wylo; for New York, Atma, Horatio, J. S. Store, Mikado, Willy Rickmers.

At Foochow.—For London, Carmarthenshire, Ospray, Ceylon, England's Glory, Polar Star, Earl Dalhousie, George Shotten. Glenavon, Albert Victor; for United States, Samuel Russell, Jeanie, Queen of the Seas, Mary Whitridge.

At Amoy.—For London. Kvik; for NewYork, Dacre.

At Hong Kong and Canton.—For London, Gauntlet, Pakwan; for New York, Arracan. Dr. Petermann. Oliver Cromwell,

At Manila.—For London, James Aiken, Hindostan; for Falmouth, Angela; for Channel, Joaquina, Victoria; for Cork. Hope; for Cadiz, Espana. Cervantes, Elena; for New York, George Peabody; for Boston, Archer.

At Singapore.—For Liverpool, Afghan (full), Norham Castle; for New York, Gemsbok; for Boston, J. W. A. Lorenzen.

At Penang.—For London, John Paul, Benvenue, Knighton; for Boston, Argonaut.

At Colombo.—For London, Ocean Rover, Southern Cross, City of Paris, Ocean Beauty, Wynaud. Linceiles; for Boston Asphodel.

At Batavia.—For Rotterdam, Graafstroon. Maria and Sarah, Maria and Elizabeth, Libertas, Jedo, Johanna Maria, Jason, Eolus, Sussana, Noord Brabrand, Her Adriana, Voorhenter, Alblasserdam, Kaap Hoorn; for Amsterdam, Louis Meyer; for Copenhagen, Signe; for Boston, Nevada, Herald, Wildeman; for New York, Zeebloem.

## FREIGHTS AND CHARTERS.

At Yokohama.—To United States, £2 5s. per ton, of 40 cubic feet.

At Shanghai.—To London £2 to £2 10s.; to New York, £3 per ton, of 40 feet.

At Foochow.—To London, £2 to £2 10s.; to United Srates, £2.

At Amoy.—To London, £4; Nominal.

At Hong Kong and Canton.—To London £2.

At Manila.—To London, Sugar, £2 5s. per ton; to Continent, £2 15s.; Hemp, £3.

At Singapore.—There are no vessels taking general cargo for London or Liverpool; a good deal of cargo is offering, and the rate is expected to be £1 15s to £2 per ton.

At Batavia.—To Rotterdam, sugar and rice, f.40; tin, f.35.

At Penang.—Rates remained unaltered.

At Colombo.—To London, coffee in bags, 25s. per ton; do. in casks, 60s.; cocoa-nut oil, 57s. 6d. to 60s.; cotton, 60s.; ebony, 40s. to 50s.

## SHIPPING POSTSCRIPT.

—o—

Arrivals not in the Tables.—At Dartmouth, from Bassein, C.C Horton; Nov. 23 at New York, from Canton, Peter Rickmers.

Departures.—Nov. 29, from London, for Yokohama, Black Watch; from Hamburg, for Hong Kong, Catherina.

Laid on.—At London, for Yokohama and Hiogo, Lochnagar.

Casualties.—The Spindrift remains in the same position. A few cases and bales have been saved through a hole cut in the deck. It is hoped that much of the cargo may be saved. At noon to-day about twenty-five packages had been saved by divers, the vessel being quite under water. The Bengal, M'Lean, from Penarth Dock to Hiogo, put into Milford, Nov. 23, with cross jack yard broken; her master had been ashore to procure a spar, and the vessel would proceed. The Zephyr, Porter, arrived at New York, Nov. 11, from Manila, had main yard and rudder sprung during a violent gale, Aug. 25, in lat. 31 S., lon. 34 E. The Her Majesty, Seymour, which arrived at New York, Nov. 12, from Manila, reported having had foremast sprung during a heavy gale off the Cape of Good Hope. The Chaturanga, Hardy, from Singapore to New York, which put into Bermuda Sept. 24, with damage, was continuing her repairs Nov. 6, and would reload the balance of her cargo and take it on to New York. A fire occurred Nov. 22 on board the Aztec (brig), from Sunderland for Nagasaki, lying in the Milwall Docks (where she had been taken for repairs after collision), but was soon extinguished, after cutting away part of the upper deck. The following telegram has been received, per Atlantic Cable, from New York:—Mary Nicholson, Yokohama Hong Kong, foundered. Advices from Amsterdam, dated Nov. 24, state that the Senior, van Det, from Batavia to that port, which put into Mauritius Oct. 19, leaky, and with damage, would have to discharge. The Chance. Imprevry, which sailed from Sunderland Nov. 17, for Galle, put into the Sound, Nov. 23, in tow, with part of crew refusing to proceed. The Citadel, Stewart, from Cronstadt to the Amoor River, with rye, flour, &c., caught fire off Christiania, and had been scuttled.

Miscellaneous.—The Admiralty have invited tenders for the conveyance of sundry small stores to Ceylon. At Table Bay, Oct. 14, Georges and Mary (str.), Leprovost, sailed for Yokohama. The Taeping, Capt. Dowdy, from London to Shanghai; the Belted Will, London to Hong Kong, put into Plymouth Sound on the 27th instant, owing to a south-west gale.

Spoken.—George Green, Cardiff to Singapore, Oct. 5, 7 S., 32 W.; Vesta (Russian ship), Batavia to Rio Doce, Oct. 7, 28 S., 7 E.; George Treat, (Amer. barque), Penang to London, Oct. 29, 5 S., 19 W.; Glenlee (ship), Foochow to London, Sept. 28, 34 S., 22 E.; W. A. Farnsworth, Padang to Boston, Oct. 14, 16 S., 9 W.; Everest, London o Hong Kong, Oct. 25, 5 N., 25 W.

## LATEST TELEGRAMS.

(Received via San Francisco, Nov. 23rd.)

### CHINA AND JAPAN.

Shanghai, Oct. 19.—The Duke of Edinburgh has arrived at Peking.

Yokohama, Nov. 1.—The Treaty has been signed between Austria and Japan. The *Mary Nicholson* has foundered off the coast of Japan.

(Received 26th Nov.)

### THE DUKE OF EDINBURGH.

Shanghai, Oct. 31.—The Duke of Edinburgh has visited Peking *incognito*, and has since arrived here. His Royal Highness was enthusiastically received in this city, and attended a grand ball in his honour. It is stated that Sir Rutherford Alcock will leave Peking in November, and that he has made definite arrangements regarding the revision of the Treaty.

## BIRTHS, MARRIAGES, AND DEATHS.

### BIRTHS.

Laughton—On the 1st Oct., at Port Blair, Andamans, the wife of Capt. A. F. Laughton, M.S.C., of a son.

Laycock—On the 23rd Nov., the wife of Henry Laycock, Esq., late of Hong Kong, of a daughter.

Ormiston—On the 25th Nov., at 17, Belsize-park, Hampstead, the wife of Walter Ormiston, Esq., of a daughter.

Overweg—On the 6th Oct., at Shanghai, the wife of C. W. Overweg, Esq., of a son.

Pyke—On the 17th Oct., at Hong Kong, Mrs. T. Pyke, of a daughter.

White—On the 14th Oct., at the Royal Hotel, Macao, the wife of Mr. J. R. White, of a son.

### MARRIAGES.

Asmus—Hartwig.—On the 9th Oct., at Singapore, by the Rev. Wm. Jeffery, Hugo Asmus, Esq., of Hamburg, to Caroline D'Souza, eldest daughter of F. von Hartwig, Esq.

Freeth—Macpherson.—On the 28th Sept., at Mysore, India, William Freeth, Esq., to Helen Lushington, youngest daughter of Col. Ranald Macpherson, R.A., Lieutenant-Governor of Singapore.

### DEATHS.

Berry—On the 12th Oct., at Singapore, Mr. George Berry.

Clemen—On the 21st Oct., at Penang, Gustaf Clemen, of Delhi, aged 39.

Cropley—On the 17th Oct., at Singapore, Edwin E. Cropley.

Kreeft—On the 15th Oct., at Penang, Capt. Kreeft, of the *Ijati Leong*.

Lion—On the 12th Oct, at Batavia, of dysentery, M. Lion, editor of the *Batavia Handelsblad*.

Logan—On the 20th Oct. at Penang, J. R. Logan, Esq., aged 51, editor and proprietor of the *Penang Gazette*.

Shulz—On the 24th Nov., at Menton, France, Madame Shulz (née Milsom), eldest daughter of Mr. Milsom, merchant, of Lyons, aged 24.

Steedman—On the 23rd Nov., the Rev. Samuel Watson Steedman, rector of Fyfield, Andover, Hants, formerly of Hong Kong.

Thomson—On the 15th Oct., at Helston Lodge, Killiney-road, Singapore, Thomas N. Thomson, aged 24 years.

Uhen—On the 15th Oct., at Pulo Ticus, Rose Frances, the wife of Captain George Uhen, of the *James Shepherd*, of Penang.

## OUR TELEGRAPHIC EXTRA.

The Telegraphic Extra to *The London and China Express* can be obtained at the following agents. Subscription: $6 to subscribers to *Express*, and $12 to non-subscribers. The Extra contains the latest telegrams on political and general news, quotations of shares and exchanges, market reports, shipping arrivals, &c.; also latest quotations and shipping from Bombay and Calcutta, sent by special telegram to Galle, for the departure of the steamer to the Straits, China, and Japan:—

LONDON OFFICE, 2, COWPER'S-COURT, CORNHILL.

Breakfast.—Epps's Cocoa.—Grateful and Comforting.—The very agreeable character of this preparation has rendered it a general favourite. The *Civil Service Gazette* remarks:—"The singular success which Mr. Epps attained by his homœopathic preparation of Cocoa has never been surpassed by any experimentalist. By a thorough knowledge of the natural laws which govern the operations of digestion and nutrition, and by a careful application of the fine properties of well-selected Cocoa, Mr. Epps has provided our breakfast tables with a delicately-flavoured beverage which may save us many heavy doctors' bills." Made simply with boiling water or milk. Sold by the trade only in ¼lb., ½lb., and 1lb. tin-lined packets, labelled—James Epps & Co., Homœopathic Chemists, London.—Advt.

## THE "CARNATIC."

The official inquiry into the loss of the P. and O. steamer *Carnatic* occupied three days, and on the fourth the Court pronounced judgment. Naturally there were two distinct questions involved; first, the cause of the vessel being so much out of her proper course as to strike the reef—and, secondly, the conduct of the captain in not immediately landing the passengers and crew when she had struck. On the first question the Court seems to have no hesitation in condemning Captain Jones. The ship being in first-rate order, with an efficient crew, fine weather, a smooth sea, and a clear sky, how came she so far out of her course? Captain Jones can only answer this by the supposition that "some unknown current must have drifted him to the westward." but there is evidence that he passed within two miles of the Ashraffi revolving light, and by taking a single bearing of this he could have found his true position; yet this simple precaution was neglected. This, in the opinion of the Court, was a grave default. The second question—as to the amount of care taken to secure the safety of the crew and passengers—was a more difficult one to determine, for the evidence on some points was very conflicting. It was, however, unmistakably clear that at two A.M. on the 14th September—the day of the final catastrophe—the ship was in a most precarious state. She had slipped backwards, the saloon and cabins were filling with water, and the fore-hold was full. At this critical time the captain had to decide whether to prepare at once for a landing at daylight, or simply to await the course of events. He adopted the latter alternative, whereas the Court expressed itself as strongly inclined in favour of the former; at the same time, apparently, giving some weight to the considerations we have already put forth in a former article, as to the danger of fatal effects from the sun on an unsheltered reef. At any rate this part of Captain Jones's conduct is evidently regarded as nothing worse than an error in judgment, though certainly a lamentable one; and the suspension of his certificate for nine months is decreed solely on the ground of neglect in not ascertaining the true position of the ship.

Since the article was written which appears in our leader columns, letters from the correspondents of most of the daily papers have been published; these, though possessing much interest, do not in any degree tend to modify the opinions based on the telegraphic news previously received. The passage of two of the Messageries steamers (the *Alphée* and *Erymanthe*) through the Canal is announced, but they had no cargo, and are coming home for repairs. The P. and O. *Delta* did not get beyond Ismaïlia, and is now on her way back.

The amount of treasure by the Pacific mail steamer *America*, for China and Japan, which sailed from San Francisco on the 4th ult., was as follows:—Hong Kong, $1,162,593 8c.; Shanghai, $1,745 77c.; Yokohama, $2,000; total, $1,166,388 85c. The following are the names of the shippers:—B. Davidson and Co., $410,798; Bank of British Columbia, $246,986 74c.; London and San Francisco Bank, $222,389; Bank of California, $68,000; Parrott and Co., $6,000; other shippers, $212,185 11c.

Mr. H. T. Lion.—The Netherlands Indian press has suffered an irreparable loss by the decease of Mr. H. T. Lion, editor of the *Bataviaasch Handelsblad*, on the 12th inst. A short but severe illness has carried away, in his 64th year, a man whose healthy constitution and sound mind promised yet a long career. His indefatigable zeal has done much to obtain for the Dutch colonies the liberties they now enjoy. When he began the editorship of his journal the Java press was gagged, and the most absolute despotism swayed, without any opposition, over the Dutch colonies. It was he who, with a noble courage, began the combat for progress and liberty—a courage which was not abated even by the persecution he met with from an arbitrary Government. He fought for the sacred cause of freedom and progress till the last moment, and no one better deserved the sword placed on his coffin (the deceased having formerly been an officer of the Indian army) than this ardent champion of liberty.

The Murder of Mr. Boyd.—Frederick Hinson has been arraigned at the Central Criminal Court for the murder of Maria Death and William Douglas Boyd, of Japan, at Wood-green, on the 4th of October. The only indictment proceeded with was that which charged the prisoner with the murder of the woman, and notwithstanding the efforts of Hinson's counsel to reduce the offence to manslaughter, the jury convicted the prisoner of the graver crime, and sentence of death was passed.

Mr. Thomas Dickins, Chairman of the Silk Supply Association, read a paper on "Silk Supply," on the 24th inst., at the Society of Arts.

The Pacific Mail Company's steamer *America* sailed from San Francisco on the 4th inst. for Yokohama. The celebrated dwarf, General Tom Thumb, and his wife, with Commodore Nutt, were among the passengers.

## LEGATIONS AND CONSULATES.

Now that Sir RUTHERFORD ALCOCK's return to this country is imminent, speculation is rife as to the future of the Legation at Peking. Unless a very marked change should manifest itself in the China policy of our Government, or unless a change should take place in the Government itself (perhaps not so very remote a contingency as is generally supposed), it is hardly likely that our present Minister will return to his post, for of late his views and recommendations have been most contemptuously disregarded. The mere fact that his homeward journey has not been preceded either by letters of recall on the one side, or a formal resignation on the other, makes no difference, for according to the established custom in such cases, a Minister who has served his full term at any foreign Court is not supposed to resign for a year after quitting his post, having "leave of absence" for that time. Such, we imagine, is the case with Sir RUTHERFORD. He returns to England on leave, after having met Mr. WADE at Shanghai, who remains as Chargé d'Affaires; and for the ensuing twelve months Mr. WADE will hold the reins at Peking, while the question is settled whether his position there shall become permanent or not. To all appearance, the choice will lie between himself and Sir HARRY PARKES. Mr. WADE certainly cannot be said to have the prior claim, for that belongs to Sir HARRY, both by his antecedents and his seniority. Yet by superseding Mr. WADE the Government would perhaps run some risk of losing his services in a country which he knows more thoroughly than almost any other European. Sir HARRY PARKES, again, is eminently useful where he is, and neither his temper nor inclinations exactly fit him to carry out the policy of "conciliation"—the attitude of abject humility—adopted by Mr. GLADSTONE'S Government towards China. If, for these reasons, Sir HARRY is retained in Japan, and Mr. WADE'S appointment is not made permanent, it seems not improbable that the post may fall into the hands of an entire stranger to China, who (if appointed by the present Ministry) would go out pledged to eat dirt to an unlimited extent.

On the other hand, should Sir HARRY PARKES be transferred to Peking, there appears to be no one immediately available to take his place, if we except Mr. WINCHESTER, who has had long experience as a Consul in Japan, and has already acted as Chargé d'Affaires there. Mr. WINCHESTER is still in this country, his leave of absence having been extended. Mr. ALABASTER, the next senior Interpreter to Mr. ADKINS, takes his place as Vice-Consul at Shanghai. In Japan also there are some changes to note. Mr. RUSSELL ROBERTSON, now at home on short leave of absence, returns to his post of Acting Vice-Consul at Yedo next January. Mr. LOWDER is Acting Consul at Yokohama; Mr. ANNESLEY occupies the same position at Nagasaki, in place of Mr. FLOWERS, now on the way home; Mr. TROUP, lately Interpreter at Yokohama, goes as Acting Consul to Ne-egata; Mr. GOWER remains at Osaka, Mr. ENSLIE at Hiogo, and Mr. EUSDEN at Hakodadi.

## THE SUEZ CANAL.

IT is even yet difficult to form a just idea of the actual condition of the Canal, for a good deal of mystery still hangs about it, and there is an evident tendency to keep back unfavourable facts. But such advices as have come to hand fully justify our often repeated assertions that the Canal could not be completed to its full depth by the time fixed for the opening ceremony. The numerous accidents to the steamers composing the inaugural squadron have clearly proved that the Canal is not, and will not for a long time be navigable for large ships; probably fourteen feet is the utmost that could for the present be safely ventured on for general purposes. Another very unfavourable feature is that the banks were much damaged by the "wash" from the steamers; for if this has happened during the passage of a flotilla of comparatively small vessels in one direction, what destructive effects may not be expected from a constant traffic of steamers in both directions? Before we can acknowledge the Canal as a permanent success, three important things remain to be done—Firstly, it has to be dredged to its full depth, that is to say a large portion of it must be made eleven feet deeper; secondly, the banks must be protected from the destructive action of the disturbance of the water by steamers, and this will apparently necessitate a "facing" of some solid material; and, thirdly, the piers or jetties at Port Saïd having been found quite inadequate to prevent the silting up of the entrance, they will have to be extended a much greater length into the sea—a most tedious and expensive operation. No doubt all this work will in time be accomplished, for it presents no greater engineering difficulties than have already been overcome; but the raising of the necessary funds will, we imagine, tax the energies and resources of M. DE LESSEPS to the utmost. Indeed, it is already stated in Paris that f.150,000,000 must still be expended on the Canal before it can be definitively opened as a great commercial thoroughfare, and that M. DE LESSEPS wants authorisation to raise a loan to that extent; but this cannot now be done, except with the sanction of the Legislature. Still, the man who can already boast that he has transformed a Continent into an Island is not likely to be dismayed at any obstacles that may come in his way.

So far, there has been more curiosity than enthusiasm exhibited in this country as to the ultimate success and utility of the Canal, and its effect in revolutionising the trade with India and the Far East. Perhaps the apparent apathy among shippers and shipowners is in great measure due to the attitude of the underwriters, who, as we noticed in our last issue, are disinclined at present to charge lower rates for the new route than for the old one round the Cape. Latterly, however, a greater degree of interest seems to have been awakened in Liverpool, where one firm of shipowners is offering to take cargo for Bombay, *via* the Canal, at £3 10s. per ton, while another firm is building a fleet of steamers of large capacity but light draught especially for this route. The working of the Canal, as far as it affects steamers of moderate size, and the more valuable descriptions of goods, such as will bear steamer freight, will therefore soon be apparent; but it will be some time yet before its effects on sailing vessels and heavy cargoes can be ascertained. The intricate and dangerous navigation of the Red Sea is totally unsuited to sailing ships, and to perform the voyage with reasonable despatch and safety they would need towing, not only through the Canal, but between Suez and Aden. At any rate we may be sure of one thing,—that whether the advantages ultimately prove great or small, British enterprise will not be behindhand in securing a full share of them.

M. DE LESSEPS has received the Grand Cordon of the Legion of Honour, but we hear nothing more of the title of Duke of SUEZ, which was to have been conferred on him. If the telegraphic reports of the attack he made on the French Government at the Ismailia banquet are correct, we can hardly wonder at its being withheld. This, by the way, is another curious symptom to add to the mysteries already surrounding the affairs of the Canal; it seems hardly credible that M. DE LESSEPS should thus publicly and vehemently assail the Government that has given him such unlimited and unquestioning support throughout his gigantic undertaking.

WE understand that Sir RICHARD and Lady MACDONNELL will leave Hong Kong in April next, returning to England by the Pacific route.

It has generally been accepted as a fact that to the late Lieut. Waghorn alone belongs the distinction of having been the originator and pioneer of the Overland route to India; and in connection with the opening of the Suez Canal it has been proposed to erect a memorial to him in Egypt. With reference to this proposition, Mr. R. W. Crawford, M.P., has written to *The Times* pointing out that the merit is chiefly due to the community of Bombay, as represented by the Bombay Steam Committee of former times; and that the practical inception of the enterprise is due to Captain J. H. Wilson, formerly of the Indian navy, well known as the commander of the *Hugh Lindsay* steamer. Mr. Crawford's letter again is followed up by one from Mrs. Head, claiming for her late husband, Colonel Charles Franklin Head, the honour of being the real originator of the Overland Mail Service.

The appointment of Mr. Low as United States Minister to China is the subject of a good deal of talk in America. He is now at Washington, it not being considered necessary for him to make any attempt to reach Peking before the spring. Advices from the capital state that the "China question" has already been discussed in every phase by the President, the Secretary of State, and the new Minister, and that "perfect unanimity exists." That is to say, the U.S. Government, being fully impressed with Mr. Burlingame's views, instruct their Minister accordingly, and he—probably knowing nothing about the matter, except that he goes out as the exponent of a certain policy—unhesitatingly accepts it in its entirety. And this policy finds favour with the American press, chiefly because it is antagonistic to the views and interests of British residents in China.

Mr. Burlingame seems to have been quite as successful with the Dutch Minister of Foreign Affairs as with our own. According to our Rotterdam Correspondent, that functionary stated in the Second Chamber that he had had several most friendly interviews with Mr. Burlingame, who had convinced him "that our trade with China could be enlarged enormously," and that a Dutch Legation ought to be established in China forthwith. The Chamber, however, did not see the matter exactly in the same light, and refused to incur the expense of the proposed mission, fearing also that a fleet might be required to back it. The Chinese Mission left the Hague on the 18th, after a stay of three weeks, for Berlin and St. Petersburg. Mr. Burlingame will not make any stay at the former city, however, until his return from Russia.

During the last few years we have noticed oft-recurring rumours of the desire of the Prussian Government to acquire a colony of some sort in the China Sea. Reports as to the intention of purchasing or annexing Chusan were of course dismissed as absurd; but there is a greater semblance of probability in a statement now put forth, that Prussia, on behalf of the North German Confederation, is making overtures to the Dutch Government for the purchase of the Banda Islands. It is beyond doubt that the Germans, whose mercantile navy finds so much employment in Eastern waters, have long been on the look-out for a station there, and there is certainly more likelihood of their finding a suitable one in this way than in any other.

By the last mail we received (and published) a more detailed account of the late earthquake at Manila. Curiously enough, none of the firms here connected with Manila received any news by that mail, and our own appears to have been the only account received in this country. A Madrid correspondent mentions a report that the Spanish Government had received some disquieting intelligence from Manila, but, according to the custom in that enlightened country, its purport was kept a secret from the public and conjectures were afloat of either an earthquake or a revolution. A recent telegram from Madrid says that "A reactionary conspiracy has been discovered in Manila, and one person implicated has committed suicide"—but the earthquake is not alluded to.

The preparations for laying the British-Indian cable continue to make progress. The *Chiltern* has followed the *Great Eastern* round the Cape, and the *Hibernia*, with the remainder of the Red Sea cable, will proceed by the same route about the 10th or 15th of next month. The *Hawk*, with the heavy shore end for Suez, will go by way of the Canal to meet the other vessels.

The non-arrival of the Brindisi portion of the present mail is accounted for by the state of the Mont Cenis Railway, which has been rendered impassable since the 24th instant by accumulations of snow and avalanches. A telegram from Florence, dated the 26th, says that the snow on the line was then four feet deep, and traffic would not be renewed for three days. This new exemplification of the dangers to which the line over the mountain is exposed leads us to look anxiously for the completion of the tunnel through it, which we are glad to learn progresses very rapidly.

We are sorry to learn by the last Indian Mail that Mr. H. J. Tarrant, whose appointment as Acting Chief Justice at Maulmein we noticed in our last issue, has had a severe attack of apoplexy, and at the date of these advices was lying in a very precarious condition.

The *Revue des Deux Mondes* of Nov. 1 contains the first of a series of four articles by M. Rudolph Lindau on the Pacific Railway. We reserve any detailed notice of them until the series is complete.

# Foreign Intelligence.

## HOLLAND.

(FROM OUR OWN CORRESPONDENT.)

Rotterdam, Nov. 25.

The Minister of Foreign Affairs has come to the conviction that it is for the interests of our trade with China that our country should be represented there; he has, therefore, asked a credit for a Consulate. The Second Chamber, however, does not agree with the Minister. When his proposal was examined in the sections a good many of the members declared themselves earnestly against it; they were of opinion that Holland was now sufficiently represented and they feared that if a formal Ambassador was sent to China it would also become necessary to station Dutch men-of-war in China waters. The Minister has replied to the several objections against his proposal. He demonstrates that it would be to the interests of trade and the Trading Company to establish a mission in China, and he contested the assertion that it should be necessary to forward men-of-war to China, in order to protect the ambassador. There were always Dutchmen in China, and it was never necessary to show our flag there. When the foreigners do not mingle themselves with the home affairs of China, their safety does not run the least risk. The Minister disapproves of the idea brought forward by some of the members to combine the missions of Japan and China; the means of communication, he asserts, are too uncertain, and besides this, there are many other objections. Mr. Roest van Limburg further stated that he has had several friendly interviews with the Chinese ambassadors, who stayed several days at the Hague, where they have met with the kindest reception, and who started the day before yesterday for Berlin. Mr. Burlingame had explained to him the nature of his mission to Europe, and he had convinced the Minister that our trade with China could be enlarged enormously, which would entail good for both countries. The Ambassador further stated that it would be regarded by the Chinese Government as a token of good friendship should the Dutch Government establish a mission in China. When the Chamber refused the credit asked for, the Minister threw the whole responsibility upon the members; he had the conviction that such a mission was necessary, and of the greatest urgency.

The Second Chamber of the States-General has resumed business in earnest, and the Minister of the Colonial Department has been the first exposed to "cross-examination" in Parliament. The India Budget has been discussed, and of course there was a very lengthened debate (it lasted thirteen days) upon the policy of the Minister and of the Cabinet with respect to India, the general condition of this rich possession, and the financial situation of the mother-country and of the colony. Mr. de Waal was placed between two fires. On the one side stood the Conservatives, who did all they could to force him to their plan, while on the other hand the Liberals desired anxiously that their programme should be adopted; but on both sides it was agreed that the Minister's greatest fault was that of indecision. It was evident, however, that it was the policy of the Opposition to force the Minister to resign, but the plan miscarried. One of the first remarks made was that the condition of the natives was most wretched, and it was Mr. Fransen van de Putte who objected to this statement, observing that it was very much exaggerated. He stated that the production of sugar was favourable; that of coffee was not unfavourable; the abolition of the punishment of rattan beating had had a good effect; and that the *heerendiensten* (services which the natives have to render to their superiors) are abolished in some districts and reduced in others. The Opposition objected that this statement was too much *couleur de rose*, and some Liberal papers agree with their opinion, and they ridicule the remark, made by some Conservatives, that this favourable condi-

Digitized by Google

tion is a result of the culture-system. But there was a good deal said which ought not to have been spoken. Indeed, many members debated for about an hour only to demonstrate that they knew simply nothing about Indian affairs. So much is certain, that the greater portion of the time consumed in discussion was wasted in very mediocre speeches. And, indeed, no one can wonder that the Minister gave—in spite of his sedateness—now and then evidences of impatience, and that he proved himself a sharp and acute critic.

The principal amendment was that of Messrs. Van ver Hucht, a Conservative (?), and Mirandolle, a Liberal *pur-sang*. By this amendment it was proposed to raise the wages for planting of coffee in the Preanger regencies from f.6. 50c. to f.13; the last-named being the sum paid in other parts of Java. This proposal was unquestionably based upon a system of equity and right. It was supported in a most masterly manner by both members, but after the most childish remarks of the Opposition members, who argued that the natives needed no higher wages *because they did not use opium*, and the opposition of the Minister, the amendment was rejected, there being 51 Noes and 19 Ayes. Had it been carried, only f.910,000 would have to be paid above the present contribution. Mr. de Casembroot called wages [a *cadeau* to the natives. The very large majority by which the amendment was rejected must, however, not be mis-interpreted. A good many are of opinion that it is urgently necessary to revise the tariff of wages, but they declined to force the Minister by an amendment, which was egarded as a political *coup* at random. I need not say that the Opposition did all they could to demonstrate that the proposal hid an *arriere pensée*. The list of voters was very much mixed. Mr. Fransen van de Putte was an Aye, Mr. Hoet a No.

The amendment of Messrs. Viruly, Verbrugge, and Moens, to raise the credit vote for the instruction of the natives by f.30,000, was carried. The amount is certainly not very large, but it is the first step on a good path, the education of the natives being at present in a most neglected condition. It was very remarkable that all the Catholic members voted against this amendment, whilst the Catholic papers grumble because it was carried. The principal point of the debate was "the Colonial Surplus," "het Batig Slot"—"the Golden Calf." From the several votes it resulted that the extreme Conservative party are in little force, but at the same time it became obvious that there are still a great number of *soi-disant* Liberal members who cannot reconcile themselves to the idea that India has a right to a surplus, and that Holland has no right to take advantage of the forced labour of the natives. I lately told you that the Minister had proposed to fix the India balance on behalf of the Dutch Treasury at ten millions of guilders, and, if there was a surplus, to dispose thereof by a special law. The Minister defended this plan as being the first step to the great principle that it was not policy to "take all that could be got." "Holland," he said, "must help itself; the favourable balances from Java have demoralised the Dutch people."

In the course of the debate, Messrs. van Naamen van Eemnes—a Liberal middleman, and Blussé—proposed to decide nothing with respect to the surplus, and to fix the contribution of India at f.10,107,779. This amendment was carried by 42 against 24 votes. The signification of this vote is very ambiguous; it is pretty clear that the plan of the Minister is frustrated, that the *adorateurs* of the "Golden Calf" will go their old way; and that the guilders earned by the natives of Java will continue to be spent in Holland. The only advantage resulting from the endeavours of the Minister is this, that in the first place the wants of India will be provided for before the Dutch obtains any profit. When the Chamber had resolved to abolish the pawnhouses in Java, the Indian Budget was approved of by 59 against 7; and the expenses by 49 against 17 votes. Indeed, the result could scarcely have been better. We do not want a slow and wavering Ministry, whose only study is to balance between Conservatives and Liberals, but a very Radical one, which will "take the bull by the horns." The next measure for discussion is the Agrarian law, which is now being examined in the sections; but it is quite certain that this Bill will not lead to a radical result, and it is a question whether it will be carried at all. The Liberals are not satisfied, and the Conservatives are shrinking in horror from this step in advance.

A most remarkable meeting took place here some days ago. Several gentlemen of very different political and religious opinions had invoked the attendance of the public, in order to hear a debate on the subject of the promotion of the welfare of the Javanese. The meeting was crowded, and several excellent speeches were made, which led to the establishment of a committee of the company, in order to improve the position of the Javanese.

The *Algemeen Dagblad* states that the Government has granted to the Amsterdam firm, Hesse and Van Raalte, a concession for laying a telegraphic cable between Ceylon and Java. The company, when established, will bear the name of the Ceylon, Java, and Australian Company (Limited).

The first Chamber of the States General will assemble on the 25th inst. The Minister of the Department of Justice has laid before Parliament a Bill to abolish capital punishment.

A paper war has arisen between several gentlemen interested in the coffee trade, about the manner in which Government sells the East India coffee. Some among them think that it will be best to hold four auctions a-year, others that it would be more advantageous to sell every month by public sale; and again, others advocate that every cargo should be brought into the market as soon as it arrives; thus the greatest difference prevails upon the subject. I think that the best way would be that all the coffee produced by the Indian natives should be sold in India. That is what we must eventually come to.

On the 15th inst. the Japanese war steamer *Nits Sin*, Vroom, commander, started from Brouwershaven bound to Japan. This very fine and powerful steamer was built in the yard of Messrs. C. Gips and Zonen, at Dordrecht.

I regret that I have to record the death of the well-known shipowner and trader Mr. J. van Hobaken van Cortgene. I have also to record the death of Mr. N. Olivier, M.P., ex Minister of Justice—a warm Liberal. He died at the Hague, at the age of fifty-nine years.

The Conservative papers are spreading the rumour that the Minister of the Colonial Department, Mr. E. de Waal, intends to resign, in consequence of the vote upon his Budget, by which his proposal with reference to the Java contribution was outvoted. By the Liberal party these rumours are declared to be quite unfounded. Mr. J. C. van Lier, Parliamentary reporter, will start next month for Batavia, to assume the editorship of the *Bataviaasch Handelsblad*, in the room of the late Mr. Lion, whose death, reported by the last mail, is regarded as a great loss to the Liberal cause.

## PRODUCE MARKETS.

Business transactions have continued since my last within a limited compass, as, with the exception of the sale by public auction of about 12,000 bales Java Tobacco, there has been upon the whole but little doing in our leading articles of colonial produce. Sugar and Hides have been in good request at steady rates, but, excepting several public sales of Japan Camphor, Japan Wax, Gum Damar, &c., the demand for other articles has been confined to the "hand to mouth" wants for immediate consumption; and when sales were forced, which has been the case with Tin, buyers could only be found by means of pretty heavy concessions. The price of the last-named article has thus undergone a material reduction in consequence of the failure of an Amsterdam house, owing to which unforeseen circumstance the Netherlands Bank threw 30,000 slabs upon the market for sale at low rates. The decline has been partly recovered.

COFFEE.—The market is firm, with small business, in waiting for the forthcoming auction of the Dutch Trading Company on the 24th inst., when 109,277 bales are to be offered. Trading Company ordinary Java is sought after in vain at ½c. advance over the prices of the late public sale. There is, upon the whole, but little on offer in the market of that sort. I have only to report the sale of 900 bags Java, ex Aletta Augusta and Medea. There is a good demand for Padang.

SUGAR (RAW).—A firm tone continues to prevail for this import, and about 13,000 baskets Java have been disposed of since my last report in the proportion of ½f. below the currency of the September sale up to the full parity of the same, which is now generally insisted on by holders, who are unwilling to sell below that mark. The demand continues active for parcels on the spot, and about 2,500 baskets Java have changed hands in re-sale from second hands at some advance over September prices. The brokers have published their valuations of the Dutch standard of the coming public sale on account of the Trading Company of about 18,500 baskets Java, on the 25th inst., viz., No. 5, f.32; No. 7, f.33; No. 8, f.34½; No. 9, f.35½; No. 11, f.35½; No. 13, f.36½; No. 14, f.36¾; No. 16, f.37; No. 19, f.37½.

TEA.—In my last report I gave the result of the last auction of Java tea offered by the Trading Company. The fine qualities were sold at lower rates, and the good and ordinary qualities at the prices of the July auctions. There is a good demand for all sorts, but especially for those which can be bought at low prices. China Tea is dull, but prices are steady.

RICE.—Continues dull, but prices are nominally maintained. Sales have been closed of 228 bags Java, ex Aletta Augusta; 2,658 bags Java, ex Eastern Empire, at f.9½; 3,146 bags Java, ex Cornelis Gips, at f.7⅞; 9,086 b. Java table, ex Bezoekie.

SPICES.—A steady demand continues to manifest itself for Nutmegs and Mace at full prices. The 18 cases Nutmegs and 16 cases Mace offered for sale by secret tenders have been adjudged. Nutmegs No. 1 sold at 105c.; Mace D, 190c.; Amboina Cloves, No. 3, 26c. Since that auction prices have advanced from 1c. to 2c.

HIDES.—Sales have been closed by secret tender of 3,021 Java Cows and 1,427 Buffaloes, ex Fop Smit, Medea, County of Bute, Aletta Augusta; of 1,560 Samarang Ox, ex Aria and Betsy; 2,000 do. Buffaloes, ex Drie Gezusters; C and C, 1,002 Samarang Ox, ex Aria and Betsy; 700 Macassar Buffaloes, ex Elmina; 535 Samarang Buffaloes, ex Betsy and V H; 4,500 Samarang Buffaloes, ex Aria and Betsy; 94 E.I. Rinder, ex Utrecht.

INDIGO.—A healthy tone continues to prevail at rather easier prices. Sales have been closed since my last report of 54 and 129 chests Java.

TIN.—Holders of Tin evinced more disposition to realise in the early part of last week at the late advance, and Banca changed hands at from f.72½ down to f.70.; but the market subsequently became quite demoralised by the failure in London of a house dealing in Tin, followed up by the stoppage of an Amsterdam firm, also largely concerned in this article, in consequence of which sales were made at very irregular prices, even down to f.64½. From this point the price rose again to f.68 on the spot. Tin, ex the spring sale of 1870, which changed hands at f.64, is now held for f.65½. The whole stock of about 30,000 slabs of one of the above-named firms has been disposed of on secret but lower terms, after the realisation of which prices began to rally. At the close Banca is quoted f.67½. to f.68, and Billiton f.67.

GAMBIER.—650 mats have been sold by private tender.

COCOA-NUT OIL.—Only a trifling business is doing at unaltered prices.

JAVA CAMPHOR.—The Trading Company has offered in auction 5,043 tubs, which were sold at 51½c. to 52½c. This is regarded as a very favourable result. The quality was good middling.

CUTCH.—20,000 kilo. have changed hands at secret prices.

DRUGS.—The brokers' valuations of the different articles to be put up at the Trading Company's public sale, on the 23rd instant, range as follows, viz.: for Gutta Percha, 25c. to 27c.; for Japan Vegetable Wax, from f.43 to f.46.; for Gum Damar, from 30c. to 50c.; for Getah Gitang, from f.50 to f.55.

RATTANS.—Some few parcels have changed hands at prices that did not transpire.

COFFEE.—The coffee auction on the 24th went off very favourably. The whole quantity was sold at ½c. to 1½c. above the valuation. Tea: 9 lots Souchong and 13 ditto Congou, ex Victoria, have been sold.

JAPAN VEGETABLE WAX.—The Trading Company offered in auction to-day 4,397 chests, of which 259 chests A sold at f.46, 2,227 chests A bought in at f.43.75c. to f.46, 429 chests B sold at f.44, 1,449 chests B bought in at f.43.75c., and 33 chests D sold at f.40.75c.

MISCELLANEOUS.—39,100 kilo. Cutch sold at 51c. to 257c. per half kilo. Of 32,300 kilo. Gum Damar the Borneo sorts partly sold at 29c.

Digitized by Google

to 33c., and partly bought in at 25c.; the Padang quality sold at 51c. 194 mats Getah Gitang sold from f 48 to f. 64 per 50 kilo., and 18 chests Turtle Shells sold from f.5.25c. to f.11.50c., according to quality.

SHIPPING.

ARRIVALS.—Nov. 12, at Brouwershaven from Batavia, Ternate; at Texel from Bombay, City of Shanghai; Nov. 18, at Brouwershaven from Batavia, Nederland and Orange; from Sourabaya, Van der Palm; Nov. 19, at Texel from Batavia, Presto; Nov. 20, at Texel from Batavia, Ferdinand and Louis; at Zierikzee from Batavia. Aeroliet.

DEPARTURES.—Nov. 11, from Texel for Batavia, Wyk aan Zee, Australie; for Samarang, Philips von Marnix; Nov. 15, from Brouwershaven for Japan, the Japan man of war Nits-Sin; Nov. 17, from Texel for Batavia, H M. war-steamer Java.

PASSENGERS INWARD.—From Java: Per Ternate, Messrs. de Wezer and family, Payen and family, Zeydel and family, van Leeuwen, Mrs. van Cosel and family, Miss Marshall, Brondgeest, and Messrs. Woesthoff; per Nederland and Oranje, Mr. W. Grashuis and family.

PASSENGERS OUTWARD.—For Java: Per Australie, Messrs. W. N. Verleah and family, J. B. Weghake and family, B. Weghake, C. Katch, T. D. Rasch, G. J. Coorengel and family, B. de Bruyn, H. Ph. Tromp, E. W. Feige, T. van Braam, Gorris, J. C. Brouwer, Misses T. Weghake, J. Verbeek, H. Verbeek, F. M. van Geuns; per Wykaan Zee, Messrs. F. Perié and family, C. Wynmalen, Miss C. van den Broek.

## ORIENTAL LITERATURE.

(FROM OUR BATAVIA CORRESPONDENT.)

BATAVIA, Oct. 14, 1869.

The last number of the journal of the Batavian Society of Arts and Sciences contains a very interesting, though rather arid, notice on the Hindu monuments in the highlands of Sumatra, illustrated by several pen sketches by the hand of Mr. E. P. Vonbrink. Mr. T. G. F. Riedel gives an account of a trip to Engano, with a map of that island, which, according to his researches, is inhabited by fourteen different tribes, numbering a total population of 6,380 souls, or rather savages. Our well-known Indianist, Mr. A. B. Cohen Stuart, published, in the same number, a very severe critique on a "History of Java," by Mr. T. Wolbers, published in Holland, which history he calls a pitiful scribble (prulschrift).

Besides, the Batavian Society published the catalogue of its numismatical collection. The nucleus of it was formed by Mr. Radermacher, who presented the collection to the society in 1779. At that time it contained, besides a fine collection of gold and silver Indian coins, a complete series of the so-called Indian golden zodiacal coins, which, however, in the course of time, seem to have been pilfered by some unscrupulous lover of rare (and valuable ?) coins. A description of this collection was published some years ago in the thirty-first volume of the transactions of the Batavian Society, by Mr. E. Netscher, resident of Rhio, and Mr. T. A. van der Chijz, the present director of the cabinet, which contains now 2,666 coins, nearly half of which are Indian and Chinese.

Messrs. Lange and Co. published a small French pamphlet by "Un Ancien Voyageur en Japon," under the title of "Notice Historique et Statistique sur le Japon." This notice is evidently written by a person very intimately acquainted with Japan, and who seems to have had access to many official documents and sources. It is well written, and refutes clearly the reproaches made to the western diplomatists o. having concluded treaties with a sovereign who had no power to do so; as, in fact, since the first visit to Japan by the Portuguese, in 1543, till a few years ago, the Shiogoon was really the *de facto* sovereign, the Mikado having only a shadow of religious power, and the other nobles being too feeble to contend against the Shiogoonal government

## ROYAL GEOGRAPHICAL SOCIETY.

The second meeting of the present session of this society was held on Monday evening last, Sir R. I. Murchison, President, in the chair.

The paper of the evening was on the exploration of the new course of the Yellow River of China, by Mr. Ney Elias, F.R.G.S. The author stated that, having planned a survey of the course the Great Yellow River of China had taken since breaking through its old banks some fifteen years ago, he devoted his autumn holiday in 1868 to carry out the object, having previously secured the approval of the Shanghai Chamber of Commerce. Only the vaguest accounts had previously been received of this grand phenomenon, caused by the river forsaking its bed, several hundred miles from its mouth, and pouring its waters in a northerly direction, seeking an outlet in the sea at a point separated by four degrees of latitude from its former mouth, leaving a dry bed two or three miles wide, which was now used as a high road. By the change scores of square miles of highly-cultivated country had been devastated, millions of people had lost their lives, and along the forsaken bed other districts were deprived of their fertility by the loss of the means of irrigation. No less than nine such changes were recorded in Chinese history, the first dating about 602 B.C., the positions of the various mouths ranging over the extent of coast between 34 deg. and 39 deg. N. lat. The author believed that the major part of the great alluvial plain of China had been formed by the rich deposit left by forsaken beds of this singular river. The author's companions were Mr. Hollingworth and two Chinese; they left Shanghai, well provided with instruments for taking observations in latitude and longitude, on the 24th of September, and, after a journey of nearly 400 miles on the Grand Canal, arrived on the 17th of October on the banks of the new Yellow River near the town of Nan-Shan. At this point the stream had not yet worn for itself a bed, but was spread over a belt of country some ten or twelve miles in width. The banks of the Grand Canal had here been carried away by the invading stream, and the whole country wore an air of desolation. The party embarked on the new river near here, and traced it down to its embouchure in the Gulf of Pe-chi-li. Nineteen miles downward the widespread waters converge and flow into the narrower bed of a much smaller river, the Tatsing, which henceforward serves as its channel. The great volume and rapidity of the waters of the Yellow River are causing the narrow bed to widen, and with the undermined banks are swept away the streets of villages and cities, gardens and fields. Bridges which formerly spanned the Tatsing now remain as ruins in mid-river. At Tsi-ho-hein one of the bridges effectually stops navigation at present at a short distance above the port of Tsi-nan-foo. Towards the sea the banks of the river are marshy and uninhabitable, the limit of the peopled region being the small port of Tu-men-quan. The mouth of the river is obstructed by a bar, which Mr. Elias found, on the 27th Oct., to have a *minimum* depth at low water of three and a-half to four feet. Deeper channels on the bar have from five to seven or eight feet of water. From various considerations the author concluded that the new course of this large river was not likely to be used by the larger trading junks, and that, in fact, its commercial value was very small In returning to Shanghai by the river the party ascended to the point where it first broke from its former course, near Lung-men-kau. The date of the first breach was 1851, but the waters were not finally diverted till 1853. The paper was accompanied by a carefully-executed chart of the new course of the river, constructed on an ordinary traverse survey, checked at several points by observations for latitude and longitude. Soundings were observed throughout.

In the discussion which followed, Captain Sherard Osborn, R.N., bore testimony to the great geographical value of Mr. Elias's paper. The Yellow River had been generally spoken of as a rapid and dangerous stream, remarkable for the mass of alluvium it carries down, and with which it is continually silting up and raising its own bed. The great plain of China, which in 1813 supported 170,000,000 inhabitants, is in great measure formed of the alluvium brought down by the river from the western highlands, the rich soil having a depth, according to Davis, of seventy feet. Uncontrollable as the Yellow River appeared to be, it was waiting only the hand of the European engineer to put a bound to its turbulence, and guide its superabundant forces into channels useful to man.

Mr. Wylie, who had recently returned from extensive journeys through the interior of China, spoke of the great accuracy of Mr. Elias's descriptions.

Mr. W. Lockhart and Mr. T. Saunders also took part in the discussion.

## LOSS OF THE CHINA CLIPPER "SPINDRIFT."

On the 21st inst. the new clipper ship *Spindrift*, which left the Thames the previous evening with a cargo valued at upwards of £200,000, was totally lost in the Channel, near Dungeness Lighthouse. She was what is termed a composite ship, built of iron framing and timber, under special Lloyd's survey, and registered A1 for 16 years. She was owned by Mr. Findlay and others, of Glasgow, and was the winner in the clipper race from China with the new season's teas last year. She was hauled out of the dock on the 20th, and proceeded in charge of Mr. Martin, a Trinity-house pilot of great experience. Her commander was Captain Nutsford; he was summoned by the owners to take the command only two or three days previous, her former master, Captain Innes, being called to Scotland on account of a death in his family. Capt. Nutsford had only returned from China ten days in the *Windhover*. Two other famous clipper ships left the dock for China at the same time, the *Taitsing* and the *Sir Lancelot*. The officers and crew of the *Spindrift* number thirty-six hands. There were also on board the captain's wife, and a relative, who intended to leave the ship with the pilot on reaching the Isle of Wight. She was towed out to sea on Saturday night, and then bore away down Channel, with a fresh breeze off the land, and fine clear weather. Capt. Nutsford, with his first and second officers, were on deck most part of the night. The pilot, however, still had charge, and his course was closely adhered to. All went well until half-past two on Sunday morning, when the ship went ashore about two miles north of Dungeness Lighthouse, opposite No. 1 Battery. The shock was scarcely felt, but although all sail was thrown back, and every possible means taken to get her off, she became fast, and towards daybreak fell over on her beam ends, with her decks towards the sea. Capt. Nutsford was below at the time she struck. The lead had been used twice or thrice just before, and ten and eight fathoms were called, but the leadsman must

Digitized by Google

have made a mistake in calling eight for three fathoms, as she immediately afterwards struck. The light at Dungeness was then seen on her starboard bow. Towards daylight a heavy sea rolled in and broke over the ship, when all hands were ordered into the boats and to make for the shore, the master, pilot, and officers taking to the mizen rigging in the hope that at ebb tide the sea would go down and enable them to cut away the masts, so as to ease the vessel and assist in getting her off. It soon, however, became evident that the ship was doomed to destruction, for the sea broke in upon her so violently that she began to break up, and they had to land without loss of time. For some time previously the coastguard of No. 1 Battery had come out in force to render all the assistance that was possible, but nothing could be done except provide shelter to the shipwrecked crew. Mrs. Nutsford and the officers of the ship desire to express their sincere thanks for the great kindness they received from all parties at Dungeness, more particularly to Mr. M'Gill, chief boatswain at No. 1 Battery, and Mrs. M'Gill. During Monday the weather became more boisterous. It blew a gale, and at high water the ship and masts were completely submerged, and portions of her cargo coming ashore showed clearly that she was fast breaking up, and that she would become a total loss. The depositions of the pilot, Mr. Martin, have been taken by the receiver of wreck for the district, as also that of Captain Nutsford, the master, and they will be forwarded to the Board of Trade. Her cargo consisted chiefly of Manchester goods, copper, quicksilver, and other valuable articles. The whole of it is covered by insurances effected at most of the marine insurance offices in the City, at Lloyd's, and at the underwriters' rooms at Liverpool and Glasgow. The ship, however, we regret to learn, was not insured.

## LEGAL AND CRIMINAL.

### VICE CHANCELLOR'S COURT, NOV. 19.

THE QUEEN OF SPAIN V. PARR.

This was a bill filed by the Queen of Spain prior to the Revolution, seeking an account in respect of sales by the defendant's firm of Parr, Hermann, and Co., of tobacco from Manila, consigned to them for sale on behalf of the Spanish Government. The sales had been countermanded by the local government of Manila, who gave instructions to the defendants' house at Manila, but before the instructions reached England a part of the tobacco had been sold. The principal contention was as to a commission of 2½ per cent. claimed by the defendants, and a commission of 10 per cent. received by the defendants for payment in cash of insurance premiums on the tobacco, and which had been paid by the defendants six weeks before receipt of funds for the purpose. The plaintiffs contended that the conduct of the defendants with regard to the sales had deprived them of right to commisson on the sales, and that their position as brokers disentitled them to make a profit of 10 per cent. on the insurance commissions. For the defendants it was contended that the commission on the sales was payable on the whole amount, and that the 10 per cent. came out of the pockets of the insurers, and not of the plaintiff, who would have had to pay the full commission in any case. This discount for cash was as rightfully received by defendants as the commission usually received by solicitors from an insurance office to which they pay premiums on behalf of clients.

His Honour held that as no case of misconduct had been made out against the defendants with regard to the sales, they were entitled in his opinion (having regard to the evidence adduced) to 1¼ commission, being half what they would have received if the sales had not been countermanded. With regard to the 10 per cent., he was of opinion that agents like the defendants could not make a profit of this nature without communicating to their principals their intention to pay cash, and thus obtain the discount allowed for cash transactions. The sum of £300, being 10 per cent. on the premiums of £2,999, must not be deducted by the defendants, who, however, were to have interest for the period during which they had advanced the sum of £2,699. The plaintiff to have costs up to decree, but each side to pay their own costs of evidence.

### THE CHARGE OF SCUTTLING THE "OLD ENGLAND."

At the Central Criminal Court on Oct. 25, Thomas Bulman, a sea captain, and T. Helburn, a ship carpenter, were indicted on the charge of having scuttled the ship *Old England*, with intent to defraud the underwriters. Mr. Giffard, in opening the case, said the *Old England* sailed for Point de Galle from Cardiff on the 15th June in a confessedly leaky condition, but by no means past work. She was laden with patent fuel, and was insured, in all, for £2,550, including an insurance of £200 on the captain's personal effects and £500 for the cargo. The ship was pumped every watch for some considerable time after leaving port, but up to the 24th of July no more than three inches of water was made during the hour. On the evening of that day orders were given to cease pumping, and the next morning (Sunday, the 25th), after falling in with a Portuguese brig, and after part of the provisions had been carried to her, the captain and carpenter, having been down in the hold about ten minutes, were seen to come upon the deck, and the carpenter carried in his hand something wrapped in canvas. He put his parcel on the deck, and the canvas falling open it was seen to contain two augers. After this the water increased, and was heard rushing in with a sound not before observed. Myers, the cook, acted as interpreter between the Portuguese captain and the master of the *Old England*, and was directed by Captain Bulman to say that they had been pumping that morning, so that the accumulation from eight o'clock the evening before was made to appear as the accumulation of a few hours only. The log was gone. The captain said he had given it to the Portuguese, who desired to see how an English log was kept, and had handed in a freshly made one. Louis Myers, the cook, said they pumped every four hours after leaving Cardiff for a fortnight; then they pumped every two hours, and during the last part of the time every hour for fifteen or twenty minutes. They saw the Portuguese brig at four o'clock; at six the captain went on board, and at twelve he saw water in the after hold for the first time. He saw the carpenter going down the hold before they left the ship, and saw the two augers he brought up wrapped in canvas. Bernard Hanlan confirmed the evidence as regarded pumping, and said the pumps sucked air at fifteen inches. Proceeding, he said that on the Sunday at eight o'clock he went down the 'tween decks and heard water making a noise aft—a gurgling kind of noise—and water was washing about the forehold. There was at this time only five feet between the water and the lower deck; there was nothing to prevent the water running throughout the ship. (Subsequent evidence showed that the lower deck was about nine feet above the bottom of the ship, so that this would give some four feet of water.) About four days before the ship was abandoned the crew went aft and asked the captain what he intended doing with the ship; he answered he was going to Point de Galle. Some inquired whether he had not better put in at some port that the leak might be stopped; he answered that he knew of no place. Hanlan suggested Pernambuco; the captain said Ascension was the nearest place he knew of, and thereafter they left the poop. The ship was safe at that time, and they had had no foul weather up to this time. The second mate gave the order to cease pumping. Further evidence showed that the *Old England* was an American built ship, of 1,030 tons, built in 1849, and that the insurance was by no means excessive, considering the age, the build, and the size of the vessel. Its value was estimated at between £3,000 and £4,000; she was chartered by the Messageries Imperiales, and was laden with patent fuel for the company's station at Point de Galle.

Mr. Serjeant Ballantine addressed the jury for the defence, and commented with emphasis on the fact of entire absence of motive. The captain had insured his effects at a fair valuation, the ship was insured at less than its value, and he, being a part owner, would consequently lose if the ship were lost. Of course, if he conspired with the carpenter it would have been for a monetary consideration, and this would have added to his loss. The use of the augers might be accounted for by the endeavours of the captain and carpenter, in the execution of their duty, to discover the nature of the leak and what means could be adopted to stop it. Evidence was given by shipowners who had employed him that the captain had borne the highest possible character for periods ranging over thirty years, and it came out here that the policy for £200 on the captain's effects included a sum on account of goods he carried as a trader, he being a part owner and entitled to trade for himself.

The jury returned a verdict of acquittal.

### COURT OF CHANCERY—Nov. 25.

THE BANK OF HINDUSTAN, CHINA, AND JAPAN.

This was an appeal against a decision of the Vice-Chancellor with reference to a transfer of some shares in the Bank of Hindustan, China, and Japan. In the month of June, 1866, a Mr. Archibald Kintrea transferred 145 shares in this company to a Mr. Alexander M'Lachlan, and the transfer was shortly afterwards approved by the directors and registered. The transfer was expressed to be in consideration of £195 paid by Mr. M'Lachlan. At this time the shares (which were of £100, and with £25 paid) were saleable in the market at rather more than £3 per share. In Dec., 1866, an order was made to wind up the company. The liquidators afterwards discovered that in fact no money was paid by Mr. M'Lachlan for the transfer, and that he was a person of no substance, he being the steward of a steamship, with a salary of £1 per week, and having no other means of subsistence. A summons was taken out by the liquidators to have the register of shareholders rectified by substituting Mr. Kintrea's name for that of Mr. M'Lachlan in respect of the 145 shares. The Vice-Chancellor was of opinion that the transfer was not an out and-out one, but that Mr. Kintrea intended to retain his interest in the shares if the company prove successful, but to escape liability in case of the company's failure. His Honour therefore ordered Mr. Kintrea's name to be restored to the register, and that he should pay the costs of the application. Mr. Kintrea appealed. Mr. Hardy, Q.C., and Mr. Higgins, for the appellant, contended that as the company had accepted the transfer, the directors having by the articles of association absolute power to refuse it, they could not now be heard to dispute its validity, and that the liquidators could have no higher rights than the company had. They also urged that since the Act of 1862 a transfer to a trustee was as good as a transfer to a purchaser, and that, at any rate, as the application must be taken to be made exclusively under section 35 of that Act, there was no jurisdiction to make Mr. Kintrea pay the costs.

Mr. Greene, Q.C., and Mr. Lindley, who appeared for the liquidators were called upon only to argue the question of costs. Mr. Hardy, Q.C., replied upon that point. Lord Justice Giffard was of opinion that the Court had power to inquire whether the name on the list was rightly there. In this case the directors could not be blamed for believing the representation made in the transfer that £195 was paid. But if they had ascertained the real facts afterwards they might have applied to have Kintrea's name restored to the register. His name ought now to be replaced there:—First, because a man who chose to make an untrue representation had no right to complain that the persons to whom it was made believed it; Second, because his Lordship did not hesitate to say that this Court would act in such cases as "Hyam's case" just as much now as before the Act of 1862, for the simple reason that in such a case a name would, within the meaning of section 35, be on the register without sufficient cause. With regard to costs, as this application was made in a winding-up his Lordship thought that, having regard to section 170 of the Act, there was ample jurisdiction to order Kintrea to pay the costs, though there might not have been under section 35 standing alone. The appeal must be refused with costs, but the Vice-Chancellor's order must be altered in form by making it on the application of the company instead of on that of the liquidators.

MR. GEORGE MELBOURN'S BANKRUPTCY.—On the 25th ult. an adjourned sitting for examination and discharge was held at the Bankruptcy Court, before Mr. Commissioner Holroyd, in the case of Mr. George Melbourn. The bankrupt, who came before the Court on a creditor's petition, was described as a merchant, of Leadenhall-street, London, formerly carrying on business in co-partnership with William Lichtenberg and R. P. Tolson, and also at Batavia, under the firm of Morgan, Melbourn, and Co. The joint statement of affairs showed debts and liabilities of £126,773; with assets—good debts, £1,938, doubtful, £12,260; property, £6,855; and property in the hands of creditors, £1,844. On the separate estate a surplus of £2,200 was returned. The assignees, being dissatisfied with the present accounts, asked for further statements, and it appearing that the bankrupt was absent through illness, the Commissioner adjourned the sitting until the 15th of Feb., and granted leave to the assignees to tender requisitions.

## NAVAL AND MILITARY.

### APPOINTMENTS TO THE CHINA STATION.

The following are the names of the officers appointed to sail in the Donegal for China, there to serve in Her Majesty's vessels on that station, under Sir Henry Kellett:—

*Captain*—W. N. W. Hewett, 1862,* to Ocean.

*Commander*—A. Fisher, 1869 (late of H.M.S. Excellent).

*Staff Surgeon*—James J. Martin, 1867, to Ocean.

*Lieutenants*—Herbert Dolphin (1861), Robert L. Byng (1863), Joshua Cole (1863), Robert H. Eyre (1866), A. D. Fanshawe (1868), W. M. Annesley (1868), to Ocean; T. S. Dickinson (1860), George N. Smallpiece (1863), A. H. B. Bradshaw (1865), Nathaniel Cotton (1868), H. E. Maclean (1866), Grosvenor Stopford (1868), to Ocean, additional, for disposal; Swinton C. Holland (1865), to Sylvia.

*Navigating Lieutenants*—Selby Lilburne (1868), to Rinaldo; William King (1868), to Zebra; W. Pearce (1868), to Sylvia.

*Paymasters*—W. M. Shanks (1854), to Ocean; H. V. Forrest (1854), to Zebra; E. M. Roe (1868), to Sylvia; John Kiddle, additional, to the Princess Charlotte, for service in Shanghai yard.

*Surgeons*—John Buckley (1869), to Rinaldo; Dr. Samuel Campbell (1867), to Sylvia; William Roche (B, 1865), to Zebra; Thomas R. Warren (1864), to Adventure.

*Chief Engineer*—Charles Seeley (1857), to Ocean.

*Assistant Surgeon*—Robert Atkinson (1854), to Ocean.

*Sub Lieutenants*—E. P. Statham (1867), Eustace D. Maude (1868), Charles W. Dickinson (1868), Henry D. Barry (1869), to Ocean; John D. Deane (1868), to Ocean, additional, for disposal; H. J. Oldfield (1868), Ernest N. Rolfe (1867), to Sylvia.

*Navigating Sub Lieutenants*—Charles B. Clark (1868), supernumerary, to Ocean; Charles W. Baillie (1864), to Sylvia.

*Assistant Paymasters*—John J. Hoar (1866), Francis H. Trollope (1868), Colin Campbell (1867), Secretary's Clerk, to Ocean; H. C. W. Gibson (1868), Edward Robinson (1863), Mozart Vining (1867), to Ocean, for disposal; A. N. C. King (1865), to Rinaldo.

*Engineers*—G. T. Crook (1863), John McKenzie (1867), Wm. A. Stewart (1867), M. A. Fothergill (1869), to Ocean; G. Gravestock (1868), M. Shannon (1869), H. Duncan (1864), A. Lawton (1866), to Ocean, additional for disposal; Peter Hutchison (1863), J. F. P. Shelley (1867), T. Barnes (1869), to Sylvia; J. Patterson (1864), W. Archbold (1867), to Zebra; E. W. Thomas (1865), J. Anderson (1867), to Rinaldo.

*Assistant Engineers*—W. G. M. M'Quire (1867), E. J. Whatmore (1868), A. J. Durston (1869), to Ocean, for disposal.

*Acting Assistant Surgeons*—George Murdoch, M.B. (1868), to Ocean, additional for disposal; Dr. Gordon Price (1868), to Rinaldo; W. Y. B. Paton, M.B. (1868), to Zebra; J. B. Isaac, J. D'A. Harvey, to Ocean.

*Midshipmen*—Francis E. R. Fielding, R. T. Rennie Mitford, and W. Pye, to Ocean; James A. Ward, John W. Osborne, G. R. Maltby, F. F. A. Scott, V. A. Tisdall, E. J. Sandiman, K. H. Foote, George Eastman, W. S. White, W. J. A. Bannister, to Ocean as supernumeraries.

*Navigating Midshipmen*—John A. Corvan, Frederick Launcelot, to Ocean; James Maitland, to Rinaldo.

*Clerk*—Fred. J. B. Maltias, to Zebra.

*Assistant Clerk*—A. F. Comyn, to Ocean.

## MR. GARDNER ON CHINA.

(To the Editor of the *London and China Telegraph.*)

SIR,—While expressing thanks to you for your kind notice of my paper read to the Ethnological Society, would you be kind enough to point out that one sentence I said was misunderstood, perhaps from not being clearly expressed? I stated that European intercourse with China had not been an "unmixed" blessing to the Chinese, and pointed out minor evils it had entailed; but I thought that all the world was so universally agreed as to the fact of a blessing having been conferred on the Chinese by our intercourse with them, and so fully alive to the nature of that blessing, that I deemed it unnecessary to dwell upon the point, whereas I laid some stress on the reverse side of the picture, to palliate the harsh judgment of certain critics, who are ever adducing the unwillingness of the Chinese to avail themselves of the benefits we offer as a mark of extreme want of capability and civilisation.—Your obedient servant, CHARLES GARDNER, F.R.G.S.

Weybridge, Nov. 23, 1869.

## Monetary and Commercial.

We beg to remind our readers that to-morrow is the last day for the present season for transmitting telegrams to China by Grant's line *via* Kiachta. It will reopen in February next.

An appeal from a decision of Vice-Chancellor Stuart, with reference to some shares in the Bank of Hindustan, China, and Japan, has been heard before Lord Justice Giffard. It appeared that a Mr. Kintrea, in consideration of the sum of £195, expressed to have been paid by a Mr. McLochlan, transferred to the latter 145 shares in the company. The transfer of the shares was duly approved of by the directors, and afterwards registered. In December, 1866, the liquidators having discovered that the consideration expressed in the deed was never paid, took out a summons to have the register of shareholders rectified by having Mr. Kintrea's name inserted for that of Mr. McLochlan. The Vice-Chancellor being of opinion that the transfer was not a *bona fide* one, ordered Mr. Kintrea's name to be put upon the register of shares, and to pay the costs of the application. From that decision Mr. Kintrea appealed, but the Lord Justice affirmed the Vice-Chancellor's decision and dismissed the appeal.

The failure of Messrs. Morgan, Melbourn and Co., of London and Batavia, has again been brought before the Bankruptcy Court, at an adjourned sitting for the examination and discharge of Mr. George Melbourn. The joint statement of the affairs of the firm showed liabilities amounting to £126,773, against assets £22,897, of which £12,260 consisted of doubtful debts. On Mr. Melbourn's separate estate a surplus of £2,200 was returned. The bankrupt being unable to appear, the sitting was adjourned until the 15th February next.

The market for bar silver is flat, and the price has declined ⅛d.—viz., to 5s. 0⅜d.—there being little or no inquiry for the East and the Continent. On the other hand, Mexican dollars are ⅛d. higher, at 4s. 11⅜d., the supply here being limited, while there is a moderate demand for China.

The amount of bullion by the P. and O. Company's steamer *Ripon*, from Southampton, on the 27th inst., was—in gold, to Galle, £5,350; to Bombay, £675; to Madras, £3,203; in silver to Calcutta, £5,000; to Penang, £1,540; to Hong Kong, £12,370 total in gold, £9,228; in silver, £18,910.

### EXPORT OF COTTON GOODS TO THE FAR EAST.

The following is a summary of Mr. Sam Mendel's tables for the present month, which contain details of the quantities of Cotton Manufactures and Yarn shipped from the ports of London, Liverpool, Southampton, and the Clyde, to Hong Kong, Shanghai, Japan, Singapore, Batavia, Manila, and Ceylon, during the month and twelve months ended 16th Nov., 1869, compared with the corresponding periods of the two preceding years:—

#### HONG KONG AND WHAMPOA.

PLAIN COTTONS.—Export for the month ended 16th Nov., 1869, 1,558,007 yards; for the twelve months 1869, 38,028,912 yards; for the twelve months, 1868, 60,067,746 yards; for the twelve months 1867, 50,373,554 yards. Decrease for 1869 against 1868, 22,038,834 yards.

COLOURED COTTONS.—Export for the month ended 16th Nov., 1869, 162,140 yards; for the twelve months 1869, 1,488,859 yards; for the twelve months, 1868, 1,548,539 yards; for the twelve months, 1867, 2,412,621 yards. Decrease for 1869 against 1868, 59,680 yards.

PRINTED COTTONS.—Export for the month ended 16th Nov., 1869, 103,560 yards; for the twelve months 1869, 963,821 yards; for the twelve months 1868, 2,126,154 yards; for the twelve months, 1867, 822,059 yards. Decrease for 1869 against 1868, 1,162,333 yards.

COTTON YARN.—Export for the month ended 16th Nov., 1869, 595,730 lbs.; for the twelve months 1869, 3,419,490 lbs.; for the twelve months 1868, 7,283,330 lbs.; for the twelve months 1867, 6,527,964 lbs. Decrease for 1869 against 1868, 3,863,840 lbs.

VALUE.—For the month ended 16th Nov., 1869, £80,293; for the twelve months 1869, £1,022,249; for the twelve months 1868, £1,674,350; for the twelve months 1867, £1,542,529. Decrease for 1869 against 1868, £652,101.

#### SHANGHAI.

PLAIN COTTONS.—Export for the month ended 16th Nov., 1869, 28,029,317 yards; for the twelve months 1869, 211,832,830 yards; for the twelve months 1868, 248,040,531 yards; for the twelve months 1867, 131,803,321 yards. Decrease for 1869 against 1868, 36,207,201 yards.

COLOURED COTTONS.—Export for the month ended 16th Nov., 1869, 801,074 yards; for the twelve months 1869, 13,019,517 yards; for the twelve months 1868, 7,037,771 yards; for the twelve months 1867, 10,719,157 yards. Increase for 1869 against 1868, 5,981,746 yards.

PRINTED COTTONS.—Export for the month ended 16th Nov., 1869, 1,037,488 yards; for the twelve months 1869, 4,888,270 yards; for the twelve months 1868, 3,818,387 yards; for the twelve months 1867, 5,484,930 yards. Increase for 1869 against 1868, 1,069,883 yards.

COTTON YARN.—Export for the month ended 16th Nov., 1869, 16,440lbs.; for the twelve months 1869, 276,063 lbs.; for the twelve months 1868

Digitized by Google

305,700 lbs.; for the twelve months 1867, 443,232 lbs. Decrease for 1869 against 1868, 29,637 lbs.

VALUE.—For the month ended 16th Nov., 1869, £500,400; for the twelve months 1869, £4,137,913; for the twelve months 1868, £4,208,038; for the twelve months 1867, £2,851,878. Decrease for 1869 against 1868, £70,125.

JAPAN.

PLAIN COTTONS.—Export for the month ended 16th Nov., 1869, 486,950 yards; for the twelve months 1869, 16,130,774 yards; for the twelve months 1868, 21,762,155 yards; for the twelve months 1867, 20,154,929 yards. Decrease for 1869 against 1868, 5,631,381 yards.

COLOURED COTTONS.—Export for the month ended 16th Nov., 1869, 39,600 yards; for the twelve months 1869, 1,576,402 yards; for the twelve months 1868, 1,702,516 yards; for the twelve months 1867, 3,253,896 yards. Decrease for 1869 against 1868, 126,114 yards.

PRINTED COTTONS.—Export for the month ended 16th Nov., 1869, 64,000 yards; for the twelve months 1869, 797,992 yards; for the twelve months 1868, 504,887 yards; for the twelve months 1867, 812,218 yards. Increase for 1869 against 1868, 293,105 yards.

COTTON YARN.—Export for the month ended 16th Nov., 1869, 146,100 lbs.; for the twelve months 1869, 4,992,198 lbs.; for the twelve months 1868, 4,490,111 lbs.; for the twelve months 1867, 3,078,679 lbs Increase for 1869 against 1868, 502,087 lbs.

VALUE.—For the month ended 16th Nov., 1869, £19,380; for the twelve months 1869, £663,082; for the twelve months 1868, £695,215; for the twelve months 1867, £721,774. Decrease for 1869 against 1868, £32,183.

SINGAPORE AND PENANG.

PLAIN COTTONS.—Export for the month ended 16th Nov., 1869, 4,643,149 yards; for the twelve months 1869, 49,348,764 yards; for the twelve months 1868, 50,180,676 yards; for the twelve months 1867, 63,183,067 yards. Decrease for 1869 against 1868, 831,912 yards.

COLOURED COTTONS.—Export for the month ended 16th Nov., 1869, 373,981 yards; for the twelve months 1869, 5,023,722 yards; for the twelve months 1868, 4,564,616 yards; for the twelve months 1867, 9,462,697 yards. Increase for 1869 against 1868, 459,106 yards.

PRINTED COTTONS.—Export for the month ended 16th Nov., 1869, 819,866 yards; for the twelve months 1869, 4,132,553 yards; for the twelve months 1868, 2,044,474 yards; for the twelve months 1867 4,625,748 yards. Increase for 1869 against 1868, 2,088,079 yards.

COTTON YARN.—Export for the month ended 16th Nov., 1869, 287,695 lbs.; for the twelve months 1869, 1,457,443 lbs.; for the twelve months 1868, 1,664,473 lbs.; for the twelve months 1867, 2,915,539 lbs. Decrease for 1869 against 1868, 207,030 lbs.

VALUE.—For the month ended 16th Nov., 1869, £126,033; for the twelve months 1869, £1,124,277; for the twelve months 1868, £1,033,560; for the twelve months 1867, £1,752,100. Increase for 1869 against 1868, £90,717.

BATAVIA.

PLAIN COTTONS.—Export for the month ended 16th Nov., 1869, 1,556,444 yards; for the twelve months 1869, 10,179,520 yards; for the twelve months 1868, 19,122,579 yards; for the twelve months 1867, 18,802,405 yards. Decrease for 1869 against 1868, 8,943,059 yards.

COLOURED COTTONS.—Export for the month ended 16th Nov., 1869, 2,125,214 yards; for the twelve months 1869, 7,864,650 yards; for the twelve months 1868, 7,895,912 yards; for the twelve months 1867, 13,105,856 yards. Decrease for 1869 against 1868, 31,262 yards.

PRINTED COTTONS.—Export for the month ended 16th Nov., 1869, 629,723 yards; for the twelve months 1869, 4,322,002 yards; for the twelve months 1868, 6,535,817 yards; for the twelve months 1867, 13,940,037 yards. Decrease for 1869 against 1868, 2,213,815 yards.

COTTON YARN.—Export for the month ended 16th Nov., 1869, 68,345 lbs.; for the twelve months 1869, 346,645 lbs.; for the twelve months 1868, 618,165 lbs.; for the twelve months 1867, 700,805 lbs. Decrease for 1869 against 1868, 271,520 lbs.

VALUE.—For the month ended 16th Nov., 1869, £92,524; for the twelve months 1869, £479,320; for the twelve months, 1868, £726,754; for the twelve months 1867, £1,080,651. Decrease for 1869 against 1868, £247,434.

MANILA.

PLAIN COTTONS.—Export for the month ended 16th Nov., 1869, 2,047,860 yards; for the twelve months 1869, 14,060,828 yards; for the twelve months 1868, 18,662,501 yards; for the twelve months 1867, 17,861,450 yards. Decrease for 1869 against 1868, 4,601,673 yards.

COLOURED COTTONS.—Export for the month ended 16th Nov., 1869, 1,491,763 yards; for the twelve months 1869, 12,415,293 yards; for the twelve months 1868, 13,912,102 yards; for the twelve months 1867, 16,961,303 yards. Decrease for 1869 against 1868, 1,496,809 yards.

PRINTED COTTONS.—Export for the month ended 16th Nov., 1869, 187,207 yards; for the twelve months 1869, 1,335,623 yards; for the twelve months 1868, 1,074,119 yards; for the twelve months 1867, 902,740 yards. Increase for 1869 against 1868, 261,504 yards.

COTTON YARN.—Export for the month ended 16th Nov., 1869, 89,000 lbs.; for the twelve months 1869, 161,985 lbs.; for the twelve months 1868, 890,222 lbs.; for the twelve months 1867, 193,826 lbs. Decrease for 1869 against 1868, 228,237 lbs.

VALUE.—For the month ended 16th Nov., 1869, £82,785; for the twelve months 1869. £583,166; for the twelve months 1868, £781,598; for the twelve months 1867, £865,489. Decrease for 1869 against 1868, £198,432.

CEYLON.

PLAIN COTTONS.—Export for the month ended 16th Nov., 1869. 2,769,469 yards; for the twelve months 1869, 22,730,599 yards; for the twelve months 1868, 23,484,880 yards; for the twelve months 1867, 18,536,581 yards. Decrease for 1869 against 1868, 704,281 yards.

COLOURED COTTONS.—Export for the month ended 16th Nov., 1869, 109,776 yards; for the twelve months 1869, 1,214,544 yards; for the twelve months 1868, 741,205 yards; for the twelve months 1867, 1,342,024 yards. Increase for 1869 against 1868, 473,339 yards.

COTTON YARN.—Export for the month ended 16th Nov., 1869, 43,30 lbs.; for the twelve months 1869, 424,172 lbs.; for the twelve months 1868, 436,737 lbs.; for the twelve months 1867, 340,735 lbs. Decrease for 1869 against 1868, 12,565 lbs.

VALUE.—For the month ended 16th Nov., 1869, £57,898; for the twelve months 1869, £524,460; for the twelve months 1868, £463,223; for the twelve months 1867, £496,289. Increase for 1869 against 1868, £61,237.

## ARTICLES OF IMPORT.

—o—

### TEA.

Messrs. W. J. and H. Thompson's Circular, dated 24th inst., is as follows:—There has not been any change to notice in the tone of the market during the past week. Prices continue irregular, and in many cases lower. The quantity put forward is still much beyond the requirements of the trade, although there have not been any fresh arrivals. Foochow Congous: In dust and siftings little has been done: good common remains at 1s. 0½d. per lb.; fair to medium at 1s. 1½d. to 1s. 4d. per lb.; good and fine at 1s. 6d. to 1s. 10d., prices being very irregular; finest are scarce, and would command full prices. Black leaf Congous: For good common there has been some inquiry for shipping orders at 1s. 0½d., and fair to good, of old import, continues to sell slowly at 1s. 1d. to 1s. 2d. per lb.; fair to medium "new crop" has been sold at 1s. 1½d. to 1s. 4d. per lb.; good and fine at 1s. 6d. to 1s. 10d. per lb. Tayshan Congous: Further sales of late arrivals of fair quality have been made at 1s. 0½d. to 1s. 1d. per lb. Oolongs: A few fine continue to be taken for export at 1s. 5d. to 1s. 8d. per lb. Scented Orange Pekoes: Medium to fine Canton-make are saleable at late quotations. Medium to good Foochow kinds have been sold rather easier at 1s. 4d. to 1s. 7d. per lb. Scented Capers: Inquiry is limited, and sales are slow at 1s. 3d. to 1s. 5d. per lb. for medium to good. Green Teas: Ping Suey Gunpowders and Imperials have been again taken for America at former rates. The lower grades of all descriptions are heavy of sale. A China auction is advertised for the 30th inst.

A small sale, consisting chiefly of red and black-leaf Congou of recent import, was effected on the 25th inst. 3,013 packages were brought forward and sold, all being printed "without reserve." Fair to medium new season's red-leaf brought 1s. 0¾d. to 1s. 2¼d. per lb. New season's black-leaf ranged from 1s. 2¼d. to 1s. 5¾d. per lb., and, although somewhat irregular, showed generally a downward tendency. Some parcels of common coloured and uncoloured Japan tea sold at low prices. Packages offered: Congou, 2,120; Gunpowder, 70; Imperial, 36; Young Hyson, 140; Twankay, 64; Oolong, 189; Pekoe, 123; Hyson Pekoe, 196; Dust, 75; total, 3,013 packages.

### SILK.

The market is active, with a large business doing daily. Within the last two or three days Japan Silk has shared in the activity, so that a general improvement has taken place. Prices are slightly higher in some instances, and there appears a general feeling that quotations of good and best Silk will further advance.

### COFFEE.

The market for Ceylon Coffee is entirely without change; the quantities offered at the public sales since we last reported have been extremely limited, but the few transactions reported have been at prices corresponding with those then current. In East India descriptions other than Ceylon 354 bags Singapore sold, Pari Pari at 45s. 6d. to 49s., good Bonthyne at 60s. 6d., ordinary mixed at 39s. 6d., small at 30s. 6d.

The quantity of Ceylon Coffee afloat for Great Britain on the 15th Nov. was as follows:—Plantation, 73,380 cwt., against 61,748 cwt. at the corresponding date of 1868; Native, 20,304 cwt., against 20,942 cwt. The quantity afloat for Europe was—*nil*, in both years. The quantity of Coffee landed in the forty-seven weeks ended Nov. 20, 1869, was, of Ceylon, 37,422 tons, against 42,242 tons during the corresponding period of 1868; of all descriptions, 66,013 tons, against 65,960 tons. The quantity entered for home consumption was, of Ceylon, 9,781 tons, against 11,166 tons; of all descriptions, 17,127 tons, against 17,750 tons. The quantity exported was, of Ceylon, 24,822 tons, against 28,937 tons; of all descriptions, 42,829 tons, against 43,632 tons. The stock on Nov. 20 was, of Ceylon, 13,814 tons, against 12,126 tons; of all descriptions, 25,377 tons, against 20,910 tons.

### SUGAR.

The deliveries include about 27,000 bags Manila, comprising in weight about one-fourth of the entire delivery, and much the largest of that kind for a long time past. Of Manila 3,000 bags clayed have sold at 29s. 6d. (duty 8s.), and 300 tons unclayed. Zebu, at 26s.

The quantity of sugar landed in the forty-seven weeks ended Nov. 20, 1869, was, of Penang, 3,908 tons, against 1,610 tons in the corresponding period of 1868; of Manila, Java, and China, 32,625 tons, against 22,150 tons; the quantity entered for home consumption was, of Penang, 2,474 tons, against 1,508 tons; of Manila, Java, and China, 19,121 tons, against 15,104 tons; the quantity exported was, of Penang, 193 tons, against 128 tons; of Manila, Java, and China, 1,252 tons, against 1,957 tons; the stock on Nov. 20 was, of Penang, 1,620 tons, against 300 tons; of Manila, Java, and China, 40,516 tons, against 30,683 tons.

---

COIR GOODS.—At the last sales, although the supply of Yarn was rather large, the bulk consisted of second-hand parcels and common qualities, for which there was little disposition to buy, and the greater part was withdrawn or bought in, a small part selling at the previous value. A heavy quantity of Fibre was also offered, nearly all in small lots and second hands, the whole of which was withdrawn. 73,940 dholls, &c. (105 tons), and 54 bales Ceylon, chiefly in second hands,

Digitized by Google

was mostly withdrawn, only about 25 tons finding buyers—low and common, £22 10s. to £25; medium to good medium, £30 5s. to £33 15s. The following quantities of Fibre, viz., 527 bales Cochin, 10,251 ballots (29 tons) 6 bales Ceylon, and 52 bales Singapore, were all withdrawn.

COCOA NUT OIL.—The offers at auction have included 96 casks Ceylon, which attracted little attention; 23 casks sold at £40 15s. for fine down to £40 for rather inferior.

CUTCH.—In auction 1,480 boxes Pegue rather mixed quality sold at some decline, chiefly of the mark Fish over NB at 23s. to 23s. 6d., 270 boxes NB at 23s. with a few lots at 22s. 6d.

GAMBIER.—670 bales fine Rhio pressed cubes sold at some decline at 18s., a few lots 18s. 6d.; 290 baskets fine pale cubes bought in at 20s.

INDIA-RUBBER.—Borneo is inquired for, and about 10 tons have sold at 12½d. per lb.

PEPPER.—Prices of Penang are rather easier; about 1,000 bags now landing have been sold at 4⅛d.; and we note sales, also, of 315 bags Singapore black to arrive at 4¼d., and 670 bags white sound and first-class damaged at 5¾d. per lb.

PLUMBAGO.—113 barrels Ceylon sold firmly, ordinary small but clean lump, 15s.; chips, 12s.; fair dust, 9s.

RICE.—The demand has exhibited a slight improvement, and the following sales have transpired since our last report. At auction of 5,686 bags new Rangoon the sound was bought in at 9s. 9d., but the damaged (1,600 bags) were sold, first-class at 8s. 6d. to 8s. 9d. Of 4,415 bags damaged Rangoon 2,800 bags first-class were bought in at 8s. 9d. to 9s., second-class sold at 7s. 6d. to 8s. 6d., third and repacked 6s. 6d. to 7s. 3d.; of 2,462 bags damaged Bassein, only 300 bags third-class sold at 7s. 6d. 2,338 bags damaged Necranzie were bought in, first class 9s., second 8s. 3d.; also 98 bags Larong, first class 8s. 6d. The cargo of 7,100 bags (about 600 tons) Bassein, per Beautiful Star, arrived in dock, has been sold without guarantee of quality, at 8s. 7½d. ex ship. Also for arrival the cargo per George Crosbaw, about 900 tons field Siam in mats, September shipment, at 8s. landed in the United Kingdom. By private contract 4,000 bags Necransie have sold at 9s.

SPICES.—Nutmegs: 19 casks Penang sold, 81's at 2s. 6d. to 2s. 7d., 89's at 2s. 5d., 129's at 1s. 7d. Mace: 13 cases Penang sold at irregular but firm rates, middling to good middling at 3s. 1d. to 3s. 6d. Preserves: Of 274 cases China Ginger 126 cases sold at 7d. to 7¼d., the remainder bought in at 8¼d.; 20 cases dry Chyloong, in tins, sold at 1s. 2d., a few at 1s. 3d. per lb.

## NEW YORK MARKETS.

TEA.—The dulness in the market has become more marked; there is scarcely any inquiry, and sales have been to an extremely limited extent; but prices are unchanged.

COFFEE.—Sales are reported of 10,000 mats Java, ex George and Ludwig, at secret prices; also of 5,000 mats Java from first hands, and 5,000 from second hands at 22½c. to 23½c. gold; the current quotations for other descriptions of East India Coffee are unchanged.

HEMP.—The stock of Manila is still in the hands of speculators, who decline to operate under 14½ to 15 cents gold, and buyers continue to hold off. The Zephyr, from Manila, brought 1,550 bales, 400 of which were sold before arrival at 13 9-16c., the remainder came to manufacturers. Of 3,146 bales brought by the Her Majesty from Manila 1,000 were sold before arrival at 14c.; the residue is added to the stock. The remaining transactions are 800 bales Manila, to arrive at New York, per Formosa, at 14c.; and 1,250 to arrive at Boston, per Wild Rover, at 14½c., both sixty days, gold.

INDIGO.—We note the sale of 43 cases Manila in lots at the former prices of $1.15 to $1.45 currency.

RICE.—The market for East India continues dull; the only transaction reported is a sale of 300 bags Rangoon for export at $2.87½ gold in bond, showing a slight decline on previously paid rates.

SPICES.—The entire stock is in few hands, and is held firmly; sales of 500 bags pepper at 25½c.; 4,000 to 5,000 mats Cassia, 44½c. to 45½c.; 40 to 50 bales bird peppers, 25c.; 75 bales cloves, 26c. to 26½c.; and 50 to 60 cases No 1 Nutmegs, $1.5 to $1.10 all gold.

SUGAR.—No change to report in the market.

TIN.—The market for Straits exhibits a slightly quieter tone, but the rates previously current are maintained, 200 slabs having been sold at 33⅜c. to 33½c. gold.

## SAN FRANCISCO MARKETS.

TEA.—Imports from Jan. 1st to Nov. 1st: China, 678,681 lbs., 1,878 packages; Japan, 884,999 lbs., 2,413 packages. There is a steady and good demand for Japans and Oolongs of high grades, at rates previously current. This important branch of trade is now largely cut up and scattered, not, as formerly, confined to two or three large houses. Of late many of the Front-street jobbers have been importing on their own account; besides the local Chinese resident merchants are importers, all striving for the mastery. Competition is rife, and some of the musters or chops received, instead of being what were ordered, are base imitations of well-known and approved brands. There is a steady increase in the overland trade with Salt Lake, Chicago, &c., which includes sales of 375 packages basket, quotable at 50c to 52½c.

COFFEE.—Imports from Jan. 1st to Nov. 1st: Java, 1,010,532 lbs., 1,906 packages; Manila, 359,255 lbs.; Ceylon, 3,650 sacks. The market for all kinds continues depressed; jobbers not inclined to purchase at present nominal rates. Stocks of Greens are liberal, while the price of Java favours the buyer, with a very limited inquiry. Sales include 250 bags Ceylon, within the range of our quotations, viz., Ceylon, 20c.; Java, O.G., 22c. to 23c.; Manila, 16c. to 16½c. per lb.

CORDAGE.—No transactions in Manila.

CHINA MATTING.—Imports from Jan. 1st to Nov. 1st: 74 bales 8,807 rolls. We have no sales to record, the trade being liberally supplied with cargo and contract, selling at prices within range of our quotations, viz.:—China 4-4 cargo, $5 to $5.50; 5-4 cargo, $5.50 to $6; 6-4 cargo, $6.50 to $7; 4-4 contract, $8 to $12; 5-4 contract, $9 to $14; 6-4 contract, $11 to $16.

RICE.—Imports from Jan. 1st to Nov. 1st: China, 22,326,695 lbs., 28,743 packages; Siam, 3,637,783 lbs.; Batavia, 110,271 lbs., 660 packages. Stocks of all kinds are excessive, with but a moderate inquiry. The transactions include 5,000 mats China, at 5¼c. to 5¾c.

SUGAR.—Imports from Jan. 1st to Nov. 1st: Manila, 15,383,622 lbs., 28,000 packages. China, 1,633,400 lbs., 874 packages. Batavia, 1,659,457 lbs., 731 packages Siam, 40,133 lbs. 5 428 packages. There have been no sales of East India since we last reported.

TIN.—No transactions.

### SHIPPING.

ARRIVALS.—Nov. 1, at San Francisco, from Yokohama, Letitia; 11, at New York, from Manila, Zephyr.

DEPARTURES.—Nov. 4, for Yokohama and Hong Kong, from San Francisco, America (str.).

LOADING.—At New York, for Shanghai, Benefactor; at San Francisco, for Hong Kong, Great Admiral.

FREIGHTS AND CHARTERS.

Berth freights to the Eastern Ports, in one or two instances, show a slight improvement, and there is not so great a supply of tonnage available; quotations for coal from the Northern outports have in some cases advanced, and the rates now rule as under:—

Current rates of freight for vessels on the berth:—To Yokohama: 32s. 6d. weight, 30s. meast. To Nagasaki: 45s. weight or meast. To Newchwang: 45s. meast. To Shanghai: 40s. weight, 35s. meast. To Hong Kong: 35s. weight, 27s. 6d. meast. To Batavia: 25s. weight, 30s. meast. To Singapore: 30s. weight, 25s. to 30s. meast. To Ceylon: 20s. to 25s. weight, 20s. meast. At New York to China; $12 to $15 per ton of 40 cubic feet.

The current quotations for coal, &c., are as follows:—From Wear or Tyne per keel.—For Singapore: £25 10s. For Galle: £23. From Newport, Cardiff, or Swansea per ton. For Shanghai: £2 2s. 6d. For Hong Kong: £1 11s. For Saigon: £1 5s. For Singapore: £1 5s. 6d. For Galle: £1 3s.

CASUALTIES.

The Kenilworth (ship), of Liverpool, bound from Hartlepool to Galle, in putting to sea, Nov. 20, ran ashore at Gurnard, west of Cowes, but was got off on the 23rd after being lightened; she slipped from an anchor and chain.

Advices from Mauritius, dated Oct. 22, state that the Senior (Dutch barque), from Batavia to Amsterdam, put in there on the 19th Oct., leaky, and for repairs, having sprung a leak on the 4th in the Straits of Sunda during heavy weather.

The Couronnement, Bourdin, which arrived at Bordeaux, Nov. 18, from Saigon, was reported to have sustained damage at sea.

MISCELLANEOUS.

At MAURITIUS.—Oct. 3, Elizabeth, Tryselius, from Batavia; 8, Carl XI., Stafveren, from Batavia; 12, Succes, Loumeau, from Singapore; 13, Canvass Back, Kerr, from Bangkok; 16, Diomed (str.), Crompton, from Penang, and left 18 for London; 17, Emma, Elie, from Singapore; 21, Flying Cloud, Marquard, from Singapore.

LAUNCHES, &c.

On the 20th inst. Messrs. A. and J. Inglis launched a very fine screw-steamer of 1,500 tons. The machinery, constructed by her builders, will consist of a pair of direct-acting surface-condensing engines of 160-horse power nominal, and embrace all the most recent improvements. This vessel has been built to the order of Messrs. Baring Brothers and Co., of London, for the Shanghai Steam Navigation Company, under the superintendence of Captain Dearborn, the company's representative. The vessel was named the Shan Tung by Miss Anna Inglis.

The Cutty Sark, a fine vessel of about 960 tons register, built by Messrs. Scott and Smith, of Dumbarton, for Messrs. John Willis and Sons, of East India Chambers, Leadenhall-street, was launched on the 22nd inst. She is commanded by Capt. Geo. Moodie, late of the Lauderdale, and comes round to London to load. The Cutty Sark is very finely proportioned, and is expected to prove an exceedingly fast sailer.

Messrs. John Reid and Co., Port Glasgow, it is stated, have contracted to build three steamers of large tonnage, for the East India trade, *via* Suez Canal.

Messrs. Robert Steel and Co., Cartsdyke, Greenock, are at present building a composite sailing ship of 1,000 tons register, to the order of Messrs. Money, Walker, and Co., London, for the China trade.

Messrs. Scott and Co., Cartsdyke, Greenock, are building a screw steamer of 2,000 tons, to the order of Messrs. Colt, Holt, and Co., Liverpool, for the China trade.

# THE BEST ROOFING MATERIAL.

BRABY & CO. ALSO MANUFACTURE SHEET AND PERFORATED ZINC, ROOFING FELT, GALVANIZED BUCKETS, AND ALL OTHER ZINC AND GALVANIZED IRON GOODS, ILLUSTRATED LISTS OF WHICH WILL BE SENT FREE ON APPLICATION.

F. BRABY & Co.

(LIMITED),

BRABY'S GALVANIZED IRON HOUSES.

FITZROY WORKS, EUSTON ROAD, LONDON · AND AT IDA WHARF, DEPTFORD, S.E.

## SINGAPORE DOCKS.

THE PATENT SLIP AND DOCK COMPANY execute SHIPS' REPAIRS of all descriptions in the most efficient manner, under the supervision of European Engineers and Shipwrights.

The DRY DOCK (opened in March, 1859) admits two Vessels at the same time, being over 400 feet in length, with a depth of water ranging to 15½ feet. A second DRY DOCK of larger dimensions will shortly be completed, and available for the heaviest Steamers.

Adjoining the above there is extensive WHARF WAREHOUSE, and other accommodation, including every convenience for coaling Steamers, discharging cargo, and storing goods, together with ample MACHINERY and appliances for repairing Iron steamers, &c.

Apply at the offices of Messrs. PATERSON, SIMONS and Co., Singapore; or 21, St. Swithin's-lane, Cannon-street, London, E.C.

WM. CLOUGHTON, Managing Director.

New Harbour, Singapore, June, 1868.

## PORT OF AMOY.

SHIPOWNERS, AGENTS, and COMMANDERS are informed that the Dock Company's establishments at the above port afford every facility, at moderate charges, for REPAIRING and SPARRING VESSELS, cleaning and painting Iron ships and steamers.

Their large Granite Dock has 286 feet length on the blocks, and at average spring tides can receive vessels of 16 to 17 feet draught. It has a caisson-gate and a powerful centrifugal steam pump, and an engineer's workshop fitted with lathes and tools, driven by steam: Iron and brass foundries, boiler-makers' shop, a large smithy and carpenters and boat-builders' sheds. All superintended by resident Europeans.

Their two smaller GRANITE DOCKS can receive, at spring tides, vessels drawing 12 feet.

Spars, timber, and other Dockyard material kept in stock.

Quarters for officers and a DRY GODOWN for stores of vessels under repair.

AMSTERDAM INTERNATIONAL EXHIBITION, 1869.—THE GRAND DIPLOMA OF HONOUR, being the First Prize, and superior to the Gold Medal, has been awarded to LIEBIG COMPANY'S EXTRACT OF MEAT; which likewise carried the first prizes at the Paris and Havre Exhibitions.

A single trial will at once convince the consumer of the great superiority in flavour, strength, and clearness over all other Extracts of Meat, thus fully showing the correctness of the received high distinctions.

Every genuine jar bears Baron Liebig's signature.

## KEATING'S COUGH LOZENGES.

THIS UNIVERSAL REMEDY now stands the first in public favour and confidence; this result has been acquired by the test of fifty years' experience. These lozenges may be found on sale in every British colony; and throughout India and China they have been highly esteemed wherever introduced. For COUGHS, ASTHMA, and all AFFECTIONS of the THROAT and CHEST, they are the most agreeable and efficacious remedy; they do not contain opium or any other deleterious drug, and may therefore be taken with perfect safety by the most delicate constitution.

Sold in boxes, tins, and bottles of various sizes.

## KEATING'S CHILDREN'S WORM TABLETS.

The great remedy for these disorders in Adults and Children can now be administered in the form of A PURELY VEGETABLE SWEETMEAT, at once agreeable and effective.

TESTIMONIAL.

"Batley, Jan 26, 1869.

"SIR,—One of my children, aged two years and four months, being troubled with worms, I was induced to try your Bon Bons. I purchased some from Mr. B. Whitaker, chemist, of Batley, and after taking two only, she voided nine large worms. Two days after another dose, she again voided three more; three of them, the worst, measuring from 8 in. to 9 in. each in length. I consider them a most invaluable remedy, and should be tried by all suffering from worms.

(Signed) "JOHN STENSON.

"Witness, B. WHITAKER.

"To Mr. Keating, London."

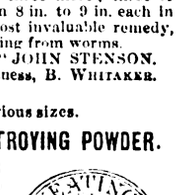
Sold in tins and bottles of various sizes.

## KEATING'S INSECT DESTROYING POWDER.

This Powder is QUITE HARMLESS TO ANIMAL LIFE, but is unrivalled in destroying Fleas, Bugs, Cockroaches, Beetles, Musquitos, and every other species of insect.

Sold in packets, tins, and bottles of various sizes.

☞ The public are particularly requested to observe that all the above preparations bear the Trade Mark as herein shown.



TRADE MARK.

Sold in Hong Kong and Shanghai by Watson and Co; Singapore, Little and Co and Woodford and Schreeder; Ceylon, Piters and Co. and Mailland and Co.; Penang, *Gazette* office.

## "THE CHINA MAIL,"

No. 2, WYNDHAM-STREET, HONG KONG.

NOTICE.—THE BUSINESS heretofore carried on under the style of "Shortrede and Co." was this day purchased by the undersigned, in whose name and by whom it will henceforth be conducted, and to whom all outstanding accounts owing to the said business are to be paid.

Hong Kong, Aug. 15, 1867. CHAS. A. SAINT.

NOTICE TO ADVERTISERS.

THE DAILY CHINA MAIL.—Six pages; published every evening (except Sunday). Subscription, 24 dols. per annum. Circulates in Hong Kong and along the China and Japan coasts. Terms of advertising:—Ten lines and under, 1 dol.; each additional line, 10 cents; one-half of these charges for repetitions. In Chinese, 2 cents per character for any number of days during the current week.

THE OVERLAND CHINA MAIL.—Compiled from the *Daily China Mail*, is published twice a month on the morning of the English mail's departure, and is a record of each fortnight's current history of events in China and Japan, contributed in original reports and collated from the journals published at the various ports in those countries. It contains, besides, a Shipping List for Shanghai, Hong Kong, Canton, and Macao, and a complete Commercial Summary.

Subscription, 12 dols. per annum, payable to any of the undermentioned agents. Postage added. Terms of advertising:—Same as in *Daily China Mail*.

AGENTS.—London: F. Algar, 11, Clement's-lane, Lombard-street, E.C. San Francisco: White and Bauer, 518, Clay-street, San Francisco. Swatow: Drown and Co. Amoy: Giles and Co. Foochow: Thompson and Co. Shanghai: H. Fogg and Co. Manilla: Karuth, Heinzen, and Co. Australia: Gordon and Gotch, Melbourne and Sydney. Singapore: Locke. Hongghee, and Co. Batavia: H. Van Dorp.

HOLLOWAY'S OINTMENT and PILLS need only a single trial to make known their capabilities; no outside sore or inward inflammation can long withstand the cooling, purifying, and healing influences exerted by these twin medicaments. Be the mischief recent or chronic, grave or slight, painful or simply annoying, it will succumb before the curative virtues of these noble remedies, which can be rightly applied by any person who will attentively read their accompanying directions, which are propounded in the plainest language, void of technical terms, and printed in the most legible characters. To the man of business confined to his counting house, and harassed by engagements, these Pills are invaluable; for the man of pleasure, addicted to free living, they are peerless.

## JOHN C. CAMPBELL will

despatch the following splendid VESSELS:—

| Destinatn. | Ships. | Tns. | Class. | Dock. | Sailing about |
|---|---|---|---|---|---|
| Colombo .. | River Indus | 1045 | AA1 | W.I.D. | Dec. 20 |
| Cochin, Cannanore, & Carwar. | Q. of Ceylon | 422 | A1 10 yr. | W.I.D. | Dec. 5 |
| Malabar Coast ... | Ann Lucey | 270 | A1 11 yr. | W.I.D. | Dec. 1 |

No. 22, Great St. Helen's, E.C.

### CHINA AND JAPAN.

THE following high-classed Clipper VESSELS will be despatched as under:—

| Port. | Ship. | Class. | Dock. | Last Shipoing Day. |
|---|---|---|---|---|
| Shanghai ... | Weymouth... | A1 12 yr. | E.I.D. | With des. |
| Yokohama... and Hiogo | Lochnagar... | A1 | E.I.D. | With des. |

For Freight or Passage apply to NORRIS and JOYNER, 60, Cornhill, E.C.

To follow the "Granville." Will meet with immediate despatch.

DIRECT for COLOMBO, the magnificent clipper ship RIVER INDUS, AA1 1,045 tons register; G. SHEARER, Commander; West India Docks. This splendid vessel, built in 1868, is well known for her rapid passages and the good order in which she always delivers her cargo, and from her high class can be strongly recommended to shippers of fine goods.

For Freight or Passage apply to LIVINGSTON, HOLDING, and BRIGGS, 31, Great St. Helen's, Bishopsgate-street, E.C.; or to JOHN C. CAMPBELL, 22, Great St. Helen's, Bishopsgate-street, E.C.

Malabar Coast. To follow the "Dione." Will meet with the usual quick despatch.

DIRECT for COCHIN, CALICUT, MANGALORE, and CARWAR, the beautiful clipper ship ANN LUCEY. A1 11 years; 270 tons register, 450 tons burthen; WILLIAM NOBLE, Commander; West India Docks. This magnificent vessel, so well and favourably known in the Ceylon trade, presents the finest opportunity to shippers.

For Freight or Passage apply to JOHN C. CAMPBELL, 22, Great St Helen's, Bishopsgate-street, E.C.; or to LIVINGSTON, HOLDING, and BRIGGS, 31, Great St. Helen's, Bishopsgate-street, E.C.

Mate's receipts must be left before bills of lading can be signed.

L. H. and B. will not be responsible for demurrage on Craft sent alongside without their instructions.

N.B.—Shippers are particularly requested to have the Port for which the goods are intended distinctly marked on the packages, to prevent delay and confusion on delivery.

Malabar Coast. To follow the "Ann Lucey." Will meet with the usual Quick Despatch.

DIRECT for COCHIN, CANNANORE, and CARWAR, the favorite clipper ship QUEEN of CEYLON, A1 10 years, 422 tons register, R. ATKINSON, Commander; West India Docks. This magnificent vessel, so well and favourably known in the Ceylon trade, presents the finest opportunity to shippers.

For Freight or Passage apply to JOHN C. CAMPBELL, 22, Great St. Helen's, Bishopsgate-street, E.C.; or to LIVINGSTON, HOLDING, and BRIGGS, 31, Great St. Helen's, Bishopsgate-street, E.C.

To sail on the 10th Dec.

FOR SHANGHAI, the well-known clipper FALCON, A1 13 years, 793 tons register; J. L. DUNN, Commander; East India Docks. Has excellent accommodation for passengers.

For Freight or Passage apply to SHAW, MAXTON, and Co., 2, Royal Exchange-buildings, London, E.C.

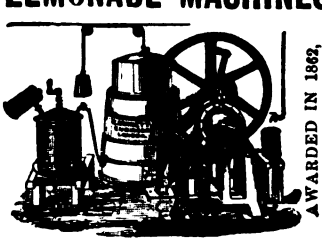
To sail on the 10th Dec.

FOR HONG KONG, the well-known Clipper BLACK PRINCE, A1 17 years, 750 tons register; WILLIAM INGLIS, Commander; East India Docks. Has superior accommodation for passengers.

For Freight or Passage, apply to SHAW, MAXTON and Co., 2, Royal Exchange-buildings E.C.

## S. BARNETT'S SODA WATER & LEMONADE MACHINES.

THE ONLY PRIZE MEDAL FOR SODA-WATER MACHINES,



AWARDED IN 1862, WAS TO SAMSON BARNETT.

FOR THE MANUFACTURE OF

**Soda, Potass Seltzer, Carrara, Lithia, Magnesia, and Tonic Waters. Lemonade, Ginger Beer, Orangeade, Gingerade, Nectar, & Champagne Cider**

*Full directions for preparing all the above drinks sent with each Machine.*

### THE MAILS, &c.

The present inward Mail left Hong Kong two days late, but is delivered on its due date. The next French mail, expected on the 20th inst., should bring the following dates:—Yokohama Oct. 31, Shanghai Nov. 3, Hong Kong Nov. 9, Singapore Nov. 17, Galle Nov. 25. Telegrams in advance of this, *via* Galle, have not yet been received. From Shanghai, telegrams *via* Kiachta, to Nov. 17, were received on the 8th instant.

## List of Passengers.

### PASSENGERS INWARD.

By this mail to Marseilles, per P. and O. steamer *Tanjore*, arrived Dec. 11.—From Yokohama: Mr. Ebynure Mr. Chapman, Mr Dapisson, Mr. F. Thomas, Signor Gatorani, and two second-class passengers. From Hong Kong: Sir H. and Lady Keppel two children, and two servants Mr. Taylor, Mr Jackson, Mr. Deacon, Mr. Schofield, Mr. Tomschy, Mr. Dean, Mr. Haslam. From Shanghai: Mr. Dawson, Mr. Drysdale, Mr. Hyde, Mr. and Mrs. Barnes, two children, and two servants. From Batavia: Mr Wolfe and child. From Singapore: Mr. and Mrs. Brickman, Miss Khron, Major Tomschy.

To Southampton, per P. and O. steamer *Nyanza*, expected to arrive Dec. 16.—From Hong Kong: Mr. P. Harris Mr. W. B. Risk, R.N., Lieut. Garnier, R.N., Commander Gurdon, R.N., Mr. J. White, D.A.S.S., and three second-class passengers. From Galle: Mr. W. Singers.

To Genoa.—From Yokohama: Mr. Cattinacci, Mr. Mulagain, Mr. Sala, Mr. Sheradatti, Mr. Vigano, Mr. Civetta, and one second-class passenger.

Per Pacific mail steamer *Japan*, from Yokohama, arrived at San Francisco Nov. 22—For San Francisco: Lieut. Commander R. F. Bradford, Lieuts. George R. Durand S. L. Wilson, H. F. Bradford, Capt. M. P. Nolan, and Surgeon S. P. Boyer. For New York: John Vandyke, James C. Frazer, Frederick Lehman, S S. Gibert and four Japanese, also twenty steerage passengers. For Europe: Baron Kosar, Dr. Synski, and Dr. Schumucker.

### PASSENGERS OUTWARD.

Per P. and O. steamer *Bangalore*, from Southampton, Dec 11.—To Shanghai: Mr. J. W. Harding. To Hong Kong: Mr. H. S. B. Usill, Mr. F. F. P. Forster, Mr R. D. Adams Mr. Buchanan. To Singapore: Miss J. Everest. To Penang: Mr. and Mrs., Miss Mr. C., Miss E., and Master De Morny. To Ceylon. Lord Elphinstone and brother, Mr. and Mrs. Staples

Per P. and O. steamer *Tanjore*, from Marseilles, Dec. 19.—To. Shanghai: Mr. R. Mackenzie. To Hong Kong: Mr M. D. Collier, Mrs. S. A. Collier.

Per P. and O. steamer from Suez, Dec. 26.—To Ceylon: Col. H. Steward, Captain Hon. Corry, Col. Glover, R.E.

Per P. and O. steamer *Pera*, from Southampton, Dec. 25.—To Hong Kong: Mr J. C. Penderea. To Ceylon: Mr. J. E. Garbutt.

Per P. and O. steamer *Ripon*, from Marseilles, Jan. 2.—To Hong Kong: Mr. John Noble. To Ceylon: Mr. J. Brown, Rev. C. and Mrs. Carter, and two children, Mr. J. F. Callaghan.

## Summary of News from the Far East.

### JAPAN.

#### YOKOHAMA.

The P. and O. mail delivered this morning brings advices from Yokohama to Oct. 24. The outward mail of Aug. 27 was received on Oct. 19. The following summary of news is from the *Japan Times*:—

The most noteworthy event of the period since we last addressed our readers has been the signature of the Treaty of Commerce and Navigation between the Austro-Hungarian Monarchy and the Empire of Japan. This was concluded at Yedo on the 18th Oct., the anniversary, oddly enough, of the Expedition's departure from the port of Trieste. The conditions, with certain necessary transpositions and modifications, are those of the North German Confederation Treaty recently made, the changes being of a beneficial character, as giving to the document a more comprehensive and logical form. Indeed, it is the most complete of the many similar contracts with Japan, and may well be taken as a text in future discussion on our treaty relations with the country.

Two days before the Treaty was signed the Mikado received the Embassy in his palace, and the reception, we are told by an eye-witness, was most cordial and satisfactory. The envoy of his Imperial and Royal Majesty, Baron Von Petz, presented his letters of credence, accompanied by his suite, the captains of the *Donau* and *Erzherzog Friedrich*, Flag-Captain Von Wipplinger, and Captain Von Pitner, Dr. Scherzer, Chief Commissioner for the commercial and scientific department, Herr Henry von Calice, the Consul-General and Chargé d'Affaires *ad interim* for Japan, Baron Herbert, Counsellor of Legation, Baron Trautenberg, Secretary of Legation, and Baron Ransonnet, Attaché. Alexander von Siebold, Esq., Japanese Secretary and Interpreter of the British Legation, accompanied the Envoy, and was also presented to the Mikado. His Imperial Majesty received the Embassy in the audience hall of the castle of Yedo, surrounded by his Ministers and the high dignitaries of the Japanese Empire. On Admiral von Petz delivering his credentials, the Mikado said a few courteous words, expressive of pleasure at receiving the Embassy, and handed to a native interpreter a paper containing a more formal reply, to which a translation in English was attached. This concluded the interview.

The Mikado's plenipotentiaries, who signed the Treaty on his behalf, were Sawa Jiusan Kiyowara Nobuyoshi and Terashima Jiu-shi-i-Fujiwara Munenori.

On the same day the presents brought by the Embassy to the Mikado were displayed in a room adjoining the audience hall, and delivered to the officers appointed to receive them. They are in great variety, and of very considerable value. Conspicuous among them are a marble statue, life size, of the Emperor and King, by Caur, an Austrian sculptor of eminence; a splendid piano, by the famous Bosendorfer, of Vienna; Hungarian harness and richly ornamented *shabraks*, and some sixty beautifully printed volumes from the Imperial press, on scientific subjects. The statue excited great admiration and wonder. The Minister for Foreign Affairs sent to the admiral a special letter, thanking him for the presents generally, and stating that he had been directed to take special charge of the statue and preserve it for time everlasting, as an Imperial treasure, and a token of the special sympathy and friendship of the Emperor of Austria. The piano was also particularly admired, and the Mikado having expressed his desire to hear its music, Baron Ransonnet, *attaché* of the Mission, a first-rate ama-

Digitized by Google

teur, played several pieces on it, giving specimens of various schools of music, before a number of the high dignitaries of the Court, the Mikado himself listening behind a screen and repeatedly expressing his delight. It is interesting to know that his Imperial Majesty picked out a piece of Chopin's, "On the Piazetta" and an Austrian Polka, for special commendation. The piano is intended as a present to his young consort, who is expected to join him shortly in Yedo. His Majesty has expressed a wish that instruction in piano-forte playing should be given to a Japanese official musician, who will, presumably, be hereafter the Empress's teacher; but there is no royal road to proficiency in art, and we fear it will be long before her Majesty will be enabled to delight her august spouse with the strains of his favourite composer.

The most useful of the gifts, the books, are intended for the Library of the Japanese Institute for Foreign Sciences, a full-titled establishment, which has already made good progress towards teaching a large number of young Japanese of good family the languages in which a knowledge of these sciences lies at present hidden from them. The solid value of this present is, we are told, as fully appreciated as the beauty of those of a more ornamental character. Some of the books, works on medicine and surgery, have gone to the Japanese Hospital, together with some surgical instruments and scientific apparatus.

A dinner party followed, given by Admiral von Petz at his Legation, the former residence of the English Embassy, at which were present, besides Sawa and Terashima, the two Japanese Plenipotentiaries, the Prime Minister, Sanjo Udaijin, and an uncle of the Mikado, Nin waji Hiobu Kio no miya.

On the day after the Treaty was signed, an autograph letter, the first which the Mikado has ever written to a foreign sovereign, was received by the Envoy to be forwarded to the Emperor. In it he expresses his particular satisfaction at having at length concluded a treaty with a power like Austria, *whose principal object is the development of commerce.*

The Japanese Government has at last stopped the installation of merchant consuls. The Austrian Envoy made no objection when the point was raised; in fact, would probably have suggested it, had he not been anticipated by the request of the Japanese Government. It is well the point was raised; indeed, this tardy acceptance of the advice which some foreign ministers and some foreign journalists have for the last four years been pressing upon the Japanese is a most gratifying circumstance. In consequence, an arrangement has been made between the Austro-Hungarian Envoy and Sir Harry Parkes, by virtue of which English Consular officers will act at the open ports as Acting Austrian Consuls until the Austrian functionaries arrive. This subject is too large a one to discuss here, but we may express the hope that the Japanese Government will follow up their present move by the most necessary one of refusing their consent to the appointment of any more merchant consuls whatever. As the present incumbents gradually disappear from the country, the Government should insist upon their being replaced by proper officers.

### NEWS BY THE PACIFIC MAIL.

As announced in our last issue, the Pacific mail steamer *Japan* arrived at San Francisco on the 22nd ult., with dates from Yokohama to Nov. 1, or a week later than the advices received by to-day's mail. All the news from China has been anticipated, but the following items from Japan have not. The passengers by the *Japan* included 240 Chinese women. It is also mentioned that a large quantity of opium, brought by the Chinese passengers, was seized by the revenue officials at San Francisco.

In Yokohama the Mikado's *fete* day was generally observed. The ships-of-war of all nationalities displayed the Japanese ensign and fired a royal salute. The foreign representatives in Yedo were entertained at a banquet given by the Mikado's ministers.

There seems to be a renewed tendency not only to commit outrages on foreigners but to attack natives who are known to be friendly towards them. The recent attack on Sir Harry Parkes was followed by a series of murders, thus described in the *Japan Times*:—

On the 8th of October five or six unknown persons broke into the lodgings of Omura Hiobu Taiyu, in the camp of the 3rd Chosiu Regiment. They cut down Hiobu Taiyu, and also Shidzuma Hikotaro, lieutenant, Adachi Konoske, professor of foreign languages, and Yoshitomi Otonoske, Building Officer of the War Department, and then ran away. It is said that Omura was severely wounded, but is under treatment. Shidzuma and Adachi were killed on the spot, and a retainer of Omura's, named Yamada Tennoske, died of the wounds which he received. Yoshitomi was severely, but not mortally wounded. One of the brigands was cut down, and his headless trunk was found on the bank of the Higashi-kawa on the way to Nijo. The head had been thrown away in Shijogawa. He appeared to be a man of about thirty years of age. The following paper was found in his bosom:—

"OMURA MASUJIRO.—It is our humble opinion that his Majesty's resolve of encouraging talent, under the new Imperial Government remodelled on the ancient pattern, implied that he would cherish the natural vigour of his divine country, add glory to the military power of Japan in the eyes of foreign countries, give every one his due place according to his abilities, procure rest and tranquillity to all his subjects, and thus restore to his ancestors in Heaven their peace of mind. But this man (Omura), ever since he took office, has had no just conception of the true relations of matters, foreign and domestic. He has steadily conformed himself to foreign customs, and has disgraced the national character of this divine country. He has treated the Imperial laws with contempt, and has arbitrarily introduced customs of the barbarians. He has caused extreme misery to all the people, by which their morals have become lowered and a sense of shame forgotten. He remembered foreigners, but forgot his Emperor. The records of his crimes would fill volumes. The deities of heaven and earth cannot restrain their indignation, and have borrowed the hands of a few resolute men, by whom he is to be executed and his head exposed for an example to posterity. 9th Month (October)"

These murders of enlightened and useful Japanese are even worse signs of the time than an assault on a Foreign Minister, and, but for our belief in the thorough good faith of the Mikado's Government, we should almost despair of the future, or should at least have but the hope that only the next generation would see Japan developed and civilised, on the model of the civilisation of the West.

The *Japan Gazette* says:—Two foreign steamers have been despatched with (nominal) emigrants from Yedo to the northernmost portion of the Island of Yeso. The object is to preserve that island from the suspected encroachments of Russia, whose soldiers have appropriated the whole of the adjoining island of Saghalien. It is a sorry look out for the colonists, for they are all men from the mild south of Niphon or Kiu siu, and the winter, which is both long and severe up north, has already commenced.

A trial is to be made by the outgoing San Francisco steamer of sending tea forward for conveyance from San Francisco to New York by rail. We believe the rate is to be seven cents per pound. The shippers are a Hiogo firm.

It is expected that the Daimios and others, whose Parliamentary duties require their presence at Yedo, will return soon. Many important matters will be brought forward for discussion.

The steamer *China* arrived at Yokohama on the 30th of October.

Minister Delong will take immediate possession of the American mission, and Mr. Van Valkenburg will return by the November steamer.

The following was the position of the United States naval fleet on the sailing of the *Japan*:—The *Delaware*, flagship of the Asiatic squadron, with Admiral Rowan, was at Yokohama; the *Idaho*, having been dismasted during a storm, had put into Yokohama; the *Ashuelot* was cruising, the *Monocacy* was at Osaka, and the *Iroquois* was at Hong Kong, on the Southern station. The *Unadilla* had been sold for $19,500, and her officers and men transferred to the *Maumee*.

The Japan steamer *Viborg* came into Hiogo Bay on the 5th Oct. with the captain and crew of the *Mary Nicholson*, of Liverpool, which was abandoned on Oct. 1 some 100 miles south of Ki Channel. An investigation of the disaster was held at H.B.M. Consulate, and Captain Freebody was honourably acquitted of all blame for the loss of his ship.

## CHINA.

—o—

### PEKING AND THE NORTH.

We have the rather startling intelligence from Peking that the revised English treaty is to be signed on the 25th instant. The Chinese rejected Mr. Otway's suggestion that the treaty should be revised four years hence; so Sir Rutherford Alcock fell back on the treaty provision that the process should be gone through at the end of ten years. The first demand for admission to personal audience of the Emperor was refused; the principle of "Customs districts," explained by him in a despatch published early in the year, is the principal concession. We do not give this authoritatively, but believe it will be found true. The Duke of Edinburgh has paid a short visit to the capital, arriving on the 7th and leaving on the 11th. His presence was entirely ignored by the Chinese Government. It is hoped this will tend to prove to people at home the falsity of the protests that have been made as to Chinese progressiveness, and anxiety to be admitted on equal terms into the comity of nations. On the contrary, the Emperor retains the old notion of universal supremacy, and looks down on our Queen's son as an inferior.

At Tientsin the Duke also preserved his incognito. His Royal Highness returned from Peking on the 13th. Some of the residents left their cards on board the *Salamis* during the day, for the Duke, Admiral Keppel, and Captain Miller, and as it had been intimated that the Duke did not wish to receive official visits the Consuls confined themselves to a similar act of courtesy. No visits have passed between the Chinese authorities and the Duke. The *Salamis* left on the 15th for Chefoo. The *Opossum* remains in port for the protection of British interests during the winter. The weather has been very hot during the last six days, and we are beginning to be heartily tired of the summer, and long for the cold season.

An enterprising English merchant in Tientsin having applied to the Government for permission to dredge the Pehio, answer was recently sent from the Foreign-office that there was no provision in the treaty for anything of the kind; therefore the request could not be granted.

S. Wells Williams, LL.D., Secretary of the American Legation,

Digitized by Google

and now in charge, left here with his family on the 5th inst. They go to Shanghai, from whence Mrs. Williams and children will sail for Europe at an early date. Dr. Williams proposes returning to his post of duty some time during the month of November.

## HANKOW.

(FROM OUR OWN CORRESPONDENT.)

Although the water has fallen nearly five feet, and is now off the bund, and so far apparently confined within its proper channel, the surrounding country is still flooded, and the suburbs of Wuchang, Hankow, and Hanyang have not been relieved of the crowds of refugees. Hunger has driven some of these to acts of violence, but it is astonishing that outrages are not of constant occurrence. Foreigners have occasionally been molested, but in such a manner as to show that the people had no motive save to endeavour to enforce relief. There is, however, a report, naturally kept very quiet, but authentic for all that, to the effect that four of the out-door staff of the Customs went over to shoot on the Wuchang side the other day, and killed some tame pigeons. They were immediately mobbed, and their guns taken from them, but it does not appear that they were in any way injured. The sportsmen are in full activity, although game has been driven from the immediate neighbourhood by the inundations. The hills are for this reason like preserves, and those who give themselves up to long and weary tramps bring back heavy bags. Trade continues at a stand-still, chiefly on account of the certain inability of the country people to buy from the retail agents during the winter. The interrupted communication with the interior in consequence of flooded towing paths is also a chief cause. The theatrical season will open in about a month.

## SHANGHAI.

(FROM OUR OWN CORRESPONDENT.)

SHANGHAI, Oct. 30, 1869.

The English mail of Aug. 27 arrived here on the 13th inst. by the *Sunda*, bringing telegrams, *via* Galle, to Sept. 11 from London. By Kiachta telegrams are to hand, dated London Sept 18 last, arriving here on the 21st.

By the Messageries Imperiales steamer *Dupleix* the French mail of Sept 3 came to hand on the 19th inst. The *Ottawa*, with the mail of Sept. 10, arrived on the 27th inst. We have telegrams dated Bombay Sept. 30, from London dated Sept. 23.

Business may be said to have been at a standstill since I last wrote you, in consequence of the preparations for the Duke of Edinburgh, and entertaining him after arrival.

Mr. J. Mc Leavy Brown (of the Burlingame Mission) arrived hear by the *Dupleix* accompanied by several Chinese; various rumours are assigned for his return. The most believed one is that he is on special business in connection with the American treaty, and will return to Europe in about a month. Mr. F. B. Johnson (of Messrs. Jardine, Matheson, and Co.) has published a memorandum on transit dues; it simply elaborates and states more clearly the views he expressed at one of the recent meetings of the Shanghai General Chamber of Commerce.

The North China Insurance Company has issued its report for the half year ended June 30. The report says:—

The directors have the pleasure to place before the shareholders the annexed statement of accounts for the first half-year, ending June 30, 1869, and to congratulate them upon the satisfactory position of the company, the balance-sheet showing on that date a surplus of Tls. 380,243.10, in addition to the capital paid up. The amount of Tls. 165,581.01 represents the balance of funds belonging to the company 1866-8, transferred for the purpose of distribution and payment of claims arising upon that account.

The result of the business transacted during the six months to which the accounts refer compares favourably with similar preceding periods, the total premia earned being Tls. 427,249.63, against—

| | Taels. |
|---|---|
| Jan. to June account, 1866 ... ... | 401,361.60 |
| " " 1867 ... ... | 385,301.27 |
| " " 1868 ... ... | 402,256.30 |

Up to the present date all coasting and a large proportion of the longer risks have run off, the only important casualty by which the company suffers loss being the wreck of the *Hamilla Mitchell*.

At the meeting of shareholders held on the 28th inst. the report was unanimously passed, the chairman remarking that the company had a full line on the *Devonport*, to Shanghai, which was lost near the Great Natunas on the 27th Sept.

We hear that the North-German barque *Baltimore*, of 780 tons, bound from hence to Yokohama, laden with cotton, has been burnt at sea; and that, by latest advices, only five of the crew had reached Nagasaki.

The ship *Devonport*, Kennedy, master, London to Shanghai, struck on a rock, not marked on the chart, on Sept. 27, about eleven miles from the Great Natunas Islands; it was found necessary to run her aground to prevent her sinking; she then rapidly filled with water, and became a total wreck. Assistance was got from Sarawak, and H.M.S. *Elk* took the captain, passengers and crew to Singapore, where they arrived on the 13th inst.

The Duke of Edinburgh's visit cannot be better or more fully described than by the subjoined extracts from the *North China Herald*:—

In consequence of news received from Tientsin, the S.S.N. Co.'s steamer *Moyune*, Capt. Lloyd, which had been courteously lent and placed under the English by the directors of that company for the occasion, went down to Woosung on Thursday morning, and fell in with H.M.S. *Icarus* in the afternoon beyond the lightship. From her it was learnt that the Duke of Edinburgh was on board the *Galatea*, then at anchor some five or six miles distant, preferring to bring his vessel himself to Woosung. Though blowing hard the *Moyune* proceeded to the *Galatea*, and Capt. Trollope, R.N., and Mr. Medhurst went on board the latter to offer the services of the steamer and ascertain the wishes of the Duke with regard to the various entertainments prepared in honour of his visit. His Royal Highness expressed his appreciation of the committee's kindness and courtesy in thus coming to meet him, but did not consider himself justified, as captain of the *Galatea*, in leaving her in pilotage water of a somewhat intricate nature. He would, however, be happy to avail himself of the *Moyune* next morning, coming up in her about noon and landing at the Customs jetty. The Duke did not wish to receive any public address on landing, or to hold a reception, but as addresses had been drawn up would be glad to have them presented in a quiet manner at the house set apart for his use. The *Moyune* returned to Shanghai with this information during the night, and left again for Woosung, to meet the Duke, early on Friday morning.

The uncertainty as to the time of H.R.H.'s arrival took many foreigners on to the Bund before the hour which had been suggested; but it was not till one P.M. that the preconcerted two guns announced the arrival of the *Moyune* at Woosung. The unusually gay appearance of the ships in harbour, which had dressed at an early hour, attracted crowds of Chinese to the Bund during the whole morning. There had been great curiosity among them for many days past, and it reached a high pitch as the day wore on. It was about 3.20 P.M. when H.R.H. did arrive, the *Moyune* running up the whole length of the Bund,—in order to get room to turn against the flood tide—and the *Zebra* manning the rigging and giving him three hearty cheers as he passed. Turning near Kin-le-yuen, the *Moyune* ran back alongside the Customs' jetty, where the members of the committee were waiting to receive him. The Prince was heartily cheered on landing, and courteously acknowledged the salute. Even the Chinese vented their excitement by an unearthly yell. His Royal Highness at once entered a carriage which was waiting for him, and drove with Mr. Medhurst to the latter's residence, which had been placed at his disposal during his stay, and where the addresses which had been signed by the British and cosmopolitan members of the community were laid before him. We subjoin copies of these addresses and of his Royal Highness's replies:—

THE BRITISH ADDRESS.

*To his Royal Highness Alfred Ernest Albert, Duke of Edinburgh, K.G., K.T., &c., &c.*

May it please your Royal Highness,—It is a satisfactory and grateful duty which devolves upon Her Majesty's subjects at this port to take their share in welcoming your Royal Higness.

Hitherto your voyages have taken you, for the most part, to the colonial possessions of the British Empire, where warm expressions of loyalty and affection have in every instance proved how deep-seated is the attachment of the dependencies of Great Britain to the Crown and Government. Although we reside under other institutions, your Royal Highness will find that even in this remote and alien country there are not wanting hearts loyal to your illustrious house, and sincerely rejoiced to have an opportunity of testifying their devoted sentiments.

There is one name which binds the sons of Great Britain together, wherever their lots may be cast, and that is the name of Her Most Gracious Majesty.

Her public and private virtues have united to endear her to the citizens of all nations, and it is a source of perpetual pleasure to the millions over whom she rules to feel that they possess a sovereign whose formal titles to respect comprise but a small part of her claims to the love and devotion of all her subjects.

This loyalty is of so sterling a quality that it has become a part of our national character, and it is but a spontaneous instinct of national feeling which prompts us to extend a welcome to a son of that Queen whose home may so truly be said to be in the hearts of her people.

We hope to be able to bear our part in making your Royal Highness's stay agreeable, and trust that you may find your short sojurn in Shanghai not altogether unworthy of a pleasant place in your remembrance.

Signed by 323 British Residents.

REPLY.

*To the British Community in Shanghai.*

Gentlemen,—I thank you sincerely for this address, and request you to convey to Her Britannic Majesty's subjects at this port the expression of my gratitude for the very kind language in which it is couched and the warm reception with which they have greeted me.

In the Queen's name I thank you for the expressions of your loyalty to Her Crown and person, and for myself I am grateful to you for your kind and good wishes on my behalf. (Signed) ALFRED.

THE COSMOPOLITAN ADDRESS.

*To his Royal Highness Alfred Ernest Albert, Duke of Edinburgh, K.G., K.T., &c., &c., &c.*

Sir,—We, the members of the foreign community of Shanghai, have the honour to address your Royal Highness on this occasion, and to offer to you a hearty welcome to this distant part of the globe.

Our settlements comprise citizens of nearly every civilised nationality, and we share one and all in that sentiment of profound admiration and respect for Her Most Gracious Majesty, the Queen of England, which so universally pervades the several countries to which we owe our allegiance

Digitized by Google

We count ourselves happy, therefore, in having an opportunity afforded us of giving expression to that sentiment in the public recognition of the presence amongst us of one of the members of Her Britannic Majesty's family.

Though your Royal Highness will not find in a purely mercantile settlement, on the borders of a semi-civilised country, the facilities for a princely greeting with which other cities visited by you have abounded, yet we offer an assurance alike deep and sincere that your visit to Shanghai is a source of unqualified gratification to us, nor can we but feel assured that a visit to the first commercial emporium of China will present features of very great interest to a member of a family ruling over a great commercial country.

We have the honour to be, your Royal Highness's obedient servants.

Signed by 350 Members of the Foreign Community.

REPLY.

*To the Foreign Community of Shanghai.*

Gentlemen,—I thank you warmly for your address, welcoming me to this part of China, and expressing your admiration and respect for Her Majesty the Queen.

Accept my thanks for your kind wishes for my future happiness. In return I wish the members of the foreign community every prosperity.

(Signed) ALERED.

The Prince, accompanied by Mr. Medhurst, then drove to the latter's residence, Soochow Creek, after which he went to the rowing ground, some three miles from Shanghai, but the best events of the regatta were over, and he made a very short stay. In the evening he honoured the Lyceum with his presence to witness the performance of Dion Boucicault's comedy, "London Assurance," by our Amateur Dramatic Corps. The performance went off very well, and his Royal Highness appeared as much amused as any one during its progress. He was greeted with three, and three more hearty cheers after the orchestra had played "God Save the Queen" at the conclusion of the performance.

A race between sedan chairs with a sailor in each created rather less excitement, but still gave lots of fun. One man dropped his window glass soon after starting, and Jack insisted on his waiting and picking it up, under the impression he should be disqualified for coming in light without it.

The next thing was a pony steeple chase, which the Prince appeared to enjoy immensely.

The Prince brought Queen's weather with him, and under its influence a very pleasant day was spent on Saturday on the Race Course. A warm sun, tempered by a cool breeze, enabled people to stroll about with equal safety from cold or sunstroke, and nearly all Shanghai availed itself of the opportunity. The day's proceedings were begun by a game of cricket between an eleven of H.M.'s Navy and Civil Service, and eleven of the Cricket Club. But about three P.M. a wheelbarrow race was suggested by way of varying the amusement, and the rush of spectators who flocked across the ground to witness this new excitement fairly swept the cricketers off the field. As the object of either game was to amuse H. R. H. and the spectators, the players submitted with a good grace, and joined heartily in the new fun.

The next proceeding was to start a lot of sailors to wheel the barrows themselves; and here the grief was awful; wheels were knocked off, shins broken, and the field reduced to two competitors in less time than it takes to write it. One man continued the race with the wheel on his back, having hopelessly smashed his barrow, and two others trundled theirs in, after coming to similar grief.

Eighteen ponies had been entered for a hurdle race, and about a dozen started, the favourites being Revoke, Automaton, and Mexican. At the word "Off!" Revoke and Sink of Iniquity took the lead, clearing the first wall together in splendid style. Revoke, now far ahead of any other pony, took the double in front of the stand in grand style; but a stirrup leather giving way, his rider was thrown. The next up were Mexican and Bobby, who raced together for the rest of the journey, Mexican winning the race by half a length. A rather amusing incident occurred in the drawing for a sweepstakes among his Royal Highness's party, in connection with the race. The Prince chanced himself to draw a pony named Sink of Iniquity, after the Duke of Somerset's new epithet for the model settlement, and no one seemed more amused than his Royal Highness himself at the coincidence. A foot steeple chase was also run while his Royal Highness was on the Grand Stand; but what with the swampiness of the ground and the effect of the recent tiffin—both combining to make running hard work—the competition was not very keen. Other athletic sports concluded a pleasant afternoon

H. R. H. was entertained at the Concordia on Saturday evening, and we hear enjoyed himself there till an early hour in the morning. Everything possible was done to make the evening agreeable, and complete success was achieved. The programme opened with a chorus, Jubelchor, from "Otto," and after a short instrumental performance, Wollman's burlesque in one Act, "Einer aus der Gerichts Zeitung," was played. The Duke played several games of bowls in the course of the evening, and sat down some time after midnight to a capital supper, at which his health was enthusiastically drunk, and warmly responded to.

On Sunday the Prince was naturally left to his own devices; but he put in an appearance in the Public Garden in the course of the afternoon, where the splendid band of the *Galatea* played for about two hours, attracting nearly all Shanghai as listeners.

On Monday evening H.R.H was entertained at a ball at the Shanghai Club, and the whole length of the Bund from Astor House to Kiu-kee-yun was illuminated in his honour. Even the opium ships and Mr. Reynolds' "look-out" on Pootung were ablaze with light. The effect was very fine. The Prince reached the Club at 9.25, and was greeted by a salute of twenty-one rockets from the verandahs, which had a very pretty effect. He opened the ball with Mrs. Medhurst, the wife of H.B.M. Consul, and afterwards danced with several other ladies. The guests sat down to supper at midnight.

After supper was over H.B.M. Consul proposed the toast of "The Queen," which was drunk with three hearty cheers, the band playing "God Save the Queen."

H.B.M. Consul next proposed "The Royal Family," and coupled the toast with the name of H.R.H. the Duke of Edinburgh, our guest. The toast was drunk with tremendous cheering, and musical honours. The Duke said:

Ladies and Gentlemen,—I return you my best thanks for the kind manner in which you have drunk my health; and the gentlemen are entitled to my more particular thanks for the musical manner in which they have responded to it. I can only assure the community of which I happen to be the guest, of my high, very high, appreciation of their musical talents, which I have now heard on three different occasions; first at the charming entertainment at the Lyceum, on the evening of my arrival; next, the enchanting entertainment—for I am sure all my countrymen thought it so—which the German residents gave the night before last, and, lastly, the beautiful song which you have sung just now. Music is one of those things that must produce feelings of harmony and good fellowship in any person's breast; and I can easily imagine, from the inclination of all classes of this community towards music, how great good feeling and harmony prevail among all the classes and all nationalities in Shanghai. I will only say one thing more, in concluding these few words I have to offer you in return for the toast you have just drunk. I say that this community has a most important bearing on the commerce of all nations, and I beg you to follow me in drinking the toast, "Prosperity to the Community of Shanghai."

The toast was drunk with six hearty cheers, led by the Prince himself. H.B.M.'s Consul had one more toast to propose—"The Ladies," and would leave it to the youngest man present, whoever he might be, to respond.

This individual, however, showing a remarkable bashfulness in coming forward, the Duke called on Mr. Porter, of H.I.M.'s Customs, who replied in a humorous speech.

The Duke left shortly afterwards, and went, we believe, to the Mon-ding-fong (Chinese) theatre, which had been brilliantly lighted up for his reception.

The following day (the 26th) had been fixed as the last of the Duke's short stay. At two P.M. he re-embarked with his suite on board the *Moyune* from the Customs' jetty, many of the community availing themselves of the courteous invitation addressed to them in the following circular to accompany the steamer to Woosung:—

I am directed by H. R. H. the Duke of Edinburgh to state that, the steamer *Moyune* having been courteously placed by the directors of the S. S. N. Co. at his disposal for return to Woosung, he will embark at the Custom-house jetty to-morrow, at two o'clock P. M. precisely, and that he will be happy if the ladies of Shanghai and any of the gentlemen who have so kindly co-operated to make his stay agreeble will avail themselves of the opportunity to make the trip in his company. H. R. H. will direct the band of H. M. S. *Galatea* to be in attendance on board.

W. H. MEDHURST.

A large crowd assembled on the Bund to see H. R. H. start, and gave him several hearty rounds of cheers, which he repeatedly acknowledged.

The community invited the Admiral, Sir Henry Keppel, to share in the reception given to his Royal Highness the Duke of Edinburgh. The invitation Sir Henry was reluctantly obliged to decline.

Mr. Forbes, appointed to the newly created post of Marine Commissioner, has arrived by the last mail.

The Shanghai *News Letter* says:—"The sanitarium scheme, by which a certain number of subscribers undertake to build a first-class hotel at Chefoo, is being successfully carried out under the management of Mr. A. Bielfeld, of Shanghai; and during the early part of 1870 a fine large house on the beach will be completed, and accommodation made therein for at least thirty visitors."

## HONG KONG.

From this port we have advices to Nov. 4. The departure of the mail appears to have been postponed, as the date, according to the time-table, should have been Nov. 2, and the overland issues of the local papers bear that date. The outward mail of Sept. 10 was received on Oct. 21.

The *China Mail* of Nov. 2 says:—

The chief local event since the departure of the previous mail is the arrival of H.R.H. the Duke of Edinburgh. The *Galatea* entered the harbour soon after 7 A.M. on Sunday (Oct. 31), and exchanged salutes with the Admiral (Kellet). The harbour soon assumed a gay appearance, the ships lying there dressing rapidly. H.R.H. landed early in the afternoon, and tiffined and dined with his Excellency Sir R. MacDonnell. During the day he walked through parts of the city, and from what he saw H. R. H. is no doubt satisfied that his reception in Hong Kong is animated by a sincere spirit of welcome. In the order of things his arrival happens very opportunely. The same number of this journal which chronicles that fact also contains the statement that H. R. H. was not "received" at Peking, together with a

Digitized by Google

tolerably full and explicit declaration of the views which the oldest and most experienced residents in Hong Kong hold as to the policy which has induced the virtual recall of Admiral Keppel. To-day the Duke will make his official landing, to do honour to which ample preparation has been made. The levee will follow. In the evening there will be a reception by Lady MacDonnell at Government House; on Wednesday, theatrical performances by English and German amateurs; and on the following day a ball at the City Hall. Under all the circumstances, therefore, we may entertain a hope that H.R.H.'s future reminiscences of the East, as derived from his experience of Hong Kong, will not be unpleasant to him, nor to her whom we Englishmen venerate as our Queen, and for whom men of all nations here who are not her subjects having feelings of the deepest and most sincere respect.

The *Overland Trade Report* states that the dinner given to Admiral Keppel on the 29th October, at the Banqueting Hall of the Freemasons' Lodge, was very largely attended, and went off most enthusiastically. There has probably never been before so striking a demonstration of public feeling in Hong Kong. Not only the largeness of the attendance, but also their enthusiasm was unparalleled upon any like occasion in China; and it may be taken as a most significant demonstration not only of the well-merited popularity of the veteran Admiral, but also of the feeling entertained with regard to the policy which he represents, and has so ably maintained. The sentiments given utterance to will meet a response in the hearts of all those who are acquainted with the career of this veteran sailor in these parts. As observed by Mr. Pollard, in his magnificent oration, he has not only displayed the qualities of a great sailor, but he has also in the course of his lengthened and eventful career shown himself possessed of the high qualifications of the head and heart, the coolness of judgment, the uprightness of design which in the troublous days of early intercourse with this nation were essentials in the naval officers placed in command; and which it will be a fatal error for the Government to imagine can be dispensed with even in the present day. Sir Henry Keppel undoubtedly deserves the credit of having proved himself beyond question a man thoroughly capable of performing his duties, and having never flinched in doing so. The Admiral in returning thanks for his health expressed his opinion that Western nations were beginning to perceive that their interests in these parts were not to be furthered by "conciliations, concessions, and apologies;" and the Hon. W. Keswick, who occupied the chair, expressed his belief that the mistaken policy adopted by the Home Government had now nearly worked itself out.

The *China Mail* has the following further remarks on the character of the speeches:—Even the cautious and non-committing though socially genial speech of H. E. the Governor found in the occasion of the banquet "a political significance." Of the chairman's speech, replete as it was with eloquence and good feeling, nothing need in the way of compliment be said. But as speakers for the community, both Mr. Keswick, Mr. Gibb, and the Acting Attorney General, are entitled to its lasting thanks for the very able manner in which the strong opinion entertained of our recent policy in China was enunciated. The latter gentleman has given a reminder to the so-called "Peace party" which may serve to mitigate the affected horror with which they will receive the tidings that a "standard bearer" of our national greatness, as Mr. Keswick happily called him, has been fêted and encouraged and cheered with an enthusiasm hitherto unknown amongst the easy-going foreign residents of China. "It is," said the learned gentleman, "by the action of such men as Keppel only that residence has been made possible in China;" and this fact, nakedly stated, lies at the bottom of our enthusiasm, and of our condemnation of the Home Government's suicidal policy.

There were, however, two other speeches which possessed a political significance of their own—those of Mr. Taylor, in proposing the health of the Foreign Consuls, and that of Mr. Overbeck, Consul-General for Austria, in reply. Mr. Taylor took advantage of the occasion to refer very pointedly to the want of official support experienced by our own officials, and such expressions on such an occasion will have much weight. Mr. Overbeck's answer was an unmistakable avowal of sympathy with the views of previous speakers; and coming from one who both in his official and social capacity occupies so leading a position, is perhaps the most valuable testimony to the general opinion entertained of our policy by foreigners which has yet been manifested in China. Mr. Overbeck spoke rather in the character of umpire than of partisan. Mr. Ross Browne has indeed inculcated similar views, but he was the Minister of a Government which is intimately interested in our relations with China. But when we find the able representative of a Power hitherto almost unmentioned in China coming forward as an independent advocate of the policy which Admiral Keppel represents, we may be sure that the feeling of sympathy has a source beyond shirtings and dollars.

The Duke of Edinburgh, as Captain of H.M.S. *Galatea*, joined most heartily with his officers in bidding good-bye to Admiral Keppel. It is a long time since an old Admiral's departure from China was regarded with so much interest as was that of Sir Henry Keppel's in the *Salsette*. H.R.H. pulled the stroke oar in the boat which took the Admiral to the steamer, the other oars being taken by officers of the *Galatea*, Commodore Jones acting as coxswain. When the boat came alongside the steamer, H.R.H. stepped aside, and gave place to the Admiral in going on board, and then (taking off his cap) cried, "Now, boys, give us a cheer." Three hearty cheers were then led off by the Duke, which were taken up and continued by those on board the mail steamer, Admiral Keppel himself replying with one cheer more as the steamer was moving. Admiral Kellet and his Excellency the Governor were both on board. About half a dozen yachts accompanied the steamer down the harbour.

In the Supreme Court on Oct 20, the Acting Attorney General announced that instructions had been received from Home to enter a *nolle prosequi* in each of the two *ex officio* criminal informations filed by the Hong Kong Government, pending against the proprietors of the *China Mail*, for alleged public libel; and also the Court was informed that leave was refused to the Hong Kong Government to apply for appeal to the Privy Council against the judgment of Chief Justice Smale, in a third similar action against the same defendant. The judgment therefore stands, although the law officers of the Home Government guard themselves against accepting it as a precedent; but the taxed costs which were awarded by the Court to defendant, in compliance with an understanding entered into by the Acting Attorney General, on behalf of the Crown, and the defendant have not yet been paid.

A coolie-broker, who has supplied a number of coolies for the Belgian ship *Frederic*, was brought up before the marine magistrate on a charge of having made false representations to certain coolies engaged to proceed in the said vessel. It is alleged that this middle-man gave it out that Messrs. Jardine were the security for the payment of their quarterly allowance to their friends when the coolies left for Peru; and as this was false and was the means of inducing many to go who otherwise would not have come down country, the broker has been charged. Mr. Smith, Registrar-General, was prosecutor, a representation of the case having been made to him by a Chinese deputation. The defendant was discharged for want of sufficient legal proof, but it was evident there had been foul play, and the magistrate warned those implicated against further malpractices.

## COCHIN CHINA.

—o—

### SAIGON.

Letters from Saigon, dated Oct. 25, announce that the French Governor had received instructions from Paris to negotiate with the ruler of Annam for the final cession of three provinces in Cochin China, which are virtually united already to the French possessions in that region.

The *Courrier de Saigon* says:—The opium question has just received a solution, such as was hoped for and desired by the interests of the Colonial Budget. The Commission instituted to examine the different modes of taxation applicable to that article has decided in favour of the absolute liberty of trade in it, and on a simple charge by means of trade licences of different classes. The local Board of Trade, on its side, has received communication of the labour of the commission, and shares its opinion from purely commercial reasons. The system of farming out the trade is, however, to be continued for some time hence, as a special organisation to succeed the former method could not be created in a moment, and there would be a danger of diminishing by a too sudden transformation the revenue indispensable for completing the numerous public works in the colony. Merchants were consequently invited to send in tenders for the concession for a further period of three years, which may be prolonged to four if required. Four candidates presented themselves, of whom one was set aside for informality; the offers were f.2,400,000, f.2,464,200, and f.2,557,500 a year; the last, by M. Banhap, merchant of Saigon, who, in consequence, obtained the contract. The terms accepted are an advance of f.466,500 on the present concession.

## STRAITS SETTLEMENTS.

—o—

### SINGAPORE.

Dates are down to the 9th Nov. The P. and O. mail of Sept. 24 arrived out on the 27th Oct., and the French mail of Sept. 30 on the 3rd Nov.

The principal topic was the expected visit of the Duke of Edinburgh, which had been delayed by various causes. Scarcely less exciting was the arrival of Admiral Keppel, *en route* to England, by the P. and O. steamer *Salsette*. A grand tiffin was given to the Admiral at the P. and O. Company's premises in New Harbour, at which nearly all the members of the community were present.

At a meeting of the Legislative Council on the 2nd Nov. the Governor informed Mr. Read that the Colonial steamer had not been even ordered, and the £23,000 set aside for her remains unspent.

At a meeting on Oct. 29, the *Straits Times* says:—

"The Auditor-General submitted a supplementary estimate for the year, amounting to $33,148, divided over a series of heads—none of which seem to call for any special comment. We cannot expect our expenditure to be prejudged to a nicety, and the sum named bears merely a fractional proportion to the whole. No opposition was made to the appropriation of the sum required, and an ordinance for that purpose has since been duly passed.

Digitized by Google

The Committee on Education also presented their report at the meeting on the 29th, and the recommendations as to increased Government aid have been adopted. At the meeting on the 2nd inst., besides the final adoption of the two measures we have alluded to, a petition was ordered to be addressed to Her Majesty's Government, praying that the transmarine convicts of this settlement might be sent to Labuan in place of to India as heretofore, and *vice versa*. This, when allowed, as it doubtless will be, will not only save this colony a considerable sum for transport expenses, but will confer a very substantial boon upon Labuan, the mines of which will never be so well worked as with a leaven of forced labour."

H.M.S. *Rodney*, from China and Japan to England, arrived on the 28th Oct., some six weeks out. So much for Admiralty economy in giving orders for her not to steam.

An enquiry has been held as to the loss of the *Devonport*, and the award found by the marine magistrate and assessor is that the captain acted judiciously, and his certificate was returned to him.

The loss of the *Inarime*, from Foochow to London, is thus reported:—

Information has been received, per *Samson*, from Labuan, of the loss of the British ship *Inarime*, of London, 669 tons, Captain Robert H. Ivey, on the London reef, on the morning of the 4th Oct. The *Inarime* was bound from Foochow to London, with a full cargo of tea. After the vessel struck, the captain and crew started off in three boats for Labuan; the chief officer and five men in the cutter, the 2nd officer and five men in the gig, and the captain and the rest of the crew in another boat. The chief mate's boat was lost sight of the first night; the 2nd officer, with the gig, kept company with the captain's boat until the 3rd day, when it also was lost sight of. After being in the boat six days, the captain with his boat's crew were picked up by the French barque *St. Yves*, of Nantes, from Saigon for Japan. The shipwrecked men were treated with the greatest kindness, and landed at Labuan on the 11th Oct. It is possible the chief officer finding himself unable to keep up with the other boats may have gone back to the wreck. Capt. Ivey was awaiting the arrival of H.M. gunboat *Elk*, at Labuan, anticipating that she would visit the wreck with him, and endeavour to save some portion of the cargo, and also, if possible, ascertain the fate of the missing men.

The *Dr. Peterman* (North German), from Canton to New York, with a sundry cargo of cassia, matting, &c., has put into Singapore for repairs.

At a meeting held in Penang it was resolved that subscriptions be invited for the purpose of a memorial to the memory of the late J. R. Logan, Esq.

# Commercial Report.

(*For dates see First Page.*)

## CEYLON, STRAITS, JAVA, CHINA, AND JAPAN IMPORTS.

YOKOHAMA, OCT. 30.*—A continued decline in the value of the native coin had restricted business, and transactions had been mostly confined to Cotton Yarn, for which, however, there had been a good demand, leading to rather higher prices. Sales of Grey Shirtings had been on a very moderate scale, and the same applies to nearly all kinds of Woollen and Fancy Goods. Quotations:—G.E. Grey Shirtings, 7 lbs., $2.55 to $2.60 per piece; 8¼ to 8½ lbs., $3 to $3.05; 9 to 9¾ lbs., $3.55 to $3.60; G.E. White Shirtings, $2.80 to $3.20; T-Cloths, 6 to 7 lbs., $1.80 to $2.20; Cotton Yarn, 16 to 24, $52.50 to $53 per picul; 28 to 32, $54 to $54.50; Camlets, S and BBB, $13.50 to $14.50 per piece; SS, $13 to $14; SSS, $9.50 to $10 50; Cloth, Medium and Broad, 80c. to $1.60 per yard; Lastings, $13 50 to $14 per piece; Long Ells, Assorted, $8 to $8.75 per piece; Lead, $6.25 to $6.75 per picul; Iron, Nail Rod, $3 to $3.50; Bars, $3.20 to $3.50.

SHANGHAI.—Business had been extremely limited. For many years there had not been such a dull time in Piece Goods, and it is not easy to say whether this is due to a combination on the part of Chinese buyers or to a diminished inquiry at the outports. Grey Shirtings: Transactions confined to a few re-sales by Chinese holders to foreigners at low rates for cash. Sycee had been very scarce among the natives, and as their prompts had matured, they had been willing sellers, even at a considerable loss. Quotations: 7 lbs., Tls. 1.98 to Tls. 2.03; 8 lbs., Tls. 2.17 to Tls. 2.22; and 9 lbs. to 9.12 lbs., Tls. 2.45 to Tls. 2.75 per piece. Heavy Goods remain very dull of sale, at a decline in price. T-Cloths: Supplies had come in so freely, and the demand had been so languid, that sales had been almost impossible to effect. Quotations: Tls. 1.40 to Tls. 1.6.5 per piece for 6 lbs.; Tls. 1.7.0 to Tls. 1.9.2 per piece for 7 lbs.; and Tls. 2 to Tls. 2.40 per piece for 8 lbs. to 8¼ lbs., 36 inch. White Shirtings dull and lower, sales of a retail character. We quote 56 reed Tls. 2 1.0 to Tls. 2.1.5, 60 reed Tls. 2.2.5 to Tls. 2.3.0, 64 reed Tls. 2.35 to Tls. 2.40, and 66 reed Tls. 2.45 to 2.47 per piece. Transactions for the fortnight on a most limited scale. Drills: Sales of American Goods (Mixed Chops) reported at a decline on last figures—best chops Tls. 4 per piece, with Chinese sellers at this price for prompt delivery. English Drills in fair inquiry for the river-ports at about last prices; but holders were not inclined to realise their stocks at current rates. Jeans of all kinds neglected, quotations nominal. Sheetings: Small sales of American at last rates; English worth Tls. 3.20 to Tls. 3.25 per piece, with a retail inquiry. Fancy Goods: Only small sales reported, prices showed no material change. Woollens, &c.: Fair sales of C P H Assorted Camlets effected at the early part of the fortnight; but the demand had since died away—prices at the close being rather weaker. Metals.—Iron: There had been a good demand for Nail Rod Iron, particularly for small sizes, which had advanced in value owing to their scarceness; large sizes, on the contrary, being in heavy supply were difficult to move even at a slight concession in price. Nail Rods had changed hands to the extent of some 22,000 bundles; but of Bars only one settlement of 50 tons was reported. Lead: There had been some speculation, and an advance of 1 to 2 mace was established. L.B. Tls. 5.2.8. Coals: Sales unimportant, and prices about the same as last advised. The current quotations were:—Camlets, English, SS, per piece, Tls. 11.5.0 to Tls. 12.5.0; Spanish Stripes, per yard, Tls. 0.5.2 to Tls. 0.8.0; Medium Broad and Habit Cloth, Tls. 0.9.5 to Tls. 1.5.5; Long Ells, Scarlet, per piece, Tls. 6.2.0 to Tls. 6.3.0; Assorted, Tls. 6.3.0 to Tls. 6.3.5; Iron-Nail Rod, per picul, Tls. 1.9.0 to Tls. 2.0.8; Lead, per picul, Tls. 5.2.0 to Tls. 5.3.0; Tin Plates, per box, Tls. 4.5.0 to Tls. 5.0.0; Coals (cargo quotations afloat)—Cardiff, per ton, Tls. 8.0; North Wales, per ton, Tls. 7.7.5; English, per ton, Tls. 6.6.0; Anthracite, per ton, Tls. 9.7.5.

HANKOW.—Grey Shirtings: Few sales, and, owing to want of inquiry, the slight advance last reported had been lost. There was some demand for 7 lbs. goods at lower rates, but the market closed dull at Tls. 2.02 to Tls. 2.05 for 7 lbs.; Tls. 2.20 to Tls. 2.25 for 8¼ lbs.; and Tls. 2.75 to Tls. 2.85 per piece; nominal for 9¾ lbs. goods. White Shirtings dull of sale. T-Cloths, 7 lbs., had not been wanted; for 8 lbs. goods there had been a fair inquiry, but at the close the demand had fallen off. Drills: Good English makes asked for at Tls. 3.80 per piece; common qualities neglected. Fancy Cottons: Dyed Spots and Brocades, Chintz and Black Velvets in request; prices firm. Dyed Damasks, 5 candareens lower. Camlets: A large business had been done at about last quotations. Gentian, Green, and Purple were the colours most wanted. Lastings dull, few sales; Long Ells no inquiry. Spanish Stripes had found buyers to a small extent, and there was some demand for good Broad Cloth. Figured Orleans: Choice assortments saleable at Tls. 3.80 to Tls. 3.90 per piece. China Crapes declined to Tls. 4.60 to Tls. 4.65 per piece, with moderate inquiry. Metals.—Lead: But small sales had been made at the advanced rates, and there was a fair stock. Quicksilver unaltered, few sales.

FOOCHOW.—The following had been the transactions during the interval:—2,250 pieces 8¼ lbs. Grey Shirtings at $3.10 to $3.15; 500 pieces 7¼ lbs. at $2.90; 500 pieces 8 lbs. T-Cloth at $3.10; 2,000 pieces 7 lbs. at $2.40 to $2.45; 500 pieces T.R. Cloths at $3.10; 120 pieces Spanish Stripes at 82½ cents per yard. Lead: 500 pigs at $7—cash; 1,000 pigs at $7.25 to $7.50 against tea.

HONG KONG.—Cotton Yarn: After making heavy purchases the dealers had been in a much quieter mood, and the fortnight's sales showed a greater falling off in the quantity taken. Prices were a little weaker on the whole, but there were no decided evidences of an actual decline. Grey Shirtings: Sales were progressing very slowly at about the prices quoted in our last, when the announcement of a large quantity of ordinary qualities of 8-4 lbs. having been forced off at $2.80 to $2.82½ per piece destroyed what little confidence there previously existed. The finest qualities could hardly be quoted $2.85 per piece at the close. 7 lbs. very dull, and declined to $2.52½ to $2.55 per piece. White Shirtings: In inquiry for the lower reeds, but the better qualities quite neglected, and, to make sales totally inadequate, prices would have to be accepted. Grey T-Cloths: 6 lbs. of ordinary makes saleable at $1.97½ to $2.0 per piece, Mexicans not wanted. 7 lbs. in request only as regards the usual qualities, and the choice lots of these commanded $2.17½ to $2.22½ per piece. Grey Twills: A trifling inquiry for shipment to the North had existed, but very low prices were offered and only a few Dutch goods had been sold. A parcel of 8 lbs., 30 yards Jeans taken at $3.70 per piece for shipment. Dyed and Fancy Cotton: 600 dozen Turkey Red Flowered Handkerchiefs had been moved at $1.00 per dozen, and 250 pieces Gentian Twills at $3.15 per piece. Long Ells: Moderate sales, at about last quotations. Camlets: Inquiry extremely limited, an advance tried for having checked purchasers. Lastings firmer; the prices asked tended to keep buyers from operating. Crape Lastings had found a little favour. Metals: Nail Rod Iron difficult to move at $2.50 to $2.55 per picul for ordinary sizes; where there had been any choice of assortments, however, the dealers had bought more freely at these rates. Round, Square, and Flat Bar inquired for. Wire unsaleable. Tin Plates quiet. Quicksilver unchanged. Lead had fallen out of demand, and "L. B. and Co." was offering at $6.25 per picul. For "W. B." no reliable quotation can be given. Quotations—Cotton Yarn, per bale. 16 to 24, $145 to $148; 28 to 32, $150 to $155. Grey Shirtings, 7 lbs., $2.50 to $2.52½; 8.4 lbs., $2.80 to $2.85; White Shirtings, $2.50 to $3.60; T-Cloths, 6 lbs.. $1.95 to $2.00; 7 lbs., $2.20 to $2.25; Mexicans, $2.30 to $2.45; Long Ells, per piece, Scarlet, $7.70 to $7.80; Assorted, $7.70 to $7.90; Camlets, SSS., $13.50 to $14; SS., $15 50 to $16.25; S., $17.25 to $17.75; Lastings, assorted, $13.75 to $16; Crape Lastings, $11 to $11.75; Figured Lustres, $4 50 to $6 50. Iron—Nail Rod, $2.45 to $2.55; Bar, $2.60 to $2.75; Hoop, $2.90 to $3.10; Tin Plates, $6.10 to $6.75; Quicksilver, $62.50 to $63; Coals, English, $7 to $7.50; Welsh, $8 to $8.50.

BATAVIA.—Grey Shirtings: 8¼ lbs. not asked for; 7 lbs. low in stock: some inquiry; importers are asking an advance. Grey Madapollams. Heavier weights wanted; some demand for Sourabaya; stocks light Drills: Dutch f.9 cash. White Shirtings: The lower reeds entirely neglected, for the higher only low bids made; extensive sales of 45 inch at f.10.50 cash. Prints had attracted little attention; Pink Pads taken for Samarang to some extent at f.8¼ to f.8½. Yarn: Market for Grey Yarn spoiled by sales at auction of sea damaged goods, ex Syringa; 40's placed at. f.4.10 cash; season concluded, and quotations purely nominal.

SINGAPORE.—A good demand for grey goods during the fortnight, and prices maintained. 8¼ lbs. Shirtings cleared off in considerable quantities at $2.85 to $2.90 per piece, fair sales of 7 lbs. and 6 lbs. Long Cloths not asked for, T-Cloths being preferred at most of the outports. T-Cloths in moderate request, prices unaltered. Grey Drills, 30 yards, both Dutch and English, in inquiry, 40 yards neglected. White Shirtings: the demand for medium fine goods had subsided, and prices were weaker, but the coarser descriptions of cloth were still saleable. Imitation Irish Linens in better supply, and a shade lower. White Madapollams had also sold at easier rates. Cambrics in moderate request, quotations unaltered. Figured Shirtings not inquired for. Small sales reported of Jacconets.

* Via San Francisco.

Digitized by Google

Brocades, Damasks, Lappets, and Mules, no business. Dyed Cloths showed little improvement. Plain and Figured Shirtings in no request, sales insignificant. Turkey Red Cambrics had sold to some extent, but at very low prices. Small sales of Prints at low rates. Sarongs in better demand, and considerable clearances made; for the finest description at fair prices, common and inferior at low rates. Handkerchiefs in some request for better descriptions. In Grey Yarn very little done; late arrivals cleared off, and market bare of the lower Nos.; prices a shade lower for the higher Nos. Small sales of Turkey Red Yarn at previous rates. Coloured Yarns in less inquiry. Woollens of all descriptions nearly unsaleable. In Metals there was no improvement to note. Iron very dull, lower rates accepted. Yellow Metal in improved demand; fair sales reported at the rates of last mail. Coals in small inquiry, and the transactions reported show a decline in price; Cardiff sold at $7\frac{3}{4}$ per ton 8 m.c., and West Hartley at $7 cash. The contract for the supply of the French Government taken at equal to $9 to $9\frac{1}{8}$ for Cardiff per ton put on board.

PENANG.—Grey Shirtings had been in but moderate request, at a decline in prices; 6 lbs., $44\frac{1}{2}$ per corge; 7 lbs., $50 to $51; 8¼ lbs., $59. In 45 inch no transactions. Grey Long Cloths not inquired for; no business; quotations nominal. Grey Madapollams: No stocks; quotations nominal. Grey T-Cloths: In moderately fair demand; sales reported of 4 lbs., at $24 to $23 per corge; 6 lbs. at $39$\frac{1}{2}$; and 7 lbs., at $45 to $44. White Shirtings not much decreased in stock; prices unimproved; small sales of fine at $86 to $108 per corge; of medium, $65; small demand for 45 inch, but stocks exhausted. White Cambrics in very weak inquiry, only unimportant sales effected, low at $20$\frac{3}{4}$ per corge, Nos. 15-16 at $32.40, being a fall on former prices. Grey Sheetings continued to work off at weakened rates; sales at $84 and $88 per corge. Sales of American Drills at $100 per corge in retail quantities; no Dutch on the market. In Dyed Goods very little business. Shirtings, Mulls, and Brocades quite out of the market. Prints: Jaconets $45 per corge; Turkey Red Cambrics dull of sale, 2 lbs. 4 oz. (invoice weight) $44$\frac{1}{2}$, 2 lbs. 8 oz. $49 per corge. Yarn of all kind inactive. Of Grey Mule the market was bare, quotations nominal; Turkey Red, $145; Imperial Red, $81 to $82; Green, $83 per bale.

## CEYLON, STRAITS, JAVA, CHINA, AND JAPAN EXPORTS.

### TEA.

YOKOHAMA, OCT. 30.*—About 9,000 piculs had been taken for the American market, and some small lots for England. Prices had been firmly maintained until near the close, when dealers showed more readiness to sell, and the market had a downward tendency. Fine Teas continued scarce, and arrivals were greatly mixed in quality, rendering the maintenance of standards very difficult. The current quotations were—Common, $19 to $21; good common, $22 to $24; medium, $25 to $27; good medium, $28 to $30; fine, $32 to $35; finest, $36 to $39; choice, none.

SHANGHAI.—Black: A large business had been transacted. Commonest descriptions, quality considered, showed scarcely any decline, but medium kinds had fallen in value a little. Supplies had come forward without stint, and, notwithstanding the heavy settlements, the stock was no less than 43,000 chests. Natives were rather desirous to sell, and the market closed weak. Settlements for the fortnight, 30,000 chests; reshipments on owners' account, 5,500 chests; stock, 144 chops, or 43,000 chests. Quotations, duty paid, exchange at 6s. 0¼d. per tael, and freight at £2:—Shanghai-packed, 11d; Hohow, common, 1s. to 1s. 1d.; Oonam, common to fair, 1s. 0½d. to 1s. 2d.; Ningchow, common to fair, 1s. 1½d. to 1s. 2½d.; Oopack, fair to good, 1s. 1¾d. to 1s. 2¾d. Green: Considerable transactions had taken place, the greater portion being on American account. Low and medium kinds again showed a small concession in price, but fine and finest descriptions had been bought at rates fully up to those previously current. The stock was increased to 78,500 half-chests. The following were the quotations: Moyune and Teenkai, Tls. 32$\frac{1}{2}$ to Tls. 34¼; Fychow, Tls. 31 to Tls. 33½; Pingsuey, Tls. 33 to Tls. 38; Shanghai-packed, Tls. 24 to Tls. 33. Settlements for the fortnight, 32,000 half-chests; re-shipments on owners' account, 2,500 half-chests; stock—150 chops, or 78,500 half-chests.

HANKOW.—The following is from Messrs. Drysdale, Ringer, and Co.'s Report:—The business done during the fortnight has been limited, the excess in our export, together with the less favourable advices from home for low class Teas, having made buyers exceedingly cautious. Teamen have been anxious to sell on this market rather than ship to Shanghai for sale, and in order to do so have offered their Teas at a decline; but as the rise in exchange and freight fully covers the reduction in price they have met with but little response from buyers, and their shipments since date of our last reach 12,700 packages. Settlements for the fortnight are about 3,900 and 1,500 half-chests, closing rates showing decline of Tl. 1 to Tls. 1½ per picul. Our export to date is in excess of last year about three million pounds. We do not see any chance of improving the position of our supplies, as the quantity yet to come is expected to equal the quantity received for corresponding period of last season. We quote Shuntam packed, Tls. 14 to Tls. 14½; Oopacks, common to fair, Tls. 15 to Tls. 16½; Oanfas, common, Tls. 16 to Tls. 17 per picul. Settlements from 6th to 20th October: 1,760 chests, 730 half-chests, at Tls. 14 to Tls. 16, at ex. 6s. 1d. and £2. 10s. frt., equal to 1s. 1d. to 1s. 2½d.; 2,100 chests, 860 half-chests, at Tls. 16½ to Tls. 18½, at ex. 6s. 1d. and £2. 10s. frt., equal to 1s. 2½d. to 1s. 3½d.; Total, 3,860 chests, 1,590 half-chests.

KIUKIANG.—Black Teas: No business had been transacted. Arrivals from the Hohow district had been rather liberal. Quotations were nominal. Export from Jan. 1 to Oct. 22, 1869, 13,171,404 lbs.; export from Jan. 1 to Oct. 22, 1868, 15,335,515. Stock, 386 packages. Green Teas: Only one transaction reported during the fortnight. Arrivals had come forward freely, but teamen had demanded extreme rates. Export from Jan. 1 to Oct. 22, 1869, 5,016,995 lbs.; export from Jan. 1 to Oct. 22 1868, 4,023,609 lbs.

FOOCHOW.—The following is from Messrs. Odell and Co.'s Circular:—Congous: In the early part of the interval only limited settlements were reported, but latterly more disposition has been shown to purchase fair to good common kinds, and we have now to report a fairly active demand at fully previous quotations. The better grades have also attracted some attention, and settlements have been made at very full rates. Australian buyers have again entered the market, and the demand on Continental account has continued. Arrivals from the country have been large, and the stock on offer is again increased. Souchongs: Those with quality find ready sale at full rates. Oolongs: Only a moderate business has been done, and some purchases of fair to good cargo kinds have been made at a reduction of about one tael per picul. The only remaining "line" of fine teas has been settled at an extreme price, say Tls. 31.5.5 per picul, ship off. Supplies have not come in very freely, and there seems but little doubt that the total for the season will show a falling off of about 30,000 to 40,000 half-chests. Scented Teas: About 6,000 boxes have found buyers at former rates. Settlements for the fortnight have been:—Congou, 31,428 chests, at Tls. 9.8 to Tls. 26.8 per picul, ship off; Souchong, 1,507 chests, at Tls. 17.8 to Tls. 28.8; Oolong, 13,612 ½-chests, at Tls. 16.3 to Tls. 31.5.5; Scented Teas, 6,016 boxes, at Tls. 8.5.5 to Tls. 25.8; Flowery Pekoe, 280 chests, at Tls. 28.8 to Tls. 35.8.

### SILK.

YOKOHAMA, OCT. 30.*—The market had been tolerably active, fully 600 piculs having been settled. Prices, more especially for Hank sorts, showed a decline of from $20 to $30 per picul, but this apparent concession on the part of the dealers was more than counterbalanced by the enhanced value of the dollar, in exchange for native coin. Arrivals had been confined in great measure to medium and common parcels of Hanks, of which the unsold stock, estimated at about 900 piculs, was mainly composed. The P. and O. steamer China, which left for Suez direct, on the 29th Oct., took forward 495 bales Silk, and 1,645 cases of Silkworm Eggs. The balance of the Silk settlements, and a further quantity of Eggs, would be shipped per M.I. steamer Labourdonnais, to leave on the 31st. Purchases of Silkworm Eggs to date exceeded 1,000,000 cards, leaving about 300,000 of inferior quality on the market. Bivoltinis were selling at 25 to 50 cents per card, according to quality.

SHANGHAI.—Messrs. C. J. Skeggs and Co.'s Report, dated 26th October, is as follows:—Since our last issue telegrams are to hand *via* Kiachta to the 28th September, that to the Chamber of Commerce reading as follows.—"Silk dull, Red Peacocks 24s. No. 3 Tsatlees 29s." The above news is generally considered very unsatisfactory, as the fact of our short export has been accepted at home without any response, either in the shape of advanced prices, or increased deliveries. Business has therefore been on a more moderate scale during the past fortnight, notwithstanding the lower current rate of exchange, which is equal to about Tls. 5 in favour of buyers. Settlements are estimated at about 1,500 bales, and prices all round may be considered unchanged, except for common Tsatlees, which being scarce and wanted have been taken at an advance of fully Tls. 5. Medium and best descriptions show no alteration in price, but the latter being also in short supply are firmly held. The following are a few of the leading settlements:—Yakee chop, Tls. 560; Donkey, Tls. 557½; Blue Flag, Tls. 520; Gold Lion, Tls. 515; Elephant, Tls. 490; and Red Peacocks, Tls. 467½. No. 2 "Fatmow" Hainins have been rejected as very common, at Tls. 480. The market is quite bare of common Taysaams, which are being used for native consumption, whilst the medium and good grades are held for very full prices.

### STRAITS, JAVA, AND CEYLON PRODUCE.

BATAVIA.—Arrack (4 per cent. overproof)—Transactions at f.120 per leaguer. Coffee—Java: For ordinary Green Java deliverable at Samarang, the nominal quotation was f.32, and for Blue Bean f.35 to f.37 per picul. The Government will sell 50,000 piculs by auction early in December. Padang: The Government had sold at auction 49,000 piculs No. 1 and 2,200 Triage, which averaged respectively f.37.12 and f.14.04½ per picul. Cubebs: Offering at Samarang at f.16 per picul. Gum Damar, f.47 to f.48 per picul. Indigo: Sales of prime quality at Samarang at f.5.25 to f.5.40 per Dutch pound. India-rubber scarce; sales at f.90 to f.100 per picul. Gutta Percha: Market bare. Tin, Billiton: Some 5,000 piculs sold by auction at an average of f.74.48 per picul. Nutmegs—In brisk request at f.105 to f.110 per picul for nuts of 110 to the pound. Mace—Much run upon at f.110 to f.115 per picul. Pepper—Black: Market bare; last sale of Lampongs at f.18 per picul; White—None offering. Rattans—Padang, f.8 to f.9; Borneo, f.9.75 to f 12 per picul. Sugar—No. 14, f.16.50 to f.16$\frac{3}{8}$ per picul. The Government sold by auction on 9th October 95,000 piculs, of wh ch 30,000 piculs were No. No. 14 and lower, and 65,000 piculs Nos. 15-20. The average of the two assortments was f.16.31 and f.15.24 per picul respectively.

SINGAPORE.—The market for produce generally had further declined. About 1,100 tons Gambier taken at $3.12½ to $3.10 per picul, but the price had declined to $3.05 to $3 Rhio, No. 1, $3.70 per picul. White and Black Pepper out of season, no parcels offering. Pearl Sago quoted $3.15 for medium Grain. Sago Flour $2.55 to $2.40 per picul. Bontyne Coffee offered at $12.35 per picul. Tapioca in small request, at $4.50 per picul. Gutta-percha lower. Tin lower, and had been taken up to some extent at $30.10 per picul.

PENANG.—The Produce Market had been quiet at this season. The price of Tin opened at $29½ per picul, since which it declined to $28, the last price paid. There was a considerable quantity on the market, but holders were not willing to sell at less than $28¼ per picul. No Black Pepper had come forward, but some remains of former stocks realised $7.50 for West Coast and $7 30 for Acheen; a small quantity of White taken at $10 per picul. Tapioca: Contracts nearly filled, and arrivals secured at former rate, $4.55 per picul. Sugar in excellent demand, former prices maintained. Penang Coffee $12 per picul; season just beginning. Cloves season not yet opened. Cutch, in boxes, $4.80 per picul.

COLOMBO.—The weather had been somewhat broken, unmistakeable evidence of which will be found in the deficiency of over 2,700 tons of

* *Via* San Francisco.

* *Via* San Francisco.

Digitized by Google

plantation, and of over 1,200 tons of native shipped as compared with the previous year. An adverse telegram reporting a fall of 5s. in Plantation and 2s. in Native had not been met by any corresponding reduction, it being given as a reason that heavy contracts are in hand which will occupy dealers for several weeks who, in the meantime, are not over anxious to deepen engagements except at what may be called an insuring margin—11s. was asked for anything like a presentable parcel of parchment. We have not heard of any transaction in an estate crop under 11s. 9d Native the little offering was taken at about 34s., with 10 per cent. picking Cocoanut Oil: The last transaction reported was at 27s. for a small parcel. The article attracted no local attention. Cinnamon: Without change, at previous quotations; Chips in good demand, and advanced to 4½d. Plumbago was taken readily at full rates for desirable parcels; inferior quality neglected, and holders rather than accept the reduction preferred to ship. Coir: Good Yarn readily saleable. Coals quite unsaleable

## ARRIVALS.

At YOKOHAMA.—From London, Oct. 13, Miako; from Liverpool, Malacca; from Cardiff, 25, Varuna; from Baltimore, 13, Helen Hood; from New York, 25, Volunteer.

At HIOGO.—From London, Oct. 26, Westbury; from Liverpool, Frederica.

At NAGASAKI.—From London, Sept. 21, Esperanza; from Liverpool, Sept. 7, Ensign.

At SHANGHAI.—From London, Oct. 20, Elizabeth Nicholson; from Newcastle, 25, Elizabeth Douglas; from New York, 31, Etha Rickmers; from London, reported by telegram, Nov.—Oberon (str.), Lammermuir, Dilpussund; from Newcastle, Oct.—Nyassa.

At HONG KONG and CANTON.—From London, Oct. 22, James Shepherd; 27, Ferndale, from Portland; Onward, from Cardiff; 28, Henry Reed; 29, Venus; from Hamburg, 19, Herzog Ernst.

At MANILA.—From Liverpool, Oct. 24, Doriga, from Cadiz, 22, Florida Blanca.

At SINGAPORE.—From Rotterdam, Oct. 27, A. Johanna.

At PENANG.—From Hamburg, Oct. 30, Tony.

At SINGAPORE.—Reported by telegram—from Liverpool, Oct. 20, Cora Linn; from London, 22, Otter.

At BATAVIA.—From Amsterdam, Oct. 24, President van Ryckevorsel; 27, Batavia; 28, Ensgezindlierd; Nov. 1, Zeenymph; from Rotterdam, Oct. 30, Robertus Hendricus; from Shields, Nov. 1, Golden City, from Liverpool, Perpetua.

At COLOMBO.—From London, Nov. 7, Palestine.

At GALLE.—From Cardiff, Nov. 7, Alice; reported by telegram, 28, Vigilant.

## DEPARTURES.

From YOKOHAMA.—None.

From SHANGHAI.—For London, Oct. 19, Wimmera; 21, Lorton; 22, Wylo, Ornate; for New York, 23, Willy Rickmers.

From FOOCHOW.—For London, Oct. 22, Glenavon, George Shotton for New York, 21, Queen of the Seas.

From AMOY.—For London, Oct., Kavik, for New York, Dacre.

From HONG KONG and CANTON.—For London, Oct. 23, Gauntlet; for Callao, 24, Argo; for New York, Oct. 7, Dr. Peterman (put into Singapore).

Digitized by Google

From MANILA.—For London, Oct. 21, James Aikin, for Falmouth 14, Angela; 23, Hope, for Channel, via Ilo Ilo; 19, Joaquina Victoria, for Cadiz, via Ilo Ilo; Pedro Plandolit, for New York, 14, George Peabody.

From SINGAPORE.—For Liverpool, Oct. 29, Norham Castle; 3, Affghan, for Boston, Nov. 6, J.W.A. Lorenzen.

From PENANG.—For London, Nov. 7, Benvenue, for Boston, via Padang, Oct. 30, Argonaut.

From BATAVIA.—For Holland, Oct. 22, Indian Empire; 23, Somerset, William Poolman; 27, Mina; 28, Mary and Hillegonda, Herman de Ruyter, Wallace, Norna; 29, Schelde; 31, Walcherin Dordcht; for United States (*via* Padang), 25, Regina Maria; 27, Zeebloem, Inglewood; for Channel, 25, Thusnelda.

From BANGKOK.—For Europe, Sept. 15, Solid; 16, Thusnelda; 17, Mikado; 27, Indiana; Oct. 6, Preciosa.

From COLOMBO.—For London, Nov. 8, Helen Finlayson; 11, Elfin; 12, Ocean Rover; for Boston, Asphodel.

## VESSELS LOADING.

At YOKOHAMA.—For London, Crown; for New York, Phæton, Herbert Graham, Janet Ferguson.

At HIOGO.—For New York, Ravensbourne.

At SHANGHAI.—For London, Annesley, Barbadian, Corea, Dhollerah, Dundonald, Fluellin, John Lidgett, Lizzie Iredale, Tavistock, Wm. Chandler; for New York, Horatio, Jas. S. Stone, U. B. Palmer, Tynedale, W. E. Gladstone.

At FOOCHOW.—For London, Carmarthenshire, Ceylon, Albert Victor, England's Glory, Earl Dalhousie, Polar Star, Tyburnia, Beemah, for New York, Resolute; for Boston Jeanie.

At AMOY.—For New York, Craigie, Lea, Raleigh.

At HONG KONG and CANTON.—For London, Pakwan. Vanguard; for Liverpool, Veronica; for Continent, Faike; for Hamburg, Sea Mew; for Havana, Neva; for New York, Oliver Cromwell, Arracan.

At MANILA.—For London, Hindostan; for Cadiz, Espana, Cervantes, Elena; for Boston, Archer, Bunker Hill, Messenger; for New York, Western Chief, Franklin.

At BANGKOK.—For Europe, Crimea, Geverland, Johanna Augusta, Luzon, Oscar Mooyer, Ravenscliffe, Ravensworth, Ruhtinas, Sebastian.

At SINGAPORE.—For London, Tyco Brahe (st.), Chusan, Roxburgh Castle; for Boston, Siam; for New York, Gemsbok.

At PENANG.—For London, John Paul, Knighton.

At BATAVIA.—For Rotterdam, Hoek van Holland, Graafstroom, Maria and Sarah, Maria and Elizabeth, Libertas, Jedo, Johanna and Maria, Jason, Æolus, Henr, Adriana, Voorlichta, Alblasserdam, Kaap Hoorn, Copernicus, Ida Elizabeth, Walcheren, Sussana; for Amsterdam, Louis Meyer, Johanna Christina, Leopold G. V. L. Stirum, Orient, County of Stirling, Benlomond; for Copenhagen, Signe, Freya; for Holland, County of Nairn, County of Argyle; for Channel, Krimpen, A. d. Lek, Annie Fleming; for United States, Nevada, Herald, Noord Braband, Wildeman, Zeebloem, Regina Maris.

At COLOMBO.—For London, City of Paris, Ocean Beauty, Victor Albert, Wynaud, Lincells.

At GALLE.—For London, Peter Denny, Percy Douglas.

## FREIGHTS AND CHARTERS.

At YOKOHAMA.—To London, £4 per ton, of 50 feet; to New York, £2 5s. per ton, of 40 cubic feet.

At SHANGHAI.—To London £2; to New York, £2 10s. The Tycho Brahe loaded at £3 10s. per ton.

At FOOCHOW.—To London, £1 10s. to £2 per ton.

At HONG KONG and CANTON.—None.

At MANILA.—The only settlement to report is that of the Pedro Plandolit, 834 tons, taken up by Government to load 15,000 quintals Tobacco, at Ilo Ilo for Cadiz, at 30 reals vellon per quintal.

At AMOY.—For London and New York, £2 per ton.

At SINGAPORE.—To London, £2 5s. to £2 10s. The Tycho Brahe, steamer, took about 1,000 tons cargo, at £2 10s. to £3.

At PENANG.—There is no alteration to report.

At BATAVIA.—To Continent, sugar and rice, f.35 to f.40; to Channel £2 10s.; rice, to New York, £2 10s.

At COLOMBO.—To London, coffee in casks, 60s.; cinnamon and sundries, 45s. to 50s.

## SHIPPING POSTSCRIPT.

ARRIVALS NOT IN THE TABLES.—Nov. 27, at New York, from Manila, Sonora; from Hong Kong, A. W. Stevens; H. Upmann; Dec. 10, at Falmouth, from Saigon, for Rotterdam, Nereus; 13, at London, from China, Seawfell; 12, in the Downs, from Singapore, Sultan, at Queenstown; from Akyab, Emily; 13, at London, from Foochow, Clara; from Shanghai, J. R. Worcester; 12, at Liverpool, from Singapore, Kinfauns Castle; 12, at London, from Manila, Verona.

DEPARTURES.—Dec. 10, from London, for Cardiff, Yokohama, and Vancouvers Island, Golden Age; from Liverpool, for Galle, Peckforton Castle.

LAID-ON.—At London, for Hong Kong, Hopewell; at Liverpool, for Mauritius, Penang, Singapore, Hong Kong, and Shanghai, Ajax (str.).

MISCELLANEOUS.—At St. Helena, Nov. 2, Seamew, from Canton, and sailed 3, for Hamburg; Condor, from Macao, and sailed for Falmouth; 4, Eleanor, from Padang, and sailed 6, for London; 6, Bangkok, from Glasgow, and sailed 7, for Singapore; 8, Dharwar, Penang to London; 10, Maid of Glanwern, Colombo to Philadelphia. Off St. Helena, Oct. 29, Shooting Star, Colombo to London; 31, Maiden Queen, Shanghai to Liverpool; Nov. 10, William Fruing, Manila to London, out 91 days.

## BIRTHS, MARRIAGES, AND DEATHS.

### BIRTHS.

BUSH—On the 26th Sept., at Newchwang, the wife of Henry Edward Bush, Esq., of a daughter.

CLARK—On the 29th Nov., at Instow, North Devon, the wife of Thos. Clark, Esq, of Point de Galle, Ceylon, of a son.

COLLINS—On the 9th Oct., at Yokohama, the wife of Mr. Henry Collins, of a son.

COGGINS—On the 5th Nov., at Galloway Knowe, Pussilava, the wife of J. Coggins, Esq., of a daughter.

GLOVER—On the 30th Nov., at Burburn, Aberdeenshire, the wife of A. J. Glover, Esq., of Nagasaki, of a son.

JAMIESON—On the 20th Oct., at Hankow, the wife of R. A. Jamieson, Esq., M.A., M.D., of a son.

MACKINNON—On the 26th Oct., at Kandy, the wife of F. D. Mackinnon, Esq., of a daughter.

PYKE—On the 7th Oct., at Hong Kong, Mrs. T. Pyke, of a daughter.

STILL—On the 4th Nov., at Colpetty, Mrs. H. Lloyd Still, of a daughter.

RANGEL—On the 7th Dec., at 13, Lansdowne-crescent, Kensington-park, the wife of F. A. Rangel, late of Hong Kong, of a son.

WILLIAMS—On the 26th Oct., at Yokohama, the wife of Mr. J. C. Williams, of a son, still-born.

### MARRIAGES.

COPE—HOLDERNESS.—On the 9th Oct., at Hankow, Herbert Cope, Esq., to Blanche Mary Hughes Holderness. No cards

HARTLEY—RUDD.—On the 1st Nov., at St. Paul's, Kandy, by the Ven. the Archdeacon Mooyaart, George Tillotson Hartley, Esq., of Kandy, to Louisa Oteline, eldest daughter of William Rudd, Esq., of Uplands, Kandy.

KINNEAR—LARKEN.—On the 30th Nov., at Burton-by-Lincoln, by the Rev. E. R. Larken, father of the bride, assisted by the Hon. and Rev. Evelyn J. Monson, vicar of Croft (her cousin), William Balfour Kinnear, Esq., of Foochow, China, son of the late James Kinnear, Esq., Writer to the Signet, Edinburgh, to Emily Maria, third daughter of the Rev. E. R. Larken, Rector of Burton.

KUNG—GANNO.—On the 3rd Nov., at St. Andrew's Church, Singapore, by the Rev. J. A. Beckles, M.A., Hermann Kung, Esq., of Heiden, Switzerland, to Mary, youngest daughter of John W. Ganno, Esq.

MORAN—FINCH.—On the 20th Oct., at St. John's Cathedral, by the Rev. Canon Beach, M.A., M. M. Moran, Commander British barque *Nile*, to Elizabeth Sarah, youngest daughter of the late Jos. Finch, Esq., of Sunderland.

NAPIER—CHETTLE.—On the 9th Oct., at Hankow, the Rev. Fred. Napier, B.A., to Annie Maria, second daughter of the late W. M. Shettle, Esq., of Trowbridge, Wilts.

ROSS—MILNE—On the 23th Oct., at Auquhirie, Ceylon, by the Rev. Alex. Silver, of Dunnottar, Alexander Ross, Esq., of Kawudupœlella Estate, Ceylon, to Isabella, only daughter of John Milne, Esq., Auquhirie, Stonehaven, Kincardineshire, Scotland.

SMITH—BROOKE.—On the 30th Oct., at the British Consulate, Yokohama, before F. Lowder, Esq., H.B.M. Consul, and subsequently at Christ Church, by the Rev. M. B. Bailey, William Henry Smith, Esq., formerly of the Royal Marines, and eldest son of the late Rev. W. H. Smith, vicar of Tuddenham, Norfolk, to Gertrude, eldest daughter of J. H. Brooke, Esq., formerly Minister of Lands, Victoria, Australia.

### DEATHS.

BATES—On the 13th Oct., at Shanghai, Frederick W. Bates, engineer of steamer *Chihli*, aged 40 years.

BOYD—On the 27th Nov., at Blandfield House, Edinburgh, Mabel Katherine, aged seven months and nine days, daughter of T. D. Boyd, Esq. merchant Amoy, China. Friends will please accept this intimation.

CROWE—On the 27th Oct., at Kandy, George Crowe, Esq.

HOWELL—On the 6th Dec., at 122, Leadenhall-street, Charles Henry Wellington, only child of Charles Wellington Howell, Esq., Secretary to the P. and O. Company, in his ninth year.

HUMPHREYS—On the 25th Oct., at Hong Kong, Jessie, daughter of J. D. Humphreys, aged 1 year and 13 days.

NACKEN—On the 21st Oct. at Hong Kong, Arthur, son of the Rev. Johannes Nacken, aged 1 month and 5 days.

RANGEL—On the 10th Dec., at Oaklands, Dulwich-wood-park, Isabella, the wife of R. Rangel, Esq., aged 47.

VAN LANGENBERG—On the 4th Nov., at Lake-view, Kandy, Cyril, infant son of Mr. James Van Langenberg, age 9 months and 7 days.

WILLIAMS—On the 27th Nov., at the residence of his cousin, Dr. D. I. Allen, Wellington House, St. John's-wood, David Walter Williams, Esq., Army Medical Staff (late of Ceylon), aged 40.

## THE BANK OF CALIFORNIA.

*The San Francisco News Letter* gives a summary of the last annual report of the officers of the Bank of California. The Bank organised with a paid-up capital of $5,000,000. Surplus after paying dividends and writing off losses, $1,609,356. Reserve and insurance funds, $800,000. The balance on hand at the credit of the depositors is $3,600,000. The total assets after deducting all liabilities amount to $8,400,000. The total discounts are $9,600,000. Its paid-up capital is held by 136 individuals and firms, who are personally liable on their private means to the extent of double their stock, and the aggregate of whose private fortunes are, at an under estimate, $40,000,000. The *Bulletin* says:—In the face of such statements as these, which can be verified and are well known among our leading business men, the absurdity of the reports prejudicial to the Bank, as to the general business and finances of San Francisco, will be apparent. And it should be remembered that this sound condition of our leading monetary institution has been maintained through a period of reaction following one of remarkable expansion. Many of our people have been overtrading and speculating, partly in anticipation of the benefits expected from the Pacific Railroad, which cannot be immediately realised. The finances of the city are in an excellent condition, and San Francisco will begin the new year with the brightest prospects. There is every reason for confidence and none for distrust.

THE P. AND O. COMPANY'S SERVICE.—The death of Mr. Patterson the superintendent at Calcutta, has been filled by the re-appointment of Captain Lovell, who has for some time been in the London office. Captain Henry has returned to his post as superintendent at Bombay; as, also, Captain Davies to Aden. Captain Kirton, for some time acting at Aden, has been appointed joint agent with Mr. Tonner at Malta, *vice* Captain Tronson, retired. Captain Guthrie, who for many years has held the post of nautical inspector, retires, and Captain Jamieson, of the *Pera*, who has been for twenty-five years in the service of the Company, and well known in China, takes the post, in conjunction with the duties lately performed by Captain Lovell. The directors have made an excellent choice in Captain Jamieson, and it is a fitting acknowledgment of their confidence in him. We trust he will long enjoy his "shore berth." We hear that the employés of the company intend erecting a monument in Bombay to the memory of those lost in the *Carnatic*.

THE KING OF SWEDEN AND NORWAY has conferred on Sir John Bowring a Knight Commandership of the Order of the Polar Star.

## LORD ELGIN'S SECOND EMBASSY TO CHINA.

Nearly ten years have passed since Lord Elgin took upon himself, for the second time, the task of endeavouring to place our relations with China upon a satisfactory footing; and yet (if we except the official despatches published in the Blue-books of the time) no succinct account of the occurrences of that most eventful year—1860—has yet appeared. The duty of placing them on record in a permanent form would doubtless have been worthily performed by Mr. Bowlby, the special correspondent of *The Times*, had not that gentleman unhappily fallen a victim to Chinese treachery and cruelty; but his untimely fate threatened to leave this memorable campaign without a historian. Fortunately, Mr. Loch, Lord Elgin's Private Secretary, now comes forward to do for his second embassy what Mr. Lawrence Oliphant did so well for the first, and presents us with so concise and carefully-written a narrative that it leaves nothing to be desired.* The work is comprised in one small, and by no means showy volume, and is commendable for a total absence of the diffuseness and the egotism that generally mark "personal narratives" of this kind. Indeed, so many events were crowded into the short period treated of, that the author might well have been excused for making them the subject of a much larger book; but he contents himself with a clear, comprehensive narration, entirely devoid of any extraneous matter. At this critical juncture, when our position in China is so precarious, and our Government persists in an attitude so dangerously incompatible with a continuance of peace, it is well to look back, and reflect on the experience of the past; and for this Mr. Loch's work affords ample materials.

A preliminary chapter is devoted to the circumstances that necessitated Lord Elgin's second visit to China. The refusal of the Government to receive Mr. Bruce at Peking, or to ratify the treaty; the attack on the Taku Forts, with its disastrous results; the consequent retirement of the Ministers to Shanghai; and the preparations for a campaign against the capital, are all rapidly touched upon, preparatory to a general review of the position of affairs on the arrival of the Embassy in China. The humiliating failure of Mr. Ward, who had attempted to gain by diplomacy what Mr. Bruce and Admiral Hope had failed to obtain by force, proved to Lord Elgin that the utmost firmness and decision on his part would be necessary; and these qualifications he exhibited in an eminent degree throughout all his subsequent proceedings. The assembling of the allied forces at Pehtang, the landing and capture of the Taku Forts (that had successfully defied Admiral Hope the previous year), and the subsequent march on Peking, are matters of history; but Mr. Loch gives numerous interesting details hitherto unknown. As an example we may quote his account of a clever stratagem by which Sang-ko-lin-sin obtained horses for a large body of his troops:—

> At Peking a force of 20,000 cavalry is supposed to be always kept in readiness to meet any emergency. The general in command draws the pay for the men and horses, and is answerable for the proper and efficient equipment of the force; but of late years the General found he could borrow or hire horses for a few days when the periodical review came round, and, therefore, instead of maintaining the requisite number, he put the money received for that purpose into his own pocket. However, when we landed, and it became necessary to collect every available soldier for the defence of the country, the Emperor ordered a review of the garrison, which included this body of horseless cavalry. The General was in despair—he feared all would be discovered; but, having recourse to his old plan, was able to parade his men on the day appointed, all fairly mounted on their borrowed steeds. A whisper of the true state of the case, however, reached the ears of San-ko-lin-sin, the Commander-in-Chief, who, thinking it too good an opportunity of horsing his cavalry to be lost, moved them at once by forced marches down to the sea-coast.

Details of warlike operations are generally dry food for the non-military reader, but this is by no means the case with Mr. Loch's narrative of the movements of the allied armies. His careful record of every step of the advance towards Peking is so interspersed with lively incident that it makes the pleasantest sort of reading, besides being instructive; for almost every page bears witness to some fresh example of the lying, deceit, and treachery with which the Chinese persisted, to the very last, in trying to outwit our Ambassador. Strongly as we are tempted to dwell on this part of the narrative, we must leave it to pass to another, and in one sense a more important part; for it is a relation of sufferings that can only be told by the two men who experienced them—Mr. (now Sir Harry) Parkes and the author. It is pretty generally known that, when the allied armies were closely threatening Peking, the Chinese suddenly ceased their obstinate resistance to Lord Elgin's demands, and offered to make peace on his terms; that, deceived by their protestations, the Ambassador sent Mr. Parkes with a small escort, under a flag of truce, to meet three newly appointed Imperial Commissioners, and make arrangements for his entry into Peking; that this party was treacherously surprised and carried away into captivity, from which most of them never returned alive. These facts are, as we have said, pretty well known, but we have now, for the first time, full particulars of this atrocious crime from the pen of one of the sufferers. Mr Parkes was accompanied on his fatal errand by Mr. Loch, Mr. De Normann (of the Legation), Mr. Bowlby, the special correspondent of *The Times*, who had obtained Lord Elgin's permission to go; Colonel Walker; Mr. Thompson, of the Commissariat; and Lieut. Anderson, in command of the escort, consisting of six of the Dragoon Guards, and twenty "sowars" of Fane's Horse. Tung-chow, the town appointed for the meeting, was reached in safety, and the conference duly took place. In returning to Ho-se-woo, where the Embassy was quartered, the party suddenly found themselves surrounded by Tartar troops, and concluded at once that some treachery was intended, for these troops occupied the very ground on which it had been arranged that the allied forces should encamp while Lord Elgin and Baron Gros proceeded to Peking. After a hasty council it was decided to avoid showing any mistrust, and that Col. Walker and Mr. Thompson, with five dragoons, should move quietly about the spot, at the same time being ready to gallop off on any appearance of hostilities, while Mr. Parkes, with one dragoon and one Sikh, returned to Tung-chow under a flag of truce to demand of the Commissioners the reason for this breach of faith. Meanwhile, Mr Loch volunteered to make his way to the Allies, escorted by the remaining Sikhs, to acquaint them with the state of affairs, and succeeded in reaching the advance-guard in safety. Having given Sir Hope Grant all the information in his power, Mr. Loch gallantly asked permission to return and join Parkes and the others, and aid them to escape in the short interval that remained before the commencement of active hostilities. With equal gallantry Captain Brabazon determined to accompany him, with an escort of only two Sikhs, one of whom carried a white flag. With little hindrance they reached Tung-chow, where Parkes, De Norman, Bowlby, Lieut Anderson, and the Sikh escort were waiting, quite ignorant of any impending danger. It having been explained to them that a collision was now unavoidable, and might occur at any moment, an immediate effort to reach the allied camp was determined on; but they were soon stopped by a mandarin, who said they could not be permitted to pass through the lines without a pass, which he would get from the Commander in-Chief if two of the party would accompany him to head-quarters to get it. By this time they were surrounded, and there seemed no alternative but to accept the proposal. What followed is thus graphically described:

> We agreed that two of us should accompany the mandarin, and Parkes said, "I will go if Loch will accompany me." At this time we had *two* flags of truce flying, one belonging to the escort, the other my handkerchief on Nal-sing's spear-head. I called to him to come with us and with a hasty good-bye to the others, galloped off with the Chinese officer. I shall never forget my last view of that party. . . . . Anderson, Brabazon, and De Norman were talking together in a group, while Bowlby, about a horse's length distant, looked exhausted and anxious, and was drawing his revolver from its case. He had often expressed a wish to see how the Chinese could really fight, and as I passed him I said, "I think, Bowlby, you'll soon have your wish fulfilled." . . . We had not left our party half a mile when, on turning the corner of one of the millet-fields, we were in the midst of a large body of infantry, who seized our bridles and pressed their matchlocks against our bodies. No time was to be lost, the Chinese officer, under whose safe-conduct we were, rushed between us. . . . We halted, the Chinese soldiers at the same time raising the cry, "Sang, Sang!" and down to the opposite galloped Sang-ko-lin-sin, surrounded by a numerous staff. Parkes immediately addressed the Prince, pointing to our flag of truce, and requested a free pass for our party. His only reply was a derisive laugh, and a torrent of abuse. . . . Parkes turned to me and said, "I fear we are prisoners." One glance told us how hopeless any resistance would be, and as we attempted to push forward we were half pulled, half knocked off our horses. We were scarcely on the ground when our arms were seized and twisted behind us . . and shoved down on our knees before Sang-ko-lin-sin, who threatened and stormed at us, the men behind cuffing us on our heads and faces, one man seizing me by the back of the neck and rubbing my face in the dirt.

Escape was now hopeless, and as the engagement had now begun, and the Chinese were getting frightened and correspondingly vindictive, the lives of the captives did not seem worth five minutes' purchase. However, they (Parkes and Loch, with Nalsing, the Sikh) were put into a cart, and sent off to Peking. Mr. Parkes, we are told, suffered much both in mind and body, yet maintained an appearance of calm indifference both to insult and bodily pain. Stopping at an encampment, quite exhausted by a jolting in springless carts over a rough road, they were subjected to an "examination"—that is, forced on their knees before some Mandarins, and brutally kicked and cuffed because their answers were not satisfactory. Suddenly some soldiers rushed in, bound them, and carried them away.

> Parkes told me he thought from their remarks we were about to be beheaded. . . . We said a few parting words, for we now considered death as certain. . . . While thus speaking a man suddenly seized my arms, and with one "God bless you" to Parkes I found myself hurried forward, two or three men on either side brandishing their swords.

The timely interference of some official saved them from immediate decapitation, and they were once more bundled into the cart, with two French prisoners and the old Sikh, and carried on to Peking, suffering frightfully on the long journey from want of water and the tight cords that bound them. Arrived at the capital, they found themselves in the prison of the "Board of Punishments," the worst even of Chinese prisons; and here they were heavily ironed, and after more kicks and beatings were thrust into a loathsome dungeon among a horde of criminals of the vilest class.

> On one side of the room, running its whole length, was a wooden bench, extending about eight feet from the wall, sloping a little towards it; this was the sleeping place; chains hung down from several of the beams, reaching nearly to the bench, with the use of which I was soon to be made practically acquainted. . . . My hands were handcuffed, the short chain which connected them being passed through a link in the one that descended from my neck to my feet. . . . I was then laid down on the bench I have described, directly under one of the chains hanging from the beam above; to this the chain round my neck was attached, and I was thus only able to lie flat on my back, and even this was painful with my elbows pinioned. . . . I was utterly exhausted, and fell into a heavy sleep. I awoke about two hours afterwards, chilled and shivering;—so crowded was the prison that my neighbours on either side touched me, and the one on my right hand feeling me shaking with cold drew his tattered, vermin eaten rug over me—and I was thankful

Separated from his companion in misfortune, chained, tortured, and half-starved, a more miserable lot could hardly be imagined, yet there was a horror yet to be endured worse than all these:—

* *Personal Narrative of Occurrences during Lord Elgin's Second Embassy to China.* By Henry Brougham Loch. London: John Murray, Albemarle-street.

Digitized by Google

There is a small maggot which seems to infest all Chinese prisons; the earth at the depth of a few inches swarms with them; they are the scourge most dreaded by every poor prisoner. Few enter a Chinese gaol who have not on their bodies or limbs some wounds either inflicted by blows, or caused by the manner in which they have been bound; the instinct of the insects I have alluded to seems to lead them direct to these wounds. Bound and helpless, the poor wretch cannot save himself from their approach, although he knows full well that if they once reach his lacerated skin there is the certainty of a fearful lingering, and agonising death before him. My right-hand neighbour on the bench was dying from the inroads of these insects; his suffering was great, and the relief his fellow-prisoners could afford was of no avail. The crowded state of the gaol brought me in such close contact with this poor fellow that our heads rested on the same block of wood, not a foot apart.

With all his courage, it is not surprising that Mr. Loch found it hard work to maintain that calmness and appearance of indifference that seemed necessary, when brought into contact with this sickening horror. These maggots, it seems, eat into the wounds, and increase a thousandfold in a day, so that nothing avails to save the victim from a living death. The deliverance of Mr. Loch from this place of torment, and of Mr. Parkes from a similar one, was eventually brought about by a clever stratagem on the part of the latter, which we have not space to describe in detail. For a while they were again together, in better quarters; and after more vicissitudes and many days of harrowing suspense they at length obtained their liberty, just as they had once more made up their minds to a sudden and cruel death. Indeed, so narrow was the escape that, within fifteen minutes after they had passed the city gate, the Emperor's order for their immediate execution arrived! This, of course, was found out afterwards.

Once restored to their friends, Messrs. Parkes and Loch learnt for the first time that they were the only two of the party who had escaped. During their captivity, the Chinese authorities had met every movement of the allies with the threat that any attack on their part would be the signal for the immediate execution of the prisoners; but by this time Lord Elgin knew his foes too well to be frightened by this, and retorted that if the prisoners were harmed he would utterly destroy the capital. The stronger the threats of the Chinese, the more determined was Lord Elgin, and the result proved he was right. With the exception of these two the prisoners had been dead for some time; and the treachery and cruelty of the Mandarins was justly punished by the destruction of the Summer Palace, which with the occupation of Peking by the Allies, brought the campaign to an end. Mr. Loch and Sir Harry Parkes of course entered the capital with Lord Elgin, and on this second visit to the city where they had been so barbarously treated, they witnessed the ratification of the treaty, and the crowning humiliation of their persecutors.

The bodies of their less fortunate companions, Messrs. De Normann, Anderson, Bowlby, Phipps, and nine of the Sikhs, were recovered, and received funeral honours; some months later the remains of Captain Brabazon were found; he had been beheaded shortly after his capture. Ten of the Sikhs escaped, and their evidence revealed the fate of the rest. One of them was imprisoned with De Normann and Lieutenant Anderson, and the following is an extract from his deposition:—

We were kept so tightly bound we could not move. . . . After the first day Lieut. Anderson became delirious, and remained so until his death, which occurred on the ninth day. Before his death his nails and fingers burst from the tightness of the cords, mortification set in, and the bones of the wrist were exposed. While he was alive worms were generated in his wounds, and ate into and crawled over his body . . . five days after this a sowar died in the same state . . . three days after this Mr. De Normann died.

Another Sikh trooper, who was imprisoned in company with Mr. Bowlby, Phipps (one of the Dragoon Guards), and a French officer, deposed as follows:—

They took us away in carts; travelled all night, gave us no food or water, and beat us when we asked for any. . . . We were taken into a fort, and for three days were out in the open air in the cold. They then put us into an old kitchen, and kept us there eight days. . . . Mr. Bowlby died the second day after we arrived; he died from maggots forming in his wrists. . . . His body remained for nearly three days, and the next day was thrown over the wall to be eaten by dogs and pigs. Next day the Frenchman died; he was wounded slightly on the head and hand, apparently by a sword. Maggots got into his ears, nose, and mouth, and he became insensible. . . . Two days after this Jawalla Sing (a Sikh) died; his hands burst from his rope wounds, maggots got into them and he died. Four days afterwards Phipps (King's Dragoon Guards) died; for ten days he encouraged us in every way he could, but one day his hands became swollen, like Mr. Anderson's, and maggots were generated the next—one maggot increased a thousand-fold in a day.

No wonder the majority of the captives sank under these accumulated horrors, on which perhaps we have dwelt too long. Not however without an excuse, for, although much has been written about Chinese prisons and punishments, this is the only instance (as far as our knowledge goes) in which Englishmen have gone through so dreadful an ordeal, and lived to tell the tale. The constancy and fortitude exhibited by both Mr. Parkes and Mr. Loch was nothing short of heroic, and as far as we can judge from the necessarily imperfect accounts of the deaths of the other captives, they seem to have met their fate in a similar spirit; so that even this sad page in the history of our relations with China, dark as it is, reflects nothing but honour on the English name.

What, on the other hand, shall be said of the Chinese Government? Or, rather, where shall we find words sufficiently strong to express our detestation of the part they played in this tragedy? Certainly, they were consistent. From the commencement to the end of the chapter they showed themselves, as they are, and always have been, base, cruel, and treacherous. Dead to all sense of honour or justice—every act a stratagem, every word a lie, every promise broken as soon as made—Lord Elgin soon found that to treat with them as with the Government of any civilised country was absolutely impossible. The subsequent experience of Sir F. Bruce and Sir R. Alcock has fully confirmed this, and to those who re not wilfully blind to facts, it is more patent than ever at the present time. The English Government of the present day is so blind. Taking for granted the truth of all Mr. Burlingame's misrepresentations, they allow their imaginations to revel in a vision of a paternal (Chinese) Government, guileless and confiding, eager to embrace foreign civilisation, and plant "shining crosses" everywhere—longing, in fact, to throw themselves into our arms, and only asking a little time to allow of their people becoming familiarised with the novelties of foreign intercourse.

Lord Clarendon and his colleagues are apparently dazzled by this picture; its reverse—the dark and terrible side portrayed in Mr. Loch's book—they will not see. Men who know the truth tell them again and again that it is the people, not the ruling classes, who would be our friends. They—the misgoverned, oppressed, "squeezed," Mandarin-ridden people—are ready enough to welcome foreigners, and Englishmen above all foreigners, if only permitted to do so by their oppressors. Recent events have shown clearly enough, that while throwing dust in our eyes through the medium of Mr. Burlingame's false flattery, the Government has been sedulously stirring up strife against us, making use of the *literati* to excite groundless animosity against foreigners. Repeated outrages are the result, yet those who direct our policy in China continue wilfully to ignore the true cause of this state of affairs. We regret to note that in a concluding chapter on the future policy to be pursued towards China our author fully endorses the instructions transmitted by Lord Clarendon to Sir R. Alcock. This seems to us a most "lame and impotent" conclusion, for the whole tenor of his work, up to this point, seems to us to lead to a very different inference. It was entirely owing—as Mr. Loch carefully impresses on his readers—to Lord Elgin's uncompromising determination that his Embassy was crowned with such satisfactory results; over and over again it was manifest that the least faltering or weakness of purpose would have been fatal. Now, we are pursuing a "policy of conciliation"—a policy, in fact, diametrically opposed to that of Lord Elgin. Does Mr. Loch wish us to believe that in ten short years—in the history of nations an almost infinitesimal space of time—the ruling party in China has so entirely changed its character as to justify a total reversal of our policy? Unless this is so, it is very difficult to reconcile the experiences on which his narrative is founded with the opinions expressed in the final chapter. Apart from this—which, from our point of view, we cannot help thinking a little inconsistent—we cannot too strongly recommend Mr. Loch's work as one that should be carefully read by all who are interested either in the past or the future of our relations with China; and even those who have no such interests will, if they once open the volume, find it difficult to lay it down until the last page is reached.

## Naval and Military.

The Donegal, screw line-of-battle ship, 800-horse power, has been commissioned at Portsmouth for special temporary service, by Capt. Hewitt, V.C., Flag-Captain to Vice-Admiral Sir Henry Kellett, K.C.B. the successor to Vice-Admiral Sir Henry Keppel, K.C.B., in the command of Her Majesty's ships on the Chinese and Japanese coasts. Sir Henry Kellett will fly his flag on board the present flagship on the station, the ironclad frigate Ocean. As announced in our issue of the 22nd Oct. last, the Donegal will take out to China Captain Hewitt and the officers, marines, and seamen to form the new complement of the Ocean, under the flag of the new Commander-in-Chief, and will return to England manned by the officers and crew that have served in the Ocean under the flag of Sir Henry Keppel. She also takes out crews for the Rinaldo, Sylvia, and Zebra, and those now on board will return to England with the crew at present on board the Ocean. The Donegal will sail to-day, weather permitting.

The following appointments have been made to vessels on the China station, in addition to those reported in our last issue:—

*Commander*—Richard E. Tracey (1864), to Avon, vice Fitzroy.

*Lieutenants*—Gerald A. Ellis (1866), to Princess Charlotte at Hong Kong; Edward Chichester (1869), additional, to Ocean; and W. M Annesley (1868), to Ocean.

*Paymaster*—John Kiddle (1865), to Princess Charlotte, for Shanghai Naval Yard.

*Chief Engineers*—Fred. H. Hodd (1854), to Ocean; Thomas Sagar 1865), to Rinaldo; and R. L. Canney (1861), to Zebra.

*Staff Surgeon*—J. R. Holman, M.D. (1868), to Ocean.

*Acting Assistant Surgeons*—John B. Isaacs (1869), and James D. Harvey (1869), to Ocean.

*Sub-Lieutenants*—B. J. S. O. Carter (1867), and W. D. Walker (1869), additional, to Ocean.

Last week was published the *Guide to Sericulture*, by Mr. Thomas Dickins, President of the Silk Supply Association. It is issued in pursuance of a resolution of the Association, that a book of instructions for silk cultivation should be published at such a price as would place it within the reach of all interested in silk culture. Mr. F. O. Adams's "Report on the Silk Districts of Japan" (which we have already noticed) is included in the pamphlet. The price is one shilling.

## THE "SPINDRIFT."

WHEN a fine clipper ship, well appointed and manned, carrying an experienced master and pilot, goes ashore on a clear, fine, moonlight night, with the wind off the land, it would appear to ordinary observers that somebody must be to blame, and that there ought to be no difficulty in ascertaining the identity of the blamable person or persons, and punishing them. But this, it seems, is quite a mistaken notion. The court of inquiry that has been sitting at Greenwich to investigate the case of the *Spindrift* teaches us that under all these favourable conditions a noble ship may be destroyed—just because no one takes the trouble to keep her in her proper course—without anybody being held responsible. So startling and (to our, perhaps, ill-informed minds) so dangerous a theory as this seems to require some explanation. The responsibility of the master, as far as the navigation of the vessel is concerned, is held to be entirely in abeyance so long as the pilot is on board, *unless* the pilot should be plainly incompetent from intoxication or other causes, and endanger the vessel, when it is incumbent on the master at once to resume charge. Clearly, therefore, a ship-master having a due sense of his responsibility, and of duty to his owners, would make it his business to keep a sharp eye on his pilot, so as to be sure that he was not in such a condition as to be inefficient. In the present instance there is very strong evidence against the sobriety of the pilot. The pilot says he was sober, and in full possession of his faculties; but this is not evidence, it is the simple plea of "not guilty," which might be expected. The master corroborates the statement, certainly; but, then, if the master admitted that the pilot was intoxicated, he would be charging himself with the loss of the ship, for in such a case it would have been his duty to interfere. The steward, on the other hand, gives strong circumstantial evidence of a directly opposite tendency. Several times he saw the pilot drinking grog, and twice he found him vomiting; while two seamen prove that he was warned of a light being on the wrong side, but took no notice of it. All this looks, to say the least, very suspicious; but a countercharge of intoxication is brought against the steward to throw discredit on his statement, and—without seeking further evidence, without subjecting the pilot to any further examination having special reference to the steward's charges, without any *vivâ voce* examination of the captain, who had simply put in a written statement—the Court accepted their assertions, and declared "upon the evidence adduced," the pilot must be considered to have been sober. This appears to us to be a most lame and impotent conclusion. If he was sober how came he, a channel pilot of unquestioned experience, to run the vessel on shore when every circumstance of wind and weather was favourable? On the other hand, if we acquit him of the charge of intoxication he stands self-convicted of culpable negligence, for which, it is satisfactory to reflect, he is still amenable to another tribunal (the Trinity Board), whose action in the matter we await with much interest.

Captain NUTSFORD apparently has no further ordeal to encounter except that of public opinion. As far as the Board of Trade inquiry is concerned he stands acquitted. There was a duly qualified pilot in charge; that pilot was, in the opinion of the Court (and how much we consider that worth has already been indicated) sober; therefore the master was exonerated from all responsibility. This is tolerably intelligible, but what follows is not so clear:—"The Court, however, deems it right to notice the fact, *though it did not contribute to the loss of the vessel*, that there was considerable laxity on board. No watches were set, and no orders whatever seem to have been given by the master or chief mate. Everything seems to have been left to chance." A vessel is unaccountably lost; no immediate cause for her loss can be found; it is shown that there was no order or discipline on board; "everything was left to chance"—and yet it is held that this disgraceful state of things had nothing to do with the catastrophe! This Board of Trade inquiry, as far as its results are concerned, seems to have been nothing better than a solemn farce; it has, however, thrown some little light on what is undoubtedly a grave scandal, and one that English shipowners and underwriters are deeply concerned in.

## THE POST-OFFICE IN CHINA.

THE "Report on Postal Agencies in China and Japan," by Mr. F. W. MITCHELL, Postmaster-General of Hong Kong, which has lately been printed by order of the Hong Kong Government, is an interesting and instructive document. The English Post-offices at the principal ports in China and Japan are of a hybrid nature, being subordinate to the Hong Kong Post-office, and partly supported by the colony, while the Imperial Post-office also contributes to their maintenance; and at all ports, except Shanghai and Yokohama, the postmaster is one of the assistants in the British Consulate. Such being their nature, it is not very wonderful that the Postmaster-General should have considered a personal inspection of these branches desirable; and this inspection has evidently been performed in a very careful, pains-taking manner, which cannot but result in a greatly-increased degree of efficiency. Most of the branches Mr. MITCHELL found very well managed; Yokohama—one of the two places that support a special agent—being almost the only exception; and by means of certain reforms inaugurated by Mr. MITCHELL where he found them needed, and a very precise and copious set of "Instructions for Post-office Agents," since compiled by him for the guidance of those officers, there is little doubt that such irregularities as have existed will for the future be avoided. Perhaps the most interesting section of the report is that relating to Foochow, at which port it seems there is a growing tendency to use Shanghai, rather than Hong Kong, as a medium for exchange transactions and other business, chiefly arising from the greater proximity of the former port, and the inconvenient time at which the steamers are despatched for the latter. To remedy this, Mr. MITCHELL proposes that a subsidy be offered to Messrs. DOUGLAS LAPRAIK and Co., the proprietors of the principal steamers on the line, on condition of their carrying the mails under the usual arrangements, and making the arrivals and departures of their vessels assimilate with those of the English mails at Hong Kong. This seems to us a most desirable arrangement, and we hope to see it acted upon; the decision, however, does not rest with the Hong Kong Government, as the Imperial Post-office would have to bear a share of the proposed subsidy, and the consent of the Home Government must therefore be obtained.

THE Post-office department of the United States' Government keeps a register of the time occupied in the transmission of the mails between San Francisco and the chief eastern cities. The average time between New York and San Francisco is seven days two hours twenty-three minutes; but frequent trips have been made in less than six days and sixteen hours. It is intended to reduce the schedule time, so as to bring it down by half a day on the average.

THE latest accounts from the Suez Canal report that the *Peruvian*, which had discharged more than half her cargo, got through to Suez in six days. The *Babel* had to lighten up to 16 feet 3 inches (or 5 metres); this was done at the expense of the company into lighters. The underwriters do not look on the risk with any more favour, and in most cases charge even a higher rate than round the Cape. They will not allow stranding in the Canal to be taken as an ordinary case of stranding. Vessels, however, continue to leave with cargoes for ports in India and China.

## THE UPPER YANGTSZE.

A LONG report has been adopted by the Bradford Chamber of Commerce on the subject of trade on the Upper Yangtsze, together with a memorial from the Chamber to Lord CLARENDON, praying that measures may be adopted to afford access to these regions. This has formed the subject of a leading article in *The Times*, which as usual, while professing "not to have a word to say against the proposal," throws cold water on it, and adopts the Chinese view entirely. We have so often combated the stale arguments adduced in support of this view that it would be a waste of time to go over the ground again. The final conclusion arrived at by the writer is, that by a long course of "patience and forbearance" we must give the Chinese time to "find out their advantage in the market we offer," and that *then* they will be "as anxious to buy as we to sell." It is proverbial that nothing short of a surgical operation will get a joke into some people's heads, and it seems to be even more difficult to instil common sense into the brains of others. Of course it is hopeless to make a writer of this class understand that his arguments fall to the ground, because the Chinese, as a people, have long since found the advantage of our market, and already avail themselves of it to as great an extent as a meddling, obstructive Government will let them; and because they are already as eager to buy as we are to sell, if the said pig-headed Government would abolish its vexatious restrictions on such buying and selling, and cease to plunder both our merchants and their own by a dishonest system of "squeezes." At an adjourned meeting of the Bradford Chamber, held on the 8th inst., the subject again came under discussion, and the chairman, Mr. JACOB BEHRENS, made some pertinent remarks protesting against the assumption that the Chamber wished to force our trade on China by tyrannical or oppressive measures, and showing that firmness in maintaining Treaty rights was necessary, because every omission to insist on them was regarded as an indication of weakness, and subjected us to fresh injury and insult.

## THE P. AND O. COMPANY.

FOR the twenty-ninth time the directors of this company have met their shareholders to report a year's progress; and considering all the adverse circumstances to be combated, the account they render must be pronounced a satisfactory one. The capital account shows a surplus of assets over liabilities of nearly £353,000; the revenue account shows a profit for the year which, after paying a dividend of six per cent., leaves over £7,000 to be carried forward; and the underwriting account, after paying £90,300 for the *Carnatic*, still leaves a surplus of £18,600 to be added to the general reserve fund. Such is an outline of the present position of the company, while its prospects may be considered decidedly more encouraging than they have been for some years. Their present contract with the Post-office, it will be remembered, stipulates that whenever the profits of the year's working shall not enable a dividend of six per cent. to be paid to the shareholders, the company shall be entitled to receive from Government such a sum as will make up the deficiency, provided that it shall not exceed £100,000; whereas, should their dividends at any time exceed eight per cent., the Government is to receive one-fourth of such excess. It is needless to say that the condition of affairs provided for by this last stipulation has not yet been reached, but at any rate some steps have been taken towards it. In 1867 (when the new contract had not yet come into operation), the shareholders received no dividend at all. In 1868, even with a large temporary increase of revenue arising out of the employment of their vessels in the Abyssinian expedition, the directors were only enabled to pay six per cent. by claiming from Government the full proportion of their contribution in excess of the subsidy. Now, in 1869, we find that without any extraneous help, such as employment in the transport service, and without any aid from Government beyond the regular subsidy, they are enabled to pay six per cent., and carry forward a small surplus. These facts speak for themselves. They not only show that under the careful management of the directors the position of the company is steadily improving, but also that the provisions of the new contract, involving a sort of partnership with the Government, were eminently wise and prudent. At the time it was entered into we were at a loss to understand the dissatisfaction which was loudly expressed in certain quarters, and which appeared to us utterly groundless and unreasonable; and the course of events has entirely justified our view.

With regard to the general efficiency of the company's service, there is nothing left to be desired. Taking into consideration the wide-spreading organisation to be controlled, the gigantic dimensions and complicated nature of the service, it is a matter of surprise how so great an amount of regularity is achieved. It must be remembered that this is not a single line of communication, having Marseilles at one end, and some port in the Far East at the other; if it were, no great praise would be due for the observance of punctuality. The P. and O. service, on the contrary, has two termini at this end, and, as it extends eastward, a number of branches and ramifications, all needing much careful adjustment to bring them into an harmonious whole. At Galle, a point of convergence and divergence for three great trunk lines, the harbour accommodation is miserably inadequate, and until the lately resolved-on improvements are completed this junction must continue to present great difficulty in working. We are glad to note that the Brindisi route is not neglected by the company, one of the directors being now engaged in an examination to ascertain how far it can be made available for their postal service.

There is no room for doubting that the manner in which the service is carried on reflects the highest credit, not only on the managing directors, but on the agents abroad, and in fact all concerned. Of course, there is no company in existence occupying so wide a field of operations, but we doubt if even any of those that approach the P. and O. Company in dimensions are so uniformly well served by their agents and employés. The loss of the *Carnatic* is a sad drawback to the results of the year, but we must not forget that last year two vessels shared the same fate. We hope the ensuing twelve months may be exempt from any such disasters, and that the shareholders may then receive a yet higher dividend—no one will deny that they deserve it.

## FURTHER EXTENSION OF TELEGRAPHS TO THE EAST.

THE great system of direct submarine telegraphs to the East will very soon be extended to China. The Falmouth, Gibraltar, and Malta, the Anglo-Mediterranean, the British Indian, and the British Indian Extension Companies, have already combined to lay an unbroken series of cables from our own shores to the Straits Settlements, and the China Submarine Company now undertakes to continue that series to Saigon, Hong Kong, and Shanghai. Like its predecessor, this company is brought out under the auspices of the Telegraph Construction and Maintenance Company, who will manufacture and lay the cables. The board of directors is exceedingly influential, comprising Mr. JOHN PENDER (chairman), Lord WILLIAM HAY, Mr. MASSEY, Mr. J. H. CRAWFORD, Mr. T. FAIRBAIRN, Lieut.-Colonel GLOVER, R.E., Mr. H. N. LAY (late Commissioner of Chinese Customs), and Mr. R. D. SASSOON. The required capital is £525,000, in 52,500 shares of £10, of which £100,000 will be taken in fully paid shares by the contractors, leaving for general subscription 42,500 shares, for which it will be necessary to pay a deposit of £1 per share on application and £1 on allotment. The remainder of the instalments are spread over the period from the 1st of July to the 1st of Nov., 1870. A contract has been entered into between this company and the Telegraph Construction and Maintenance Company for the manufacture and laying of the cable from the Straits of Malacca to Hong Kong for the sum of £508,000. The cable is to be shipped from England in 1870, and is to be completely laid by June in the following year. The second section, from Hong Kong to Shanghai, with intermediate stations at Amoy and Foochow, is to be commenced as soon as the directors shall think it expedient, and is to be made and laid by the same company as the first, for the sum of £250,000, which will be raised by a second issue of shares. The cables are to be of similar type to that of the British-Indian Extension Telegraph Company, but will be considerably heavier, on account of the lesser depth of water in which it is to be submerged. Satisfactory working arrangements have been entered into with the companies forming the other links in the system; and with the enormous advantage of one organisation throughout, entirely in English

Digitized by Google

hands, the efficiency of the entire scheme, and consequently its success, cannot for a moment be doubted. An ultimate extension of the line to Japan is intended. Arrangements are also in progress for the intended lines connecting Burmah, the Tenasserim Provinces, and Siam with Penang, so as to bring the traffic from those countries into the British Indian lines. In less than two years we shall have such a complete system of communication with and between all important seats of trade in the East as will be really creditable to British enterprise.

## THE COOLIE TRADE FROM CHINA TO PERU.

An interesting paper with the above title was read by Mr. Y. J. Murrow, on the 28th ult., at a meeting of the Council of the Social Science Association. The question of the mortality on board Chinese coolie ships, the author justly observes, is not well understood in this country. The emigration of Chinese to San Francisco was conducted for years with an average mortality of less than one per cent.; that to Australia with very little more, while that among the coolies shipped to British Guiana has been comparatively insignificant, though of course somewhat larger than in the first-mentioned cases, owing to the greater length of the voyage. The Peruvian trade presents a horrible contrast to these statistics. The average mortality in it is set down at upwards of 25 per cent.; in one case it reached 55 per cent., and in another—doubtless the worst ever known, for anything worse is impossible—it is stated to have been 100 per cent., only five coolies having been landed alive out of 300, and these died in hospital within a fortnight. Nor is this the full extent of the evil. Cruelty, excessive toil, insufficient food and clothing, loathsome diseases generated by the foul air and filth of the Guano diggings, make a life of hopeless misery always ending in premature death, even when not cut still shorter (as it often is) by suicide. In a very fairly written history of the traffic, from its commencement in 1849, to its stoppage by Governor Souza's recent prohibition, the author narrates these and many other iniquities that have characterised it. He shows, clearly enough (to use his own words), that this slave trade has been carried on "in open "defiance of the laws of China, and in utter disregard of "all national obligations; that an organised system of "shameless kidnapping and deception has been practised "on the coolies, who have been coerced or cajoled into emi-"grating thither; that the most barbarous and murderous "cruelties have been practiced on the victims of this system, "and that the destruction of probably 100,000 innocent lives "has been the result. I seek to show that the Peruvian Go-"vernment has been a party to this system of sanguinary "fraud, partly through culpable apathy, . . . partly by placing "the matter in the hands of their guano contractor, who evi-"dently enjoyed a perfect immunity from the performance "of his share of the so-called coolie contracts; and still "more culpably in appointing a notorious man-stealer as "their Consul-General in China." One other thing Mr. Murrow seeks to prove would, if the charge were substantiated, reflect no little discredit on the Government of Hong Kong; it is that "after the coolie traffic to "Peru had been utterly stopped in China by the weight "of its notorious infamy, the Government of Hong Kong "lent, or were publicly supposed to lend, or appeared "to lend, the sanction of British support and protection to "a deliberate attempt made by the agent of the guano con-"tractor to revive it." The stringent provisions of the Chinese Passenger Act had prevented Hong Kong being used as a depot by the coolie contractors; but Mr. Murrow states that very recently a ship under Belgian colours, called the *Frederic*, was loading coolies in Hong Kong for Peru, and that this was made possible by Governor MacDonnell having, after some secret correspondence with the agent of the guano contractors, consented to relax the provisions of the Act, and instructed the Emigration officer to be "indulgent" in the execution of his duty, so that in the case of the *Frederic* the strict operation of the ordinance might be evaded. Mr. Murrow's statements—and they are very plain and circumstantial—point to a grave scandal which will need prompt investigation. Of course these statements present only one side of the question; but they certainly call for a reply from the Governor, and this we look for with much interest, trusting that it will be in his power completely to refute the charge brought against him.

## STRAITS AFFAIRS.

A copy of a very important despatch from Sir Harry Ord, in which his Excellency replies to the various representations made by the Straits Settlements Association to the Colonial Office, has been forwarded by Earl Granville to the Honorary Secretary of the Association; and a meeting is to be held on Wednesday next to take it into consideration. The document and the reply to it will no doubt be published in due time, and will we hope mark another step in the progress of reform in the Government of Crown Colonies. It is gratifying, at any rate, to find that the present Chief of the Colonial Office evinces a disposition to thoroughly investigate the alleged causes of complaint; and the Straits Association has already evidenced the advantage to be gained by an influential body of colonists acting in this country as the representatives of a distant community of British subjects. Other Crown Colonies may learn a useful lesson from what has been achieved by this Association. We understand that it is the intention of the Committee to seek another interview with Earl Granville on the subject of the finances, as they cannot agree with the statements of the Governor as to a surplus; the half-million expected from India being illusory. The attention of Lord Granville will be called to the sum remitted for the gunboat, which, as we stated in our issue of the 20th Sept., has not been even laid down.

## MR. ROSS BROWNE ON CHINA.

Mr. Ross Browne has made an effort to counteract the effects of the persistent misrepresentations by which it is sought to uphold the Burlingame policy, by a letter to the *San Francisco News Letter*. In this he combats the opinions of Mr. Wade, who still holds to the belief that the governing party in China really wishes to initiate a policy of progress, by adducing those of Mr. Hart, as enunciated in a letter addressed to himself. Mr. Hart candidly admits that the Peking College has collapsed, and that the Foreign-office grows more illiberal every day; and he significantly adds, "I have not ceased to warn Mr. Burlingame how far from making good his words are the Chinese." Unfortunately these representations are not likely to prove any great check on the fervid eloquence of Mr. Burlingame. He goes on, and (in his own way) prospers. He has caught the Dutch Foreign Minister with the prospect of "a largely increased trade," just as he caught larger fish with the "shining cross" bait; what lure is he holding out to the Czar of all the Russias? Some political or territorial advantage over other Powers, no doubt, for he evidently exercises a nice discrimination in his choice of inducements. At Berlin he is said to have been much gratified by the reception he met with. Besides a treaty of Commerce between China and Prussia, he is to conclude a treaty of amity, whereby China, so far as the North German Confederation is concerned, will be placed upon the footing of Christian nations, and this, it is said, will probably be concluded before the new year. We append the full text of Mr. Browne's letter, as it cannot be too widely circulated:—

The following telegraphic despatch, dated Washington, Oct. 30th, appears under the above heading in the *Bulletin* of Saturday:—

"Mr. Wade, English Chargé d'Affaires to China, is reported to have said recently that J. Ross Browne was in error in stating that the Chinese made no progress. They recently established foreign affairs, provided for the education of youth abroad, and this, with the appointment of the Burlingame Mission, indicates considerable progress. Mr. Wade thinks all the Burlingame treaties will be ratified."

Like every despatch on the Chinese question, dated Washington, published since my arrival here, the above is calculated to mislead the public.

I have said, and I repeat it, that if any progress has been made by the Chinese since the reign of Kang-he, it has been under the influence of force or pressure. They have advanced whenever they have been compelled to do so, and not before. Mr. Wade says, according to the report; "They recently established foreign affairs." Mr. Wade knows perfectly well that the foreign affairs of China were established by foreigners. The Chinese would gladly get rid of their "foreign affairs" if they could. They had not "provided for the education of youth abroad" up to the date of my departure from Peking, and I have good reason to believe that they have not done so since. Mr. Robert Hart, Inspector-General of Maritime Customs, admits "the College has collapsed" (meaning the University of Peking); and in a letter received by last mail, informs me that he has "not ceased to warn Mr. Burlingame how far from making good his words are the Chinese." He

Digitized by Google

further says: The Yamen (foreign office) is more illiberal every day.' I have reliable information, direct from Shanghai, to the effect that Dr. Martin, "Professor of Political Economy and International Law in the University of Peking"—an institution which does not exist, and never did—is going to make an effort to revive the project in another shape, viz., by trying to prevail upon the Chinese to send pupils abroad. It has not yet been done, and, judging by past experience, it probably never will be done.

Mr. Wade has been absent during the past three years in England, and knows nothing by personal observation about progress in China during that time. He is now on his way to Shanghai, *via* California, having sailed by steamer of Oct. 4. It is very natural for Mr. Wade, in his present position, to think that "the appointment of the Burlingame Mission indicates considerable progress." If he can convert anybody in China to his opinion, it may help the cause. It certainly pays better to think that than it does to know the contrary and prove it.

As to the probability of "all the Burlingame treaties" being ratified, I would like to know with what powers "all the treaties" have been made. So far as I have heard, and to the best of my belief, no treaty has yet been made, except with the United States.

Permit me to express the belief that Chinese progress is in exactly the opposite direction to that intimated by Mr. Wade.

Sir Rutherford Alcock says (Feb. 19, 1869):—

"Whatever may be the desire of the best friends of China and of foreign merchants to see her advance in the path of progress, and enjoy the increased prosperity which the adoption of the several improvements referred to would do so much to secure, I cannot feel justified, in the present aspect of affairs, in holding out any hopes of material modification in the policy or disposition of the Chinese Government in regard to telegraphs and other similar innovations on established customs."

Is there any sign of progress in this? Mr. Hart says in a recent letter to myself:—

"Leaving aside what has been said about Mr. Burlingame, the addresses presented to you [by the American and British merchants of Shanghai] are reasonable, truthful matters of fact, and to the point. Your reply is a fair *résumé* of history and a just exposition of the situation. I cannot see anything to disagree with."

Is progress indicated either in the addresses or in my reply?

The truth is, Mr. Low is sent to China to represent as existing there that state of things which I am permitted to remain at home for proving does not exist. If the friends of progress in Washington can succeed in opening up China by means of such telegraphic despatches as that quoted, they will be entitled to the credit of having devised a very effective substitute for gunpowder.

I think all such despatches ought to be transmitted to the Emperor of China.—Respectfully yours, J. ROSS BROWNE.

---

IN the *Illustrated News* of the 4th inst. we notice an engraving and description of the monument that has been erected in Calcutta to the memory of the late Lord ELGIN. It is satisfactory to find that the nature of its design is such as to commemorate his valuable services, not only as Governor-General of India, but as the honoured representative of Great Britain in China and other countries, where he did good service at an earlier period. Of course Calcutta is the fitting place for a monument; but, taking into consideration his varied and almost world-wide achievements, it seems to us that a niche in Westminster Abbey might be worthily filled with a statue or bust of the late earl.

---

THE arrangements for laying the British Indian Telegraph Cable progress satisfactorily. The *Great Eastern*, according to last advices, had reached St. Vincent on the 19th, and was to leave for the Cape on the 25th Nov. The *Chiltern* was at Teneriffe on the 17th Nov.

---

IT is announced that the Pacific Mail Company have altered the date of departure of their steamers from San Francisco to the first day of the month, instead of the fourth, as formerly. This seems to us a much more convenient arrangement.

---

BREAKFAST.—EPPS'S COCOA.—GRATEFUL AND COMFORTING.—The very agreeable character of this preparation has rendered it a general favourite. The *Civil Service Gazette* remarks:—"The singular success which Mr. Epps attained by his homœopathic preparation of Cocoa has never been surpassed by any experimentalist. By a thorough knowledge of the natural laws which govern the operations of digestion nd nutrition, and by a careful application of the fine properties of well-selected Cocoa, Mr. Epps has provided our breakfast tables with a delicately-flavoured beverage which may save us many heavy doctors' bills." Made simply with boiling water or milk. Sold by the trade only in ¼lb., ½lb., and 1lb. tin-lined packets, labelled—JAMES EPPS & Co., Homœopathic Chemists, London.—ADVT.

# Foreign Intelligence.

## GERMANY, &c.

(FROM OUR OWN CORRESPONDENT.)

HAMBURG, Dec. 8.

The recent case of another piratical attack on a German merchant ship, the *Apenrade*, in the Chinese seas has shown the necessity of taking some steps for the protection of trade there. The German ships of war hitherto sent to China and Japan (the *Arcona*, *Gazelle*, and *Vineta*, and even the *Medusa* and the *Nymph*) were found to be too large and heavy, and with too great a draught of water to enable them to cope successfully with the pirates, and follow them up into their almost inaccessible lurking-places. On the other hand, the gunboats employed on this service were too small and confined for the health of the officers and crews in a tropical climate. It has been, therefore, thought expedient to devise a new class of vessels, called steam-avisos, being something between a corvette and a gunboat, of a light draught of water, and roomy. The Prussian official organ, the *Staats Anzeiger*, of the 24th inst., contains the following announcement:—"For the protection of the German trade against pirates in the China seas the King has been pleased to give orders for the immediate construction of two steam-avisos, to be called the *Nautilus* and the *Albatross*. They will each be of 600 tons, with engines of 150-horse power, and an armament consisting of two rifled twenty-four pounders and two rifled twelve-pounders.

Mr. Koopmanschap, the Californian contractor for the delivery of Chinese coolies, has proposed to the North German Lloyd Company at Bremen to charter some of their steamers for the conveyance of Chinese, not from China to California direct, but *via* the Suez Canal to New Orleans. The steamers are admirably adapted for the purpose, being built and fitted up for the conveyance of German emigrants from Bremen to New York, Baltimore, and New Orleans, and often carry over 900 to 1,000 in a single vessel; but we understand that, as that branch of business is so remunerative, and they are, moreover, under contract with the different Governments to carry the German, French, and United States mails every week, they were obliged to decline the offer.

Mr. Burlingame and his Chinese companions appear to be continually in motion and travelling about the Continent in the most peculiar zigzag fashion imaginable. Scarcely had they returned from Copenhagen and Stockholm than they turn up at the Hague. Last week they arrived at Berlin, "*en route* for St. Petersburg," as it was stated with a great flourish of trumpets, and are at present staying at the "Grand Hotel de Rome" in that city; but the Berlin papers now announce that they are about to leave for Brussels, and will subsequently go from thence to Russia.

---

## HOLLAND.

(FROM OUR OWN CORRESPONDENT.)

ROTTERDAM, DEC. 8.

The members of the First Chamber met some days ago, and will discuss the India Budget, now under examination in the sections very soon. The question of the influence of the Suez Canal upon our trade with India is being earnestly discussed, and there is a great deal more paper expended in the controversy than money in building steamers suitable for the new route. Indeed, absolutely nothing is heard with regard to any project for establishing a direct line between Holland and India *via* the Canal, and the schemes for a steam line between our country and America seem likewise to have miscarried. In the meantime the papers continue to demonstrate, day after day, that it is the duty of our capitalists to back these enterprises, by which means alone can our depressed trade be revived. Amongst the new ideas put forward, is one to the effect that the Trading Company should establish *filiales* at Trieste, where Java produce could be imported and sold. Undoubtedly this suggestion will remain a *pia vota*. The Trading Company has seen its best days, and the endeavour to maintain its system of consignments by the means referred to would prove, in all probability, abortive.

In the last number of the *London and China Telegraph* you made mention of a rumour, spread by German newspapers, that negotiations were on foot between our Government and that of Prussia for the cession of the Banda Islands to the North German Confederation. These *on dits* have been contradicted in the most positive manner. You will remember that for some years they have been periodically brought on the *tapis* by German journalists. There is, however, much talk of the intention of our Government to get rid of our colony on the West Coast of Africa. In my last letter I spoke of the inauguration of a monument for 1813; I have now to add that the editor of the official journal, *De Staats Courant*, was invited to the banquet, in order to report the toasts, but was compelled to decline the invitation because the Minister of the Home Department had forbidden him to be present at the banquet. The Conservative paper, *De Noord Star*, terms this news "incredible."

I stated in my last that Mr. J. C. van Lier, parliamentary reporter, had been appointed editor of the *Bataviaasch Handel-blad*, in the room of the late Mr. Lion. It, however, appears that this was not exactly the fact, Mr. Van Lier really proceeding to Batavia in order to take the place of Mr. L. W. C. Keuchenius, ex-editor of the *Nieuw Bat. Handelsblad*. Mr. Van Lier was for a long time private secretary of Mr. Van de Putte, ex-Minister of the Colonial Department. In a short time Messrs. J. Doornick, J. D. Rash, G. van der Jagt, C. Rash, and A. L. Clignett, will leave for Batavia, where they have been appointed judicial functionaries.

## THE ETHNOLOGICAL SOCIETY.

Mr. Hyde Clarke wishes to state that his remarks on Mr. Gardner's paper went beyond the subject of the general study of comparative philology. He gives his support to Mr. Gardner's statement of the similarity of some of the Chinese early characters with hieroglyphics and the Semitic alphabets, and he also referred to other examples of a similar kind. He did not, however, adhere to the conclusion that the other systems of signs and letters were derived from the Chinese, but rather believed that the Chinese, being a comparatively later people, adopted these and other elements of civilisation from some older people. He also dissented from the assertion that a resemblance of some characters supports the theory of Mr. W. W. Hunter, that the Aryan languages are derived in some way from the Chinese. Traces of similarity may, he stated, be found even in languages so remote as English and Turkish, but these are not the results of immediate translation, but of the identity of human thought under the like circumstances, or of derivation from some very remote source. Mr. Clarke considers, with Mr. Gardner, the Chinese to be of comparatively late settlement in China, and he considers them intrusive on an area formerly occupied or traversed by the Tamulo-Japanese, and perhaps before that by a ruder race, to which the Kamchatdales in the north, and the Sours in the south belonged, and of which, perhaps, intermediate relics may yet be found among the hill tribes of China.

# Monetary and Commercial.

The annual meeting of the P. and O. Company was held on the 10th inst., and the directors' report was adopted with many expressions of satisfaction. The meeting, the report, and the general position of the company are fully noticed in another part of our paper.

The prospectus has been issued of the China Submarine Telegraph Company (Limited), to complete the communications with the East already in progress. The proposed capital is £525,000, in shares of £10, and its first operation will be to lay a cable of 1,640 miles from the Straits of Malacca to Hong Kong, with an intermediate station at Saigon. The scheme is more fully noticed in our leader columns.

*The Times* announces that an exclusive concession has been granted by the Spanish Government to Messrs. Graham and Hean, of London, for forty years, for a submarine cable from Manila to Hong Kong and Singapore, and for a telegraph system for the whole of the interior of the island of Luzon; also for all the communications from the island of Luzon to the whole of the other Spanish possessions in the Philippine Islands.

Messrs. Samuel, Montagu, and Co. received on the 6th instant subscriptions for a Dutch Indian Railway Loan of £398,300 (the balance of eleven millions of florins), in bonds, to be issued at £77 11s. per 1,000 florins—or £84 15s.—and bearing interest at the rate of 4½ per cent. Reckoning the value of the reimbursement at par, the investment will yield nearly 5¼ per cent. The remainder of the loan, with the exception of two million florins reserved by the Dutch Government for conversion, has been allotted in Holland and Belgium. The object of this loan is to complete the necessary funds for finishing certain lines of railway in Java, and for converting the Four and a Half per Cent. Obligations, issued by the company in 1867. Interest and redemption of the bonds at par are guaranteed by the Dutch Home Government, so that the security will rank next to a Netherland State loan. The applicasions reached double the required amount

The underwriters in the China trade are being hit rather severely. To the loss of the *Devonport*, *Bella Rosa*, and *Spindrift*, we have now to add the *Inarime*, which left Foochow for London on the 16th Sept. with 856,400 lbs. Tea. The vessel was almost a new one of 665 tons, owned by Messrs. Glover Brothers.

Tenders for £387,500 in bills on India were received on the 1st inst. at the Bank of England. The amounts allotted were:—To Calcutta, £347,300; and to Madras, £40,200. The minimum price was fixed as before, viz., at 1s. 11d. on Calcutta and Madras. Tenders on those presidencies at 1s. 11 3/32d. will receive about 17 per cent.; above that price in full. A reduction of 1/32d., or ½ per cent., is shown, as compared with the rates paid on the last occasion; but this reduction seems to be owing rather to the increased amount of these drawings than to any falling off in the demand.

The amount of bullion by the P. and O. Company's steamer *Bangalore*, from Southampton, on the 11th inst., was—in gold, to Alexandria, £10,000; to Aden, £80; to Galle, £1,320; to Bombay, £26,600; to Madras, £5,585; in silver, to Bombay, £10,000; to Singapore, £23,800; to Shanghai, £1,980; total in gold, £43,585; in silver, £35,780.

The Ceylon currency question is considered here to be practically settled, and, in anticipation of the impending change, the banks connected with that colony are now sending out rupee notes instead of pound notes.

The report of the Ceylon Company (Limited), to be presented on the 21st instant, recommends an interim dividend at the rate of 6 per cent. per annum, and states that in Mauritius the prospects this year show a great improvement, while in Ceylon a period of injurious weather has been followed by a favourable change.

In reference to the representations made by the residents in Ceylon for a reduction in the rates of premium on life insurance charged by the "Standard Insurance Office," we understand it is the intention of the directors to adhere to their present tariff, which—considering the injury already inflicted by low rates—is the best course for the "Standard" and for the assured.

Mr. W. J. Haslam, of the firm of Haslam, Appleton, and Co., has joined the board of the Metropolitan Bank.

## THE P. AND O. COMPANY.

The annual meeting of shareholders in the P. and O. Company was held on Friday last, the 10th inst., when the twenty-ninth annual report of the directors was presented. James Allen, Esq. was in the chair.

The Chairman said he was very sorry to say that Mr. Hadow, the chairman of the company, was suffering from a severe attack of bronchitis. Three of their directors—Mr. Thornton, Mr. L'Estrange, and Mr. Melville—had gone to Egypt to represent the company at the opening of the Suez Canal. Mr. L'Estrange and Mr. Melville were now engaged in looking after the interests of the company in the East, and Mr. Thornton in examining the Brindisi route, to see how far it could be made available for the postal service. He was sorry to say that Mr. Howell, their excellent secretary, was absent in consequence of the death of his only child.

Mr. Hill then read the notice convening the meeting. The report, an abstract of which appears below was taken as read.

The Chairman, in moving the adoption of the report, said the revenue had improved considerably, but the expenditure had somewhat increased. Their ships had conveyed £3,000,000 of specie from Australia in the past year. They had carried £1,336,000 of the specie out and home, against £1,061,000 in the previous year. They had used up nearly all the expensive coal sent out during the Abyssinian Expedition, and had been lately able to obtain coal at a much cheaper rate than during last year. When the expensive coals were used up and the cheaper coals came into operation the net returns would look better. An effort had been made to utilise the native coal at Calcutta by mixing it with English coal. An experiment was tried at Calcutta with the mixed coal, and satisfactory results were obtained. He hoped they would be able to get the native coal delivered at Calcutta at a cheaper rate than they had paid for it, and the Welsh coal also, so that the average cost per ton of coals might be considerably reduced in future. Although the Suez Canal was open, their ships must still go to Alexandria, because in all probability passengers would still go by rail. They were not unmindful of the advantages of the Canal, and would use it if possible for the benefit of the proprietors. He might mention that the silk traffic had been very satisfactory, and that the company had carried ninety per cent. of the whole of the silk traffic from China to Europe. The freights were keeping up remarkably well. They carried a great deal, although they did not get much for it; but it was satisfactory to know that it was on the increase.

The Hon. H. Tracy, M.P., seconded the motion for the adoption of the report. He would have been pleased to see a larger dividend than 6 per cent., and a larger increase in the reserve fund; but when they considered the tremendous competition which the company was undergoing he thought they must consider the operations of the year satisfactory. In his opinion the reserve fund ought to amount to £500,000. It was very satisfactory that the postal service had been so well performed, and with perfect regularity.

Mr. Gliddon said he did not consider the operations so satisfactory. It was true the receipts had increased by £73,000, but the expenses had increased by £76,000. The capital had increased, and the dividend had diminished. Since 1858 the capital had increased by £1,500 000, and they had to pay dividend on that extra capital, and he thought, therefore, that the extension of capital had been carried to the utmost limit. The value of the stock of ships was in 1858 £1,886,000, but now it was £2,948 000. The tonnage of the ships at the former period was £23 per ton, but now it was £30 a ton; so that if the ships had not increased in value, the outlay of the additional £700,000 was not profitably expended. It was not satisfactory to see the working expenses increase and the dividend diminish.

Mr. Jones said he considered the report satisfactory. With a depression of trade they had increased the receipts, and therefore the directors must have done something to look up freight. In the face of the competition it was a great matter for the company to increase their income by £500,000 in the year.

Mr. Murray considered the coal question one of the most important for the company. Everything that reduced the consumption of coal, or the cost of it, would add to their dividend. They had purchased 282,000 tons of coal this year, and only 1s. a ton upon that amount

Digitized by Google

would be above £14,000. If they could run their colliers through the Suez Canal they might save something important on the freight.

After some further observations,

Mr. W. F. DE SALIS, a director, explained that everything was being done to economise expenditure. Since 1858 they had been subjected to considerable competition. It was most unfair to compare the state of things in 1858 with those of the present year. They had immense quantities of specie to carry then, which paid well; but that business had greatly fallen off. He believed that the Suez Canal would make trade for the company. Their large ships would be able to bring large cargoes of wool from Australia, which would be remunerative; also the trade with China and Japan would increase, and instead of having only sixteen passengers per month to and from Australia, he trusted they would before long have a hundred passengers per month.

The CHAIRMAN explained that the company's fleet now consisted of larger and better ships than in 1858, and that fully accounted for their increased value alluded to by Mr. Gliddon.

Resolutions were unanimously passed adopting the report, and declaring a dividend of 3 per cent. for the past half-year, free of income-tax, payable on the 28th inst. The retiring directors and auditors were re-elected; and the proceedings concluded with a vote of thanks to the chairman and directors.

EXTRACT FROM THE REPORT.

"The *Bombay*, withdrawn for repairs at the date of the half-yearly report, having received new boilers and been otherwise completely refitted, is again in active service. The *Hindostan*, which was launched in June, has been completed, and after a satisfactory trial in the Channel, was despatched to Calcutta *via* the Cape of Good Hope, on the 3rd ult. Rapid progress has been made in the new ship contracted for with Messrs. Caird and Co., of Greenock. This vessel has been named the *Australia*. The directors have issued invitations for tenders for two new vessels of about 3,000 tons each, which are to combine the speed and other requirements of the mail and passenger services, with a large capacity for the conveyance of cargo. The *Sultan* and *Indus* (sailing ship) have been sold, the former in China, and the latter in this country.

"The directors have a very painful duty to perform in recording the wreck of the *Carnatic*, and they deeply regret that this casualty was attended by the loss of life. The *Carnatic* ran upon a reef near the entrance to the Gulf of Suez, at 1.30 A.M., on the 13th of September, and unhappily slipped down into deeper water while the passengers and crew were in the act of embarking in the boats on the morning of the following day. The evidence taken at the Court of Inquiry, which was held at Greenwich on the 23rd to the 25th ult., and fully reported in the newspapers, will have placed the proprietors in possession of all the particulars of this distressing event.

"The company was represented by three members of the board at the recent ceremonials in Egypt in connection with this great work, and one of its steamers, the *Delta*, proceded up the Canal as far as Ismailia. The directors are careful to keep themselves supplied with the best information on all points relating to the Canal; and the proprietors may feel assured, that whenever it may be for the advantage of the company to make use of it, the opportunity will not be neglected.

"The unfortunate loss of the *Carnatic* has created a charge to the underwriting account of £90,300, and the company's contribution to the general average consequent on the grounding of the *Surat* in 1867 has turned out to be larger than was estimated when the accounts for 1868 were made up, and the sum of £9,411 12s. 1d. has to be debited to this year's account. These charges, with a smaller contribution to a general average on the *Candia*, absorb £101,392 17s. 10d. of the annual premium on the estimated value of the floating property of the company, namely, £120,000, and the balance, £18,607 2s. 2d. has been carried to the general reserve fund

"The share capital of the company stands at the same amount as at the date of the last annual report, namely, £2,700,000, leaving £800,000 available, and it may be convenient to the proprietors to know that no call is likely to be made during the next twelve months. The amount borrowed on debentures is £799,000, and those which fall due from time to time are readily renewed at 4½ per cent.

"The operations of the year may, on the whole, be considered satisfactory. In the last annual report the proprietors were reminded that in 1867 there was a heavy loss, and that a considerable portion of the profits available for dividend in 1868 was due to the Abyssinian expedition. The balance at the credit of the profit and loss account this year is only enhanced to a trifling extent by the winding-up of the accounts for the transport service, and the available profit arises, therefore, chiefly from ordinary sources of revenue.

"The directors have now to recommend a dividend of three per cent., free of income-tax, for the six months ending 30th September last, making, with that declared in June, six per cent. per annum. The warrants will be issued on the 28th inst.

## ARTICLES OF IMPORT.

—o—

### TEA.

At the sales of 7,500 packages this week good medium new red and black-leaf sold at 1s. 1½d. and 1s. 1d., being a fall of 1d.; private sales are very small. Young Hyson lower.

### SILK.

A marked improvement has taken place in the Silk market within the last fortnight; during that time the symptoms of revival which had just then shown themselves have strengthened into a very active market, and a general recovery of prices to the extent of 1s. to 2s., according to description and quality, in all classes of Silk. In Chinas the demand has been really large, especially for Tsatlees, the lower grades of which have received unusual attention.

### COFFEE.

The interval has again been characterised by the absence of any material change in the market for Ceylon. The supplies offered at the auctions have been moderate in quantity, and have gone off at prices showing but little variation from those current at the date of our last report. The absence of business in East Indian descriptions of Coffee other than Ceylon continues; in Java and Singapore no transactions are reported. Of Manila 193 bags were bought in at 50s., except 27 bags fine, which sold at 60s.; 1,844 bags sea-damaged pale sold, first class, 50s. 6d. to 51s.; second, 48s. 6d. to 49s.; third and repacked, 46s. to 47s.

### SUGAR.

The market generally is fairly active, and prices are steady. Penang: At the public sales of 1,621 bags offered the greater part sold at and after the auction, ordinary to middling brown (duty 8s) at 29s. to 31s. 6d., good to fine brown and middling yellow (9s. 7d.) at 32s. to 37s., and good yellow (10s. 6d.) at 37s. to 38s., 1,025 baskets low brown being bought in at 26s. 6d. to 27s. 6d. By private contract 670 baskets (100 tons) low brown sold chiefly at 26s. Manila: At the auctions 19,968 bags clayed (duty 8s.) were bought in at 30s. 9d. to 32s.; and 1,856 bags unclayed, Taal, at 26s. 6d.; 12,390 bags unclayed Zebu sold, the bulk at 26s. 9d., superior 27s. to 27s. 6d. By private contract 82,000 bags have been sold, 70,000 bags clayed (duty 8s.) at 30s., a small quantity 30s. 6d. (duty 9s. 7d.) at 31s. 6d., and 12,000 bags unclayed, Zebu at 27s., low quality 26s. to 26s. 3d. Java: At auction 3,559 bags low brown were offered and withdrawn. By private contract 600 baskets have been sold at 36s. 9d. No transactions in China or Siam.

COCOA NUT OIL.—Shortly after the date of our last report a parcel consisting of 237 casks Ceylon was offered by auction, and 162 casks sold, good to very fine with a small part yellowish and yellow at £40 to £40 5s.; common, £39 to £39 5s.; dark and rather dark, £35; dark and very dark, £33 10s. to £34 5s. The inquiry has since this sale become more active, and the quotation for Ceylon is now £41 per ton. The quantity of Ceylon afloat for Great Britain on the 30th Nov. was 31,074 cwt., against 30,927 cwt. at the corresponding date last year.

TIN.—Prices are again lower, Straits being quoted £112 to £113, and Banca £113 to £114. The business doing is extremely limited.

The reports upon the condition of the market for the following articles of produce are from Messrs. Brookes and Faith's Circular, dated 2nd inst.:—

CINNAMON.—The quarterly sales of Ceylon Cinnamon on the 29th ult. comprised the total quantity of 2,504 bales, 32 parcels, and 60 boxes, being an excess of 1,300 bales not generally looked for, arrived per Ocean Belle. The assortment was particularly good, and orders from all quarters being strong, a better spirit prevailed than might have been looked for. Under these circumstances the highest decline submitted to (as compared with last quarterly sales' prices) was about 2d. to 4d. per lb., noticeable more particularly upon the very good and finest qualities. Fair middling (shipping) qualities brought former prices, to 1d. and occasionally 2d. decline; good 3rds were well competed for, and showed but little variation in price; good 4ths were very firm, and fine ditto went dearer. Low and inferior qualities brought full prices. Flavourless kinds (as is generally the case) sold most irregularly. Nearly everything offered was sold. Broken was in strong demand, from 1s. 8d. to 1s. 11d. per lb. for fair to good. Chips were sparingly offered, but nevertheless met only a limited demand. Prices ranged at 5d. to 5¼d. for Bark; inferior mixed quality, 6d. to 6½d.; good, 6¾d. to 7½d.; fine in quill, 12½d. to 13d.; tips, 1s. 7d. to 1s. 9d. The offers were:—New import, 1st Superior, 67 bales; 1st quality, 411 bales; 2nd do., 1,034 bales; 3rd do., 613 bales; 4th do., 272 bales; Old import, superior, none; 1st quality, 14 bales; 2nd do., 58 bales; 3rd do., 32 bales; 4th do., 3 bales; 32 parcels 60 boxes Ceylon broken; 482 bags and 8 cases Ceylon Chips. Prices ranged as under:—Superior quill, 3s. 5d. to 3s. 7d.; 1sts, good to fine, 3s. 3d. to 3s. 6d.; do., middling to fair, 2s. 9d. to 3s. 2d.; do., very low and ordinary, 1s. 6d. to 2s. 8d.; 2nds, good to fine, 3s. 1d. to 3s. 7d.; do., middling to good middling, 2s. 6d. to 3s.; do., very low to ordinary, 1s. 3d. to 2s. 5d.; 3rds, good to fine, 2s. 10d. to 3s. 3d.; do., middling to fair, 2s. to 2s. 9d.; do., coarse and inferior, 1s. to 1s. 11d.; 4ths, good to fine, 2s. 2d. to 2s. 6d.; do., ordinary to middling, 1s. 5d. to 1s. 10d.; do., very low unassorted, 8d. to 10d.; Jungle, 1s. 10d. to 2s.; broken, 1s. 9d. to 1s. 11d.; Chips, good to fine, 8d. to 1s. 2d.; ordinary to middling, 4½d. to 7½d.

CUTCH.—Position was well maintained until within the last week, when it became weaker, and sales were effected at a decline of 6d. per cwt. There appears to be evidence (especially from prices having so considerably given way in Liverpool, sales of fine having been made there at 23s. per cwt.) that market has a downward tendency. At auction have been offered 3,005 boxes Rangoon, partly sold at 24s. 6d. to 25s. fine, and Fish mark per Gloucester, mixed, at 23s. to 23s. 6d.; Calcutta, 601 bags retired: Penang, 320 bags good, rather mixed, 21s. to 22s. 6d. per cwt.

Digitized by Google

CHINA PRESERVED GINGER.—With large arrivals the article is almost unsaleable. Where sales have been effected, prices are lower, very good having been quitted at 8½d. to 8¾d., common at 7d. to 7¼d.; 600 cases at auction and only 210 cases sold. Chow Chow in small quantities has realised 1s. to 1s. 0½d. Orange 9½d. to 9¾d.; and 20 cases fine plump dry Ginger (Chyloong Brand) 1s. 1d. to 1s. 3d. per lb.

CAMPHOR.—Immediately following our last good Japan was again quitted at 95s. and fine held for 97s. 6d. Market then became quiet, and the Dutch sale of 5,000 tubs being advertised, forced sales were effected privately at 87s. 6d. for China, being a decline of 6s. to 7s. per cwt. Stagnation again prevailed until it was known that the prices obtained in Holland were equal to about 89s. delivered here, whereupon market hardened, and quite recently sales of Japan have been effected at 95s. per cwt. Large arrivals have lately occurred.

GALLS.—China: Still without any improvement in demand. Arrivals have occurred, part of which will be brought to sale this day. The article meanwhile is extremely dull, and tendency of prices downwards, meanwhile quotations are nominal. Japan also quiet: 223 cases placed at auction, very fine bright clean sifted 51s. 6d.; good part bold, 50s.; ditto slightly broken, 49s.; and rather more broken, 47s. to 48s. 6d.

GAMBIER.—Remained pretty steady for a few days after our last; but arrivals being heavy, and coming closely together, has caused the market ex ship to fluctuate. Sales have been made from 16s. 10½d. to 17s. per cwt., and a large quantity 16s. 9d. On the spot there has been little done; 17s. per cwt. is the nearest price. At auction 1,862 bales pressed cubes have been offered, and 670 sold at 18s. per cwt. for good, being quite 1s. to 1s. 6d. per cwt. decline. Cubes: Demand continues most quiet, and sales extremely difficult to effect; 4,475 packages at auction, and very few sold, fine, 21s. 6d.; common, 19s. 3d. to 19s. 6d.

HEMP.—Manila: for a few days after our last issue remained dull, but with no alteration in value, arrivals being rather heavy, and market being met, a decline of £2 to £4 per ton was submitted to at the subsequent auctions; a further fall of about £1 per ton was also made. There is but little inquiry, and market closes dull. The most recent transactions are: good roping £62 to £62 10s.; common to fair, £57 15s. to £59 10s.; superior, £64.

JAPAN WAX.—Extremely little doing, and there are appearances of prices giving way. 670 cases at auction very good saucer sold at 77s. 6d., and fine slab 75s. to 76s., this latter being certainly lower.

MUSK of good quality and shape is scarce, and for a few caddies of such higher prices have been realised, 32s. to 33s. per oz. being freely paid.

RICE.—Market has shown sundry fluctuations during the past month, but no very marked change has occurred. Low priced Rice has been the description most sought after. Bengal, Siam, and Madras have been in improved demand, whilst soft grain qualities have been neglected. The business afloat has been on a very limited scale. Prices are now low, and although stock is heavy, the quantity of East Indian Rice afloat for Europe shows so heavy a deficiency that, with any improvement in trade, a rise in price might justly be looked for. Stock, 49,606 tons of all kinds, against 33,744 tons last year. Afloat for Europe, 33,010 tons E. I. Rice, against 97,008 tons last year.

RHUBARB.—An arrival per Tanjore, consisting of 171 cases, was brought to auction early in the month, and sold at 2s. 11d. to 3s. 4d. per lb. for middling to very good bright coated, well-trimmed root, of generally good pinky break, being steady prices, to a slight advance; a few lots preferable break realised 3s. 6d; remainder withdrawn. At the last auction, when 202 cases were offered, chiefly of recent arrival, per Chillingham, marked quietude prevailed, and although the greater portion was placed, prices generally went easier, especially for the common kinds, which sold at 6d. to 8d. per lb. for dull dark, horny coated, grey and ordinary mixed break; fair bold, of middling coat and fracture, but slight wormy, brought 1s. 11d. to 2s. for flat, the round being held for 2s. 3d.; very middling coat, half fair, rest ordinary break, 1s. 5d. to 1s. 7d.; common, 11d. to 1s. 1d.; good, a little mixed, 3s.; and similar in appearance, but better break, 3s. 8d.; dust, 2d.

SPICES.—Nutmegs: An inquiry has sprung up, and about 80 cases have changed hands, including 67 to lb., at 3s. 10d.; 75 to lb., at 2s. 10d.; 80 to 81 to lb., at 2s. 6d. to 2s. 7d.; 82 to 89 to lb., at 2s. 5d.; 129 to lb., at 1s. 7d.; small Javas held for 1s. 5d. The position of the article is such, that with any revival in trade price may readily advance. Mace has been in improved inquiry, and about 60 cases have changed hands at very full prices. At auction, all parcels sold with good spirit at 2s. 8d. to 3s. 1d. per lb. for middling bold, rather reddish Penang; good flat at 3s. 3d. to 3s. 6d.; broken, from Melbourne, at 2s. 9d.; and 5 casks fair Java retired at 2s. 11d. Quantity afloat s decreasing, being 39½ cwt. against 124 cwt. last year, but stock is small, only 215 packages. Cloves: Penang scarce, and none lately offered. Value of good, 11¾d. to 1s. per lb.

SAGO.—The very important quantity of 2,330 boxes and 2,118 bags has been offered at auction since our last, but only 2,000 packages found buyers, the supply being far in excess of the demand. Fine small in boxes sold at 18s. 6d., being for this quality 6d. lower; good, 18s. 3d.; and middling to very good in bags, 17s. to 17s. 6d. per cwt. Large grain, following our last, realised 22s. 8d. to 23s., then 20s. for fair of old import; but at the last sale good bright, per Dewa Gungudhur, GH in triangle, L under, was quitted in bags at 19s. 6d. to 20s., being fully 2s. to 2s. 6d. decline. Sago Flour: Is steady for Singapore kind, but a shade lower for Borneo or fine quality, there being sellers of the latter at 14s. 3d. in small lots, and at auction 210 bags sound repacked were quitted at 13s. 9d. per cwt. For Singapore 13s. 9d. has been bid and refused; but afloat, near at hand, sales have been made at 13s. 9d.; 913 bags at auction, but all retired at 14s.

SAPANWOOD.—Most quiet, and sales difficult to effect. Ceylon, 62 tons retired; Manila, 24 tons sold, £8 7s. 6d.; and Bombay, 23 tons sold, £8 5s to £8 15s. per ton.

TAPIOCA.—Penang: Only 119 bags good quality offered. These sold at 2¼d. per lb. together, with 300 bags privately at same figure. Remainder, 1,053 bags, consisted of common and good middling quality, and the sound being held for 2½d., only the damaged portion was quitted, viz., 380 bags at 1½d. to 2d. per lb., for 3rd to 1st class sea, being very cheap. Malacca: Meets no demand over 2¼d., at which really fine has been sold privately; at auction 1,109 bags offered, but only 180 bags placed at time of sale, these at 2¼d. for fine white well made, common retired at 1¾d.

## ARTICLES OF EXPORT.

### WOOLLEN GOODS.

The following is Messrs. Hayter and Howell's monthly statement of the estimated exports of Woollens shipped to China and Japan from London and Liverpool:—

| — | Pieces Long Ells. | Pieces Camlets. | Pieces Spanish Stripes, Broad Cloths, &c. | Pieces Stuffs. | Pieces Inferior Woollns. |

## NEW YORK MARKETS.

### TEA.

There has been a slight improvement in the demand since we last reported upon the condition of the market, chiefly noticeable in Greens. Only a moderate amount of activity, however, as yet exists, but prices for all descriptions exhibit considerable firmness, and there is every prospect of the enquiry becoming more extensive. The following are the current quotations:—Taeping and Twankay Young Hyson, 46c. to 90c.; Gunpowder and Imperial 60c. to $1; Hyson, 45c. to 60c.; Fychow and Moyune Young Hyson, 52c. to $1; Gunpowder and Imperial, 63c. to $1.15; Hyson, 55c. to $1; Hyson Skin, 46c. to 60c.; Foochow Oolongs, fair 50c., superior 53c. to 56c., fine 65c. to 70c.; Amoy Oolongs, fair 47c. to 48c., superior 51c. to 53c., fine 60c. to 63c.; Congou and Souchong, good common 54c. to 55c., superior 60c. to 68c., fine 70c. to 80c.; Japans, fair 55c. to 57c., superior 61c. to 63c.; fine 65c. to 68c. The sales have been 700 half chests Uncoloured Japan per N. B. Palmer, 500 do. per Crested Wave, 950 do. Green and 550 do. Uncoloured Japan, vessels not named. 4,000 half chests Green, part per Anglo Saxon, 60 per Chinaman, 690 per Etha Rickmers, 325 per Horatio, 333 Oblong, per Surprise, 6,000 Uncolored Japan, to arrive per Doon, 2,200 do. Oolong, and 1.100 do. Green, vessels not named.

From Jan. 1 to Nov. 19 the imports were—Greens, 19,364,400 lbs., against 14,977,000 lbs. in the corresponding period of 1868; Japans, 10,234,600 lbs., against 6,759,400 lbs.; Oolongs, 11.298,200 lbs., against 12,592,300 lbs.; Souchong and Congou, 2,491,200 lbs., against 1,638,000 lbs.; total of all description, 43,388,400 lbs., against 35,966,700 lbs.; the deliveries were—Greens, 19,100,800 lbs., against 15,319,300 lbs.; Japans, 9,776,700 lbs., against 6,678,700 lbs; Oolongs 113,474,000 lbs., against 10,163,500 lbs.; Souchong and Congou, 2,308,800 lbs., against 1,752,700 lbs.; total of all descriptions, 42,533,700 lbs., against 33,914,200 lbs. The stock on Nov. 19 was of Greens, 2,847,500 lbs., against 2 595,600 lbs. at the corresponding date last year; of Japans, 2,374.300 lbs., against 1,763,500 lbs.; of Oolongs, 4,777,600 lbs., against 5.787,000 lbs.; of Souchong and Congou, 488.100 lbs., against 256,300 lbs.; and of all descriptions, 10,417,500 lbs., against 10,402,400 lbs.

COFFEE.—There is a fair inquiry for Brazil from the Trade, the market remaining steady and uniform at the values so long previously current. The demand is still confined to the low and better grades, which are scarce, while the medium grades, which are plenty, remain neglected. Java, is inactive, the Trade being mostly supplied from dealers' hands; 126 bags Government, and 4.150 mats, a speculation lot, brought 22⅛ cents., gold; the sale is also reported of 16,246 mats per Jean Von Galen and 9,078 mats per Royal Berkshire on private terms. In other descriptions of East India there has been no business. The quotations are Singapore, 20c. to 22½c.; Ceylon, 17½c. to 19½c. gold. The stock of Manila on the 1st Nov. was estimated at 3,775 bags, against 4,679 bags on Nov. 1, 1868; of Java (Government) at 943 bags, against 1,436 bags; of Java (mats) 43,391 mats, stock 1868 *nil*, of Ceylon *nil*, against 100 bags in 1868.

CORDAGE.—The quotations are: Manila Cordage, 24c.; ditto 6-thread and 9-thread (¼ inch and 5-16 inch diameter), 25c.; ditto, 12-thread (⅜ inch diameter), 24½c.; Manila Hay Rope, 24½c.; Manila Cordage, Bolt Rope Yarns, 26c.; ditto, 6-thread and 9-thread, 27c.; Tarred Manila, 23½c.; Fine Tarred Manila Lath Yarn, 25c.; and Sisal Rope, 21c. cash.

CAMPHOR.—Quotation for China, 23c. gold per lb. 3,000 piculs afloat from Hong Kong.

GAMBIER.—Quotation 3⅞c. gold. Stock, 5,000 bales.

HEMP.—Manila is entirely out of demand, and there has been no business; the nominal quotation is 14½c. gold. The stock of Manila on

Digitized by Google

the 1st Nov. was estimated at 5,357 bales, against 10,936 bales at the corresponding date of 1868, and 8,061 bales in 1867.

INDIGO.—Manila has slightly declined, 30 cases having been sold at $1.10 to $1.40 currency; stock, 1,200 chests.

SPICES.—Cassia is lower; sales of 10,000 mats at 42c. to 43c. gold. In other kinds there is nothing of moment to report, though, with a less active demand, prices favour buyers; sales 160 cases No. 1 Nutmegs at $1.05 to $1.10; 850 bags Pepper, 25c. to 25½c.; 400 bales Cloves, 26c.; and 60 to 70 do. Bird Peppers, 25c., all gold.

SUGAR.—The dulness which has characterised the market for East India descriptions for some time past has continued without relief; the only sale to report is that of 1,396 bags damaged Manila at 8c. to 8⅞c. cash. The current quotations are:—Java, Nos. 10 and 12, 11¼c. to 11⅞c.; Manila, current clayed, and superior, 10⅜c. to 11½c. per lb gold. The stock of Java on the 1st Nov. was 310 baskets, against 810 baskets at the corresponding date last year; of Manila 96,700 bags, against 31.283 bags. Out of the cargo of Manila per Zephyr 26,533 bags have been shipped to Canada.

TIN.—The market for Banca is dull and rates are lower; Straits is in moderate inquiry at steady rates. We note sales of 5 tons Banca on private terms and of 150 pigs and 50 slabs Straits at 33½c. to 33¼c. gold; the nominal quotation for Banca is 35c. to 36c. gold.

OILS.—Aniseed is quoted $3.87½ currency; Cassia, $2.50 gold.

PRESERVED GINGER.—The current quotation is $10.50 to $11 currency; stock, 1,500 cases.

RICE.—A dull tone continues to prevail, especially with reference to East India descriptions. Rangoon is in limited inquiry for export, and we note the sale of 650 bags at $2.93¾ to $3.25 gold (in bond).

RHUBARB.—The quotation for China is $2 to $3 currency.

## SAN FRANCISCO MARKETS.

TEA.—Imports from Jan. 1st to Nov. 16th: China, 678,681 lbs., 1,878 packages; Japan, 884,999 lbs., 2,663 packages. There is a good demand in a small way for all the high grades of Japans and Oolongs; but otherwise trade is slack, with no disposition to purchase beyond current wants. Quotations: Young Hyson, country made, 75c. to $1 15c.; country packed Gunpowder and Imperial, 75c. to $1 15c.; Hyson do., 75c. to 85c. Foochow Oolong, 75c. to $1 50c.; Ponchong do., 60c.; Souchong do., 65c. to 80c.; Japan, 1st quality, 72½c. to 90c.; do., 2nd qual., 60c. to 65c.

COFFEE.—Imports from January 1 to Nov. 16: Java, 1,010,532 lbs., 1,906 packages; Manila, 359,255 lbs., 2,593 packages; Ceylon, 3,650 sacks. There is no life to the trade; the few sales making partake largely of a jobbing nature—so small, indeed, that importers are apparently ashamed to report progress, for fear they would be called retailers. Stocks of Greens, as well as of old Government Java, far exceed the usual average for the season, rendering it necessary to carry over heavy supplies. Prices are, at best, more or less nominal. Quotations: Ceylon, 19c. to 20c.; Java O.G., 22c. to 23c.; Manila, 17c. to 17½c.

CHINA MATTING.—Imports form Jan. 1 to Nov. 16: 74 bales, 8,807 rolls. We have no sales to record, the trade being liberally supplied with cargo and contract, selling at prices within range of our quotations, viz.—China, 4-4 cargo, $5 to $5.50; 5-4 cargo, $5.50 to $6; 6-4 cargo, $6.50 to $7; 4-4 contract, $8 to $12; 5-4 contract, $9 to $14; 6-4 contract, $11 to $16.

RICE.—Imports from Jan. 1st to Nov. 16th: China, 22,326,695 lbs., 28,743 packages; Siam, 3,637.783 lbs.; Batavia, 110.271 lbs., 660 packages. The only sale reported is of 4,200 mats China, at 5¼c. to 5⅜c.

SUGAR.—Imports from Jan. 1st to Nov. 16th: Manila, 15,383,622 lbs.. 25.715 packages. China, 1,633,400 lbs.. 874 packages. Batavia, 1,659,457 lbs.. 731 packages. Siam, 40,133 lbs. 5,428 packages. No. sales of East India reported.

TIN.—We note a sale of 50 pigs Banca on private terms.

## SHIPPING.

ARRIVALS.—Nov. 22. at Boston, from Singapore, Ahkera; 23, from Padang, Fearless; 23, at New York, from Hong Kong and Canton, Peter Rickmers; 25, at Boston, from Padang, W. A. Farnsworth.

DEPARTURES.—Nov. 16, from New York, for Shanghai, Benefactor; 17, from San Francisco, for Hong Kong, Great Admiral.

LOADING.—At San Francisco, for Hong Kong, Panther.

# Shipping Intelligence.

## FREIGHTS AND CHARTERS.

The opening of the Suez Canal has had a tendency to unsettle berth freights to the Eastern Ports, but on the whole they are somewhat firmer; in coal freights from the Northern outports there is a little more doing, but rates rule about the same.

Current rates of freight for vessels on the berth:—To Yokohama: 32s. 6d. weight, 35s. meast. To Nagasaki: 45s. weight or meast. To Newchwang: 45s. meast. To Shanghai: 40s. weight, 35s. meast. To Hong Kong: 35s. weight, 30s. meast. To Batavia: 25s. weight, 30s. meast. To Singapore: 30s. weight, 25s. to 30s. meast. To Ceylon: 20s. to 25s. weight, 20s. meast. At New York to China; $12 to $15 per ton of 40 cubic feet.

The current quotations for coal, &c., are as follows:—From Wear or Tyne per keel.—For Singapore: £25 10s. For Galle: £23. From Newport, Cardiff, or Swansea per ton. For Yokohama: £1 18s. For Shanghai: £2 2s. 6d. For Hong Kong: £1 11s. For Saigon: £1 5s. For Singapore: £1 5s. 6d. For Galle: £1 3s.

The Admiralty have invited tenders for the conveyance of sundry small stores to Ceylon.

## CASUALTIES.

The master, Johnson, of the ship Kenilworth, from Hartlepool, to Galle, which stranded at Gurnard, Nov. 20, and was subsequently got off, has reported that the ship's bottom had been examined by divers without the discovery of any important damage, and that he would reship the part of the cargo (coals) discharged and proceed.

The following telegram, dated Nov. 17, has been received from Galle:—"Inarime, Ivey, Foochow to London, wrecked China Seas."

Advices from Amsterdam, dated Nov. 23, state that the Senior, van Det, from Batavia to that port, which put into Mauritius, Oct. 19, leaky, and with damage, would have to discharge.

The Glance, Imprevry, which sailed from Sunderland, Nov. 17, for Galle, put into Plymouth Sound, Nov. 23, in tow, with part of crew refusing to proceed, but sailed again Nov. 29.

The Citadel, Stewart, from Cronstadt to the Amoor River, with rye, flour, &c., caught fire off Christiania, and was scuttled.

The Australie, Lucas, from Amsterdam to Batavia, was in collision Dec. 2, whilst going out of the Nieuwe Diep, but only sustained slight damage, and proceeded.

Advices from Rotterdam, dated Dec. 4, state that the Cornelis Smit, Wiedenaer, from Batavia, which arrived at Helvoet, Dec. 3, had been thrown on her beam ends during a hurricane off the Cape of Good Hope, when she sprung a leak, lost sails and part of copper; she pumped up much sugar, and it was feared that the cargo would be seriously damaged. The steam pumps were continually kept going, which rendered it unnecessary to put into any port.

The Kortenaar (Dutch ship), from Java, got aground near Oude Fonge, on her way from Brouwershaven to Helvoet, but was got afloat with the assistance of tugs and lighters; she lost much copper and sustained other damage.

The Jupiter, Kiewit, from Batavia to Amsterdam, stranded on the Zuid-wall, whilst entering the harbour at Texel, but was towed off and arrived at Nieuwe Dieppe, Dec. 8, without any apparent damage.

The Wyk aan Zee, De Looper, from Amsterdam to Batavia, put into Vigo, Nov. 28, with damage, having been in collision.

## MISCELLANEOUS.

Advices from Ismailia, dated Nov. 26, state that the Godavery, Messageries steamer and the Asie (str.), for India, met on that day in Lake Timsah with the Curacao (Dutch ship), from Java, the mail steamer from Reunion, and three merchant ships from the Red Sea.

At Table Bay, Oct. 14, Georges and Mary (str.), Leprovost, sailed for Yokohama; 19, Iho Sho Maru (str.), James, from Aberdeen for Japan; 25, Vistula, Burkett, from Liverpool, and sailed 28, for Hong Kong.

The Taeping, Capt. Dowdy, from London to Shanghai, put into Plymouth Sound on the 27th ult., owing to a south-west gale. The Belted Will, Capt. Locke, from London to Hong Kong, arrived off Plymouth the same morning, and landed pilot.

The following telegram has been received from New York, per Atlantic Cable:—"Nightingale, Hong Kong, San Francisco, delayed Yokohama."

The Mexicana, Jeffries, from Helvoet to Shanghai, put back to Helvoet Roads Nov. 28, but sailed again Dec. 2 for her destination.

The Catherine, Fokkes, from Hamburg to Shanghai, put into Ramsgate, Nov. 29, with crew sick, but sailed thence Dec. 5 for her destination.

At Gibraltar, Dec. 3, Rocket (str.), from Shields for Shanghai.

At Port Said, Nov. 19, Viajante, Gonsalves, from Lisbon, for Macao.

The Messageries Imperiales str. Thabor, for Japan, arrived at Suez Nov. 19, having passed through the Canal.

The Hunze (schooner), of Rotterdam, for Bangkok, slipped from an anchor and fifteen fathoms of chain, off Broadstairs.

SALVED CARGO EX "SPINDRIFT."—A large portion of the stores and materials, including all the copper sheathing out of water, besides many packages of cargo, have been recovered from the Spindrift, wrecked off Dungeness; the latest report states that her fore and mizen masts were still standing. The first salvage sale is advertised to take place on the 15th inst.

## THE "EASTERN ISLES."

In our issue of the 25th October we reported the launch of the Eastern Isles, a steamer for the China and Japan trade. This vessel was built by Messrs. A. M'Millan and Son, Dumbarton, and her dimensions are:—Length, 170 ft.; breadth, 25½ ft.; depth, 20 ft.; registered tonnage, 600. She is built on the composite principle, with iron topsides and copper bottom, and is classed A 1 at Lloyd's for sixteen years. Her saloon and cabin accommodation—of a very elegant and superior kind—is designed for about thirty first-class passengers, and there is ample accommodation forward for steerage passengers and the crew. The ship has been engined by Messrs. John and James Thomson, Finnieston Engine Works, Glasgow, this being the maiden effort of that firm. The engines are on the compound principle, the diameter of the cylinder being on the high pressure 26½, and on the low pressure 46 inches, by 2 feet 9 inches stroke, with surface condensers of large cooling surface, and circulating water and air pumps worked horizontally. The boilers, two in number, are 10 ft. 6 in. diameter, and 8 ft. 6 in. in length, having two furnaces of 3 ft. 3 in. diameter. The working pressure of each steam is 60 lbs. On the 27th ult. the steamer made a satisfactory trial trip. Leaving the Gareloch, where she had lain from the previous evening, for the purpose of adjusting her compasses, she proceeded down the river, attaining in the passage a speed of about ten knots, notwithstanding that she was in indifferent trim, being two inches by the head, with her propeller fully eighteen inches out of the water. The consumption of fuel was found to be within five hundred weight per hour, being three hundred weight less than the quantity stipulated for in the contract. The engines attained a speed of ninety revolutions per minute. The Eastern Isles has left the Clyde for China and Japan, under the command of Captain Knight.

THE BEST ROOFING MATERIAL.

BRABY & CO. ALSO MANUFACTURE SHEET AND PERFORATED ZINC, ROOFING FELT, GALVANIZED BUCKETS, AND ALL OTHER ZINC AND GALVANIZED IRON GOODS, ILLUSTRATED LISTS OF WHICH WILL BE SENT FREE ON APPLICATION.

**Secretary**—THOMAS FULLER, Esq.

**Offices—No. 95, Palmerston-buildings, Old Broad-street.**

This Company has been established to extend to the Empire of China the great system of Submarine Electric Telegraphs between England and the East.

The first section will consist of a Cable about 1 640 miles in length, to be laid from a station of the British Indian Extension Telegraph Company, in the Straits of Malacca, to Hong Kong.

It is proposed to establish an intermediate station at Saigon (Cochin China), upon satisfactory arrangements being concluded with the French Government.

The second section, about 1,000 miles in length, is intended to be laid from Hong Kong to Shanghai, touching at one or more of the other Treaty Ports.

A contract has been entered into, bearing date the 10th December, 1869 between this Company and the Telegraph Construction and Maintenance Company (Limited), for the manufacture and laying by the latter of the Cable from the Straits of Malacca to Hong Kong, for the sum of £508 000, of which £100 000 in fully paid-up shares will be reserved until this Company's engineer has certified that the line has been successfully laid, and is in good working order. Upon this certificate £50.000 will be paid, and the remaining £50,000 will be retained until the line has continued in working order for thirty days.

The Cable is to be shipped from England in 1870, and is to be completely laid by June in the following year.

The contract provides for the payment by the Telegraph Construction and Maintenance Company of interest at the rate of £5 per cent. per annum upon the paid-up capital, payable half-yearly, until the date fixed by the contract for the opening of the line.

It is further agreed with the Telegraph Construction and Maintenance Company that the second section of the Company's Cables shall be made and laid for £250,000, and be commenced when required by this Company. The capital for this section is proposed to be raised by a second issue of shares, with the sanction of a general meeting.

The Cable now to be laid is of similar type to that of the British Indian Extension Telegraph Company, but will be considerably heavier, on account of the lesser depth of water in which it is to be submerged.

The Company have it in view to continue their lines to Japan.

Traffic arrangements have been entered into with the Falmouth, Gibraltar, and Malta the Anglo-Mediterranean, the British Indian Submarine, and British Indian Extension Telegraph Companies, by which these companies have agreed to give an ample rebate upon their through rate on all messages forwarded over their Cables from or to China.

It appears from recent published statistics that the English and foreign firms in Hong Kong and the Treaty Ports number 483. The Chinese firms dealing with foreigners in Hong Kong alone are 486. The foreign ships cleared and entered at Chinese ports in 1868 numbered 14,075, with an aggregate tonnage of 6,418,503 tons. The total value of the imports and exports for Hong Kong and the Treaty Ports in 1868 amounted, according to the Customs returns, to £68,000 000. From these statistics, which are exclusive of the very important local trade, it cannot be doubted that there will be as well in through messages to Europe and America, as in messages between China and India, the Straits, and the Eastern Archipelago, a very extensive Telegraphic business ensuring large dividends to the Shareholders. It is considered premature to fix this Company's tariff at present, but it will be regulated with a view to secure the largest possible amount of traffic.

Copies of the Memorandum and Articles of Association, and of the contract with the Telegraph Construction and Maintenance Company, can be seen at the offices of the solicitors of the Company, Messrs. Bischoff, Bompas, and Bischoff, 4, Great Winchester street-buildings, E.C., or at the offices of the Company.

Applications for shares on the accompanying form should be left at the Company's bankers. The deposit will be returned if no allotment is made, and if an allotment is made, will be applied on account of the amount payable on the shares allotted.

The deposits and any subsequent payments will be liable to forfeiture if the instalments on the shares are not duly met.

**The subscription list will close on Wednesday, the 15th, for London, and at twelve o'clock on Thursday for the country.**

The following is a copy of the Memorandum of Association:—

1. The name of the Company is "The China Submarine Telegraph Company Limited"
2. The registered office of the Company is to be in England.
3. The objects for which the Company is established are:—
   The contracting for, constructing, acquiring, leasing, maintaining, dealing with and working lines of Telegraph between the Straits of Malacca or the Malay Peninsula and China and Japan, and any places or points adjacent thereto, or forming or intended to form part or parts of any telegraphic route or routes between those places, or any of them, and (as and when authorised by extraordinary meeting of the members) branches from and extensions of any of those lines to such countries or places as the Company think fit; the establishment of telegraph stations, and, generally, carrying on the business of a telegraph company; the applying for, acquiring, selling, leasing, using, and disposing of such lands, telegraph lines, vessels, concessions, leases, privileges, licences, and letters patent, and any shares or interest therein respectively, as may be useful or desirable for the purposes aforesaid, or any of them; the doing of all or any of those matters or things in conjunction with any other company or person; the registration or constitution of the Company abroad as a Société Anonyme or otherwise; the subscribing for and acquiring shares of, or amalgamating with and sharing in the business or undertakings of any other telegraph company or companies, and the making and carrying into effect of working traffic and other agreements with Governments, railway, postal, steamboat, telegraph, and other companies and authorities, and the doing of all such other things as are incidental or conducive to the attainment of the above objects.
4. The liability of the members is limited.
5. The capital of the Company is £525,000, in 52,500 shares of £10 each.

## KEATING'S COUGH LOZENGES.

THIS UNIVERSAL REMEDY now stands the first in public favour and confidence; this result has been acquired by the test of fifty years' experience. These lozenges may be found on sale in every British colony; and throughout India and China they have been highly esteemed wherever introduced. For COUGHS, ASTHMA, and all AFFECTIONS of the THROAT and CHEST, they are the most agreeable and efficacious remedy; they do not contain opium or any other deleterious drug, and may therefore be taken with perfect safety by the most delicate constitution.

Sold in boxes, tins, and bottles of various sizes.

## KEATING'S CHILDREN'S WORM TABLETS.

The great remedy for these disorders in Adults and Children can now be administered in the form of A PURELY VEGETABLE SWEETMEAT, at once agreeable and effective.

TESTIMONIAL.

"Batley, Jan. 26, 1869.

"SIR,—One of my children, aged two years and four months, being troubled with worms, I was induced to try your Bon Bons. I purchased some from Mr. B. Whitaker, chemist, of Batley, and after taking two only, she voided nine large worms. Two days after another dose, she again voided three more; three of them, the worst, measuring from 8 in. to 9 in. each in length. I consider them a most invaluable remedy, and should be tried by all suffering from worms.

(Signed) "JOHN STENSON.

"Witness, B. WHITAKER.

"To Mr. Keating, London."

Sold in tins and bottles of various sizes.

## KEATING'S INSECT DESTROYING POWDER.

This Powder is QUITE HARMLESS TO ANIMAL LIFE, but is unrivalled in destroying Fleas, Bugs, Cockroaches, Beetles, Musquitos, and every other species of insect.

Sold in packets, tins, and bottles of various sizes.

☞ The public are particularly requested to observe that all the above preparations bear the Trade Mark as herein shown.

KEATING, 79, ST PAUL'S CHURCHYARD

TRADE MARK.

Sold in Hong Kong and Shanghai by Watson and Co.; Singapore, Little and Co. and Woodford and Schroeder; Ceylon, Piters and Co. and Maitland and Co.; Penang, *Gazette* office.

## "THE CHINA MAIL,"

No. 2, WYNDHAM-STREET, HONG KONG.

NOTICE.—THE BUSINESS heretofore carried on under the style of "Shortrede and Co," was this day purchased by the undersigned, in whose name and by whom it will henceforth be conducted, and to whom all outstanding accounts owing to the said business are to be paid.

Hong Kong, Aug. 15, 1867. CHAS. A. SAINT.

NOTICE TO ADVERTISERS.

THE DAILY CHINA MAIL.—Six pages; published every evening (except Sunday). Subscription, 24 dols. per annum. Circulates in Hong Kong and along the China and Japan coasts. Terms of advertising:—Ten lines and under, 1 dol.; each additional line, 10 cents; one-half of these charges for repetitions. In Chinese, 2 cents per character for any number of days during the current week.

THE OVERLAND CHINA MAIL.—Compiled from the *Daily China Mail*, is published twice a month on the morning of the English mail's departure, and is a record of each fortnight's current history of events in China and Japan, contributed in original reports and collated from the journals published at the various ports in those countries. It contains, besides, a Shipping List for Shanghai, Hong Kong, Canton, and Macao, and a complete Commercial Summary.

Subscription, 12 dols. per annum, payable to any of the undermentioned agents. Postage added. Terms of advertising:—Same as in *Daily China Mail*.

AGENTS.—London: F. Algar, 11, Clement's-lane, Lombard-street, E.C. San Francisco: White and Bauer, 518, Clay-street, San Francisco. Swatow: Drown and Co. Amoy: Giles and Co. Foochow: Thompson and Co. Shanghai: H. Fogg and Co. Manila: Karuth, Heinzen, and Co. Australia: Gordon and Gotch, Melbourne and Sydney. Singapore: Locke, Hongghee, and Co. Batavia: H. Van Dorp.

HOLLOWAY'S OINTMENT and PILLS.—Disease in some shape is ever rife amongst mankind, impurity of the blood or irregularity of function is constantly giving rise to despondency, debility, or distempers. In the above named remedies the community can have at a little cost the safe and certain means of preventing, or checking and curing, both outward ailments and inward maladies. Ample, plainly printed, and very intelligible directions accompany every package of both Ointment and Pills, which only require attentive study to enable every invalid to be his or her own medical adviser. The earlier these powerful remedies are employed after the discovery of the disease, the more rapid will be their action in expelling from the system all noxious matter and restoring health.

NOTICE.

MORRIS'S DIRECTORY for CHINA, JAPAN, and the PHILIPPINES, &c., to be published on the 1st Jan., 1870, contains a Revised List of the Foreign Residents at all the open Ports of the China Sea, including Saigon, which has never yet been included in any similar work; together with the Time Tables of the different Steamship Companies, Rates of Postage, Local Ordinances, and such other matter as will be useful to all interested in the China trade. No trouble or expense has been spared to make this the most accurate publication of the kind ever offered to the public.

Price, complete in one volume, 14s.

Orders received by the Publisher of the "London and China Telegraph," 2, Cowper's-court, Cornhill, E.C.

## CAUTION.

THE GROSS FRAUDS which continue to be practised by obscure manufacturers, more particularly in Germany, by imitating the labels attached to JOHN GOSNELL and Co.'s PERFUMERY, render it imperative upon the Proprietors to Caution the public against such nefarious proceedings, and to request their friends and patrons to purchase only of respectable dealers, who import direct from JOHN GOSNELL and Co., and invite special attention to the address, ANGEL-PASSAGE, 93, UPPER THAMES-STREET, late of 12, Three King-court, Lombard-street, London, E.C.

JOHN GOSNELL and Co.'s SELECT PERFUMES—Eau Bouquet, Royal Yacht Club Bouquet, Jockey Club Perfume, Essence of Wood Violet, Victoria Bouquet, Garibaldi Bouquet, Frangipanni, Military Bouquet, The Bride's Bouquet, Tea Rose, Russian Leather Perfume.

JOHN GOSNELL and Co.'s Toilet Vinegar, Inexhaustible Salts, Aromatic Vinegar, Aromatic Eau de Cologne.

JOHN GOSNELL and Co.'s Prince of Wales Perfume.

JOHN GOSNELL and Co.'s Princess Alexandra Perfume.

JOHN GOSNELL and Co.'s La Noblesse Perfume.

JOHN GOSNELL and Co.'s La Noblesse Pomade.

JOHN GOSNELL and Co.'s La Noblesse Soap.

JOHN GOSNELL and Co.'s Real Old Brown Windsor Soap.

JOHN GOSNELL and Co.'s Golden Oil—Moelline—Macassar Oil, Bear's Grease, &c., for the Hair.

JOHN GOSNELL and Co.'s Extra Highly Scented Toilet and Nursery Powder.

JOHN GOSNELL and Co.'s Stereodesmic or Dentist Tooth Brushes and Trichosaron Hair Brushes, warranted to purchasers.

JOHN GOSNELL and Co.'s Instantaneous Hair Dye.

JOHN GOSNELL and Co.'s Cherry Tooth Paste is greatly superior to any tooth powder, gives the teeth a pearl-like whiteness, protects the enamel from decay, and imparts a pleasing fragrance to the breath.

Orders executed on receipt of 10 per cent. of the amount in cash, the balance being drawn for through a Banker.

## SINGAPORE DOCKS.

THE PATENT SLIP AND DOCK COMPANY execute SHIPS' REPAIRS of all descriptions in the most efficient manner, under the supervision of European Engineers and Shipwrights.

The DRY DOCK (opened in March, 1859) admits two Vessels at the same time, being over 400 feet in length, with a depth of water ranging to 15½ feet. A second DRY DOCK of larger dimensions will shortly be completed, and available for the heaviest Steamers.

Adjoining the above there is extensive WHARF WAREHOUSE, and other accommodation, including every convenience for coaling Steamers, discharging cargo, and storing goods, together with ample MACHINERY and appliances for repairing iron steamers, &c.

Apply at the offices of Messrs. PATERSON, SIMONS and Co., Singapore; or 21, St. Swithin's-lane, Cannon-street, London, E C.

WM. CLOUGHTON, Managing Director.
New Harbour, Singapore, June, 1868.

## PORT OF AMOY.

SHIPOWNERS, AGENTS, and COMMANDERS are informed that the Dock Company's establishments at the above port afford every facility, at moderate charges, for REPAIRING and SPARRING VESSELS, cleaning and painting iron ships and steamers.

Their large Granite Dock has 286 feet length on the blocks, and at average spring tides can receive vessels of 16 to 17 feet draught It has a caisson-gate and a powerful centrifugal steam pump, and an engineer's workshop fitted with lathes and tools, driven by steam: iron and brass foundries, boiler-makers' shop, a large smithy and carpenters and boat-builders' sheds. All superintended by resident Europeans.

Their two smaller GRANITE DOCKS can receive, at spring tides, vessels drawing 12 feet.

Spars, timber, and other Dockyard material kept in stock.

Quarters for officers and a DRY GODOWN for stores of vessels under repair.

## FOOCHOW DOCK.

*RIVER MIN.*

THE above granite floored DOCK, of the following dimensions, viz., Length, 300 feet, breadth at bottom, 40, is capable of receiving vessels drawing 13 to 16 feet, as the state of the tides will allow. The Dock runs dry to the blocks, and is pumped out by steam.

The above premises comprise a large Machine Shop containing a

WHITWORTH'S 12-INCH SCREW CUTTING GAP LATHE, DRILLING AND SCREWING MACHINES,
A LARGE SMITHY, &c., &c., &c.

Large Godowns are on the premises for STOWAGE OF CARGO, &c , &c. A large stock of Woods, Metal, &c., &c., always on hand.

The Dock steam tug *Woosung* is available at all times to tow vessels to or from sea.

JOHN C. SKEY, Superintendent.

# TANJONG PAGAR DOCK COMPANY

(LIMITED).

## VICTORIA DOCK, SINGAPORE.

This Company's Granite DRY DOCK, 450 feet in length, 65 feet width of entrance, and 20 feet depth of water on the sill, was OPENED on the 17th October, 1868. In the high tides of the North-East Monsoon there is a foot to eighteen inches more water.

In connection with the Dock is a complete range of workshops, fitted with steam machinery, driving all descriptions of engineers' tools required in the construction and repair of vessels and machinery, and a foundry for iron and brass castings.

The Company's extensive Wharves and Godowns for receiving and storing cargo immediately adjoin the Dock.

Having an efficient European staff in each department, the Company is in a position to guarantee the best workmanship, executed with every possible despatch, as well as low rates of charges.

These advantages, and the great facilities which the proximity of the Dock to the town offers for the transport of materials, &c., enable this Company to adopt a very low scale of charges for ships' work of all classes.

**LONDON AGENTS.**

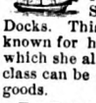
For Freight, &c., apply at 19 to 21, The Albany, Liverpool; or 7, East India-avenue, Leadenhall-street, London.

---

To follow the "Granville." Will meet with immediate despatch.

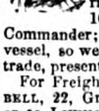


DIRECT for COLOMBO, the magnificent clipper ship RIVER INDUS, AA1 1,045 tons register; G. SHEARER, Commander; West India Docks. This splendid vessel, built in 1868, is well known for her rapid passages and the good order in which she always delivers her cargo, and from her high class can be strongly recommended to shippers of fine goods.

For Freight or Passage apply to LIVINGSTON, HOLDING, and BRIGGS, 31, Great St. Helen's, Bishopsgate-street, E.C.; or to JOHN C. CAMPBELL, 22, Great St. Helen's, Bishopsgate-street, E.C.

---

Malabar Coast. To follow the "Ann Lucey." Will meet with the usual Quick Despatch.



DIRECT for COCHIN, CANNANORE, and CARWAR, the favorite clipper ship QUEEN of CEYLON, A1 10 years, 422 tons register, R. ATKINSON, Commander; West India Docks. This magnificent vessel, so well and favourably known in the Ceylon trade, presents the finest opportunity to shippers.

For Freight or Passage apply to JOHN C. CAMPBELL, 22, Great St. Helen's, Bishopsgate-street, E.C.; or to LIVINGSTON, HOLDING, and BRIGGS, 31, Great St. Helen's, Bishopsgate-street, E.C.

---

Last Season Ship. Malabar Coast. To follow the "Queen of Ceylon." To be despatched about December 27.

DIRECT for BEYPORE, CALICUT, MANGALORE, and CARWAR, the favourite clipper ship AUGUSTA MAY, A1, 10 years, 392 tons register, JAMES CLARK, commander; St. Katherine Docks. This magnificent vessel, so well and favourably known, has just been reclassed by Lloyd's and newly metalled, and presents the finest opportunity to shippers.

For Freight or Passage, apply to JOHN C. CAMPBELL, 22, Great St. Helen's, Bishopsgate-street, E.C.; or to LIVINGSTON, HOLDING and BRIGGS, 31, Great St. Helen's, Bishopsgate-street, E.C.

---

To sail on the 17th Dec.

FOR SHANGHAI, the well-known clipper FALCON, A1 13 years, 793 tons register; J. L. DUNN, Commander; East India Docks. Has excellent accommodation for passengers.

For Freight or Passage apply to SHAW, MAXTON, and Co., 2, Royal Exchange-buildings, London, E.C.

---

To sail on the 17th Dec.

FOR HONG KONG, the well-known Clipper BLACK PRINCE, A 1 17 years, 750 tons register; WILLIAM INGLIS, Commander; East India Docks. Has superior accommodation for passengers.

For Freight or Passage, apply to SHAW, MAXTON and Co., 2, Royal Exchange-buildings E.C.

---

Regular Line of Packet Ship.

FOR HONG KONG, the well-known clipper DUNMAIL, A1 14 years, 771 tons register; PETER THOMPSON, Commander; East India Docks.

For Freight or Passage, apply to SHAW, MAXTON, and Co., 2, Royal Exchange-buildings, London, E.C.

### THE MAILS, &c.

The Southampton portion of the last mail arrived, per *Nyanza*, on the 17th inst. The present mail is delivered two days in advance of its due date. The next inward mail, with advices from Yokohama to Nov. 3, Shanghai Nov. 10, Hong Kong Nov. 16, and Singapore Nov. 23, is due here on the 27th inst.

*Via* Galle no later telegrams have been received from China, though Bombay and Calcutta messages come through in twenty-four hours. *Via* Kiachta Shanghai telegrams to Nov. 23 were received on the 14th inst. A message has been received by Atlantic Cable from Yokohoma, *via* San Francisco, date (supposed) Nov. 22. The ordinary Pacific steamer is not due at San Francisco until the 21st inst., so this would seem to have been conveyed by an extra vessel.

## List of Passengers.

### PASSENGERS INWARD.

By this mail to Marseilles, per Messageries Imperiales steamer.—From Yokohama: Messrs. Frigerio, Begnotti, Meloncelli, Mouriez, Rand, Champetier, and Madame de Lapeyrouse. From Hong Kong: Messrs. Rey, Maisse, Leroux, Bastioni Agostini, Everron, Minot, Simonet, Simonnot, and F. Sorensen. From Saigon: Mdme. Welles. From Shanghai: Messrs Fleuriais and Huet. From Batavia: Mr. Reuchlin.

By last mail to Marseilles, per extra P. and O. steamer *China*—From Yokohama: Signors Etyiene, Civetta, Dapison, F. Thomas, Messrs. Briancon, Berchiyene, Sommer, F Abroli, and Chapman. From Hong Kong; Mr. Taylor. To Southampton.—From Hong Kong: Messrs. P. Harris and Ledwidge.

### PASSENGERS OUTWARD.

Per P. and O. steamer *Bangalore*, from Southampton, Dec 11.—To Shanghai: Mr J. W. Harding. To Hong Kong: Mr. W. B. Uaill, Mr. F. F. P. Forster, Mr R. D. Adams, Mr Buchanan and two second class passengers. To Singapore: Miss J. Everest. To Penang: Mr. and Mrs., Miss, Mr. C., Miss E, and Master De Morny. To Ceylon, Lord Elphinstone, brother, and one servant, Mr. and Mrs. Staples, and one second class passenger.

Per P. and O. steamer *Tanjore*, from Marseilles, Dec. 19.—To Shanghai: Mr. R. Mackenzie. To Hong Kong: Mr. M. D. Collier, Mrs. S. A. Collier, Mr. J. Bernstein. To Singapore: Mr. A. Fraser.

Per P. and O. steamer from Suez, Dec. 26.—To Hong Kong: Mr. Grabe. To Ceylon: Col. E. Steward, Captain Hon. Corry, Col. Glover, R.E.

Per P. and O. steamer *Pera*, from Southampton, Dec. 25.—To Hong Kong: Mr. J. C. Penderen. To Ceylon: Mr. J. E. Garbutt.

Per P. and O. steamer *Ripon*, from Marseilles, Jan. 2.—To Yokohama: Mr. Russell Robertson. To Hong Kong: Mr. John Noble. To Ceylon: Mr. J. Brown, Rev. C. and Mrs. Carter, and two children, Mr. J. F. Callaghan.

Per P. and O. steamer *Nyanza*, from Southampton, Jan. 8.—To Ceylon: Mr. G. A. Talbot. Mr. and Mrs. Folkard.

Per P. and O. steamer *Bangalore*, from Marseilles, Jan. 16.—To Ceylon: Mr. and Mrs. J. C. Elliott.

From Suez.—To Singapore, Mr. and Mrs. G. A. Remé.

## Summary of News from the Far East.

### JAPAN.

YOKOHAMA.

Dates by this mail reach to the 31st Oct. The news has been anticipated by the Pacific mail, and given in our last number. The only item we hear of is that a loan of five millions sterling had been arranged on the Secuity of the Customs through the Oriental Bank.

### CHINA.

SHANGHAI.

(FROM OUR OWN CORRESPONDENT.)

SHANGHAI, Nov. 30, 1869.

I last wrote you by the P. and O. extra steamer *Ganges*, to Suez Since then but little of importance has transpired, the outports equally with Shanghai may be said to be in a state of almost stagnation.

Telegrams by Kiatcha, dated London, 5th and 12th Oct., to hand, the former on the 31st ultimo (27 days), and the] latter on Nov. 2 (22 days).

The festivities attending on the sojourn of the Prince had hardly come to an end, when the bi-annual holidays consequent on the races, set in. Racing in Shanghai is not now what it was of yore; the expensive English racer, the thoroughbred Australian, the fleet Arab, now give place to the China pony. The interest of the multitude, if one can so demoninate the Shanghai community, has almost vanished, what there is, is centred in the few interested in racing. Many, especially the ladies, who formerly graced the Grand Stand with their presence, avail with their husbands of the opportunity to "run up country," or make an excursion in the Ningpo district.

The Revised Land Regulations for the Municipal Government have been provisionally approved by the representatives of the Foreign Powers at Peking. One month hence Shanghai will cease to be the solitary exception of a place, though self-governed has not the power to enforce the rules that may be made. Indeed, as Sir Edmund Hornby said, "there is no place which has so thoroughly understood the object which self-government has in view, or one which greater personal sacrifices have been voluntarily made for the general good."

I enclose you a correspondence between Messrs. Jardine, Matheson and Co. and Sir Rutherford Alcock, on the subject of the "T'sung Yang claims." The correspondence, I trust, you will publish in full, that Englishmen may know from the representative of their country in China that when an act of injustice is perpetrated on an Englishman, he can hope for no redress, such is the moral of Sir Rutherford Alcock's letters of the 23rd Nov., 1868, and 15th Oct. 1869.

On the 1st inst. the new light-house on Gutzlaff Island exhibited a fixed white light at an elevation of 270 feet, illuminating in clear weather a radius of over twenty miles.

Sir Rutherford Alcock was to leave Peking on the 1st, *en route* for England. Mr. Hart was to leave on the 10th, and will most likely stay south during the winter.

Another correspondent writes us:—

The bonding system will be adopted here very soon, I believe next China New Year, as Mr. Dick is very anxious forit,

Digitized by Google

James Porter goes home by this mail, and is to return early in 1870, to take home several Chinese, who will study in Europe—at whose expense I cannot quite make out. His schemes are ahead of the times.

Several new buildings are going up here, and builders scarce in consequence. Rice is getting dear here, and in Japan it is very dear. Northern trade is excessively dull, and though most people look for better prices for Shirtings, I can only see lower rates coming. Stocks very heavy; plenty afloat, and lower quotations. Here we have no demand, and speculators anxious to sell. Large speculations in Lead.

---

The following items are from the *North China Daily News* of 2nd Nov. :—

Apparently, the two steamer companies are going to enter on a little competition, for the benefit of shippers. The agent to the Messageries Imperiales announced by an "Express," that an exceptional return of 10 per cent. would be made on freight of silk per *Duplcix*, to leave Shanghai to-morrow. And at three P.M. the P. and O. agent issued a similar notice promising a reduction of 20 per cent. on silk per extra steamer *Ganges*, which left on the 31st inst.

A short while ago the *Recorder* published the following translation of a notice which has been extensively posted in the settlement by the new Taoutai :—

Prostitutes, by far too numerous and utterly inconsistent with right, must return to their native places within one month from date. Prostitute owners and house owners warned that, if any are found after that date, the women will be taken charge of by the Government and disposed of to their friends or relations, the owners punished severely, and the houses confiscated by the Government.

New brooms are always anxious to sweep exceedingly clean, and the accession of different Taoutais to office is generally marked by a proclamation against some prevailing form of error. But the coolness of the threat to confiscate Chinese house property in the foreign settlement has never yet been equalled. We have no doubt his Excellency's mistake has, ere this, been pointed out to him. The interference with tenants is also a great stretch of prerogative, and, if carried out on this side, would simply result in changing the *venue* to the French side, where, we may be sure, nothing of the kind would be tolerated. The evil is not to be remedied by any such measures as the Taoutai proposes. Indeed, it is very likely he never meant to give effect to his threat, but simply to score a cheap notch to the credit of his morality. Such proclamations, however, are not altogether innocent, as they open a door to squeezing and bullying.

We have some further particulars of the loss of the North-German barque *Baltimore*. The nature of the cargo which she had on board shows what a conflagration it must have been, and how quickly the vessel must have been consumed. She carried 1,481.40 piculs cotton, 7,520 piculs peas, 125 piculs assorted paints, 100 gallons paint oil, 2,600 gallons kerosine oil, besides sundries. The cotton was stored in the lower hold, and the kerosine oil, paints, &c., between decks. After being at sea for a few days smoke was noticed to emerge from the hatches, which were immediately opened. An examination was made, but nothing in the shape of fire was to be seen. The captain, however, took precautions, and had all the kerosine thrown overboard; but, to the astonishment of everyone, the next day the ship was found to be on fire; and, seeing there was nothing to be done to save her, she was abandoned. As we stated before, some of the crew have arrived safely at Nagasaki, but nothing has been heard of the remainder, though it is hoped that they may be safe in some bay not very distant from Nagasaki.

We hear that M. Rochechouart, the French Chargé d'Affaires, has been recalled. This is to be regretted, as M. Rochechouart understands Chinese politics, and will probably be replaced by a man who has all to learn.

---

## HONG KONG.

The *China Mail* of the 5th Nov. contains the following account of a ball given in honour of H.R.H. the Duke of Edinburgh, on the preceding evening :—The festivities consequent on the visit of H.R.H. the Duke of Edinburgh to this colony may be said to have culminated in the grand ball given in honour of the Royal visitor at the new City Hall. Seldom have the "pomp and circumstance" peculiar to a large public dancing assembly been displayed with better effect than on the present occasion. The various advantages and beauties of the City Hall building as a public institution are better seen by night than by day; and in the full blaze of light thrown round it (outside and inside) on this occasion; the spacious, suitable, handsome and metropolitan appearance of the building was remarked by all. The fine sweep of esplanade was well lit up by the illuminated transparency of "Galatea" (which successful piece of art was painted by an amateur for Mr. Sander's illumination), and by fitful gleams from the crackling and hissing display of Chinese pyrotechny on the parade ground adjoining. The gaslight all over that part of the building occupied on this occasion—hall, stairway, ante-rooms, ball-room and supper-room—was a perfect and unqualified success; and the dazzle and splendour which peculiarly belong to such assemblies were never seen to greater advantage than they were last night. This auspicious result, then, forms a most important segment of the great round of success with which the City Hall has been so far attended.

Punctually at ten o'clock, His Royal Highness was received on the main staircase by the committee, a guard of honour of the 25th Regt. being drawn up inside the building. H.R.H. was accompanied by Sir R. G. MacDonnell and Lady MacDonnell, and other distinguished guests. On reaching the ball-room (which was beautifully decorated with armorial shields and wreathed with festoons of evergreens and flowers), dancing commenced, the Prince opening the ball with Lady MacDonnell, and dancing in the first waltz. After three or four dances had been got through, the Prince retired to a private room in which two or three gentlemen unconnected with his suite were honoured with a private reception. About half-past twelve, the strains of the Duke's Scotch piper sounded the call to supper, and the sturdy man of Huntly led the way to the supper-room, where four tables were magnificently laid out, at the head of the first of which sat the Hon. W. Keswick, Chairman of the Committee. The Prince (with Lady MacDonnell) sat on the chairman's right, while the Governor (with Mrs. Pollard) occupied the seat next the chair to the left. Less than half of those present found seats at the first relay. After supper the chairman gave the toast of "The Queen," which was responded to with all the honours. He next gave the toast of "The Prince and Princess of Wales, and the remainder of the Royal Family," coupled with the health of the Duke of Edinburgh. The toast he was sure would be received with enthusiasm. They were proud of their Royal Family, and justly so; and they were proud of the Prince and Princess of Wales, who, for their many good qualities, were beloved throughout the land, and for their generous sympathies were endeared to the hearts of all the people. (Cheers.) There was a peculiar significance given to the toast on the present occasion, and never before had Hong Kong enjoyed the honour of coupling with it the name of one of its members, our Sailor Prince (cheers)—our Sailor Prince whom they were proud to receive amongst them, and give him that hospitality which they could offer. He called upon them to drink the toast with enthusiasm and with all the honours; and leading off the "hip, hip, hurrah," the cheers then rang round for an indefinite period, and were renewed on the Duke rising to respond.

When the excitement had ceased, H.R.H. spoke as follows :—Ladies and Gentlemen, I thank you most heartily for the kind manner in which you have responded to the toast; I thank you for the manner in which have received it, and I thank the chairman for the kind words he has just used and the manner in which he alluded to my brother and sister-in-law. (Loud cheers.) I thank you also for the manner in which you have received the toast as coupled with my name, and for the reception and welcome you have given me in Hong Kong—(cheers)—as equal to the most hearty and enthusiastic I have ever received in any portion of the Queen's dominions. (Great cheering.) On such an occasion like the present the fewer words spoken the better, and if I say more, or whatever more I might say, it will possibly rather take away than otherwise from the feelings I wish to express, viz., my sense of the kind manner in which you have received me. I would now ask you to drink another toast, "The Prosperity of Hong Kong." It is almost unnecessary, it might be said, to propose such a toast, for, when one enters a palace such as this, that prosperity is evidently already guaranteed. I now ask you to drink to "The Future Prosperity of Hong Kong." The Duke—who was somewhat nervous, but spoke in a most hearty and honest tone of the reception he had met with—led off, with a most hearty good-will, the old British cheer, which was as heartily responded to.

The Hon. H. B. Gibb rose to respond, but with difficulty could obtain a quiet audience for some time. He believed that this was the first toast ever given in this colony by a Royal Prince. The gratification of the community was very great when it was made known that the *Galatea's* cruise was to be extended to this colony, and that in it was a son of that noble woman whom we call Sovereign. (Cheers.) It reminded them of "Home, sweet Home," Great Britain, whither they often looked. Their home is ruled by a Sovereign beloved and respected by those on the Continent and in America as well as by themselves, and to whom they were all so much attached as their most gracious Sovereign. (Cheers.) When they knew that the *Galatea* was coming to their little island, every British heart was animated with feeling and desire to give an united and hearty welcome to her son, our Sailor Prince. (Great cheering.) Though far distant and limited in numbers, their hearts were large, and he was sure that no hearts beat with greater loyalty than those of the colonists of Hong Kong. He agreed that these were not occasions when long speeches should be made; and he would return, on behalf of the Colony, their heartful thanks for the honour done them by this toast. His Royal Highness might be assured that, when he went, he would take with him all the good wishes of a dutiful community. (Here the audience rose *en masse* and sang "For he's a jolly good fellow," amid repeated rounds of cheers.)

The Chairman next proposed the toast of "H. E. the Governor." It was a toast that required few words, as the genial fare of the Governor would ensure that the toast would be responded to with enthusiasm. (Cheers.) H. E. the Governor then rose. He said it was very kind, at the present time, when their hearts were full of other feelings, to have drank his health; and he thanked them for the manner they had received the toast, and for the few kind words with which the Chairman had introduced it. It was a very

Digitized by Google

sensible observation on the part of their Royal guest, that the less said often left the better feeling; but he would avail himself of the privilege which his position gave him once again to express the joyous feeling felt by all when it was intimated that H.R.H. intended visiting this Colony, and the great and real pleasure which his actual visit had afforded. They did not welcome him simply as the son of a Queen who had identified herself with her people, and who in the social relations of life showed a true and just appreciation of what was owing to a people governed by the truest principles of liberty. (Loud cheering). Even then their greeting would be of welcome; but one aspect of the subject had not been adverted to, and that was the character in which the Duke came amongst them, which had earned him the popular name of "Our Sailor Prince." (Great cheering). They were glad to say that he belonged to that service—he meant no disparagement to the sister service when he said so—which was so peculiarly identified with the glories of the Empire, and with its security at the present moment. (Cheers.) It was with gladness they welcomed him, belonging to that noble service which had so high a claim to respect from a working colony; and this colony he looked upon as a colony of working men. Only a quarter of a century since (as Admiral Keppel said the other night) an official report was sent home to the effect that there was building space on the island of Hong Kong for only one house; and now you see a splendid city and a great emporium of commerce; and they might be assured that it was working men who built such a city. (Great cheering.) A few yards from the hall windows, there came and went some 4,000,000 tons of shipping every year; and he repeated, that they all the more rejoiced to realise in their Royal visitor a truly working man; he was more than the son of their respected Queen; he had shown himself able to fulfil the duties of the position in which he was placed; and this was a community which could duly appreciate that. (Much cheering.) He had no doubt that his Royal Highness had good interest and good chances early in life—(laughter)—but the question was had he not earned his rank of post-captain. (Cries of "Yes.") Sir Harry Keppel told him the other day that he never inspected a vessel in better order or that reflected greater credit on her captain than the *Galatea*, and that the Duke commanded his own vessel thoroughly. (Immense cheering.) Allow me (turning to the Prince) to welcome you as a working man to a working colony, and a hard-working colony. It may seem to be a questionable compliment, but it is nevertheless a true one. Everything (H.E. continued) was not a privilege in his office; but it had given him great pleasure to do what he could, in his humble way, to make the visit of H.R.H. to this colony as comfortable as possible. (Immense cheering.)

After a short visit to the ball-room, the Duke retired; but dancing was kept up till four o'clock, at which time much of the official tone resolved itself into a "jolly good fellow" kind of expression. Altogether, from the moment the Duke stepped on the wharf officially, not a single hitch has taken place in all the festivities of which the City Hall has been the chief centre; and a large share of credit must fall to the committee who have been so untiring in their successful efforts to make everything run smoothly.

The circulation of the banks is thus reported:—

| Banks. | Average amount. | | Specie in Reserve. |
|---|---|---|---|
| Oriental Bank Corporation ... ... ... | $750,201 | ... | $250,067 |

| Hong K. and Shanghai Banking Corporation | 1,168,938 | ... | 800,000 |
| Total | $2,865,373 | ... | $1,425,067 |

## PHILIPPINES.

—o—

### MANILA.

(FROM A CORRESPONDENT.)

Manila has risen up and cast off the dulness that the late earthquakes and other sundry evils with which she has been afflicted of late had thrown her into. The expected visit of Prince Alfred has been announced, and orders from the Municipal Council have appeared for owners of houses from the quay where H.R.H. is to land up to the residence which is to be offered him, to clean and paint up their faces, *i.e.*, of their houses, and put their best looks on; not satisfied with this, a commission has been nominated to decorate certain residences, triumphal arches, &c., and illuminations are to be made on the greatest scale ever yet seen in this "Pearl of the Ocean." Roads are being repaired and swept clean and many other preparations made, that H.R.H. may have plain sailing from the moment he steps on this hospitable shore. The Municipal Council have voted ten thousand dollars for preliminary expenses, and a *carte blanche* for any further expenditure necessary to give H.R.H. a most hearty welcome during his stay in this capital. Two grand balls are announced, one on his arrival, the other on the eve of his departure, and both the beautiful and ugly sex are busily employed hunting up *recherché* materials for dress. Shopkeepers meet and congratulate one another, and bless the Duke for the movement he has caused in their dullness; kid gloves have to be cleaned for want of new ones, all bought up; tailors refuse orders for dress until further notice; whilst even the turkeys, guessing their proximate fall, hang down their heads, and refuse to be fattened, even to please the receivers of a Royal Prince. Editorials have appeared in each of the (three) local newspapers, speaking in the highest terms of the Duke, and calling upon the subjects of Spain to give him a right royal welcome, not only for the honour such a personage does them in his visit, but also for the good and virtuous family he belongs to. Besides the two State balls there are many others projected, which, if accepted by his Royal Highness, would detain him in Manila many days more than he intends. English residents of Manila have met, and subscribed for a *bal au costume du pays;* also noisy discussions have been made respecting the presentation of an address to his Royal Highness from the loyal British subjects residing at Manila. The great difficulty appears to be that three or four heads of mercantile firms consider they have a right to dictate for the mob, and be their sole representatives; whilst the generality of true-born Englishmen think they have a right to know the purport of and form in which the address in their name is to be presented. The finest house in Manila has been fitted up by the Municipal Council for his Royal Highness to reside at whilst on shore, the *chefs du cuisine* have been sought, and Indian hunters have been sent to the mountains to prepare to send down daily wild boar, venison, &c.

## COCHIN CHINA.

—o—

### SAIGON.

(KALTENBACH, ENGLER AND CO.'S MARKET REPORT.)

EXPORTS.

RICE.—Since date of our last issue the features of our market have changed altogether, the rise noticed therein having taken quite an unexpected extent as prices have been pushed up from $1.38 to $1.71 per picul. This considerable advance is chiefly owed to some important orders laid down here by last home mail with tonnage provided for in Hong Kong, the execution of which was so much hurried that Chinese were losing on every preceding contract and could at last only by a considerable advantage be induced to enter into new engagements. At the same time the quality of the grain became daily worse and the present shipments consist of mere Vinhlong cargo rice, containing a great deal of dust and broken grain. Since a few days prices are however on the decline, and two contracts have been passed at $1.68.

Shipments since our last amount to 201,100 piculs, and were directed to—

| | | |
|---|---|---|
| Mauritius ... ... ... ... | 7,000 | piculs |
| Singapore ... ... ... ... | 2,350 | „ |
| China ... ... ... ... | 30,570 | „ |
| Japan ... ... ... ... | 161,180 | „ |
| | 201,100 | piculs |

NEW RICE.—The month of October having been unusually rainy, the ripening of the new crop has experienced some delay. Since the beginning of this month the weather has been thoroughly favourable, and we therefore still expect to see supplies of some importance towards the end of the month. The first contracts have been closed at $1.67 and $1.65.

COTTON.—Small lots only have been brought to the market. The demand having slackened we have to report a slight reduction of prices. We quote $6 10c. per picul uncleaned, $19½ for cleaned No. 1, and $17½ for cleaned No. 2. Exports since our last amount to 1,300 piculs.

HIDES.—Buffalo: Some contracts have passed on terms at $8 50c. to $8 75c. per picul. Several lots have lately arrived from Tonkin. Cow are scorce, and we quote nominally $11 50c.

HORNS.—Several purchases have taken place at $8 50c. per picul for horns of no lighter weight than 1 catti.

BLACK PEPPER.—A few small contracts for produce of the next season, delivered in January, have been closed at $8 40c. and $8 65 per picul.

COCOA NUT OIL remains scarce, and up to $7.80 per picul has been allowed.

GAMBOGE.—There are no stocks on hand. Quotations are nominally $58 per picul.

IMPORTS.

PIECE GOODS.—The market is dull, and will very likely continue so until the new rice is coming forward, as our natives generally take Piece Goods in exchange for their produce. Prices have followed a downward tendency, and we may quote to-day—

| | | | | | |
|---|---|---|---|---|---|
| Grey Shirtings ... | 8¼ lbs, | $3 | ... | 7 lbs., | $2.57½. |
| „ T-Cloths ... | 6 „ | 1.80 | ... | 5½ „ | 1.70 |

| White Irishes ... ... | | $2.25 to $2.30 | | | |

## SIAM.

—o—

### BANGKOK.

Dates from this port are to the 11th Nov. A correspondent says:—

The King of Cheangmai has killed two of the native converts, and has given orders to kill the other five. The Rev. D. M'Gilroy

Digitized by Google

and Rev. J. Wilson and families may have been taken by this second Theodore. A party started on the 5th Nov. to inquire into this affair, but as they have to go 400 miles up country we shall not hear from them for about ten weeks.

Mr. Parker, from Saigon, one of the promoters of the telegraph to Hong Kong, in conjunction with Messrs. A. Heard and Co., has been here for some time making the necessary arrangements.

The annual meeting of the Presbyterian Mission was held on the 29th Oct.

Rev. N. A. McDonald preached the annual sermon. It was an historical discourse, showing that amid the changes and improvements of the age, Christianity was steadily progressing.

After the sermon, the Presbytery sat in session. Mr. McFarland read the minutes of last year's meeting, which were adopted.

Officers for this year were then elected as follows:—Rev. S. G. McFarland, moderator; Rev. S. R. House, M.D., temporary clerk. The roll was then called, the members present answered to their names, and excuses from the absentees were read.

It was voted—that Rev. Mr. VanDyke, of the Presbytery of Raritan, and the Baptist missionaries be cordially invited to a seat as corresponding members of the Presbytery.

Rev. Mr. Carrington, of the Presbytery of New Brunswick, presented a letter from that body dismissing him to join the Presbytery of Siam. The letter was read, and Mr. Carrington was received, waiving in his case the usual examination.

Mr. McFarland reported on behalf of the committee on the state of the Church that his report on that subject had been forwarded to the General Assembly of the U.S. of America, and also to the Synod of Albany.

The *Siam Advertiser* has the following:—

His Majesty, the Supreme King of Siam commenced the annual season of Temple Visitation by land on the 26th Oct. As soon as this is over he will immediately begin to visit by water.

The four principal posts for the Mane connected with the approaching cremation ceremonies of his late Majesty the King of Siam have arrived from the upper country. These immense timbers are 120 feet in length, eighteen feet of which is to be buried in the ground, and five feet in diameter at the large end.

On the 28th there was a line of Siamese boats of all sizes, filled to their capacity of rowers and paddlers. The men and the women, perhaps the latter formed the greater proportion, were gaily dressed. They paddled, and rowed, and cheerily sang, as now and then groups of boats were testing with each other their speed. This innumerable string of people and boats have been out paying the annual visit and devotions to the P'ra-chedi, at the mouth of the Chow Phyta River. To the credit of this mass of people we cheerfully record, we heard not a harsh word, saw none the worse for liquor, though all seemed to be full of animation and enjoyment.

All the treaties which the great nations of the West have made with Siam have scrupulously guarded the persons and the property of their subjects, by exempting them in express stipulation from Siamese jurisdiction. The Siamese cannot arrest, try, judge, sentence any subject of a treaty power. They cannot enter their premises to effect a seizure of persons or property, except by special permission from the Consul, having jurisdiction over said persons or said property.

A special provision is made by which Siamese Custom House officers, properly accredited and properly uniformed, and the places are specified where, when, and how many such officers can board foreign vessels to watch and prevent those vessels from violating the express conditions of the Treaty. If the premises of foreigners are entered, and their vessels are boarded by officers, or in ways not specifically provided for by the particular treaty of the nation of the subject in question, the Siamese Government lays itself open to a breach of the express provisions of the treaty and its serious consequences.

One Consul allowing the Siamese Government to act in a given way with those under his jurisdiction cannot give the Siamese Government the right to do the same act to the subjects of every other nation. Nor can the Siamese Government argue that a Christian, civilised, and an international law-observing nation, does so-and-so, and therefore she may do likewise. She would be reasoning from a wrong stand-point, and hold herself up to contempt and ridicule. We have but one wish for Siam, and that is, may she make the greatest possible progress, and attain the highest type of national development.

## BORNEO.

—o—

### LABUAN.

The following financial statement was laid before the Legislative Council of Labuan by Governor Hennessy, on the 11th October. The figures are not imposing by their magnitude, but they nevertheless disclose a very wholesome condition of accounts in the little colony:—

The following paper was laid before the Legislative Council of Labuan by his Excellency Governor Pope Hennessy, on the 11th of October, 1869:—

"The auditor certifies that the balance available on the 31st of December, 1869, for the expenditure of 1870, will be £3,283 14s 7d.

"The revenue farms, for which I have accepted tenders for the year 1870, have been sold for £4,535.

"Adding to this the minor sources of local revenue, the total income for 1870 will be £7,361 10s.

"Adding to this the surplus from the present year available for next year's expenditure, now certified by the auditor, there will be a total sum of £10,645 4s. 7d. in the Colonial Treasury to the credit of the Labuan Government in the year 1870.

"Looking to this favourable state of our finances, I am enabled to abolish two taxes—the salt farm and the Gambier farm—to increase the salaries of some of the civil officials, to contribute £1,000 to the Imperial Exchequer on account of the pay of the troops, and to appropriate a total sum of £6,727 5s. for the expenses of the colony, exclusive of the contribution to the Imperial Exchequer.

"This estimate of local expenditure includes a considerable sum which I propose to devote to the improvement of the town of Victoria.

"Deducting all these expenses from the Colonial funds for 1870, there will remain a surplus at the end of that year of £2,905 9s. 7d. available for the expenditure of 1871.

"In the year 1871 a new source of revenue will become payable, that is, £1,000 per annum from the Oriental Coal Company as the rent of the mines.

"The finances of the colony are, therefore, in a sound condition.

"The revenue every month will be in excess of the monthly expenditure, and an increasing surplus can be laid by each year to form a consolidated fund for any extraordinary emergency.

"All this is done without import or export duties, tonnage dues, or any form of charge whatever upon trade or commerce; and excise revenue is drawn from the population without a murmur, for it falls exclusively on luxuries."

## JAVA.

—o—

### BATAVIA.

The *Javasche Courant* has the following items of news:—

Report on the Chinchona Culture in Java, for the third quarter of the year 1869. The continuous drought, and strong winds during this quarter, were unfavourable to the plants. From seeds and slips 44,401 plants have been obtained, whereof 5,766 were Calisayas, 7,755 were Succirubras, 30,590 were Condamineas, and 380 were Lancifolias. 22 boxes, containing altogether 269 Succirubras, and 1,581 Calisayas, have been sent to Pasaruan, Probolingo, Menado, the Moluccas, Celebes, and the West coast of Sumatra. In November some thousands more plants, which are now lying ready, will be distributed in various directions throughout Java, in order thereby to make experiments in the higher inhabited mountain tracts.

The first experimental gatherings have proved that, planted under favourable conditions the chinchona, if no adverse circumstances happen, can yield within five or six years a very fair and significant produce. Forty calisaya trees, aged four and a-half years, produced 100 Amsterdam lbs.; and twenty-nine eight-year-old trees of the same sort, 114 Amsterdam lbs. of dry bark. By the drying process the freshly gathered prodnct lost about 66 per cent. The trees which were cut down began to shoot out fresh sprouts from the stumps, so that in a few years they can be cut again like European copsewood. It is deserving of observation that in these experimental gatherings the best trees were not selected. Two of the most forward gardens were fixed upon for the operation. Some extensive plantations still remain very backward, in consequence of some malady, which may be ascribed to the inroads and influence of insects. The total number of chinchona trees, large and small, in every state of growth, may be estimated just now at 1,998,000.

The *N. B. Handelsblad* gives the following particulars of the difficulties which impede the construction and setting up the proposed statue of J. P. Koen at Batavia. For the erection of the statue a sum of f.4,500 has been reserved from the moneys collected for celebrations attendant on the laying the first stone; whilst in Holland, according to the last advices, a sum of f.6,000 has been collected. So that on the whole, a sum of f.11,000 is now available. This sum is however far from being sufficient for the attainment of the object in view, and for which an amount of f.25,000 is judged necessary. As a consequence to the decision of the Supreme Government "that there appear no reasons for a contribution from the national treasury, for the erection of a statue to Jan Pieters Zoon Koen"—a fresh endeavour will now be made to procure the amount required, by a renewed appeal to the interest taken in the matter by the inhabitants and colonists of Northern India.

On the 25th October the Governor-General turned the first sod of the Batavia and Buitenzorg Railway, in the presence of a considerable number of persons summoned by invitation. Mr. Maarschalk, president of the head committee of the N.I. Railway Company, was the first to deliver a speech on the occasion. After having satisfied the demands of politeness towards the Governor-General, and then towards the company present, the speaker amply enlarged on the urgent necessity, becoming more and more apparent of late, of practising the utmost economy in the construction of railroads. The less necessary adjuncts—such as elegant stations, buildings, &c.—could always be constructed, as the

Digitized by Google

railways came into operation, from the gains resulting from the traffic. The speaker emphatically contradicted a report, lately spread about, that in the construction of the Batavia Buitenzorg line an economy would be put in force which would be injurious to the durability of the works, and dangerous to the security of the passengers.

## STRAITS SETTLEMENTS.

### SINGAPORE.

Dates by this mail are to the 18th Nov.

At a meeting of the Council at Singapore on the 10th Nov., 1869, present: H. E. the Governor, the Hon. the Lieut.-Governor and Col. Secy., his Honour the Chief Justice, the Hon. the Officer Comdg. H.M.'s Troops, the Hon. the Attorney-General, the Hon. Acting Treasurer, the Hon. Auditor-General, the Hon. W. H. Read, the Hon. T. Scott, the Hon. W. R. Scott, and the Hon. W. Adamson, the minutes of the last meeting were read and confirmed. The Attorney-General gave notice of the following addition to the standing orders of Council:—Whenever the mail steamer for Europe or China is signalled by 11 A.M. on a day appointed for the meeting of the Council, or whenever a notice is given by the Post Office that a mail for Europe or China will be made up between the hours of 12 and 4 on a day appointed for the meeting of Council, such meeting shall stand adjourned to the following day at twelve o'clock, unless notice be given to the contrary. The Attorney-General moved, seconded by the Auditor-General, that the Criminal Law Bill be committed, which was agreed to. The Council went into committee upon the Bill. The committee reported progress. Adjourned to the 15th November.

The *Straits Times* says:—

We hear that the present opium farmer of Singapore, Chiang Hong Guan, has, by Government influence, secured the Johore Farm from the 31st proximo for $11,000 per mensem. The present tenant of the Johore Farm offered, it is said, $12,000, but pressure was put upon his Highness the Maharajah to accept the lower offer, which, however, is $2,000 to $3,000 over the present rent. We are very glad indeed this desirable result has been obtained, but we wish the violation of political morality could have been dispensed with.

At a meeting of the stewards of the Race-course held yesterday it was decided to postpone the races for a week—that is, from the 16th, 18th, and 20th, to the 23rd, 25th, and 27th Nov.

The arrangement recently come to with the Maharajah in regard to the Opium Farm of Johore is not one which can be looked upon as permanently removing the difficulties which have been encountered during the past three years.

Dr. James Grey Jewell, American Consul for this port, with his wife and family, has arrived in the American ship *Rocket*, from Boston, and will at once, we learn, assume the duties of the Consulate.

## CEYLON.

### GALLE.

On the Galle harbour improvements the *Colombo Observer* says: In our last we gave the report of Messrs. Halliley and Donnan on the best mode of raising a revenue to meet interest of borrowed money, and to form a sinking fund for the repayment of the loan. Draft of an ordinance has been published, based on the recommendation in that report, to enable the Government to collect a harbour due of two shillings per ton on coals, with graduated tonnage dues on steamers and other vessels resorting to the harbour. If, therefore, the report which will be prepared and sent in by the local commissioners appointed by the Governor opposes no obstacle, we suppose we may take it for granted that the early part of 1870 will see the commencement of the work, the Duke of Edinburgh, perhaps, being asked to take the initiatory step. The reports of Mr. Gregory and Major Clarke, with other papers on the subject of the breakwater, will be found in our columns, as well as a letter from Mr. R. J. Dunlop, of Jaffna, on the proposal to cut a ship canal across Ramisseram Island, and make Colombo the port of call for steamers. Sir James Elphinstone, who was president of a committee of the House of Commons for taking evidence on the subject of the passage between Ceylon and India, is now in the island, and will, doubtless, give Government the benefit of his views. News, which we hope to receive before we frame our next summary, of the successful opening of the Suez Canal, will naturally give a new impetus to proposals of this kind. A passage for large vessels will yet, no doubt, be opened between India and Ceylon; but we fear not in this generation.

The French transport *Sarne*, from Saigon to Suez, fouled the P. and O. steamer *Mongolia*, doing considerable damage.

The following is from our *Telegraphic Extra* of Nov. 24:—The French mail steamer *Meinam*, from Calcutta, arrived on the 22nd, and the *Tigre*, from China with homeward mails, anchored yesterday. The *Donnai*, from Suez, with London letters to 28th ult., arrived this day. The last-mentioned vessel experienced very severe weather when about a thousand miles on this side of Aden. The storm is described by several of the passengers as to have presented all the appearance of a cyclone. The good ship bore herself well. however, and sustained but little damage, with the exception of boats, spars, &c.

It is reported that telegrams have arrived which proclaim the Suez Canal a *fait accompli*, by the successful passage of the *Godavery* through it.

The wires have again been working badly, and we scarcely expect to see regularity restored until communication is re-established by the Turkish line. A mail or two will doubtless elapse before our system of special telegrams will be in regular working order, with our mail advices of Eastern produce and shipping.

## THE SUNG-YANG CLAIMS.

H.E. Sir RUTHERFORD ALCOCK, K.C.B., H. B. M.'s Minister, Peking.

Shanghai, Nov. 12, 1868.

Sir,—We have the honour to address you on the subject of a claim which we have preferred against the Chinese Government since the year 1865, for losses sustained by us in consequence of the plunder by Imperialist soldiery, from our native agents at Sung-Yang, in the province of Hoopeh, of certain sums of money in coin and bullion sent there for the purchase of tea.

We enclose copies of the original letters addressed to H. M. Consulate at Hankow. by our representative there, stating the origin and the particulars of the claim, which has been frequently urged without successful result upon the notice of the consuls successively in charge of British interests at that port.

We are induced to bring the matter to your Excellency's attention at this time, because we have recently ascertained that certain Russian merchants having claims like our own, arising out of the same occurrence, viz.:—Messrs. Ivanoff Oberin and Co. and Messrs. Akooloff and Tokmakoff had, through the intervention of the representatives of H.I.M. the Emperor of Russia, been paid in full by the Taoutai of Hankow, during February last, the value of the copper cash and Sycee which was taken by the soldiers from their agents on the occasion to which we have referred.

We trust your Excellency will move the Chinese authorities to render to us the justice which has so long been deferred.—We have the honour to remain, Sir, your most obedient servants,

JARDINE, MATHESON, AND CO.

To W. H. MEDHURST, Esq., H.B.M.'s Consul, Shanghai.

PEKING, Nov. 23, 1868.

Sir,—I have received a letter with enclosures from Messrs. Jardine, Matheson and Co., dated the 12th instant, respecting a claim which they preferred against the Chinese Government in 1865 for losses sustained from the Imperialist soldiery who robbed their native agents at Sung-Yang, of certain sums of money in coin and bullion, sent there for the purchase of Tea.

Messrs. Jardine, Matheson and Co. complain that, although this claim has been frequently urged upon the notice of successive Consuls, there has been no result, whereas they have recently ascertained that certain Russian merchants having claims of like nature arising out of the same occurrences, had, through the intervention of the Representative of H.I.M. the Emperor of Russia, been paid in full by the Taoutai of Hankow, during February last.

That there has been great delay and no settlement yet effected, are indisputable facts. But Messrs. Jardine and Co., have been misinformed as to what has been done in the matter of the Russian claims. So far from having been paid in full, they have been induced to accept a compromise, receiving Tls. 800 for claims amounting to Tls. 2,500. If Messrs. Jardine are prepared to follow the same course, I have very little doubt they may secure a like result.

These Sung-Yang claims of Messrs. Jardine and others, accruing from losses alleged to have been suffered by the plundering of some revolted Imperialist troops, have, as you are aware, been the subject of much correspondence and negotiation; and if the result has been less satisfactory than could be desired, it has arisen from several very intelligible causes.

The Chinese Government in the first place contested their responsibility for losses suffered by insurgents, contending that the plunderers were in no proper sense Imperial troops, but men in revolt against their own Government, like other insurgents. Losses by civil war or popular tumults and insurrections, they are aware, cannot constitute a valid claim against a Government according to the International law of Europe. Apart from the first difficulty of principle, it followed from the nature of the case that no accurate or perfectly conclusive evidence could be furnished for the losses incurred. When a band of disorderly soldiers or a mob take to plundering a town, there is no time for inventories or attested lists of goods, moneys, &c., actually taken or destroyed.

As regards the British claimants, they were even in a worse position in this respect than the Russians, who were there in person, and on the spot, preferred their claims without delay, based upon their own attestations and evidence; whereas the British had to rely upon the statements of their Chinese employés and agents, and could vouch for nothing more of their own knowledge. The actual claimants could not really know or make any deposition as to what money or property may actually have been plundered. They can only say such and such losses were reported by the Chinese entrusted with their money or goods; and, therefore, the loss to them, the claimants, owing to the plundering acts of the revolted soldiery, was so much.

It can hardly be matter of surprise or complaint that the Chinese authorities, when called upon to make good such losses,

Digitized by Google

should demur and take exception to the inconclusive and more or less untrustworthy nature of the Chinese evidence tendered in proof of value. Under any view, the amount was a question for investigation and subject to verification. But a still more serious difficulty in the way of any satisfactory settlement seems to exist in the law of the Empire, by which the proprietors of houses are made responsible for any losses or robbery on their premises, irrespective of their inability to prevent them by any exercise of foresight or courage. It follows that, if these claims were actually to be enforced, and by any irresistible pressure could be recovered, the unfortunate proprietors of the houses, whose only fault appears to have been the giving shelter and accommodation under their roof to foreigners' agents and property, would be the sufferers, since they would be made to pay up the amount of the claims.

The justice or injustice of such a law is beside the question; and the Chinese Government may refuse to enter into a discussion on the subject with foreigners, in the settlement of an incidental claim. But it is certain that, in such a case as this, to put the law of the Empire in execution would be to raise a feeling of anger and hostility to foreigners, not only in the city of Sung Yang, but probably throughout the province, which would go far to render the residence of any foreigner or agent impossible in future. Apart from any sense of injustice or wrong, the merest dictates of self-interest would effectually deter any Chinese householder from hereafter voluntarily accepting such a liability by lodging a foreigner under his roof. This very obvious result, I have reason to believe, made the Russian Minister hesitate, as well as myself, in any further proceedings to enforce a settlement. And the alternative was probably put before the Russian merchants of seeing themselves shut out from ever after in the city of Sung-Yang, or contenting themselves with less than a third of their claims, which the Taoutai was induced to pay without attempting to wring it from the proprietors of the houses where the property and merchants were lodged.

The settlement so effected was not the result, therefore, of any pressure exercised here by the Russian Minister on the Central Government, but a friendly compromise on the spot between the claimants and the local authorities, and I understand that the effects of such a settlement have been experienced by the Russian merchants in a friendly spirit manifested both by the authorities and townspeople. Their having refused to allow their own interests to be benefited at the expense of those who had done them no wrong, seems to have been fully appreciated, and instead of being the object of implacable hostility on all sides rendering their continued residence in the town for the transaction of their business impossible, they find themselves unmolested and in perfect security.

If the British claimants, in view of these difficulties, and by the light of this Russian experience, are willing to act on a similar principle, I should be very glad to give every assistance in my power to obtain an amicable settlement with the local authorities. If otherwise, the whole of the circumstances will be reported to H.M.'s Principal Secretary of State for Foreign Affairs, and in view of the grave prejudice to commercial interests and our relations in the interior that is likely to result from any more decided action for the recovery of the full amounts claimed, I shall deem it my duty to await instructions from H.M.'s Government before I proceed further.

In this state of the case, I think you will do well to communicate, not only with Messrs. Jardine, Matheson and Co., but with all the other claimants, and invite, upon a knowledge of the facts, an expression of their opinions as to the expediency of pressing for settlement of their claims as they stand, so far as their own interests and wishes are concerned in the matter, and report to me the result.—Your obedient servant,

(Sd.) Rutherford Alcock.

---

To H. E. Sir Rutherford Alcock, K.C.B., H.B.M.'s Minister, Peking.

Shanghai, July 28th, 1869.

Sir,—We have had the honour to receive from Mr. Consul Medhurst a copy of your Excellency's despatch to his address of the 23rd Nov. last, replying to our letter of the 12th of the same month on the subject of our claim against the Chinese Government for losses incurred at Sung-Yang some years ago. Several circumstances have combined to hinder us from giving an earlier acknowledgment to your Excellency's communication, not the least important of which has been our desire to verify the statement we made, that Russian subjects have been paid in full the value of the coin and bullion which they lost on the occasion out of which our own claim arises.

We observe that your Excellency considers the Chinese to have good grounds for contesting the claims made upon them.

Firstly. Because a Government cannot, under the principles of international law, be held responsible for losses by civil war, popular tumults, or insurrections.

Secondly. Because from the nature of the case it is not possible to bring forward satisfactory evidence that the losses alleged to have occurred had actually taken place.

Your Excellency proceeds to state that the difficulties in the way of a satisfactory settlement are seriously increased by the fact that there is a law of the Empire, by which the proprietors of houses are made responsible for any losses which may occur by reason of robbery or violence within their premises; and that, consequently, if payment of the claims were to be enforced, an amount of ill feeling would be engendered on the part of the native population which would probably go far to render the residence of foreigners in Sung-Yang well nigh impossible.

Your Excellency further assures Mr. Medhurst that we have been misinformed as to what has been done in the matter of the Russian claims, the Russian merchants having accepted a compromise which involved a reduction of two-thirds of their original claim.

With regard to the right of the Chinese to refuse recognition of the claims made upon them, on the ground that it would not be justified on the principles of international law, we suggest that a Government which appeals to international law is also bound by the obligations which that law imposes, and that no parallel can fairly be drawn between the liability of the Chinese Government in respect to the case in point, and that of any European State, to make good a loss arising out of somewhat similar circumstances.

To suppose, for the sake of argument, a possible outbreak in Birmingham of militia whose pay was in arrear, and the plunder of the property of a French resident in the United Kingdom, the parallel between such a case, and the occurrences of Sung Yang, to be complete, would involve the supposition also that the British local authorities took no steps to redress the outrage or to recover the money, listened to no representations from the French Consul that an immediate inquiry should be instituted, or that the offenders should be brought to justice, even though it was known that murder had been committed, denied in fact the benefits of either Municipal and International law to the aggrieved party, and only after the lapse of two years in consequence of pressure from the French Minister in London at the Foreign Office, condescended to institute a mock inquiry into the circumstances, when, owing to the lapse of time, and the disappearance of necessary witnesses, a complete chain of proof was all but impossible.

In a letter on the subject from Mr. Medhurst to our Agent at Hankow, that gentleman says:—

"The Viceroy of this Province, and the Taotai of Hankow have both received repeated injunctions from the Supreme Authorities at Peking to come to some arrangement with me, for the proper adjustment of the claims, and I have had as often to report them to H. M. Minister for evading these orders."

The date of this letter being 15th Feb., 1867, nearly two years after the loss occurred.

A lengthened experience of the character and practice of Chinese officials must have led your Excellency to the conviction, even if the reports of H. M. Consular officers in this case were wanting, that no claim upon them would be by any chance entertained if it could possibly be evaded; and that, in the absence of any recognised mode of procedure, the only means of redress open to foreigners who may be sufferers by the wrong-doing of Native Government servants, or of any portion of the native population, is an appeal to the protection of the Foreign Ministers.

The application therefore of the rules of International law to the settlement of a question with the representatives of a nation who refuse to examine even into the merits of any claim, however just, seems entirely out of place, and we venture to quote in support of our views the authority of Your Excellency, expressed in the following extract from Your Excellency's despatch to Lord Clarendon, dated the 5th February last:—

"We need not look to Vattel or Grotius for any sanction to exceptional action (in the case of China), for the simple reason that they and all other writers on international law deal with principles in their application to civilised States, recognising a mutual obligation, and governed by similar, or at least analogous, systems of jurisprudence and polity. But when dealing with Oriental races and States, ignorant of all the conditions and principles of European polity, a special adaptation of these principles is required to meet the wholly exceptional character of the situation caused by a forced intercourse between races holding totally different views of moral obligation and national policy."

As to the perpetrators of the outrage not being Imperial troops, it appears from the correspondence to be admitted by the Chinese that they were braves called to arms by the Imperial Government, and whose pay, as it was alleged at the time—and the statement has never been satisfactorily contradicted—was in arrear. The demand for such a complete proof of loss as would satisfy all the nice distinctions of evidence and practice upheld in a Western Court of Judicature cannot, with any justice, be brought forward by the Chinese Government at this time. Our principal witnesses, two Shroffs, were decapitated, and the persistent refusal of the authorities to cause examination of the circumstances during a period of two years following the occurrences, appears to us to debar them from complaining of want of evidence, which is the consequence of their own delay.

Your Excellency, however, answers us that there is a municipal law of the empire which provides for the payment of claims such as ours, and we confess to be unable to feel the weight of the reasons assigned against the policy of putting the law into force in our favour. We can hardly be expected to see other than injustice in an arrangement which would make British subjects who are practically prevented from residing at Sung Yang to be sufferers, in order that Russian subjects, who are encouraged to reside there, may not be disturbed in the possession of special privileges;

Digitized by Google

while it seems to us highly improbable that the townspeople of Sung Yang will not be far too well acquainted with their own interest to offer any interruption to the large and lucrative foreign trade which passes through their hands, merely because a law of the empire, the provisions of which must be well known to them, is put in force.

We cannot admit the force of the suggestion that the British Government should go out of its way to refuse, on our behalf, the benefits of a Chinese law which is probably suited to the temper and requirements, and, for all we know to the contrary, is established with the general approbation and concurrence of the native population, because the principle of the law does not harmonise with the maxims of English jurisprudence.

To admit the force of the arguments which have been adduced on the Chinese side of this question would be to recognise the justice of a position in respect to the relations of Chinese with foreigners, which would accord to the former all the benefits of a strained interpretation of Western International law, without committing them to its ordinary obligations, and would deprive the latter of the limited protection which even Chinese laws affords. To recognise a position, in fact, in which the liability of foreigners to outrage on the part of native officials would be limited only at the point at which reparation would probably be exacted by force.

With reference to the contradiction by H. E. the Russian Minister of the statement we made to the effect that Russian claims had been fully satisfied, we have to acquaint your Excellency that we have received information upon which we can place reliance, that Russian subjects have been paid in full the value of the coin and bullion which they lost. Their original claim upon the Chinese Government included items of account put forward as consequential, having arisen out of loss by market fluctuations, incidental expenses, and personal injuries to their employés.

These consequential claims were waived, but the actual losses in money were made good. Our own claim is preferred only for repayment of sycee and copper cash seized by the Imperial levies—that is to say, such a compromise as the Russians have accepted is all we have ever claimed; and your Excellency will not fail to see the unfairness of our being made the victims of our own moderation.

We trust your Excellency will reopen a discussion of the question with the Chinese Government, and insist upon that measure of justice being dealt out to us, which, although so long evaded and pertinaciously denied, we still claim under the broad principles of equity underlying all honourable treaties, and forming the basis of all law.—We have the honour to remain, Sir, your most obedient servants,

(Signed) JARDINE, MATHESON, and Co.

---

BRITISH CONSULATE, Shanghai, Oct. 28, 1869.

Gentlemen,—I have to enclose herewith copy of a despatch which I have lately received from H. E. H. M. Envoy Extraordinary, &c., &c., &c., on the subject of your share in the claims for compensation for losses sustained at T'sung Yang in 1865.

W. H. MEDHURST, H. B. M. Consul.

Messrs. Jardine, Matheson and Co., Shanghai.

---

PEKING, Oct. 15, 1869.

Sir,—Referring to your despatch No. 28 of 29th July and its enclosure, I have to instruct you to acknowledge the receipt of the statement forwarded through you by Messrs. Jardine, Matheson, and Co., dated the 28th July last, respecting their claims for losses incurred at Tsung Yang in May, 1865.

I observe that Messrs. Jardine, Matheson, and Co. contest the validity of the grounds taken by the Chinese authorities to resist the claims, whether these rest on the principles of international laws or defective evidence.

Seeing the impossibility of arriving at any satisfactory settlement in the way of compromise between the conflicting claims of the merchants and the Chinese authorities—each maintaining their own view of their respective rights, the one to claim the full amount in coin or bullion of alleged losses, and the other for absolute immunity from liability, no practical solution is possible.

It seems only necessary, therefore, in reference to this rejoinder of Messrs. Jardine, Matheson, and Co., to remark that, as regards the operation of Chinese law in like cases, if insisted upon, proving highly injurious to any future interest; not, as alleged by Messrs. Jardine, Matheson, and Co., of Russian merchants especially, but of British subjects and all other foreigners desiring to conduct either in person or by their agents business in that town or its neighbourhood, they have misapprehended the sense in which their attention was called to the fact; whether as a matter of policy in the interests of the claimants it might be expedient or the reverse to press for a rigorous settlement, if it could only be obtained under conditions which would involve serious loss or ruin on the people who had given lodging to their agents, and were in no other way blameable or answerable for the spoliation suffered, may be a matter of opinion. The Russian merchants accordingly come to a conclusion totally opposed to that maintained by Messrs. Jardine, Matheson, and Co., as would appear from the following statement received from the Russian Chargé d'Affaires:—"The Taoutai of Hankow wanted to levy the amount of the indemnity which, after so many pains, was awarded to them in compensation for the losses they had sustained, from the proprietor of the Tea Manufactory leased to the Russians; but these having heard of it, declared they would not accept such extorted money, and the indemnity was paid to them from the Government Treasury."

As to the amount paid, and the proportion it bore to the amount claimed, I am still of opinion that Messrs. Jardine, Matheson, and Co. are not fully or correctly informed as to the actual settlement obtained, or its conditions. Further information leads me to believe that there was less analogy between their case and that of the only Russian merchant concerned, than they have been led to imagine. This information derived also from the Russian Legation is to the effect that the result ultimately arrived at by a mutual compromise entered into by agreement on the spot, was the acceptioner on the part of the Russian merchant of Tls. 800 instead of Tls. 2,500, the amount of the total claim for damages sustained by them and his compradore and servants, all included, and forming a little less than one-third of the whole. This seems to have been the amount, exact or approximate, as Mr. Ivanhoff himself states in answer to an inquiry from Mr. Consul Caine, of the actual loss, in money or bullion apart from all other property taken or destroyed and also from what the compradore or servants may have lost.

But the testimony in support of this claim appears to have been very different from that on which the British claims rest. The Russian was himself in Tsung Yang, when the revolted braves approached, and immediately made declaration to the authorities of the place that he was compelled to leave behind him such and such property, specifying the same; and this being verified he received in proof proper documents attesting the same.

Had it been possible for the British claimants to take the same steps, or even, from having been on the spot, to subsequently give direct evidence from their own personal knowledge of what property was in Tsung Yang at the time, instead of through Chinese servants, whose evidence under the circumstances may fairly be considered by the authorities as less trustworthy, it is possible that some satisfactory settlement might have been come to before this. As it is, there seems to be no probability of any further diplomatic action here being successful, and I have therefore informed the Prince of Kung that I had determined on referring the whole correspondence home for the instructions of Her Majesty's Principal Secretary of State for Foreign affairs. You will make known to Messrs. Jardine, Matheson, and Co. the contents of this despatch, for their information and guidance.—Yours, &c.,

(Signed) RUTHERFORD ALCOCK.

W. H. Medhurst, Esq., H. B. M.'s Consul, Shanghai.

---

My Dear Mr. Caine,—I received on Tsung Yang claims only for sycee and copper cash which were taken by the soldiers, but I have nothing for the property which was taken or destroyed by the soldiers.—Yours, &c., (Signed) H. IVANOFF.

G. W. Caine, Esq., H.M.'s Consul, Hankow.

---

# Commercial Report.

(*For dates see First Page.*)

## IMPORTS.

SHANGHAI.—Piece Goods: There is but little to add to our report for last English mail. There had been some inquiry for Grey Shirtings for shipment to Japan and the river ports, and prices advanced a few cents for 8-4 lbs., sales of finest Eagles being effected at Tls. 2.25 per piece, and of good ordinary chops at Tls. 2.22 per piece, but the demand soon died out, and the last news from Tientsin had given a weak tone to this market. There was still, however, a small demand for local consumption and for some of the river ports, and the latest sales (to a moderate extent only) had been at fair values. We quote—7 lbs., Tls. 1.98 to Tls. 2.02; and 8-4 lbs., Tls. 2.18 to Tls. 2.24 per piece. There had been some inquiry for 6 lbs. to 6-8 lbs. T-Cloths at low figures, but only a few sales had resulted. White Shirtings were asked for at a decline on last prices. Drills: Small re-sales of American goods quoted at about last figures, but Chinese holders were weak, and would submit to a reduction for prompt clearance. The tendency of the market for this class was downwards, owing to a large stock, and but little inquiry. Jeans and Sheetings were much as last advised. Fancy Goods: Dyed Brocades and Damask asked for, and sales of Chintzes had taken place at low rates for ordinary goods. Woollens, &c.: The business done had been of a retail character, though there was more inquiry for Camlets of best chops, and for low class Figured Orleans at cheap figures. Metals: A good business in Nail Rod Iron at a further advance in prices for assortments and small sizes, but the larger makes were heavy, and, if anything, had rather declined. Nail Rod Iron: About 13,000 bundles had been taken at Tls. 2 to Tls. 2.10 per picul, but Bars were very dull, and Hoops lower. Lead: Holders firm; some small sales had been made at an advance of 5 candareens per picul. Coals: The arrivals from Cardiff (Tartar and Anita) were to order. Newcastle, Lambton, sold at Tls. 5.75 from ship's side alongside a wharf. Japan: Sales at Tls. 4.30. There was a fair inquiry for most kinds, but at no higher rates. Quotations (duty paid):—White Shirtings, Tls. 2.1.0 to Tls. 2.8.0; T-Cloths, 6 lbs., Tls. 1.3.5 to Tls. 1.6.8; 7 lbs., Tls. 1.6.5 to Tls. 1.9.0; 8 to 8.4 lbs., Tls. 2.0.5 to Tls. 2.4.0; American Drills, 40 yards, Tls. 3.7.5 to Tls. 4.0; American Jeans, 30 yards, Tls. 3.0; American Sheetings, 40 yards, Tls. 3.6.0 to Tls. 3.8.0; English Drills, 40 yards, Tls. 3.5.5 to Tls. 3.8.0; Dutch Drills, 40 yards, Tls. 3.5.5 to Tls. 3.6.5; Handkerchiefs, Blue, Tls. 0.5.8 to Tls. 0.6.2; Brown, Tls. 0.5.0; Brocades, Dyed, Tls. 3.0 to Tls. 3.2.3; Damasks, Dyed, 40 yards, Tls. 4.0 to Tls. 4.3.0; Chintz, Tls. 1.6. to Tls. 1.9.0; Camlets, English, SS, per piece, Tls. 11.5.0 to Tls. 12.5.0;

Digitized by Google

Spanish Stripes, per yard, Tls. 0.5.2 to Tls. 0.8.0; Medium Broad and Habit Cloth, Tls. 0.9.5 to Tls. 1.5.5; Long Ells, Scarlet, per piece, Tls. 6.2.0 to Tls. 6.3.0; Assorted, Tls. 6.3.0 to Tls. 6.3.5; Iron—Nail Rod, Tls. 2.0 to Tls. 2.1.5; Hoop, Tls. 1.6.0 to Tls. 1.7.0; Flat and Round, Tls. 2.1.0; Lead, Tls. 5.2.0 to Tls. 5.3.0; Tin Plates, per box, Tls. 4.5.0 to Tls. 5.0; Steel, per tub, Tls. 3.2.0 to Tls. 3.4.0; Coals (cargo quotations afloat)—Cardiff, per ton, Tls. 8.0; North Wales, per ton, Tls. 7.7.5; English, per ton, Tls. 6.6.0; Anthracite, per ton, Tls. 9.7.5 to Tls. 1.0.

## EXPORTS.

### TEA.

SHANGHAI.—Black: During the week a considerable business had been done at previous rates. The demand had been chiefly on Teas from Tls. 19½ to Tls. 21 with a few chops Common Oonams at Tls. 18¾. Telegrams to hand dated 5th October, quoted low kinds of Tea worse at home, so that the market at the close was rather quiet. The settlements for the week amounted to about 17,000 chests. Supplies from Hankow were now on a much more moderate scale. Greens had been taken freely, and no change can be quoted in prices. All fine chops were bought up with eagerness, and the grades below them had also been attracting more attention. Prices for Moyunes had ranged from Tls. 33 to Tls. 43, and Pingsuey from Tls. 34½ to Tls. 37. A large business had been done in boxes of Pingsuey at from Tls. 41 to Tls. 44. Settlements amounted to 17,000 half-chests.

### SILK.

SHANGHAI.—The opportunity of shipping Silk by the intermediate steamer Ganges, at 20 per cent. reduction in freight, had led to further business, and fully 500 bales had found purchasers, of which 337 bales advance of fully Tls. 5 to Tls. 10 for Karshing Taysaams, and a similar were exported on the 31st October. Prices showed an advance for Common Tsatlees, which appeared to be in fair demand. All chops and best grades were unchanged, and to a certain extent neglected. The unsold stock of 4,000 bales contained fully 1,000 bales of silk so very common that it was thoroughly unsaleable—and in all probability would go into local consumption.

### SIAM PRODUCE.

BANGKOK.—Messrs. Markwald and Co.'s report is as follows:—Rice: Our market has maintained a firm position, but supplies of grain being abundant, prices remained unaltered until the beginning of November, when, owing to the large number of vessels arrived here to load for Europe and China, in connection with favourable advices from the rice markets in China, a very brisk demand sprang up for Rice, and prices experienced an advance. Steam-mill field rice has been contracted for in some instances at 95c. per picul, inclusive of duty, mat-bags, and coolie hire. All the steam-mills are engaged for fully eight weeks to come, and will not be able to accept other contracts during this period. Native cleaned Rice is scarce, and prices have likewise advanced, owing to the competition of many purchasers. Our quotations for Rice are as follows:—Steam Mill Namnang, or Field Rice, 87½c. per picul; Steam Mill Nassuan, or Garden Rice, $1. 15c. do.; Native-cleaned Garden Rice, resifted, $1. 15c. do.; Native-cleaned White, No. 1, Tls. 53 per coyan; Do., No. 2, Tls. 51 do.; Clean cargo, No. 1, Tls. 38 do.; Do., No. 2, Tls. 36 do.; Good cargo, Tls. 34 do.; Fair do., Tls. 29 do.; Common do., Tls. 26 do.

Sugar: White and brown sorts are scarce, and larger supplies cannot be expected till February next, when the new season supplies will commence to appear in the market. Our quotations are—For White superior, Tls. 10½ per picul; No. 1, Tls. 10; No. 2, Tls. 8¾; No. 3, Tls. 9; Brown, superior and No. 1, Tls. 5; No. 2, Tls. 4¾.

Black Pepper: No fresh supplies have come to market, and the price is nominally Tls. 11 per picul.

Sapanwood: Stocks small and prices firm. 4 to 5 pieces, Tls. 3 per picul; 4 to 6, Tls. 2¾; 6 to 7, Tls. 2½; 7 to 8, Tls. 2. Cut Sapanwood, roots dressed off, for shipment to Europe; Thin pieces, Tls. 2 per picul, equal to £6. 19s. 7d. per ton of 20 cwt. f.o.b.; Thicker pieces, Tls. 2¼ per picul, equal to £7. 11s. 8d. per ton of 20 cwt. f.o.b.

## ARRIVALS.

At SHANGHAI.—From Cardiff, Oct. 27, Anita, Tartar.
At SAIGON.—From Bordeaux, Oct. 23, Olivier; Nov. 6, Malacca.
At SINGAPORE.—From Boston, Nov. 16, Rocket.
At BANGKOK.—From London, Nov. 8, Hampton Court.
At HONG KONG.—From Cardiff, Glenaros (reported by telegram).

## DEPARTURES.

From SHANGHAI.—For London, Oct. 26, Dhollerah, Tycho Brahe (str.); 30, Lizzie Iredale; Nov. 1, Tavistock; for New York, Oct. 30, Mikado, Jas. S. Stone; for Boston, via Foochow, 31, W. E. Gladstone; for London, Nov. 23, John Lidgett; for New York, Dilpussund (reported by telegram).

From FOOCHOW.—For London, Oct. 28, Osprey.

From SAIGON.—None.

From SINGAPORE.—For England, Nov. 13, H.M.S. Rodney; for New York, Nov. 13, Gemsbok.

From BANGKOK.—For Europe, Oct. 22, Ravenscliffe, Ravensworth; 23, Luzon; 26, S. Bach, O'Mooyer; Nov. 5, Drusus; for Marseilles, Oct. 23, Canal; for Falmouth, Nov. 1, Ruhtinas.

## SHIPPING POSTSCRIPT.

ARRIVALS NOT IN THE TABLES.—Dec. 13, at Texel, from Batavia, Vrede; 16, at Deal, from Padang, Eleanor; 15, at St. Helen's Roads, from Akyab, Glen Monarch; 14, at Texel, from Padang, Maria Regina; at Brouwershaven, from Padang, Delft; from Batavia, Vesta; 16, at London, from Macao, Vanguard; at Cowes, from China, Seamew; 17, at Brest, from Singapore, Blenheim; 16, at Deal, from Rangoon, for Shields, Rowena; at Torbay, from Akyab, Senator Iken; 17, at London, from Macao, Vanguard; Nov. 23, at New York, from Canton, Peter Rickmers; Dec. 16, at Douarneney Roads, near Brest, from Singapore, for London (during a heavy N.W. gale), Blenheim; at Boston, from Penang, W. A. Farnsworth; 17, in the Downs, from Ceylon, Shooting Star; 18, at London, from Colombo, Camelot.

DEPARTURES.—Dec. 11, from the Clyde, for Ceylon, Arrow (str.); Dec. 17, from London, for Hong Kong, Guinevere; from Hamburg, for Hong Kong, Hydra.

LAID ON.—At London, for Yokohama, Min; at Liverpool, for Singapore, Katherine. At London, for Hong Kong, Maiden Queen; for Singapore, Kingdom of Belgium; Sree Singapura.

SPOKEN.—Louisa Fletcher, Liverpool to Galle, Oct. 13, 27 S., 27 W.; Frid Warrior (?), Shanghai to London, Aug. 28, lat. 6, lon. 8 W.; Helena (Dutch ship), from Batavia, Oct. 30, off Cape Recife; Godefroy, of and from Hamburg, for Java, Dec. 2, 34 N., 22 W.; Altona (British barque), Carlisle to Singapore, Oct. 24, 18 N., 25 W.; Molle Tonnes, Marseilles to Bangkok, Oct. 27, 18 S., 31 W.; Wemyss Castle, Clyde to Singapore, Nov. 13, 5 N., 23 W.; Rachel, Singapore to Liverpool, Nov. 9, 15 N., 28 W.; Bolivia, Liverpool to China, Nov. 13, 5 N., 25 W.; Maha Ranee, London (?) to Shanghai, Nov. 12, 4 N., 22 W.; Shooting Star, Colombo to London, Nov. 15, 7 N., 23 W.; Surprise, New York to Shanghai, Nov. 10 (?), 2 (?) S., 32 W.

CASUALITIES.—The Robert Rickmers, Rohtfoss, from Hamburg to Shanghai, put into Plymouth, Dec. 16, with loss of foremast and bowsprit.

Digitized by Google

MISCELLANEOUS.—At St. Vincent, C. V., Nov. 4, Ophir, Heal, from Dundee, and sailed, 5, for Ceylon. Another sale of damaged goods ex Spridrift is announced for the 22nd. At Mauritius, Oct. 13, Canvas Back, from Bangkok, and sailed, Nov. 6, for Cork; Nov. 4, Joyse Philipps, from Yloilo, and sailed for Falmouth; Nov. 9, Cecilia, from Macao, and sailed, Nov. 15, for Falmouth.

## BIRTHS, MARRIAGES, AND DEATHS.

### BIRTHS.

DE SOUZA—On the 13th Nov., at Singapore, the wife of Mr. G. R. De Souza, of a daughter.

HOLT—On the 16th Dec., at Holly-road, Fairfield, near Liverpool, Mrs. Alfred Holt, of a son.

SOHST—On the 11th Nov., at Lochiel Cottage, Singapore, the wife of Theodore Sohst, Esq., of a son.

SOLOMON On the 4th Nov., at Hong Kong, the wife of Reuben Solomon, Esq., of a daughter.

YALE—On the 16th Dec., at Bath-house, Peterhead, N.B., the wife of Alex. H. Yale, Esq., of a son.

### MARRIAGE.

THOMSON—PARK.—On the 2nd Dec., at Stoneyhill, Musselburg, by the Rev. Henry Moncrieff McGill, of Northesk, assisted by the Rev. Sir Henry Wellwood Moncrieff, Bart., John Gibson Thomson, of Colombo, Ceylon, eldest son of James Gibson Thomson, Esq., York-place, Edinburgh, to Elizabeth Brunton, only daughter of Thomas Park, Esq.

### DEATHS.

CRIPPS—On the 5th Dec., at 6, Devonport-street, Hyde-park, George Hinde Cripps, Esq., late of Her Majesty's Civil Service, Ceylon, aged 63.

PESTANA—On the 9th Nov., at Singapore, Philip Anthony, infant son of Mr. Joseph C. Pestana.

## THE CHINESE EMBASSY IN EUROPE.

(STANDARD.)

The Chinese Embassy continues to enjoy itself in Europe, and had been invited, according to a telegram from Berlin, to dine on the 13th instant with the King of Prussia. The United States Minister at the North German Court is said to be engaged in organising a banquet in honour of the illustrious strangers, and of that share in their great enterprise which may be considered due to the great republic of which the Chinese ambassador himself is a citizen. Of course no one is entitled to raise any objection if the King of Prussia or any other Sovereign chooses to entertain a party of gentlemen from Peking, and nothing is more natural than for Mr. Bancroft, or any other American Minister, to do the honours of the place in which he may be living to a wandering compatriot. It is impossible not to feel, however, that no matter how great may be the personal claims of Mr. Burlingame to the courtesy of all persons enjoying the pleasure of his acquaintance, and no matter how amusing it may be to catch and lionise a party of Chinese travellers, still European Governments who entertain the Chinese Embassy officially are, after all, clinging to a mistake which may have been pardonable at first, but ought certainly to have been given up long before now. People who were intimately acquainted with China declared from the beginning what the course of events during the past year ought certainly to have made apparent to all men by this time, that the Chinese Embassy is simply a buffer. Its mission is to keep off Europeans. It naturally finds that the best way of fulfilling this charge is to persuade Europeans that its object is exactly the reverse, and for this reason it makes use of the language which pleases the European ear in connection with Chinese affairs, and talks of progress, civilisation, and the development of resources; but all this time it is really a buffer, and nothing else. Our own Minister in Peking, Sir Rutherford Alcock, a man who is in the worst possible odour amongst all European residents in China, through being considered the slave of retrogressive ideas, and a mere half-hearted champion of his countrymen's interests, has himself been moved to declare that he finds the obstructive spirit of the Chinese Government as great now, if not greater, than ever. Mr. Ross Browne, the American Minister at the Court of Peking, who succeeded Mr. Burlingame when that gentleman was appointed to take charge of the Embassy, has avowed his conviction that it is a delusion and a sham, in a speech much more remarkable for candour and sincerity than for diplomatic reserve. Meanwhile, the only thing which the Embassy has actually done has been to extort from this Government concessions which no Cabinet in harmony with the aspirations and the genius of the country would ever have granted, and of which the effect must be diametrically antagonistic to the purpose which we ought to have, and the Chinese Embassy itself pretends to have, in view. In Paris Mr. Burlingame is not reported to have done well, but it was hardly to be expected that the Emperor of the French would be so easy a victim as the Foreign Secretary of a Radical Cabinet in England. Foreign policy was never the strong point even of the Whigs, and their modern successors are still less distinguished in diplomacy. In Berlin and St. Petersburg, however, the envoy from Peking has a new field of operations, new hospitalities to receive, and new laurels to win by obtrusively doing nothing. Moreover, it is obviously a law of his political existence that he must be kept moving. He is necessarily an itinerant ambassador; for it would be impossible to remain in one place and do nothing in a striking and impressive manner for several years continuously. There will come a time, of course, when the Embassy will, so to speak, have used up all the capitals of Europe, but by judicious management that result may be postponed for a considerable period. To the best informed observers of its policy it does, as we say, seem strange that the hollowness and emptiness of the whole undertaking should so long be successfully concealed; but to him who will be deceived, the only thing to say after vainly trying to enlighten him is, *decipiatur*. It may have been noticed, however—and while on this subject it may be worth while to point out for the benefit of all believers in the Celestial Embassy—that, despite the honour paid to it, the Duke of Edinburgh visiting Peking has to go *incognito* to avoid the slight which would otherwise be offered to him by the Chinese Court. To that august Government it appears only fitting and seemly that gentlemen honoured with its confidence should be received with marks of distinction and respect by the Sovereigns and Ministers of European States, but to imagine that their courtesy ought to be reciprocated in any way is preposterous. A Chinese ambassador may be the equal of a barbarian king, but it does not follow for a moment that a barbarian prince is worthy to be admitted to the glorious presence of the Chinese Emperor. Perhaps, indeed, the present incumbents of the Treasury coincide in this view. Radicals in their foreign policy often enjoy—like Uriah Heep—the sense of being "'umble," especially when their 'umbleness is accomplished at somebody else's expense.

## DUTCH FINANCE.

The following comments on the Dutch Colonial Budget are from the *Daily News*:—

Very little is known in England of Dutch politics. This is a pity; for the Legislature of that country has just been discussing questions analogous to those with which we are familiar in English affairs—questions referring to Colonial Administration, Poor Law Relief, and the relations of Church and State. The colonial question is worthy of some attention. It is a most intricate one, and has been shelved only for the moment. Indeed, the Colonial Minister, M. de Waal, seems not only incapable of dealing with it, but imagines that the Dutch Parliament possesses no better ability than his own. It is difficult to conceive the ludicrous position of a Cabinet Minister who, while demanding a credit on the colonial budget of £10,000,000, calmly says in effect:—"This budget could not be examined in the East Indies, where they are too busy to occupy themselves with the subject; but we request you to vote for it, such as it is, because you understand nothing about it." Naturally the Opposition could not appreciate such an argument, and its audacity could not alter the facts which, as illustrating the downfall of a great colony, is well worthy of mention here. The annual expenses of the Dutch East Indies did not exceed 57,000,000 florins before 1852; but in 1855 they rose to 60,500,000 florins; then to 98,000,000 florins in 1865; and to 105,000,000 florins in 1867. The year 1869 shows an expenditure of 110,000,000 florins, and the Minister demands 116,000,000 florins to meet the budget of 1870. Instead of corresponding with this enormous increase, the receipts have on the contrary fallen in a most surprising manner. In 1857 the income amounted to 41,000,000 florins; it has not ceased to retrograde each year; and the Colonial Minister now proposes to levy an annual and fixed income of 10,000,000 florins, that is, less than the eleventh part of the colonial expenditure. A system of fixed income was, however, contested by the Chamber as contrary to the fundamental laws of the colony. An amendment, proposing to fix the colonial income each year according to the rise or fall of wealth in the colony, was adopted by forty-two votes against twenty-four. The position of the colony is certainly distressing, and it is supposed that the only true remedy is to be found in the introduction of a suitable agrarian law. The first question with regard to Java must be whether the land belongs to the Sovereign or is a communal property, and what rights have the natives over the soil. Actually these differ in every province, and disputes are settled by curious traditions, not by equitable law. The Conservatives, deeming the Javanese not sufficiently civilised to become landowners, would maintain the system of communal property. But by preventing the native from becoming a proprietor he is converted into a simple labourer, he is degraded, and he remains poor. The Javanese have in many respects improved of late; and, in fact, Java like other countries needs institutions of a more liberal character—the abolition of monopolies—and free competition in all agricultural and industrial pursuits. With freedom of trade and laws bearing the impress rather of a civilising power than of a conquering people, the fertility of the colony may again be revived; and this to the advantage, not only of Holland, but also of England and the many other countries which trade with that hardy little nation.

## VICE-CHANCELLOR'S COURT.—DEC. 4.

BE THE BANK OF HINDUSTAN, CHINA, AND JAPAN (LIMITED).—MITCHELL AND ASPINALL'S CASE.

This case raises the question whether the liquidators of a company which is being wound up can prove against contributories who have executed a deed of inspectorship under the Bankruptcy Act for the amount of calls made subsequently to the deed of inspectorship, the deed itself containing the name of the bank as creditors for arrears then due on the shares, but not for the balances which might become due on the uncalled capital. It appeared that on the 21st of December, 1866, the date on which an order was made for the voluntary winding up of the Bank of Hindustan, China, and Japan, under the supervision of the Court, Messrs. Mitchell and Aspinall were the holders of fifty shares standing in their joint names. On the 4th of June, 1867, Messrs. Mitchell and Aspinall executed the deed of inspectorship under which their estates were realised, and advertisements were inserted in various newspapers giving notice of the intention of the inspectors to pay a dividend on the joint estate, and requiring all persons having any claims on the estate of the debtors to send in the particulars of their claim to the solicitor of the inspectors before the 21st of December, 1868. No claim was made by the bank in answer to the advertisement, and the assets were administered and distributed among the other creditors without making any provision for the calls, amounting to £500, which have since been made on the shares. The matter was brought before the Vice-Chancellor in Chambers, and then adjourned into Court.

Vice-Chancellor Stuart has reserved judgment.

## BAIL COURT.—DEC. 3.

WRIGHT V. PARKER.

The plaintiff, Mr. J. P. Wright, was a tea broker, carrying on business in Mincing-lane, and the defendant was the registered officer of

Digitized by Google

the National Bank, and the action was brought to recover damages for loss sustained through the dishonouring of a cheque of plaintiff's in August last. The declaration stated that the plaintiff had an account with the National Bank, and on the 14th of August last he drew a cheque in favour of Messrs. Rothwell, Marshall, and Co., tea dealers, for £416 18s. 8d., which was dishonoured by the bank. The defendant pleaded that the plaintiff had no funds at the bank with which to meet the cheque, and they had paid £10 into court as sufficient to cover any damage the plaintiff might have sustained.

It appeared that the plaintiff's lodgments in the bank between Oct., 1867, when he became a customer of the bank, and the time the cheque was dishonoured, amounted to about £61,000, and the cheques drawn from time to time reached nearly that amount. On the 14th August, 1868, the plaintiff's clerk lodged a City cheque for £420, City cheques being always treated as cash, and the plaintiff then had to his credit, including the £420, a balance of £530 12s. 4d. The bank on the following day wrote to the plaintiff, expressing regret that through an error of one of the clerks the cheque had not been paid on presentation, but that they had taken it up on that day. Plaintiff exhibited the letter to Mr. Rothwell. The plaintiff's case was that his credit was so much damaged by the dishonouring of the cheque that his business fell off, and he was obliged to make an arrangement with his creditors. Plaintiff, however, continued to deal with the National Bank until the following November, when he stopped payment.

The defence was that it was an unfortunate mistake, and that the bank had been always ready and willing to make the plaintiff fair and reasonable compensation for any loss that he had sustained, but that he had been unable to satisfy them on that point. They denied that the plaintiff's arrangement with his creditors was owing to their dishonouring the cheque. The defendant called a number of witnesses, persons whom the plaintiff said had refused to deal with him in consequence of the dishonouring of the cheque, but several of them stated that they first heard of it when they were subpœned to give evidence, and others said that the circumstances would have had no effect on them in their dealing with the plaintiff. An accountant was also called, who gave it as his opinion that the plaintiff must have made an arrangement with his creditors if the mistake had not happened.

The jury returned a verdict for the plaintiff—damages 40s. over the £10 paid into Court.

---

A COMMERCIAL INSTITUTION.—A letter has been addressed to *The Times* advocating the establishment by Royal Charter of an association under the title of "The Honourable Institute of Commerce;" to be composed of gentlemen whose reputation is intact and of at least seven years' standing, who shall be entitled by such charter to affix the letters of diploma to their names; and that the institution should be a Chamber of Commerce for the settlement of trade questions. *The Times* in commenting upon this suggestion observes:—"The writer would wish a chartered association, but the whole idea could be carried out, and perhaps more efficiently, without any State or legal aid; that which is wanted is simply a combination of persons of unstained mercantile repute who should exclude from membership with them any one who by dishonourable or unbusiness-like transactions might be considered to have forfeited a fair position. A slight nominal subscription would alone be required, and the association should rigorously avoid the pretence of setting the world right upon any political or theoretical questions, whether as regards currency, trade, or any other matter, so as to prevent it from becoming an arena for the fussy and obtrusive vanity of the class who are more clever in making speeches than in steadily and honestly making money. It should content itself simply with looking to the character of its members, refusing companionship with those whom it does not approve, and without attacking them in any way, leaving the fact of that refusal to find with the public whatever weight it may deserve. If, as the writer contends, character is of higher value than money, character should combine as well as capital, and the joint influence of both might then cause the English name to be once again all-powerful. At present honest traders are paralysed by the cheating confederacies that surround them on every side. False advertisements, false brands, bribes in the shape of commissions, and all the other organised devices that from helpless toleration have now almost obtained the sanction of custom, prevent in commercial life the success of new men who would seek a course of rectitude; while in financial circles, when the concoction of impostures is temporarily impracticable, hosts of persons are found shamelessly to boast of participation in conspiracies to wreck the very concerns they were once influential in starting, or to alarm the stockholders of railway or other undertakings in which, from the sensitiveness of the times, they may see a chance of speculative gain. The multitude who compose these classes are mostly known, but so long as they prosper pecuniarily and can escape any social ban they may carry everything before them. To force them to occupy a special circle, while straightforward men quietly kept to their own association, would be a corrective far more potent than could be inflicted by any penalties of a formal Court.

CHINESE TROOPS FOR SERVICE IN INDIA.—The Indian correspondent of *The Times*, in a recent letter, alludes to the great mortality among the British soldiers in India, and asserts that between sixty and seventy men out of every thousand serving last year in Bengal were lost to the service either permanently or for the time being. The *Globe* asks whether in view of this condition of affairs there is any necessity for maintaining in India such a large force of English soldiers as are at present stationed there, and goes on to observe that while undoubtedly there must always be kept up a certain proportion of foreign soldiers to the number of native troops, need they be all Britons? Why should not Chinese regiments be raised, officered by Englishmen, for service in India? They would serve for less pay; the expenses of transport from China would be incomparably smaller than from England, even when the Suez Canal is completed, the climate is much the same as their own, their food is of the most inexpensive kind, they are able-bodied men, and experience has proved that whether as combatants or as Military Train they are when led by European officers as fearless and brave as our own soldiers. During the attack on the Taku Forts in 1860 the Chinamen employed to carry the scaling ladders laid them, in the midst of a heavy fire, across the wet ditches, and held them there while our soldiers crossed over, regardless of the shots and shells that were falling fast and furious on all sides of them. And as combatants it is only necessary to turn to the narrative of Colonel Gordon's campaign against the Taepings to find ample proof of their fighting powers. The Chinese are in their religion, habits, and modes of thought so widely separated from the natives of India, that a combination between the two to oppose the English Government would be next to impossible, and, being so far antagonistic, they would as effectually serve as a check upon the Sepoys as do our own troops, and at half the cost.

COURT OF BANKRUPTCY.—IN RE J. F. WILKINSON.—THE JOINT-STOCK DISCOUNT COMPANY.—The bankrupt, James Freeling Wilkinson, is well known as the late manager of the Joint-Stock Discount Company. He was recently tried and convicted on a charge of misappropriating the moneys of the company, but was afterwards discharged by order of the Secretary of State. He is described as of St. Clement's-house, Clement's-lane, bill broker. The accounts disclose a large amount of liability—£113,417—and there are no assets whatever. Of the liabilities, £12,000 are in connection with the Agra Bank, £24,000 in respect to calls on 600 shares in Barned's Banking Company, to the Financial Corporation, £4,300, the Joint-Stock Discount Company, £35,500, and the liquidators of P. Kleman's estate, £21,476. Mr. Lawrance, for the assignees, said the accounts required amendment, and they wished for further information. The bankrupt, in examination, stated that Mr. Morgan was a creditor of his for £6,000. He did not know whether Morgan was largely indebted to the Joint-Stock Discount Company. The sum of £21,476, due to Mr. Kleman, was in respect of share transactions. He understood that Kleman was now a debtor for £90,000 to the Joint-Stock Discount Company. Mr. Giles Loder had advanced him £18,000, and held shares as security. He believed that Kleman had since discharged Loder's claim. Mr. Sedgwick, for the bankrupt, stated that he had only kept a banker's book. He had been manager of the Joint-Stock Discount Company, and had only been in business as a bill broker for a few months. The deficiency was easily explained, as much as £90,000 being in respect of share transactions. An adjournment was ordered till the 24th of February.

ROLLS COURT.—THE COMMERCIAL BANKING CORPORATION OF INDIA AND THE EAST.—FERNANDEZ'S CASE.—In this case a dividend in the winding up had become payable to the executor of a deceased creditor, whose domicile was in India, where the will had been proved and the executor was residing; and the question arose whether the dividend could be paid out of Court, and remitted to the executor, without probate being taken out in England and the duty paid. His lordship held that it was not incumbent upon him in this particular case to require probate to be taken out here, having regard to the fact that the corporation was essentially an Indian establishment, with only an agency in this country. The dividend might therefore be remitted direct to the claimant. The official liquidator and the claimant would have their costs, but he should not give the Crown any costs.

COLONIAL POSTAGE.—On the 1st of January, and thenceforward, the scale of weight which is now in force for charging inland letters, as well as letters to most of the British colonies, will be extended to the under-mentioned colonies:—New South Wales, Victoria, South Australia, Western Australia, Queensland, Tasmania, New Zealand, Mauritius, Penang, and Singapore. Under this regulation a letter for any of the colonies named, if weighing more than one ounce, but not exceeding one ounce and a half, will be chargeable with three rates of postage instead of four, as at present; and if exceeding two ounces, but not exceeding two ounces and a-half, will be chargeable with five rates of postage instead of six, and so on, the scale progressing by one rate for every half ounce throughout.

IT is stated that the Russian Government has granted a concession of thirty years to M. Titgen, Councillor of State to the King of Denmark, M. Erickson, a merchant, and M. Pallisen, Consul-General for that country at St. Petersburg, for the establishment of submarine telegraphic lines between Asiatic Russia and Osaka, Yokohama, or Nagasaki, in Japan; and Shanghai, Fou-djaon, and Hong Kong, in China. The company thus formed will ask for the authorisation of the Chinese and Japanese Governments, and the Russian Executive will lend its good offices in the matter. The concessionaires bind themselves to attach this system of telegraphy to a station and telegraphic line of the State in Russia in Asia.

TESTIMONIAL TO MR. MILLER.—We have much pleasure in stating that the subscriptions to the testimonial to Mr. Alex. Miller, the well-known and much-respected manager of the "Jerusalem," have now reached £1,000. Most of the firms in the India, China, and Australian trades have subscribed to this well-deserved tribute to Mr. Miller's worth, and to the tact, judgment and other qualities that so eminently fit him for the post. Mr. Miller's connection with the "Jerusalem", and the proprietors (Messrs. Harpers) extends to nearly half a century.

NEW SHIPS FOR THE P. AND O. COMPANY.—The directors have contracted with Messrs. Caird and Co., Greenock, for two screw steamers of 3,400 tons, and 600-horse power.

THE "DONEGAL" sailed from Spithead for China on the 16th inst., but has put back owing to a severe gale.

---

THE meeting of the Straits Association, held on Wednesday last, to consider Governor ORD'S despatch, was very fully attended, and resulted in the appointment of a committee, consisting of Messrs. NAPIER, GILFILLAN, and TIDMAN, to prepare a reply to it.

## THE MUNICIPAL COUNCIL OF SHANGHAI.

THE excellence of any system may best be estimated by the practical results that flow from its adoption. In an especial manner, the suitability of a public body entrusted with the administration of affairs and the collection and expenditure of money produced by the levy of taxation, is to be most justly tested by the amount and value of the work done, as compared with the pecuniary burdens laid upon the contributing community. If, therefore, after a change in the plan of administration, an unpopular body becomes popular; if permanent local improvements take the place of temporary expedients spasmodically adopted; if a heavy debt, bearing what to us must appear exorbitant interest, is, in whole or in part paid off within a short time, and if, moreover, taxation is sensibly diminished in the meanwhile, we are justified in assuming that the plan secondarily adopted is suited, and that that which it replaced was utterly unsuited to the requirements of the place wherein the two experiments have been tried. Now, this has been exactly the case in Shanghai, with this additional element working against the framers and executors of the reformed system; that from the time at which they commenced operations, the value of real property continued to fall, not slowly and steadily, but rapidly, and by great bounds, until at length it reached a minimum which, in many cases, fell below zero. For, no matter how unproductive land in Shanghai may be, the Government and local taxes are still levied upon it; so that at present, and for years back, the holders of certain lots are and have been anxious to get rid of their property even by gift, but can find no one equally anxious to acquire it, representing, as it does, nothing but expenditure. In addition to all this, the commercial crisis which lately passed over the monetary world was felt with much severity at Shanghai. Bankruptcy was the order of the day, and amid the crash of great houses and the less noisy collapse of small ones the voice of the tax-gatherer was heard with the indifference of despair.

Such is an outline of the state of affairs during the early part of the administration of the new Council. Moreover, there was no public work worthy of the name in existence, with the exception of the roads through the settlement. The sewers were in a terrible condition, the bridges were dilapidated, and the municipal buildings were ruinous. Yet this was the immediate result of a previous large and wasteful expenditure which had necessitated increased taxation at a time when, from the exodus of the native population consequent on the suppression of the rebellion, the resources of the settlement had been considerably curtailed. Finally, to meet a debt of Tls. 85,340, bearing interest at rates varying from 10 to 15 per cent., the last of the recklessly magnificent councils left behind them the sum of Tls. 500, the savings of the police, the reward and gratuity funds, the tavern deposits, &c., amounting to Tls. 24,000, having all been misappropriated and spent. It is needless for us to trace the steps by which this truly frightful state of things was remedied. Suffice it to say, that one year after the reformed Council entered office, the police savings and the other funds just mentioned had been placed on deposit in a bank; the standing debt had been reduced to Tls. 81,200, consolidated and placed with the Comptoir d'Escompte de Paris at 9 per cent., and the budget, which was Tls. 66,500 lower than that declared by the previous Council to be absolutely and indispensably necessary, had yielded a surplus of Tls. 25,000. And this was the case although (in consequence of the refusal of the Taoutai to increase the native wharfage dues commutation allowance, the distrust and reluctance of the public and the extension of private wharves and godowns), the wharfage dues for the year, as realised, fell short of the estimate by Tls. 20,000. As the preceding Councils had invariably exceeded their budgets and increased the public debt, it is fair to assume that had they remained in office a sum of at least Tls. 120,000 above what was practically proved to have been necessary would have been squandered. Thus, by 31st March, 1866, the Shanghai municipality, which had been a year before in the position of a hopelessly insolvent person, addicted to private gambling, who is equally unable to pay his business debts and his debts of honour, was in as satisfactory a position as any public body deeply in debt can be, which is, however, in a fair way to pay off everything in full. At any rate its credit was perfectly restored.

We now turn to the report for the year ended 31st March, 1869, and we find that the standing debt had on that day been reduced to Tls. 48,000. Since then Tls. 12,000 more has been paid, so that now the consolidated debt is Tls. 36,000. A balance of Tls. 34,639 was in hand on the above date, and the estimated working balance for the next municipal year amounts to Tls. 21,305. Meanwhile, improvements are being steadily carried on, the drainage has been made most satisfactory, plans for extending the bund line have been adopted and are now being put in operation, and various measures, such as the establishment of water works, the construction of bridges, and other undertakings on a large scale have been fully discussed and ventilated. As the depreciation of real property continues, land is from time to time re-assessed, and thus the public burdens are lightened in a way peculiarly satisfactory to those whose land taxes go to the account of pure expenditure unbalanced by any income. The police arrangements are almost perfection, and we assume from the fact that a report on the sanitary condition of the English and American settlements has recently been drawn up for the Council that the local Government will, for the future, extend its labour so as to include those new branches which properly come under the jurisdiction of a board of health. In addition to performing the functions properly appertaining to a body entrusted with the finance, police and improvement of a town, the Municipal Council of Shanghai have steadily kept in view the elaboration of the local legislative code. It is matter for regret that hitherto mutual jealousies, and unwillingness to make concessions or incur responsibilities, have prevented the representatives of Western Powers from working with harmony in this matter. For all are ready to confess that the Land Regulations of 1854 are now far too narrow for the requirements of the settlements, and, moreover, a revised code approved by the land renters at several meetings is in existence, and only awaits official sanction. But the Municipal Council are in no respect answerable for the delay. They have pushed on vigorously in the right direction—the Ministerial carriage stops the way!

---

WE are glad to announce the safe arrival in England of Admiral KEPPEL, who arrived by last homeward mail *via* Marseilles, with Lady KEPPEL. We are happy to see that the hearty demonstrations of goodwill that greeted the Admiral in Hong Kong were repeated at Singapore; and we trust that these strong expressions of popular feeling will not be without their proper effect on the minds of HER MAJESTY'S Ministers.

---

THE PRESIDENT'S Message to Congress contains but a brief allusion to China affairs. Adverting to the closer approximation that is rapidly being brought about between that country and the United States, the PRESIDENT recommends legislation to prevent the enslavement of the Chinese upon American soil, and to prevent American vessels from transporting coolies to any country engaging in the system.

## THE DELIVERY OF MAIL LETTERS IN LONDON.

WE wish to call the attention of our correspondents to a serious inconvenience that arises from the mode of addressing letters, papers, and circulars, that residents in the Far East are very prone to indulge in. People in China have long been impressed with the idea that a letter or packet intended for a person or firm of any repute at all in this City, is sure to be safely delivered if addressed simply "London," without any more particular direction. To a certain extent this supposition is justified by facts; but it must be remembered that not only safe, but early delivery of letters is a desideratum, and the omission of the requisite details entails needless and vexatious delay. The Postmaster-General has recently issued a notification, urgently requesting mercantile firms in the City to order their correspondence to bear the full address of street and number, instead of the word "London" only. Of our own despatches by the last inward mail, a portion came to hand early in the morning, some in the afternoon, and the remainder in the evening; and we noticed that those which were delivered early bore a correct and explicit direction, while the latest were those addressed simply "London." From this it seems probable that a change has taken place in the system of sorting at the Post Office, letters not explicitly addressed being thrown aside to be dealt with after the properly directed ones have been attended to. We therefore beg that our correspondents and contributors, publishers of journals who exchange with us, and firms who are good enough to forward us their circulars, will in future address them in full, to No. 2, Cowper's-court, Cornhill, London, E.C. And we strongly recommend all persons in the East who have correspondents in London, to adopt the same rule.

## THE STRAITS SETTLEMENTS ASSOCIATION.

A COPY of a very important despatch from Sir HARRY ORD, in which his Excellency replies to the various representations made by the Straits Settlements Association to the Colonial-office, has been forwarded by Earl GRANVILLE to the Honorary Secretary of the Association; and a meeting, which was very fully attended, was held on Wednesday, the 15th inst., to take this document into consideration. The result was the appointment of a committee, consisting of Messrs. NAPIER, GILFILLAN, and TIDMAN, to prepare a reply to the GOVERNOR'S despatch. The document and the reply to it will no doubt be published in due time, and will, we hope, mark another step in the progress of reform in the Government of Crown Colonies. It is gratifying, at any rate, to find that the present Chief of the Colonial-office evinces a disposition to thoroughly investigate the alleged causes of complaint; and the Straits Association has already evidenced the advantage to be gained by an influential body of colonists acting in this country as the representatives of a distant community of British subjects.

Mr. NAPIER has issued a pamphlet, entitled "Independence of the Judges in the Straits Settlements" (to be obtained at Singapore, Colombo, and Hong Kong), in which this question, possessing so much interest, not only for Straits residents, but for those concerned with judicial independence in Crown Colonies generally, is very ably treated. The pamphlet contains a lucid exposition of the views of the Association regarding the *status* of the Judges, and shows clearly enough the hollowness of the objections hitherto opposed to them by the Colonial-office. But argument is unavailing with those whose actions are not based on reason. The Straits Judges are now deprived of their independence, not because they have been proved unfit for it, or because anything is to be gained by taking it away, but simply because the Straits have become a Crown colony, and must therefore be brought in all respects into a state of uniformity with other Crown Colonies—without any reference to the total dissimilarity of conditions between Singapore and (for example) Jamaica. Probably, as Mr. NAPIER remarks, if Lord GRANVILLE could divest his mind of official traditions, and bring his own independent judgment to bear on the question, he would at once see the absurdity of the Colonial-office view of it.

---

WE hear the first "China Loan"—of four million taels—is to come out in February, the security being the Customs Revenue. The Chinese must not be denied credit for willingness to adopt the usuages of Western nations; at any rate, as regards borrowing money to spend on arsenals and armaments.

## THE SUEZ CANAL.

AN official report on the Suez Canal having been made by Commander G. S. NARES, of HER MAJESTY'S surveying vessel *Newport*, which passed through at the opening, the Hydrographer to the Admiralty has issued a series of directions for the navigation of the Canal. There is no doubt, it is stated, that every vessel will do more or less damage to the banks on passing, but screwships going five or six knots will do but little harm. Large vessels should go at slower speed than small ones. The latest accounts from the Canal report that the *Peruvian*, which had discharged more than half her cargo, got through to Suez in six days. The *Babel* had to lighten up to 16 feet 3 inches (or 5 metres); this was done at the expense of the Company into lighters. The underwriters do not look on the risk with any more favour, and in most cases charge even a higher rate than round the Cape. They will not allow stranding in the Canal to be taken as an ordinary case of stranding. Vessels, however, continue to leave with cargoes for ports in India and China. It is said that a Russian line of steamers from the Black Sea to Bombay, *via* the Canal, is about to be established, with contracts already made by one house at Moscow to ship 4,000 bales of cotton per week. The report made by Capt. METHVEN, of the P. and O. Company to the managing directors on the state of the Canal has been published in the form of a pamphlet, and contains much useful information. It is now freely admitted on the part of the Canal Company that it must be considerably deepened and in some places widened, and that extensive works have still to be undertaken at Port Saïd. Rumour whispers that to admit of the necessary dredging operations, the Canal will be closed until April next; but the engineers say that all can be done without any suspension of the traffic. We hope this will prove to be the case.

## OUR TELEGRAPHIC EXTRA.

THE utter disorganisation of the Indian telegraphs still continues to act most prejudicially on our TELEGRAPHIC EXTRA. We deeply regret to find that two successive issues (those of Nov. 4 and Nov. 17) appeared in an incomplete state, the special telegrams sent out for those numbers having miscarried. We have previously explained that these mishaps are attributable to no fault in the management, but take this opportunity of again assuring subscribers of our intention to persevere in the endeavour to make the EXTRA a success, notwithstanding these discouraging circumstances. These frequent miscarriages have induced us to be content, for the present, with shorter and less comprehensive telegrams than we at first intended; but we trust that an improvement in the lines will soon enable us to improve the EXTRA, provided it is supported.

---

FROM Egypt we have a piece of information curiously illustrative of the real tendency of Lord CLARENDON'S Foreign Policy. It has no immediate reference to our relations with China, but has nevertheless such an indirect bearing on the whole question of England's position in the East as justifies us in adverting to it here. Sir SAMUEL BAKER, as is well known, has entered the service of the Viceroy of EGYPT, and is about to conduct an expedition into the interior of Africa to put down slavery, which flourishes more than ever in the Soudan. England has always held the very highest position before the world as the unrelenting enemy of slavery; she has long maintained a squadron on the African coast, to combat, at a heavy cost of life and treasure, the infamous traffic; it was with the consent of the English Government, and, indeed, under the special influence and encouragement of the Prince of WALES, that Sir S. BAKER undertook his arduous task; and it was therefore not unreasonable to expect that the moral, and if needed, the material support of England, would be vouchsafed to so important a step in the interests of humanity and civilisation. Not so, however. Colonel STANTON, Her MAJESTY'S Consul-General in Egypt, in accordance with positive instructions received from the Foreign-office, has formally warned Sir S. BAKER that he and those under him will receive no aid or protection from this country, and that if they are in any way "wronged, injured, molested, or constrained"—that is, if they are captured and tortured, imprisoned, or enslaved—they are not to look to England for any redress. So that, on the eve of its departure, this useful mission is publicly discredited and de-

Digitized by Google

nounced by our Government. It is thus that England, under a Liberal administration, renounces the lofty aspirations and abnegates the noble duties that have hitherto been her privilege and pride.

---

Our Rotterdam Correspondent gives an interesting account of the debate in the Second Chamber, which ended in the final rejection of the proposed vote to support a Dutch Embassy at Peking. It contains some amusing illustrations of the complete success that has attended Mr. Burlingame's endeavours to ingratiate himself with the Ministry. One member thereof (Mr. de Casembroot) gravely impressed on the Chamber the necessity of remembering that "the Government of China was a most enlightened one;" and another (M. Roest van Limburg) naïvely confessed that he had been guided by Mr. Burlingame's advice, not only in proposing to establish a Minister at Peking, but even in fixing the amount of his proposed salary. How M. van Limburg's simple and confiding nature must have been hurt by the rude way in which his proposal was negatived by the majority of non-believers in Mr. Burlingame! That distinguished diplomatist is now in Berlin, where, we are informed, a treaty is being arranged between China and the North German Confederation, whereby each party will be bound to grant the other all privileges accorded to "the most favoured nations." Perhaps the North Germans fancy that the effect of this will be to place themselves and the Chinese on terms of equality; but they will soon find that the equality is all on one side.

---

It is sad to think that the Duke of Edinburgh must be set down as a *mauvais sujet* after all. We read of his frank, genial manner, of the favourable impression he has left in Japan and Hong Kong; of the hearty cordiality with which he joined in the demonstrations in honour of Admiral Keppel; but just as we begin to feel quite enthusiastic about "Our Sailor Prince," there comes the bitter recollection that he has visited the "sink of iniquity," and allowed himself to be feted by the denizens of that Stygian pool. That he could emerge from so horrible an abyss without being utterly corrupted and demoralised, would be too much to expect; and we are, therefore, not surprised to hear that the Duke of Somerset has given him up entirely.

---

# Literature.

—o—

*A Cruise in the Gorgon.* By W. Cope Devereux, R.N. Bell and Daldy.—Those of our readers who are tired of the disquisitions on the coolie trade between China and Peru, which seems from recent disclosures to embody all the worst features of slavery, may like to hear something of the African slave trade for a change. It is a long time since we had a book on the slave trade, for, in truth, the subject has of late years become somewhat stale and devoid of general interest. The days of exciting chases and important captures may almost be said to have ceased soon after our squadron of gun-brigs came to be superseded by steam-sloops and screw-gunboats; by degrees the slavers became less daring, until their traffic was so far suppressed that the preventive squadron came to be regarded almost as a superfluity, the only intimation of its proceedings being an occasional Admiralty notification regarding the distribution, in infinitesimally small shares, of a paltry amount of prize-money earned by the capture of some wretched "slave dhow, name unknown." Indeed, it is not very long since some zealous advocates of naval economy urged the entire withdrawal of our African squadron, on the ground that its occupation was gone. Under these circumstances it is interesting to learn, from an officer of experience on the station, something of the actual condition of the trade in the present decade. The cruise of the *Gorgon* extended from November, 1860, until June in the following year. It appears, from Mr. Devereux's narrative, that up to that time there was still a good deal of illicit traffic in human flesh carried on on the Mozambique coast, besides what may be called the legalised trade in slaves, with which our treaty with the Sultan of Zanzibar prevented any interference. Most of this seems to be done under the convenient shelter of the Portuguese flag, by those who profess to be *bonâ fide* traders on the coast. The Portuguese pervade every available spot on the coast, and as far in the interior as they can penetrate; under their auspices the slave trade, with all its concomitant rascalities, flourishes; and all attempts to counteract their baleful influence, either by the *suaviter in modo* (as personified by our missionaries), or the *fortiter in re* (as represented by our gunboats), have hitherto failed. Our author has not written without an object; he not only exposes the evils of the slave trade itself, as still carried on, but also shows how futile are our attempts at a complete suppression of it, notwithstanding the heavy expenditure of money, and the still more regrettable loss of life that have accompanied them. Some details are given of actions in which British naval officers, in their thirst for prize money, have been guilty of what can hardly be called anything else than piracy; and finally, in a section of the book devoted to a trip up the Zambesi, with Dr. Livingstone, Mr. Devereux shows how our missions to Central Africa have come to grief through mismanagement, incapacity, and misdirected expenditure. To all who are not indifferent to the important social problem involved in the question of slavery, the book cannot be otherwise than interesting.

*Womankind in Western Europe.* By Thomas Wright, F.S.A. Groombridge and Sons.—In this handsome volume Mr. Wright makes no pretence of having produced a philosophical treatise on the character and condition of the female sex generally, or of any profound investigation into the complicated question of women's rights. But he has endeavoured, and with no small measure of success, to trace, from sources not accessible to the general reader, the history of the sex in Western Europe from the earliest times to the seventeenth century; with descriptions of the condition, character, manners, and—last, though not least—dress, at different epochs. The task could not possibly have fallen into more thoroughly competent hands. Mr. Wright's profound antiquarian knowledge and his researches into ancient and mediæval literature, have made the subject apparently as familiar to him as the Latin grammar is to a schoolboy; indeed, so great a stock of information has he accumulated that his only difficulty has been to do justice to the richness of the materials at his disposal. Commencing with the condition of woman in Gaul and Britain during the Roman period, we are led through the Frankish and Anglo-Saxon periods to the feudal times, where "domestic life in the castle" and among the Anglo-Normans generally, affords some curious pictures. Then we come to the days of feudal romance, with their troubadours—Provence, with its poetry and "Courts of Love"—and then to the transition period, when feudalism began to die out, until the sixteenth century, when it may be said to have become extinct in Western Europe. This period affords an especially rich supply of materials illustrative of the social system of the time, both in England and France. Beyond the time of Charles I., or what may be termed the close of the Elizabethan age, Mr. Wright does not attempt to go. To have brought his history down to the present time would, he considered, have required a much greater amount of labour and research, and much more space than was consistent with the limits of a single volume. As far as the work goes, however, it is perfect. The numerous illustrations include many fac-similies, in chromo-lithography, of curious pictures from ancient MSS., and illuminated missals of the Middle Ages.

*Deliverance, or the Bold Conspiracy.* A Tale of the Inquisition; and other Stories. Groombridge and Sons.—The nature of the principal tale in this volume is sufficiently indicated by its title. It deals with the darkest period of the history of the Papacy, and is full of incidents illustrative of the cunning, cruelty, and bigotry of the Jesuits, then in the zenith of their power.

*Kingsdown Lodge*, by Emma Jane Worboise. E. Marlborough and Co.—This is a new edition of a pleasing story by the author of "Thornycroft Hall" and some other tales of what may be termed an "improving" tendency. Like her other works, it differs very strongly from the sensational style of fiction that has latterly become so popular.

*The Microscope* and *The Telescope*, by the Hon. Mrs. Ward (Groombridge and Sons), are two excellent little books. The first is a complete guide to the management and use of the microscope, with instructions for the collecting and mounting of objects, and descriptions of various objects of special interest and beauty adapted for study. It is full of excellent woodcuts, and may justly be described as a perfect handbook to the use of the instrument. The companion work is on the same principle. It contains a familiar sketch of the history and construction of the telescope, with special notices of those heavenly bodies that come within the range of small instruments such as amateur astronomers are likely to possess. There are also instructive details of some of the most interesting discoveries that have been made with the telescope. The volume is illustrated with a good map of the moon's surface and numerous other engravings.

---

One of the most splendid gift-books of the season is a selection of Hood's Poems, with illustrations by Gustave Doré. In such subjects as "Eugene Aram," and the "Bridge of Sighs," the wild, fanciful imagination of the artist has full scope, and his drawings are full of that strange, weird power in the possession of which he stands alone among living artists. There are two editions, one illustrated with engravings from Doré's designs, the other by autotypes, or fac-similes of his original pictures, produced from photographs by Mr. Ernest Edwards's process of printing in carbon. The absolute fidelity with which this beautiful process reproduces the artist's work, not only in outline but in every gradation of tone, every touch of the brush, and even in colour, must be seen to be believed. The publishers are Messrs. Moxon and Co., whose new publications also include the Royal Gift Book for 1869, by express permission of Her Most Gracious Majesty, entitled *Windsor Castle*, containing thirty photographs printed in permanent colours, by Mr. Ernest Edwards, with descriptive text by B. B. Woodward, F.S.A., Librarian to the Queen.

Digitized by Google

Messrs. Macmillan and Co. also announce an important work, illustrated in the same manner, entitled *Specimens of the Drawings of Ten Masters*. These consist of twenty photographs by Mr. Ernest Edwards, from the Royal Collection at Windsor, with descriptive text by Mr. Woodward, F.S.A., the late Royal Librarian.

Mr. Richard Bentley announces an important elucidation of the Byron mystery, *Medora Leigh, a History and an Autobiography, by a new Witness*, edited by Dr. Charles Mackay. From what we are given to understand, Medora was a wild and wayward sister, or half-sister, of Mrs. Leigh; and while the general truth of Lady Byron and Mrs. Stowe remains unimpugned, Dr. Mackay proves, so we hear, the fact that there was some foundation for the story, but that Lady Byron was mistaken, and led Mrs. Stowe into error. We shall be heartily glad when this scandal shall be allowed to drop into the oblivion from which it never ought to have been evoked.

The forthcoming work from the pen of General Garibaldi has been translated under the supervision of a distinguished English *littérateur*, and will be published under the title of "The Rule of the Monk, or Rome in the Nineteenth Century." It is understood to be a vivid portraiture of the wrongs and evils of Papal misrule in Rome, together with a narrative of personal experiences and actual adventures, thrown into the form of a stirring story. The patriot of Caprera is himself a personage in the novel.

The Marchioness of Hastings is the illustrator of a book called "Fairy Fancies," which will shortly be published by Hurst and Blackett.

Mr. Tennyson's new volume, published by Messrs. Strahan, contains the completion of the "Idylls of the King," and has prefixed to it a note in which the Laureate states the mode in which he would have the Idylls already published, and the new work, read, the whole being the result of Mr. Tennyson's long study of Arthurian romance.

Mr. Dickens's new serial story will be issued on the 1st of March and will be concluded in twelve monthly parts, uniform with the original illustrated issues of the works of this most popular of all novelists.

The *Graphic*, the new and formidable rival to our old friend the *Illustrated London News*, is likely to have a large share of public favour. Indeed, it takes much higher ground than the latter; the *Illustrated*, amusing and full of information as it is, has little originality in its composition, and must be considered a "thing of shreds and patches." The *Graphic*, on the other hand, exhibits none of this paste-and-scissors work, but literary merit of a high order, while the illustrations are admirable in quality. This is not surprising when we find among the list of artistic contributors the names of the President of the Royal Academy, four Royal Academicians, and nine Associates, besides Goodall, Charles Keene, Marcus Stone, Du Maurier, Harrison Weir, and other well-known favourites. The first number gave promise of great excellence, and the second (now before us) is even better.

*Nature*, Messrs. Macmillan and Co.'s new scientific journal, has reached its seventh number, and is evidently destined to maintain the high reputation its projectors seek to establish. It deals with a wide range of subjects, all handled with undeniable ability; and most of the contributions are signed, instead of being anonymous. The *Academy*, the new literary periodical, is remarkable for the abstruseness of its contents. It is cleverly and laboriously produced, but is, we fancy, of too heavy a nature to find many readers.

Our readers are no doubt already aware that the *Pall Mall Gazette* will appear as a daily morning journal from 1st January Doubtless, the extinction of the *Morning Star* (which had for some time been a "falling star," and evidently tending towards the usual fate of those fiery meteors) leaves an opening for a new morning paper; but the general opinion seems to be that the proprietors of the *Pall Mall* are not acting judiciously in seeking a new field.

A large and valuable collection of Chinese books, consisting of upwards of 1,100 volumes, has recently been added to the Chinese library at the British Museum. The books were brought to this country by Wang Taou, a learned Chinese scholar, who selected them in his native country with the view of their being of assistance to Dr. Legge, the great Sinologue, in translating the Chinese classics, the work on which he is now engaged. As both these gentlemen are about to return to China, the books were offered by them to the trustees of the British Museum, who instantly secured the collection. Being books especially chosen to elucidate the older classical and historical works of China, they are of infinite value to students of Chinese literature.

Among recent French works, one of the most important is *Le Japon Illustré*, par Aimé Humbert (Hachette and Cie.). It is comprised in two magnificent imperial 4to. volumes, with 500 wood engravings, a map of Japan, and two plans. The author, in collecting the material for these volumes, visited the towns and country round the Bay of Yedo at all seasons of the year, and with pencil and note-book in hand made his notes and sketches. Besides these means, he availed himself largely of the aid of photography, and also of the portfolio of Mr. Wirgman, correspondent of the *Illustrated London News*. From these various sources he has produced a most complete picture of the institutions, habits, and manners of the Japanese people.

A Diary of the Prince and Princess of Wales's tour in Egypt, kept by the Hon. Mrs. Grey, one of the ladies in waiting, has recently been published for private circulation. According to the *Court Journal*, only a few copies, handsomely got up, have been printed.

Professor R. Pumpelly, of Harvard, is about to publish, simultaneously in New York and London, an important work, entitled *Across America and Asia*. It will be largely illustrated with wood engravings by our own countryman, Linton, and with curious facsimiles of Japanese woodcuts and colour-printing. ¶

Messrs. Blackwood announce that early in December they will publish *Walpole; or, every Man has his Price*. A Comedy in Rhyme. By Lord Lytton.

## STUDY OF THE ORIENTAL LANGUAGES IN FRANCE.

The French Government and savants are certainly using their utmost endeavours to assist the progress of French commerce in the Far East. The number of books recently published in France on subjects connected with China and Japan, and noticed in our columns, the admirable fonts of type employed at the Imprimere Impériale in the printing of these works, and the extension that has been given to the various schools of Oriental language are all evidences of the above fact. The chair of Chinese has long been worthily filled by M. Stanislaus Julien; and last year the complimentary course of Japanese was converted into a regular professorship, and M. Léon de Rosny appointed to the chair. These gentlemen, as well as other Oriental professors, have natives attached to their chairs as *repetiteurs* or assistant teachers. These young Orientals exhibit great intelligence, speak French well, and some of them are contributing to French periodicals information respecting their native countries. Thus Kouri-Moto Tei-zi-Ro, from Yedo, is the author of a curious paper on "The Condition of Women in Japan," which appeared in the second number of the *Revue Ethnographique*, recently published. M. de Rosny himself has just completed an elementary course of Japanese and vocabulary in seven parts.* Lastly, the works of the Jesuits, Portuguese, and others, including native authors, Chinese, Japanese, Siamese, &c., either in their original form or in that of translations, have now their regular publishers or salesmen, and appear to be in fair demand.

Certainly the Oriental classes are far from being crowded, but Rome was not built in a day, and our neighbours deserve all the more credit from the fact that the task they have undertaken is very slow up-hill work.

## FOOCHOW TEAS—DETERIORATION.

(To the Editor of the *London and China Telegraph*.)

SIR,—Anyone interested in the trade with Foochow must see the necessity of drawing the attention of the teamen there to the yearly deterioration of the teas from that port, in the hopes that more attention will be paid to the preparing and curing of the teas this coming season. I recollect when in Foochow we could always depend on our teas doing less harm in bad years that the teas from the northern ports; but now the reverse is the case, and this year, though Foochow teas are eight millions short of last season, against a deficit of only four millions from the North, the latter are saleable at about cost, while the former are totally unsaleable, excepting by public auction without reserve, and then at a severe loss. This, no doubt, arises from the inferiority of the teas; the relative positions may be thus explained:—A Shanghai tea with flavour and quality, and good infused leaf, can be sold here at 1s. 5d. to cover cost; while a Foochow tea of equal quality, if sold at 1s. 5d., would lose 7d. per lb. And it is a notorious fact that many of the largest dealers, who at one time carried on their trade with Kysow teas, now buy only black-leaf teas, refusing altogether to look at Kysows. The same inferiority is also visible in Souchongs, particularly this season, when it may almost be said there has not been one chop of really fine imported. This inferiority of Foochow teas does not, I think, depend on the growers, but with those who prepare the tea for foreign markets. I believe the teas are spoilt in the curing, being too hastily fired, and they are then further deteriorated by being mixed with old or inferior teas, leaving only some approach to fineness on the very first picking, and bringing the rest to a level almost of common Congou; and it is much to be feared that unless some great change takes place in the quality of Foochow teas, we shall soon only see two prices for them—one for the few that have some quality, the rest will be classed as common Congou.

Buyers, too, in Foochow should give up making such absurd differences in teas,—paying from 1s. 3d. to 1s. 8d. for teas that are here all saleable at the lowest price; and not caused solely by the depressed state of the market here, but from the fact that on this side no difference exists between them, and why they should have been bought at such a difference of price is a mystery to all on this side.

Another great mistake is made by buyers in Foochow continuing to buy for the first three months of the season without any ma-

* Cours de Japonaise. Enseignement Elementaire, &c., 8vo. Paris: Maisonneuve and Cie.

Digitized by Google

terial fall in prices, although the quality must have differed considerably. As an importer, I know advices are often received here from one's agent that at the opening he thought prices far too high; then, in about a month, when the quality must have considerably fallen off, he advises purchases at Tls. 1 to Tls. 2 reduction, when the reduction should have been Tls. 10 at least. I maintain that to do a safe business there should be a drop of Tls. 8 to Tls. 10 after the first ten ships have sailed and another heavy reduction in another fortnight or three weeks, and after the first week in August very little should be bought over common Congou price; for so long as teas are bought all through the year at almost the same price, while quality has been falling off day by day, we cannot expect to do a satisfactory business. Tea importing has been a losing business now for some years, especially from Foochow. I can see no chance of Foochow teas paying until the quality is improved, and the prices paid vary more in accordance with the quality.—As so many of your readers are interested in this subject, I hope you will find room for this in your next issue, and remain, Sir, your obedient servant,

London, Dec. 14, 1869. An Importer.

# Foreign Intelligence.

## GERMANY, &c.

(FROM OUR OWN CORRESPONDENT.)

Hamburg, Dec. 14.

The Prussian Parliament is still sitting, and will probably adjourn for the holidays at the end of this week, as it has been found impossible to get through the business and close the session before Christmas. The House has got pretty well through the estimates, but there is still the Bill for the Consolidation of the National Debt, which cannot be brought forward till after the holidays. When it does come on it will not be passed without some lively debates, as some opposition is offered already in the Conservative press, and several of the members are known to be opposed to it. However, it has successfully passed through one of its phases of danger, for the Finance Committee of the House, to whom it was referred for preliminary examination, has passed it by a majority of seventeen to thirteen votes. With regard to the new Four and a-Half per Cent. Consols, the names of the proprietors will not be registered and transferred in case of sales, but bonds be issued payable to bearer in sums of $1,000 each, with coupons and counterfoil attached, the former payable on April 1 and Oct. 1 by the cashier of the Department for the Administration of the National Debt and the other Government offices appointed for the payment of interest. Amortisation is to be effected to the amount available as surplus of the public expenses every year—not by drawings of numbers and repayment at par, but by purchases on the Berlin Stock Exchange at the quotations of the day. But it is expressly stipulated in the new bonds, the text of which has been published, that the State reserves to itself the right of redeeming them on and after Jan. 1, 1890, at their full nominal value, after giving due notice, the duration of which will be notified at that future date. The coupons must be presented for payment within four years after they become due, as after that the owners lose all claim to compensation. From the foregoing it is apparent that the safety of the bondholders has not been so much consulted as that of the State, for it cannot be denied that the proprietors are much safer when their names are inscribed on the bank books, as in England, than according to this German system, where the bonds are liable to be stolen, or else destroyed by fire and other accidents; so that there is every probability of the Government reaping a considerable benefit from such casualties to the bonds and coupons during the course of the twenty years, the minimum period they have to run.

Count Bismark has at length returned to Berlin, though it may be doubted whether he would have made his appearance so soon but for an accidental cause. Though he has paid his respects to the King and Queen and received some few people—mostly his private friends—he has not publicly entered on the duties of his high official position nor placed himself in communication with the Corps Diplomatic, which is still carried on by the Under-Secretary of State, Herr von Thile. The Count has now been for more than a week at Berlin, and still maintains a sort of incognito, though he goes out shooting nearly every day with his friend General von Roon, the Minister for War, in the preserves of the latter, at no great distance from the capital.

The fortuitous circumstance above alluded to, that induced the Count to come to Berlin was the receipt of a telegram from one of his sons at Bonn to say that his brother Herbert—they are both pursuing their studies at that University—had been seriously wounded in a duel with another student, and was lying in a critical state. On the receipt of this intelligence both parents started off for Bonn; but on their arrival at Berlin they received more cheerful news, and the Count remained at Berlin, whilst the Countess proceeded to the bedside of her son to nurse him. It appears not to have been a duel in the generally accepted sense of the term, as there was no insult given or hostile spirit between the combatants, but one of those trials of skill and courage common to all the German universities, and which all students have to go through. Though muffled up in thickly padded dresses, in which every part of the person is well protected *except the face*, it requires a very severe cut with the broadsword to draw blood. Therefore the point of the joke—for such it is considered in German student life—lies in being able by a skilful twist of the wrist to give the opponent a slash on the cheek. And this the opponent appears to have done on the young Count in a very creditable manner; for he has not only given him the above-mentioned slash, which is considered the very perfection of skill, but given him another that cut open his upper lip, and inflicted three other wounds. From a letter I saw from a student at Bonn to his father (in which he gives a minute account of the proceedings, at which he was present), an alarm was given that the "Proctor and his Bulldogs" were coming, upon which they all dispersed, and the medical student who performs the part of surgeon, was obliged to sew up the young Count's wounds in a hurry (and perhaps not very scientifically), so that though they ostensibly healed in a few days, matter was formed, and suppuration ensued. By the latest accounts, however, his condition is described as satisfactory.

The Prussian *Staats-Anzeiger* announces that the King has conferred on Herr von Delbrück, the head of the Federal Chancery and *locum tenens* of Count Bismark, the title and rank of a Minister of State without a *portefeuille*, which enables him to take his seat at the Council of Ministers, so that he may know all that is going on, and thus be prepared to make use of his knowledge of the feelings and intentions of Prussia, which cannot be otherwise than important for him to be acquainted with in his official relations with the representatives of the other Governments in the Federal Council, at which he presides in the absence of Count Bismark.

The Bill of the late Minister of Finances that was passing through the House when he resigned office, providing for a more rigorous control of the income-tax, does not meet the approbation of the new Finance Minister, Herr Camphausen. In withdrawing it he stated to the Financial Committee that the inconveniences and complaints that must necessarily ensue on the part of the tax-payers weighed a great deal heavier with him than the few hundred thousand dollars of additional revenue that it might possibly produce if carried into operation.

The Chinese Embassy is still at Berlin, and will probably remain there till the end of the year. Arrangements are said to be in course of negotiation for an agreement between China and the North German Confederation—either in the form of a protocol or an additional treaty—involving the principle of the subjects of the two countries being treated in the other on the basis of the most favoured nation. Mr. Bancroft, the United States Envoy at Berlin, has given a banquet to Mr. Burlingame and the Chinese Ambassadors, at which the latter appeared in the full official costume which they wore when presented at Court.

It is reported that the University of Kiel is to be given up, as it costs $80,000 for the salaries of the Professors and officials, and there are only 150 immatriculated students, and even in exceptional years there were never more than 200. It will be a great loss for the citizens; but it is likely they will be more than compensated by the naval arsenal that is proposed to be established there.

### COMMERCIAL.

The Tea market continues quiet, but prices are well supported. The sales by private contract included 145/4 and 256/8 chests Moning Congou and 200/4 chests Souchong. At public sale 187/4 chests ordinary to good ordinary Congou were sold at 11¾ to 13 sch. bco. per lb., 41 chests ordinary middling to good middling Pecco fetched from 19½ to 24 sch. bco., 150/4 chests ordinary middling to fair middling Hyson 16 to 25 sch. bco., and 35 chests middling to good middling Imperial 17 to 20 sch. bco. Cleaned Rice moves off pretty freely at the quotations, but nothing has been done in rough. There is an improved demand for Pepper, but no alteration in values. Cassia Lignea continues in demand. Ginger is rather lower, and 40,000 lbs. of Bengal changed hands at 2⅞ sch. bco. Spelter neglected.

### SHIPPING.

Arrived.—James Wishart, from Calcutta.

Sailed.—Hydra, to Hong Kong; Robert Rickmers, to Shanghai; Catharina, to Bangkok; Mozart, to Macassar and Hong Kong.

Loading.—China, for Singapore and Penang; Falcke, for Hong Kong; Anna, for Shangnai.

The weather is bright and mild, with hitherto no indications of frost to interrupt the navigation.

## HOLLAND.

(FROM OUR OWN CORRESPONDENT.)

Rotterdam, Dec. 14.

A few days after the departure of the last mail a question referring to the credit of f.12,000, asked for by the Minister of Foreign Affairs on behalf of the Consulate to be established in China, was discussed by the Second Chamber of the States-General, and Mr. Dumbar, the antagonist *par excellence* of the diplomatists, proposed an amendment to reject the demand for the credit. He was of opinion that we were already sufficiently represented in China, and he contested the assertion that the mission would be beneficial to our trade there, and the fact that the Trading Company had urged the necessity of the grant. He feared also that if our Ambassador were insulted we should be involved in diplomatic complications. The amendment was seconded by Mr. van Goltstein, who was of opinion that it was an entirely useless expenditure, and that the presence of a Consul was quite sufficient to promote the interests of our trade. Mr. van Lynden, on the other side, was of opinion that an Ambassador in China was indeed urgently necessary, but he objected to the small amount which the Government asked for the establishment of the Embassy, and he asserted that it was impossible for a Minister to live in China upon £1,000 a-year. Mr. de Casembroot strongly objected to the amendment. He was convinced that the opening of the Suez Canal would lead to the extension of our commercial relations with the Far East, and it ought not at the same time to be forgotten that the Chinese Government was actually a very enlightened one, and that England had opened negotiations with reference to a revision of its commercial treaty with China. He demonstrated that if the Chamber did not grant the amount our commercial interests must be injured to an enormous extent. Messrs. Hoffman and Blusfe spoke to the same tenour. They strongly condemned the Consuls, who, they asserted, were also traders, and therefore did not promote the general

Digitized by Google

interests, but only their own. After several members had objected to or defended the amendment, the Minister of Foreign Affairs, Mr. Roest van Limburg, rose and spoke most eloquently in favour of his proposal. He stated that we, according to our treaty with China, were bound to appoint a Minister at Peking, and he assured the Chamber that if a Minister were appointed all the Consuls who were not well qualified for their duty should be dismissed. Before he fixed the amount of the sum asked for he requested Mr. Burlingame to state what amount was necessary for a Minister to live at Peking, and it was according to the advice of that Ambassador that he asked for £1,000. He denied that he should have acted upon the instigation of the Dutch Trading Company alone; that company had only drawn his attention to the stipulations of the existing treaty. Several members responded, and eventually the amendment of Mr. Dumbar was carried by thirty-seven against thirty-five votes, thus defeating the Minister's motion. Mr. de Casembroot thereupon regretted that the proposition of the Minister of Foreign Affairs had been rejected, but he hoped that Mr. Roest will find an opportunity to renew the proposal at some future time. The Budget for Foreign Affairs was afterwards voted by an overwhelming majority. The Budgets for the Departments of Justice and Home Affairs have likewise passed; but the debates thereupon were of very small interest for your readers. At length the Minister of the Department of Justice has laid before the members a Bill to abolish capital punishment, as well for civil as military crimes. Capital punishment will be replaced by confinement from five to twenty-five years, and in some cases for life. Capital punishment will only be maintained in cases of conspiracy or high treason.

The members of the First Chamber have assembled, in order to discuss the Budget of the Colonial Department. After a very short debate it was carried almost unanimously. The discussions, which lasted only two days, have proved that our Lords sympathise largely with the Minister of the Colonial Department, for Mr. Hartsen, the *pur sang* Colonial Conservative, stood almost alone. Mr. de Waal, the Minister, has not given up his project of a fixed annual contribution by our East India possessions to our Treasury, and it seems that he intends to call upon Parliament to once more state its opinion upon the question. The Lords, after having voted this Budget, took recess; indeed, they had nothing else to do. It is probable that all the Budgets will not be voted before the end of the year, notwithstanding that this is prescribed by our Constitution.

In one of my former letters I told you that a meeting had been held here, in order to establish a branch of the Society for Promoting the Welfare of the Javanese. The list of gentlemen who attended exhibits a great diversity of political and religious opinion. Amongst the matters discussed, reference was made to Christian missionaries abroad, and several gentlemen strongly urged that every possible means should be taken to establish missions among the Javanese. A curious paper war has resulted from this debate. One of our local weekly journals contested the opinion brought forward, and asserted that the Javanese religion was as good as ours, and that it was quite superfluous to teach them the Christian religion. I need not say that this bold speaking made an enormous sensation, which has since augmented, because the clergy have not been wise enough to keep silence. They responded to the newspaper article, whose editor has since replied; and, as matters stand now, it seems that he has the best of the discussion. A curious sign of the age.

In Zuidhorn an election has taken place for the vacant seat of the late Mr. Olivier. Mr. Eppo Cremers, ex-Minister for Foreign Affairs, was duly elected. He is the only Catholic member in Parliament who represents a Protestant district. This is certainly remarkable, at a time when a controversy prevails between the Liberal and Catholic papers; but Mr. Cremers is a warm, a very warm Liberal, and our Northern provinces are fanatical adherents to Liberal principles; they even go, according to the *Handelsblad*—a leading Liberal paper—too far. Why I will tell you. Some months ago a paper was published in Groningen called *Het Noorden*. It made its way and obtained favour very speedily; was hated by its opponents, and adored by its promoters. It gave new ideas, and did not even scruple to defend Republican principles. Amongst the new ideas brought forward by this paper was one to the effect that our expenditure on behalf of the navy and army was ridiculously high for such a small country, an enormous amount of money being expended with no corresponding benefit. These articles opened the eyes of many, and a storm of addresses were sent to the King urging him not to sanction henceforth the expenditure of such a large amount for military purposes. The North has given the example, the Southern provinces follow, and it seems that people will not rest until a change is made. *Het Noorden* had so much success that it will be published in a short time at Amsterdam. This does not at all content the *Handelsblad*—which paper would correspond to your *Punch*, if we had a satirical journal, as it used to represent the *Standard* and *Herald*. Several papers are of opinion that, if we ought to have a military system at all, we should follow the American model. While we always remain in a condition of armed peace, our (no, the Indian) millions are spent for nothing.

The *Nieuwe Arnhemsche Court*, a Conservative paper, foretells that in a short time we shall be involved in a Java war, in reference to the succession to the throne of Djoeja. It says that there are two claimants, the one is the son of the actual Sultan, the other of the late one; and it predicts that if our Government fails to make a good choice, a war must result. It is generally thought that this is only the idle talk of this Conservative paper. The German Prince von Wied is betrothed to Princess Maria of the Netherlands. I hear that the Prince, a second-lieutenant of the Prussian army, has been promoted to the rank of major, Did the *capacities* come with the bride?

Mr. B. F. A. Higgers van Kerchem has started for Batavia. I have reason to believe that he is appointed director of the Java Bank. Mr. de Liefde, well known by his novels, published in English—his last was, I believe, upon Dutch beggars—died some days ago at Amsterdam. There is, I hear, an enormous lack of medical officers in the Indian army. Last week some foreigners were examined at Utrecht, and several of our medical officers have been offered appointments in India. The majority, however, have declined the offers.

According to a private correspondent of the *Arnhemsche Courant* the last Governor of our possessions at the Coast of Guinea was hooted and pelted with stones when he took his *congé*. The news about the trade and general condition of that colony continues unfavourable. The subscription for the Four-and-a-Half per Cent. Loan of the East India Railway Company, guaranteed by the State, opened at London and Amsterdam, has had the greatest success, nearly double the capital required (£398,300) being subscribed.

The *Java Bode*, received by the last mail, has created much indignation by its articles upon Mr. Lion, the late lamented editor of the Batavia *Handelsblad*. Of course these articles are the more currish, being written by Mr. Huet after the death of his political opponent, who certainly criticised Mr. Huet very severely when he arrived in Batavia; but the latter, it seems, did not dare to answer until the death of Mr. Lion. It is probable that the secret press-agent of Mr. Hasselman does not care for preserving his reputation. The Dutch papers are showing the greatest sympathy with Mr. Lion, who was the pioneer of the introduction of more Liberal principles in India.

Some time ago I told you that Mr. des Amorie van der Hoeven was blackballed in the *Doelen*. Endeavours have since been made to have him accepted as a member of the aristocratic club *Amicitia*, but without success; he was blackballed again. It is said that this antagonism against Mr. van der Hoeven arises from the fact that he became a Roman Catholic after marrying a lady belonging to that communion.

## PRODUCE MARKETS.

Notwithstanding that frost has not yet prevented shipments, as much dulness prevails as if we were among ice and snow, making transactions rather impossible. The demand for nearly all articles is confined to the immediate requirements for consumption.

COFFEE.—The only transaction to report is a sale of 1,000 bales Java, ex Doesborgh, at 37c. to 37¾c. The total stock of coffee was on the 1st inst. 521,100 b., against 443,700 b. in 1868.

RAW SUGAR.—The market is very quiet, and only a trifling business has been done. There is very little offering. About 2,000 mats have changed hands, at f.½ beneath the last auction value. The unsold stock of the Dutch Trading Company was on the 1st. inst. 11,034 mats.

RICE.—Very dull.

SPICES firm, but inactive. Prices have undergone no material alteration. Nutmegs are quoted No. 1, 111c. to 113c.; No. 2, 106c. to 108c.; Mace D., 197c.; E, 192c. The stock on warrants of the Trading Company is, Nutmegs, 3,446 casks; Mace, 259 casks; Cloves, 2,793 casks; Cinnamon, 58 bales; and the unsold stock, Nutmegs, 205 casks; Mace, 333 casks.

TEA.—On the 9th inst. were offered in Amsterdam in a public sale, 674/4, 518/8, and 296/12 chests China tea. The result was as follows:—79/4 c. PHN, finest new season's Lapseng Souchon, partly sold at 110c.; 126/12 c. finest first crop Kaisow Congou, partly sold at 97c.; 170/12 c. finest Kaisow Congou, partly sold at 95c.; 438/8 c. fine Moning Congou, partly sold at 112c. to 113c.; 595/4 c. finest Moning Congou, partly sold at 125c.

JAVA TOBACCO.—In waiting for the forthcoming auction at Amsterdam on the 16th, when 4,785 bales will be offered, there are no transactions. The auction held at Amsterdam on the 4th inst. went off as follows:—

| Bales. | Trade Mark. | In average. |
|---|---|---|
| 446 Java... ... | Blitar Papoh... ... | 47½c. |
| 856 do. ... ... | RS ... ... ... | 31½ |
| 192 do. ... ... | SMvM ... ... | 35⅕ |
| 275 do. ... ... | Kidol ... ... | 59½ |
| 1,023 do. ... ... | Banteng ... ... | 30¼ |
| 142 do. ... ... | Birit/WR ... ... | 25½ |
| 892 do. ... ... | Poerbolingo ... ... | 44½ |

BANCA TIN.—There is a very trifling business doing. A few parcels have changed hands at f.66, and this price is the current quotation. The stock on warrants was, on the 1st inst., 53,848 slabs, and the unsold Trading Company's stock 35,523 slabs.

ARRACK.—45.2 and 44/2 casks Batavia, ex Eastham, have been sold at prices that did not transpire.

## SHIPPING INTELLIGENCE.

The Trading Company has chartered the following three vessels to convey produce from an Indian harbour to Amsterdam:—Electra, f.64.87; India Packet, f.69.47; Friesland, f.69.96 per last.

The Noach will start in a few days for Java, with 153 soldiers.

ARRIVALS.—Nov. 30, at Brouwershaven, from Batavia, Cornelis Smit; Dec. 1, at Brouwershaven, from Batavia, Kortenaer; Dec. 8, at Texel, from Batavia, Jupiter; at Flushing, from Batavia, Burgemeester van Middelburg; Dec. 9, at Texel, from Batavia, Laura and Adéle; Dec. 11, at Texel, from Batavia, Henriette Geertruida; Dec. 12, at Brouwershaven, from Batavia, Asia; Dec. 13, at Texel, from Batavia, Vrede.

DEPARTURES.—Dec. 1, from Texel, for Batavia, Amstelstroom; for Sourabaya, Hendrik Ido Ambacht; Dec. 2, from Brouwershaven, for Batavia, Beroekie; for Samarang, Petronella; from Hellevoet, for Shanghai, Mexicana; Dec. 1, from Texel, for Batavia, Australie; Gerard Pieter Servatius; for Padang, Henriette; for Sourabaya, Betty; Dec. 6, from Texel, for Samarang, Relanak.

PASSENGERS INWARD.—From Java, per Cornelis Smit, Mr. S. van der Lee and family; per Kortenaer, Messrs. Feith and family; Gribbling, van der Byl; per Jupiter, Messrs. Klerk, Cambier, Goteling Vinnis, Seelking, Miltenburg, Engelhardt, Neys, Mrs. Shortridge and family; per Henriette Geertruida, Messrs. E. A. Daendels, B. Winters and family, J. D. van der Lingen and family, Mrs. Margadant.

PASSENGERS OUTWARD.—For Java, per Gerard Pieter Servatius, Messrs. T. E. de Bruyn and family, T. L. Rovers; per Hendrik Ido Ambacht, Messrs. P. van Baak and family, Mosland and family, Misses Baak, Mrs. Yssel de Schepper; per Betty, Mr. J. Pereire; per Relanak, Messrs. Ramaker and family, Faber and de Jong, Mrs. Tromp and Miss Meyer; per Batavia, Mr. K. N. Moorweg.

# Monetary and Commercial.

In connection with the affairs of Messrs. Morgan, Melbourn, and Co., of Batavia, an interesting trial has taken place in Bremen, regarding the interpretation of a Letter of Credit. It appears they held a general credit from a Bremen firm, authorising them to draw on the latter, payable in London, or on Messrs. Frederick Huth and Co., London, to the extent of £15,000; all drafts to be endorsed on the back of the credit. On the faith of that document, an English Bank purchased drafts to the extent of £8,000, which the drawers declined to accept, on the plea that Messrs. Morgan, Melbourn, and Co. had already valued on them to the full extent of £15,000. An examination of the credit, however, showed that previous drafts to the amount of only £6,200 had been written off, and the Court accordingly held that, whatever other sums the Batavia firm might have drawn for, the bills in question must be held to be covered by the credit, and that the drawees were liable. There can be little doubt that the judgment is an equitable one; but it should serve as a warning that these open credits are dangerous things to grant without some wholesome restrictions, and that bankers should be wary in operating too freely on the faith of them.

"An Importer" writes to us on the subject of the continued deterioration in the quality of Foochow teas, and the losses entailed thereby on importers. The writer points out that many large dealers who formerly bought most Kaisow teas now refuse them altogether, and that while a Shanghai tea of certain flavour and quality can be sold here at 1s. 5d., to cover cost, a Foochow tea of similar quality sold at 1s. 5d. would lose 7d. per lb. Every season the Foochow teas are cured and packed more carelessly, and with a larger admixture of old or inferior leaf; it is only the first chops that are offered that have any pretension to fineness, yet buyers go on for the first three months giving hardly anything below opening prices. We can hardly wonder that in the end this is found to be a losing game, but we do wonder at its being repeated year after year. We recommend a perusal of the letter referred to, and shall be glad to receive expressions of opinion from other quarters.

We have to report the occurrence of several commercial failures. Messrs. H. F. Jorss and Co., of Leeds, woollen merchants and exporters, have been obliged to "suspend their engagements." Mr. T. Simpson, solicitor, of Leeds, has issued a circular to the creditors, asking for statements of their accounts, and giving as the reason for Messrs. Jorss and Co.'s unfortunate failure "the continued depression of foreign markets." The books have been placed in the hands of Messrs. H. W. and J. Blackburn, accountants, who will at once prepare a statement of the affairs, and a meeting of the creditors will be convened on the earliest day possible. It is reported that the liabilities in Yorkshire will not exceed £50,000, but are approaching that amount.—Advices from Birmingham announce that a petition in Bankruptcy has been filed by Mr Edward Michelson, woollen warehouseman. His liabilities are stated at £15,000 to £20,000. The failure has been caused by the depression of trade and losses upon consignments abroad.—The stoppage is reported of Messrs. Charles Vidal and Co., commission agents, of Manchester. At a meeting of the creditors the liabilities were stated to amount to £16,294 3s. 6d., and the assets to £4,833 12s. 10d. An adjournment was agreed to with the view of making further inquiry.—Advices from Bradford report the suspension of Falconer Brothers, of New York. The firm had extensive connections with several Bradford houses, and, although nothing is known of the general liabilities, the amount falling upon Bradford houses is believed to be about £40,000.—Advices from Stockport mention the failure of Messrs. Edmondson and Balfe, manufacturers, with liabilities amounting to about £5,000. —The Manchester papers report the failure of Messrs. Henry Briggs and Sons, manufacturers, of Newchurch. Their liabilities, which fall chiefly upon Oldham spinners, amount to £2,000 or £3,000.

At a meeting of the creditors of Mr. Abraham Akeroyd, manufacturer, of Bradford, the balance-sheet showed liabilities for about £8,000, and an offer was made of 7s. 6d. in the pound, but after some discussion the meeting was adjourned without coming to a decision.—At a meeting of the creditors of Messrs. Hallewell and Son, worsted manufacturers, at Bradford, the liabilities were represented at £3,600, and a composition of 5s. 6d. in the pound was accepted.—At a meeting of the creditors of Messrs. Massey and Sheldon, of Chorley, the statement of affairs showed the amount owing to creditors unsecured to be £3,743; liabilities on bills, £961; total liabilities, £4,704. The assets were estimated to realise £3,247, leaving a deficiency of £1,567. After discussion it was unanimously resolved that a composition of 15s. in the pound should be accepted, payable by instalments extending over the next two years.—A meeting of the creditors of Messrs. Macleroy, Hamilton, and Co., manufacturers, has been held at Glasgow. From the statement of the accounts the assets showed about 17s. 5d. in the pound, and it was expected that the creditors would eventually receive 12s. 6d. to 15s.—From a statement of the affairs of Messrs. Pim and Co., corn merchants, of Dublin, London, and Liverpool, whose failure was recently announced, it appears that the estate shows a dividend of about 9s., the liabilities being £50,250, and the assets £23,723.

The subscription list of the China Submarine Telegraph Company (Limited), closed on the 15th inst., and the amount applied for was said to be more than that to be allotted. The shares have been dealt in to a moderate extent, and were last quoted par to ¼ prem.

The Salvage Association has returned £24,500 to the underwriters, who had settled on the total loss of the specie sunk in the *Carnatic* steamer, wrecked in the Gulf of Suez. This amount, or twenty-two boxes, had been recovered by the divers of the association from the wreck. There are, it is believed, thirteen boxes of specie still to be recovered; but it is necessary to blow up part of the vessel to get at the point where this portion is stowed, which may be carried out in a few days.

The trial of the directors of Overend, Gurney, and Co., which commenced on the 13th inst., before the Lord Chief Justice, is exciting great interest in all City circles.

Tenders for £387,500 in bills on India were received on the 15th inst., when the amounts allotted were—to Calcutta, £287,500, and to Madras, £100,000. The minimum price was fixed, as before, at 1s. 11d. on Calcutta and Madras. Tenders on those presidencies at 1s. 11 3/8d. will receive about 7 per cent.; above that price in full. These results show that the demand for remittance to the East is a little in excess of that noticed on the last occasion.

It is announced by the committee of shareholders of the late Agra and Masterman's Bank (Limited) that an arrangement has been made under which the Agra Bank (Limited) have agreed to take over the interest of shareholders in the surplus assets of the former bank, at the rate of £4 15s. per share, by an immediate cash payment which will be open for the acceptance of shareholders resident in Europe up to and including the 31st inst.

The directors of the Chartered Mercantile Bank of India, London, and China announce that a dividend of 4 per cent. free of income-tax, for the half-year ending the 31st inst., will be paid to the proprietors on the 1st of January.

## ARTICLES OF IMPORT.

—o—

*(For Quotations see Table of Prices Current.)*

### TEA.

The following is from Messrs. A. Capel and Co.'s report:—

During the past fortnight there has not been much worthy of remark in the market. As usual at this period of the year, the demand from the trade has been very limited, whilst in exports there has not been much doing. Prices for medium kinds of Congou have again ruled slightly in favour of buyers, but for most other kinds there is but little alteration to notice. Green Teas have been less saleable, and prices obtained at the public sales of the 7th inst. cannot now be realised. Red-leaf Congous: Siftings have sold rather easier. Broken-leaf kinds remain firm. Fair to good common has been steady at 1s. 0½d. to 1s. 0¾d. per lb. Fair to good Kaisows remain difficult of sale at former prices. Fine to finest have been without alteration, but sales have been small. In Paklins there has been no change. Amoy kinds remain steady at about 1s. per lb. Black-leaf kinds: Siftings remain as before. Fair to good common have been rather more in demand, at 1s. 0½d. to 1s. 1d. per lb. Fair to good kinds have been realised to some extent, but at rather lower prices. Fine remain firm at former rates. In finest there is no change to notice. Canton-make: Further sales continue to be made at about 1s. 0½d. to 1s. 1d. for fair to good quality, showing no improvement. Oolongs: Business has been limited, and prices show no change. Souchongs: Common to fair show no alteration; good and fine of this season have been less saleable, and prices must be quoted 1d. to 2d. per lb. lower. In Flowery Pekoes there is nothing new. Scented Teas: Canton Capers have been dull, at the decline last quoted. Low kinds have been sold at public sale at from 6d. to 7d. per lb. Foochow kinds are scarce, and prices well maintained. Orange Pekoes: Canton kinds have sold in limited quantities at a shade under previous prices. Foochow kinds: Old season's have sold from 1s. 1d. to 1s. 1½d. per lb., being again rather lower. In new season's good quality has been sold at about previous prices. Fine have been inquired for; Uncoloured Japans show no alteration. Green Teas: At the public sales of the 7th inst. a chop of Pingsuey Tea realised about previous prices. A chop of fine Moyune also sold at full prices. Extra fine quality has been readily saleable at high prices, but those of average quality have been difficult to sell, and prices must be quoted 1d. to 2d. per lb. below public sales' prices. Medium qualities have been much depressed. Some sales of Canton Gunpowder, of fair quality, have been made at 1s. 3d. to 1s. 5d. per lb.

BLACK.—The demand for all grades below common has been limited, without change in value; inferior to good flavoury kinds have been wanted at 1s. 0½d. to 1s. 0¾d.; large supplies of much better quality, of first crop, have been offered at 1s. 1d. to 1s. 2½d. per lb., without leading to extensive transactions; for all other grades but finest quotations are quite nominal. Pakling and Tayshan leaf stand at a low standard of value, and several hundred boxes of the latter per Overland, Season 1869-70, realised only at 1s. 1d. to 1s. 1½d. Black Leaf: Ordinary to good common has, so far, come forward in moderate supply; quotations rule at 1s. 0¾d. to 1s. 0¾d. per lb., preferable to good medium at 1s. 1d. to 1s. 4d. per lb., show extremely good value, as also fine and finest at 1s. 5d. to 1s. 10d. per lb.; in extra fine but little has been obtainable, and it is still saleable at fancy prices. Souchong has maintained its value, as supplies have been small. Oolong: The low rates have not stimulated transactions. Scented Teas.—Canton Orange Pekoe: More liberal supplies have been offered of medium to fine, and easier prices have been accepted, but finest is scarce and in good request. Capers: Prices have been steady, at 6d. to 7d. for low spurious, 9d. to 10d. for ordinary to clean common, 11d. to 1s. 1d. for fair to good, 1s. 2d. to 1s. 4d. for medium to good medium, 1s. 6d. to 2s. per lb. for fine and finest. Foochow Orange Pekoe: Arrivals of late have been small, while there has not been much inquiry.

GREEN.—The demand has been confined to few buyers, with little or no competition; the result has been, a great proportion of the late imports remain in merchants' hands, and the few sales show declining rates, except for the Moyune, ex steamer Diomed, a portion of which were offered at public sale without reserve on the 7th inst., and realised satisfactory prices. For Japan leaf, either coloured or uncoloured, in the absence of export trade, there has been no demand except at extreme low rates.

The Circular of Messrs. Kinnear, Hawes, and Hertz says:—The approach of the holidays has been felt, and the demand for export has not been large; under these circumstances importers have shown an inclination not to press their Teas until January; this has given a somewhat firmer feeling to fair to medium, and good medium to fine Congou; really fine Moning is much needed by exporters.

### SILK.

The activity reported in our last has continued uninterruptedly to present date, and the market is now exceedingly firm at the following quotations for China Silk:—Best Chop 3rd Tsatlees, 29s to 30s.; good to best 3½, 26s. to 28s.; good to best 4, 25s. 6d.; fair 4 and "Red Peacock," 24s. 6d. to 25s.; fair 4½, 4½, 24s. to 23s. 6d.; fair 4¾, 5, and inferior, 23s. to 22s. The bulk of the business has been in China silk; Tsatlees have been in great demand, and "Ka Hing" Taysaams have also been freely taken at 23s. to 24s. for "Gna ling" and "Ting How," and 21s. 6d. to 22s. 6d. for "Kin ling" and inferior "Gna ling;" coarse Taysaams are very scarce, and command high rates; Long reels have also been in good demand at 21s. to 22s.; Haineens have scarcely shared in the advance to the extent of other Silks, and are yet comparatively neglected. Re-reeled Haineens of finest descriptions have found buyers at from 28s. to 29s. 6d. The last arrivals of Japan Silk have changed hands at 30s. to 31s. 6d. for best "Mybash," and 27s to 28s. 6d. for mixed parcels; other descriptions are not much looked after. In Canton Silk the importations have been very large, and a special feature has been the arrival of a large quantity of very fine "Loong Kongs," which have realised 22s.6d., the medium descriptions still remaining at the last quotations of 19s. to 20s. Tsatlee reels, of ordinary qualities, are held at 20s. to 20s. 6d., while extra fine have been sold at 22s. The deliveries since the 1st inst. are satisfactory, having been 2,536 bales in all, viz., 1,683 China, 213 Canton, 319 Japan, and 321 Bengal.

### COFFEE.

In our last report we noted a slightly improved tone in the market for Plantation Ceylon. This has since been maintained; the offers of good and fair qualities Plantation at the public sales—of which there has been but a very limited supply—have gone off with spirit at an advance of 6d. to 1s. on last mail's quotations, while the commoner descriptions have been moderatively active at fully former prices. Native Ceylon, which for some time past has been extremely dull, also exhibits some improvement, the quantities offered at recent sales having realised advanced terms. The absence of business in East Indian descriptions of Coffee other than Ceylon continues; and no transactions are reported.

The quantity of Ceylon Coffee afloat for Great Britain on the 13th Dec. was as follows:—Plantation, 82,779 cwt., against 92,172 cwt. at the corresponding date of 1868; Native, 20,277 cwt., against 29,317 cwt. The quantity afloat for Europe was—*nil*, in both years. The quantity of Coffee landed in the fifty weeks ended Dec. 11, 1869, was, of Ceylon, 39,591 tons, against 43,279 tons during the corresponding period of 1868; of all descriptions, 68,681 tons, against 67,759 tons. The quantity entered for home consumption was, of Ceylon, 10,413 tons, against 11,691 tons; of all descriptions, 18,150 tons, against 18,770 tons. The quantity exported was, of Ceylon, 25,961 tons, against 30,564 tons; of all descriptions, 44,951 tons, against 46,430 tons. The stock on Dec. 11 was, of Ceylon, 14,212 tons, against 11,011 tons; of all descriptions, 24,900 tons, against 18,891 tons.

### SUGAR.

There has been a fair demand during the interval, which has been liberally supplied by holders, many of whom appearing well satisfied to have an opportunity of realising, have not checked trade by trying for much advance. In some instances slightly higher prices have been paid than were obtainable at the date of our last, and for most common and middling descriptions, although quotations cannot be altered, it must be observed that the selling value of quantities is really 6d. to 1s. per cwt. higher than it was a fortnight since, when buyers were disinclined to purchase freely.

The quantity of Sugar landed in the fifty weeks ended Dec. 11, 1869, was, of Penang, 4,765 tons, against 1,610 tons in the corresponding period of 1868; of Manila, Java, and China, 32,935 tons, against 22,322 tons; the quantity entered for home consumption was, of Penang, 2,698 tons, against 1,569 tons; of Manila, Java, and China, 21,279 tons, against 15,533 tons; the quantity exported was, of Penang, 193 tons, against 128 tons; of Manila, Java, and China, 2,377 tons, against 1,957 tons; the stock on Dec. 11 was, of Penang, 2,233 tons, against 239 tons; of Manila, Java, and China, 37,543 tons, against 30,426 tons.

COCOA NUT OIL.—There is a good business doing in Ceylon, but at lower prices than when we last reported; at auction 88 casks have been sold at 41s., and by private contract business has been done on the spot at 41s., and for arrival at prices slightly in advance of that figure. The quantity of Ceylon afloat for Great Britain on the 13th Dec. was 31,074 cwt., against 35,680 cwt. at the corresponding date last year.

CAMPHOR.—Very limited business in China is reported at 90s. per cwt.; nothing doing in Japan.

COIR GOODS.—At the last aution a moderate quantity of yarns was offered, chiefly of the lower kinds, which went off without competition at easier rates. Supplies of fibre and rope were of undesirable quality, and were mostly withdrawn. Of 57,785 dholls (93 tons) Ceylon yarn 65 tons sold, very common and common £21 to £23, good common £25 to £26, a few small lots good £33 5s. to £34; of 3,823 bundles 3,276 ballots (34 tons) Ceylon, only 4 tons sold, common coarse £8 5s., middling pale £20 5s., 80 bundles bristles sold at £26 15s. to £27 5s.

CASSIA LIGNEA.—Further supplies have been brought to auction, and importers being willing sellers, prices have given way 3s. to 5s. per cwt. 785 boxes unsorted mostly sold at 120s. to 123s.; 43 cases, dark small bundles, fine flavour, realised 136 for sound, and 122s. to 123s. for slightly mouldy. Buds: Quiet; in auction 15 bags wild sold at 17s. per cwt.

CUBEBS.—Prices are lower; of 996 bags offered 730 bags from Samarang, just arrived, sold, good bright, rather stalky, 32s. to 34s. per cwt.

CUTCH.—Fine Pegue is held firmly, but there is very little demand. 100 boxes in auction were retired. 200 bags low, from Singapore, sold at 8s. per cwt.

GAMBIER: Is very slow of sale; about 50 tons are reported privately at 16s. 9d. ex. ship, and 100 tons for arrival on same terms. At auction 191 bales, 445 baskets were retired.

Digitized by Google

GUMS.—Benjamin is dull of sale, and 93 cases in auction were retired. Copal: Of 148 packages, two-thirds sold, hard mixed, part good and part foul, 40s. to 44s. 6d.; soft, part dark, 30s. to 30s. 6d. per cwt. Damar: Quiet; in auction 32 cases were retired. Arrivals, and sales advertised. Gamboge: Is in fair request; at auction, 37 cases sold to the extent of two thirds, middling pipe, part run, £15 17s. 6d. to £16 2s. 6d.; pickings £12 17s. 6d. per cwt.

HIDES AND SKINS.—At the last sales there was a fair demand for East India Hides, and nearly the whole offered found buyers. Those of really good quality were comparatively scarce and realised extreme prices to a slight advance, whilst ordinary and inferior sold at from last sale rates to ¼d. per lb. decline. 6,660 Penang Ox and Cow Hides offered, 4,112 sold—Dry, Best Light, 9¾d.; Seconds, 9¼d.; Heavy, 8d. to 8½d.; Extra Heavy, 7¾d.; Small, 9¼d.; Thirds, 7d.; Fourths, 5d. to 6¼d.; Brined, Light and Small, 8⅜d.; Heavy, 7½d. to 7¾d. per lb. 1,588 Java Buffalo Hides offered. 1,000 sold—1st Heavy, 6¼d.; Seconds, 5⅝d.; Light, 6⅝d. per lb. 2,617 Singapore and Penang Buffalo Hides offered, 996 sold—Prime, av. 47¼ lbs., 6¾d.; Best Heavy, 5¾d. to 6⅝d.; Seconds, 5¼d.; Light, 5¾d. to 6¼d. per lb.

INDIA-RUBBER.—At auction 60 baskets good Singapore lump sold at 1s. 6d. to 1s. 6¼d.; 12 bales very low trash at 1d. per lb. 14 baskets Assam retired. Little doing privately.

JAPAN WAX.—Prices are 2s. to 3s. per cwt. lower; of 700 boxes in auction, about 400 boxes sold, fair to good saucer, 70s. 6d. to 73s. 6d.; soft and stained, 62s. 6d. to 63s. per cwt.; one lot at 66s.

MUSK.—The better qualities have sold rather dearer. Of 53 caddies offered the greater part sold; good flat pods, 31s. 6d. to 32s.; ditto, rather damp, 30s. 6d. to 31s.; rough bally and skinny, 15s. to 21s.; very low, 10s.; of 7 tins grain, part sold at 47s. to 48s. per oz.

MANILA HAMP.—The demand is very dull, and we have to report a further fall in prices; privately about 250 bales have been sold, common to good common, £56 to £57 10s.; in auction, 839 bales of indirect import, offered with all faults, were chiefly bought in; good roping, £62; common to good common, £56 to £58 10s., only 170 bales finding buyers; good to superior roping, £62 10s. to £63 10s.; barely fair to good fair, £59 to £60 10s.; common, £56 5s.

PEPPER.—Black is only in limited demand, and Penang has given way ⅛d. per lb. At auction 6,780 bags partly sold, fair West Coast and Acheen at 4d., a few lots 4⅛d. per lb. No Singapore brought to auction. Privately sales for arrival of Penang: November shipment, at 3 13-16d., and parcels near at hand at 3⅞d.; for Singapore for arrival 4¼d. has been bid. White is steady. In auction 679 bags Singapore sold at 5⅛d. to 5⅝d. for fair, and 236 bags Penang at 5⅜d. to 5½d.

PLUMBAGO.—Of 822 barrels Ceylon, about one-half sold at higher prices for lump, but previous rates for dust; fine bold bright lump, 25s. to 28s.; good small but clean, 21s. 6d. to 22s.; common and middling dull lump and dust, 16s. to 19s.; good chips, 14s. 6d. to 16s.; middling, 10s. 6d. to 11s.; very fine dust, 12s.; middling to good, 8s. 3d. to 9s.; common, 7s

RICE.—There has been little business during the interval, the dulness which has existed for such a long time past continuing without relief. A fair amount of business is reported in White Bengal. At the public sales 5,000 bags Rangoon sold, chiefly good middling damaged, first class, 8s. 9d.; part sound of ordinary quality at 8s.; 1,217 mats 166 bags damaged Siam, first class, at 8s. 6d.; and about 4,000 bags cleaned Siam at 9s. 4½d.; 1,933 bags Dacca were bought in at 9s.; 748 bags Ballam at 8s.; and 2,000 mats, white China, at 10s. 6d. to 11s.; the last-named parcel subsequently sold at 10s. 3d. By private contract there is slightly more inquiry for soft grain descriptions, and prices show an improving tendency. 5,500 bags middling Rangoon have been sold, supposed at 8s. 10½d. full prompt, also 3,000 to 4,000 bags ditto first class damaged of good quality at 8s. 7½d. to 8s. 9d.

RATTANS.—Of 7,275 bundles Penang 4,425 bundles sold at 3s. to 4s. 1d. per 100 canes.

RHUBARB.—The parcels of China offered have entirely consisted of low and ordinary qualities, for which there is scarcely any demand at previous rates; of 257 chests in auction, about two-thirds sold, at lower prices; ordinary round and flat, dark fracture, rather wormy, 9d. to 1s. 2d., very low 4d. to 8d., dust 2d. per lb.

SPICES.—Cinnamon: There has been a fair inquiry for Ceylon during the interval, at rates corresponding with those of the last quarterly sales. Chips are lower; in auction 761 bags partly sold—coarse bark, 4d. per lb.; thin bark, 4½d.; middling to good shavings, 5¾d. to 8d. Cloves: Sell readily; at auction 1,001 bags Zanzibar most sold—fair 2¾d. to 3d. per lb.; good bright, 3d.; fine, 3¼d. Of stems, 295 bags Penang were retired. Mace: The late activity has subsided, and sales are not easily effected at late rates; at auction 50 cases partly sold—middling to fair pale and red, 3s. 1d. to 3s. 4d. per lb.; 1 case ordinary China sold at 2s. 11d. Nutmegs have barely supported their previous value; at auction 67 cases Penang mostly sold—73 to 70 to the lb., 2s. 9d. to 2s. 11d.; 79 to 75, 2s. 7d. to 2s. 8d.; 84, 2s. 5d.; 83, slightly mouldy, 2s. 4d.; and 90, 2s. 1d.; 3 cases small limed China sold at 1s. 5d.

SAGO.—Meets a moderate inquiry on former terms. At auction 1,854 boxes and 203 bags sold at 17s. 9d. to 18s. for fair to good small; privately sales of small, in bags, have been made at 17s. 3d., and in boxes at 17s. 9d. per cwt., but the market is quiet. Flour: Is cheaper; in auction 1,821 bags Singapore partly sold at 13s. 9d., and 1,162 bags good Borneo at 14s. per cwt.

SOY.—There is a steady demand at unchanged rates; 102 casks China at auction have realised 3s. to 3s. 1d. per gallon, and private sales to a moderate extent are reported at the same rates.

SHELLS.—Mother o'Pearl realise extreme prices. In auction, 3 cases Macassar sold, large medium and very grubby and blistery, 107s. 6d. per cwt.; medium and small clean, part dead, 80s.; small, 40s.; 37 cases Singapore were retired. No Manila offered.

STICKLAC.—Out of an offer of 93 cases Siam, at public sale, a small portion only was taken, fair free at 51s.; small at 47s. per cwt.

SAPANWOOD.—No business to report.

TAPIOCA moves off very slowly at late reduced quotations. At auction 1,073 bags Malacca partly sold, fair lumpy, 2½d. per lb.; fine Rio character, 2¾d.; 157 bags Penang retired. Pearl finds a more ready sale; 105 boxes, 567 bags sold; dull Penang, 19s. to 20s. per cwt.; good and fine bright small and medium, 21s. to 22s. 6d.; fine bold, 22s. 1d.; bullets, 22s. to 24s. Of flour, 144 bags Penang sold at 2¼d. per lb.

TORTOISESHELL is firm. Of 16 cases Singapore in auction, 5 cases sold at 11s. 6d. to 16s. per lb. for ordinary sorts to good.

TIN.—We have to report a further decline in Straits tin. Shortly after the date of our last report some outside speculators showing weakness, some small parcels were offered on the market and sold at £112 per ton, and as at this time of the year consumers rarely buy but for immediate needs, prices have since fallen still lower. The current quotations are:—Banca, £111 to £112; Billiton, £110 to £111; fine Straits, £110 to £111

TOBACCO.—53 bales Japan, 6¾d. to 8d.; sea-damaged, 5½d. to 7d.; 12 bales Java, 7¾d. Cigars: Manila 3a sold at 6s. 9d., and 7 cases 2a, sea-damaged, at 4s. 6d. to 5s. 9d.

## BRADFORD AND LEEDS MARKET.

BRADFORD, DEC. 16.—Markets rather dull and unsettled, owing to recent commercial disasters. Prices quoted for both goods and raw material are, however, firm. Quotations:—Long Ells, Scarlet, 31s. per piece (packed); Camlets, S, 66s. (unpacked); SS, 62s. 9d. (unpacked); SSS, 54s. (unpacked); Spanish Stripes, best quality, 3s. per yard (packed); Lastings, black, 49s. 6d. (unpacked); Crape Lastings, 39s. (unpacked); Crape Lustres, 19s. (unpacked); Figured Lustres, best black, 19s. (unpacked).

NORTH STAR (ship), Hong Kong to San Francisco, Oct. 27.
MYSORE (French barque), bound to Nagasaki, Oct. 29.

## FREIGHTS AND CHARTERS.

Berth freights to the Eastern Ports are very dull; the steamer Lokana has been laid on the berth for Yokohama, and the Willliam Miller, and Chin Kiang, for Hong Kong, at 70s. to 80s. (*via* Suez Canal); freights for coal from the Northern outports show little variation, and business is quiet.

Current rates of freight for vessels on the berth:—To Yokohama:

Digitized by Google

32s. 6d. weight, 35s. meast. To Shanghai: 40s. weight, 30s. meast. To Hong Kong: 35s. weight, 30s. meast. To Batavia: 25s. weight, 30s. meast. To Singapore: 30s. weight, 25s. to 30s. meast. To Ceylon: 20s. to 25s. weight, 20s. meast. At New York to China; $12 to $15 per ton of 40 cubic feet.

The current quotations for coal, &c., are as follows:—From Wear or Tyne per keel.—For Shanghai: £40. For Singapore: £25 10s. For Galle: £23. From Newport, Cardiff, or Swansea per ton. For Yokohama: £1 18s. For Shanghai: £2 2s. For Hong Kong: £1 11s. For Saigon: £1 5s. For Singapore: £1 5s. 6d. For Galle: £1 4s. 6d.

The Admiralty have invited tenders for the conveyance of 34 tons stores to Hong Kong, and sundry small stores to Colombo.

## CASUALTIES.

A telegram received at Liverpool, Dec. 13, states that the Bosworth, from Sunderland to Batavia, with coals, had foundered N. of Pernambuco, after collision, crew saved; passengers per Douro.

## MISCELLANEOUS.

At BRINDISI.—Dec. 5, Erymanthe (str.), from China, having passed through the Suez Canal.

At ST. VINCENT.—Oct. 14, Ariel (str.), Timmerman, from New York, and left 2nd Nov. for Hong Kong.

Off ASCENSION.—Oct. 25, No. 1,803, 4th d.p. (Aust. barq.), from Manila, for Cadiz; 27, St. Magnus, from Colombo, for London; 31, P.M C.H. (? N.), (Dut. barq.), from Batavia, for Dordt; Nov. 5, Maiden Queen, from Shanghai, for London; No. 832, 4th d.p., (Eng. ship), from Singapore, for Liverpool; 14, No. 921, 4th d.p. (Eng. ship), from Manila, for London.

At ST. HELENA.—Oct. 29, Bato, Kramers, from Batavia, and sailed for Amsterdam; Nov. 6, Bangkok (str.), Haffenden, from the Clyde, and left 7, for Singapore; 2, Seamew, from Canton, and sailed 3, for Hamburg; Condor, from Macao, and sailed for Falmouth; 8, Dharwar, from Penang, for London; 10, Maid of Glanwern, from Colombo, for Philadelphia.

Off ST. HELENA.—Oct. 29, Christiana, from Java, for Amsterdam; Nov. 2, Arabia, from Batavia; Oct. 31, Maiden Queen, from Shanghai, for Liverpool; Nov. 10, William Fruing, from Manila, for London, out 91 days.

At ASTORIA.—Oregon, previous to Nov. 24, Hattie, C. Besse, from Portland; Oregon, for Hong Kong.

The Mary Ann Johnston, Leder, from Colombo, which arrived at New York Nov. 30, was 14 days N. of Hatteras with heavy W. and N.W. gales.

THE WRECK OF THE "CARNATIC."—Captain Grant, R.N., who is superintending the diving operations at the sunken wreck of the Peninsular and Oriental steamer *Carnatic*, lying in five fathoms water, in the Gulf of Suez, has forwarded to Lloyd's Salvage Association his reports of the extent of specie he has recovered since Oct. 30. Captain Grant says, on Oct. 30 and 31, the divers found two more boxes specie, also 19 bales of goods. On Nov. 1 they recovered four boxes and 13 sheets of copper. On Nov. 2 four bales and another box of specie was sent up. He was then compelled to leave the wreck, as the Egyptian gunboat *Tor*, which had been stationed near the wreck as a protection, required her engines and boilers to be repaired, as also that the ship be provisioned On Nov. 10, with the aid of an armed force, he searched the village on the Arabian shore, and recovered about £300 worth of calicoes and silk which had been plundered from the wreck. On Nov. 11 also another village, where he found about 100 pieces of calicoes and some wearing apparel. It is feared that five boxes of mails which were on the main deck are lost, having probably floated out when the ship sunk. On Nov. 19 and 20 the divers were unable to work, in consequence of very heavy weather. On the 21st they resumed work, and found that the wreck of the steamer had righted four or five degrees, and all the cargo to windward had been pitched down on the mail-room and betweeen decks. The vessel had also parted just abaft the fore-rigging. On the 23rd and 24th the divers sent up 24 sheets of copper, 29 bales Manchester goods, and about 20 cases. The divers report the main-hold quite full of goods, so that there is every probability of a large bulk of it being saved. The divers continued working up to the 28th, when a heavy gale set in, compelling them to cease their operations.

THE "MADRAS."—On the 11th instant Messrs. G. R. Clover and Co. launched from their yard at Woodside a fine iron ship named the *Madras*, which has been built for Messrs. Clint and Co., of Liverpool. The *Madras* is 1,280 tons register, 216 feet between perpendiculars, 37 feet breadth of beam, with a depth of hold of 22 feet 9 inches, and is classed at Lloyd's A1. She has been built for the East India trade, but her first trip will be to Melbourne, under the flag of the Thames and Mersey line, although, as she has been fitted with all modern improvements, steam windlass, &c., there is no doubt she will be successful in whatever trade employed. Captain Fairlem, late of the ship *Ganges*, has been appointed to the command. Her fittings, &c., will be placed on board in the Queen's Basin, where the *Madras* was towed immediately after being launched. Miss Clint, daughter of the late John Clint, Esq., performed the ceremony of christening.

THE "SCHIEHALLION."—There was launched at Dundee, on the 2nd inst., by Messrs. Brown and Simpson, a fine iron barque, named the *Schiehallion*. The vessel is the property of Messrs. Cruikshank and Ring, shipowners, London, and is to be commanded by Captain Levack. The vessel is to be employed in the India and China trades. The *Schiehallion* is classed A1 at Lloyd's; she is 168 feet in length, 28 feet in breadth, and almost 18 feet deep, builders' measurement 642 tons, and register tonnage, 590. The vessel is handsomely modelled, and has been fitted with all recent improvements. She will be ready for sea in two or three weeks, as her masts and rigging have already been set up.

THE "KINFAUNS CASTLE," a composite ship of 800 tons register, launched in the autumn of 1867 by Messrs. C. Connell, Greenock, for Messrs. Thomas Skinner and Co.'s Castle Line, and commanded by Captain Holmes, has just arrived, after an unusually rapid voyage. The *Kinfauns Castle* left Greenock on the 13th May, arriving at Singapore on August 13, discharged, loaded, and left Singapore, arriving at Liverpool on the 12th inst., thus completing the round voyage in seven months.

## SINGAPORE DOCKS.

THE PATENT SLIP AND DOCK COMPANY execute SHIPS' REPAIRS of all descriptions in the most efficient manner, under the supervision of European Engineers and Shipwrights.

The DRY DOCK (opened in March, 1859) admits two Vessels at the same time, being over 400 feet in length, with a depth of water ranging to 15½ feet. A second DRY DOCK of larger dimensions will shortly be completed, and available for the heaviest Steamers.

Adjoining the above there is extensive WHARF WAREHOUSE, and other accommodation, including every convenience for coaling Steamers, discharging cargo, and storing goods, together with ample MACHINERY and appliances for repairing iron steamers, &c.

Apply at the offices of Messrs. PATERSON, SIMONS and Co., Singapore; or 21, St. Swithin's-lane, Cannon-street, London, E.C.

WM. CLOUGHTON, Managing Director.
New Harbour, Singapore, June, 1868.

## PORT OF AMOY.

SHIPOWNERS, AGENTS, and COMMANDERS are informed that the Dock Company's establishments at the above port afford every facility, at moderate charges, for REPAIRING and SPARRING VESSELS, cleaning and painting iron ships and steamers.

Their large Granite Dock has 286 feet length on the blocks, and at average spring tides can receive vessels of 16 to 17 feet draught. It has a caisson-gate and a powerful centrifugal steam pump, and an engineer's workshop fitted with lathes and tools, driven by steam: iron and brass foundries, boiler-makers' shop, a large smithy and carpenters and boat-builders' sheds. All superintended by resident Europeans.

Their two smaller GRANITE DOCKS can receive, at spring tides, vessels drawing 12 feet.

Spars, timber, and other Dockyard material kept in stock.

Quarters for officers and a DRY GODOWN for stores of vessels under repair.

## FOOCHOW DOCK.

*RIVER MIN.*

THE above granite floored DOCK, of the following dimensions, viz., Length, 300 feet, breadth at bottom, 40, is capable of receiving vessels drawing 13 to 16 feet, as the state of the tides will allow. The Dock runs dry to the blocks, and is pumped out by steam.

The above premises comprise a large Machine Shop containing a

WHITWORTH'S 12-INCH SCREW CUTTING GAP LATHE, DRILLING AND SCREWING MACHINES,

A LARGE SMITHY, &c., &c., &c.

Large Godowns are on the premises for STOWAGE OF CARGO, &c., &c. A large stock of Woods, Metal, &c., &c., always on hand.

The Dock steam tug *Woosung* is available at all times to tow vessels to or from sea.

JOHN C. SKEY, Superintendent.

## NOTICE.

MORRIS'S DIRECTORY for CHINA, JAPAN, and the PHILIPPINES, &c., to be published on the 1st Jan., 1870, contains a Revised List of the Foreign Residents at all the open Ports of the Chin Sea, including Saigon, which has never yet been included in any similar work; together with the Time Tables of the different Steamship Companies, Rates of Postage, Local Ordinances, and such other matter as will be useful to all interested in the China trade. No trouble or expense has been spared to make this the most accurate publication of the kind ever offered to the public.

Price, complete in one volume, 14s.

Orders received by the Publisher of the "London and China Telegraph," 2, Cowper's-court, Cornhill, E.C.

## CAUTION.

THE GROSS FRAUDS which continue to be practised by obscure manufacturers, more particularly in Germany, by imitating the labels attached to JOHN GOSNELL and Co.'s PERFUMERY, render it imperative upon the Proprietors to Caution the public against such nefarious proceedings, and to request their friends and patrons to purchase only of respectable dealers, who import direct from JOHN GOSNELL and Co., and invite special attention to the address, ANGEL-PASSAGE, 93, UPPER THAMES-STREET, late of 12, Three King-court, Lombard-street, London, E.C.

JOHN GOSNELL and Co.'s SELECT PERFUMES—Ess Bouquet, Royal Yacht Club Bouquet, Jockey Club Perfume, Essence of Wood Violet, Victoria Bouquet, Garibaldi Bouquet, Frangipanni, Military Bouquet, The Bride's Bouquet, Tea Rose, Russian Leather Perfume.

JOHN GOSNELL and Co.'s Toilet Vinegar. Inexhaustible Salts, Aromatic Vinegar, Aromatic Eau de Cologne.

JOHN GOSNELL and Co.'s Prince of Wales Perfume.

JOHN GOSNELL and Co.'s Princess Alexandra Perfume.

HOLLOWAY'S OINTMENT. — SCALD HEAD, RINGWORM, and all the cutaneous disorders peculiar to children are permanently removed by the use of this healing and renovating Ointment. Mothers of families should never be without it, for it may be applied at all times without danger of any kind, as it is composed entirely of pure balsams, and should it not do good, it cannot possibly do harm. The parts affected should be first fomented with warm water, and then the Ointment should be rubbed in briskly, except where there is any tenderness, irritability, or excoriation. In that case the painful spot should be gently lubricated with the Ointment twice every day, and the surrounding skin only should be rubbed therewith.

### THE MAILS, &c.

The present mail was delivered on its due date, but yesterday being kept as a general holiday, we found it necessary to defer publication until to-day.

The next inward (P. and O.) mail will be due here on Jan. 10, and should bring the following dates:—Yokohama, Nov. 22; Shanghai, Nov. 24; Hong Kong, Nov. 30; Singapore, Dec. 7; Galle, Dec. 15.

Telegrams in advance of the above mail were received on the 17th, and *via* San Francisco we yesterday received a telegram from Yokohama to Dec. 2, which will be found in the usual place.

Advices from Galle inform us that the telegraph wires had been working better, and our special commercial telegrams of Nov. 25 for the *Telegraphic Extra* arrived in time for the issue of Dec. 1.

## List of Passengers.

### PASSENGERS INWARD.

By this mail to Marseilles, per P. and O. steamer *Ripon*, arrived Dec. 25.—From Yokohama: Mr. Bartesaghe, Mr. Pellet, Mr. Riviere, Mrs. Jules and child. From Hong Kong: Lieut. Mainwaring. From Singapore: Mr. and Mrs. Duprey.

To Southampton, per P. and O. steamer *Delta*, expected to arrive Jan. 1.—From Shanghai: Mr. Langlois. From Hong Kong: Mr. J. G. Ewart.

### PASSENGERS OUTWARD.

Per French steamer *Moeris*, from Marseilles, Dec. 25.—(Booked from London), to Singapore: Mr. J. D'Almaida. To Ceylon: Mr. Grinlinton, Mr. Macvicar.

Per P. and O. steamer *Pera*, from Southampton, Dec. 25.—To Hong Kong: Mr. J. C. Penderea. To Ceylon: Mr. J. E. Garbutt, Mr. T. Gibson.

Per P. and O. steamer *Ripon*, from Marseilles, Jan. 2.—To Yokohama: Mr. Russell Robertson. To Hong Kong: Mr. John Noble, Mr. C. W. Orne. To Ceylon: Mr. J. Brown, Rev. C. and Mrs. Carter, and two children, Mr J. F. Callaghan.

Per P. and O. steamer *Ceylon*, from Marseilles, Jan. 9.—To Ceylon (via Bombay): Mr. E H Hayes.

Per P. and O. steamer *Nyanza*, from Southampton, Jan. 8.—To Ceylon: Mr. G. A. Talbot, Mr. and Mrs. Folkard.

Per P. and O. steamer *Bangalore*, from Marseilles, Jan. 16.—To Ceylon: Mr. and Mrs. J. C. Elliott.

From Suez.—To Singapore, Mr. and Mrs. G. A. Remé.

Per P. and O. steamer *Tanjore*, from Southampton, Jan. 22.—To Shanghai: Mr. C. Y. McVicar. To Ceylon: Mr. E. England, Miss A. Robinson.

Per P. and O. steamer *Pera*, from Marseilles, Jan. 30.—To Penang: Mr. and Mrs. C. A. Evans. To Ceylon: Mrs Russell.

Per Pacific Mail steamer *Japan*, from San Francisco, Dec. 1.—For Yokohama and Hong Kong:—Miss Lucy A. Happer, Miss Lillie B. Happer, C. Breunwald, Mrs. E. D. Barbour, Charles Schmitz, Mr. Dickson, Rev. W. J. Boone and wife, Rev. E. Marcellus and wife, Rev. A. P. Happer, wife, and three children, Dr. Bremson, Mrs. W. Murray, Mr. Von Hovenberg and wife, Mrs. Holmes and child, John Jochimes, Miss H J. Shaw, D. W Osgood and wife, J. R. Coryelle, H. T. Tiffin, Mrs. W. B. Cobb, Rev. W. E. McChesney and wife, Rev. D. Lyon and wife, R. B. Foster, Miss Bremson, C. L. Schwartz, Miss H. Bowley, Miss Nellie Moore, Miss Cora Rogers.

## Summary of News from the Far East.

### JAPAN.

#### YOKOHAMA.

Our advices from this port extend to the 7th November. The outward mail of Sept. 10 was delivered there on the 1st Nov. The week had been a very uneventful one in Yokohama.

The *Japan Times* says:—"It gives us great pleasure to be able to announce that Keiki, better known in Europe as 'Stotsbashi, and Aidzu, have both been pardoned by his Imperial Majesty. This restores them to political life, and in the case of Keiki, at all events, to use; a friend to foreigners, and fully appreciative of our powers and good intentions, he will be a valuable servant of the newly-restored Empire. We have before had occasion to remark on the unusual clemency displayed by the winners in the recent struggle towards the beaten side, and nothing was wanting but these pardons to complete their moral victory."

Dr. Scherzer, the chief of the scientific and commercial department of the Austrian Embassy, was a passenger to San Francisco by the last Pacific Mail steamer. The *Donau* having suffered considerably during a typhoon on her way hither, has to remain in harbour for some time still to refit, and that part of the Embassy's programme which included a visit to the Sandwhich Islands, *en route* for South America, has been abandoned. The expedition will leave this port, we believe, in about ten days. The exhibition of Austrian and Hungarian Industrial products is now on view. We are sorry to have to say that, so far as we have examined it, there is nothing among the textile fabrics, of course the important part of the exhibition, suitable to this market—at the prices affixed to them in the catalogue.

We have discussed the subject of merchant-consuls at some length. That such an article was necessary, and that further action of the Japanese Government is required, is proved by a circular which has been transmitted to us from Europe, in which the Consul appointed to represent a small power in Yedo, and who has lately arrived here, invites mercantile houses to entrust their goods to him to sell on commission, deliberately stating as a prime recommendation that "his official position will place him in, so to speak, constant communication with the Princes or Daimios who have the control of foreign trade in certain provinces." It is full time to stop this sort of thing.

### CHINA.

#### HANKOW.

(FROM OUR OWN CORRESPONDENT.)

Since I last wrote nothing of importance has occurred at this outlying settlement. Business remains at a stand-still, partly from the causes enumerated in my previous letters, and partly also in consequence of the very unfavourable reports regarding this year's tea shipments, which reach Hankow by every mail. Closure is the order of the day, and with one or two exceptions the agents of Shanghai houses remain merely to supervise the property once so

Digitized by Google

costly now almost valueless. Hopes reaching almost to certainties were entertained at the beginning of the tea season, but they are day by day being rudely dispelled. Indeed the impression now is that the tea trade is so utterly disorganised that it matters little whether purchasers in China buy at low rates, as was the case this year, or at extravagant prices, as in former years. Ruin seems to be the fruit alike of transactions under both circumstances.

The flood that has for the last three months made this place a watery desert, is now going down, and the greater part of the concession is once more dry ground. But the dilapidated appearance which it presents is something truly sad. Gardens all spoiled, boundary walls a heap of ruins, godowns and houses showing great slits and gaps in their walls, needing to be propped up and bolstered with poles and woodwork. No end of money will have to be spent in putting the whole to rights again; and though that may be good for trade, it won't improve the profits of this year's tea season. The destruction visible in the foreign quarters does not for one moment compare with that visible among the native dwellings. It is utterly impossible to estimate the amount of outlay which will be required to rebuild and repair the ruined houses of the Chinese themselves. Fortunately China houses are somewhat lightly constructed, and all fitted on to a perfect framework, so that the work of repairing and rebuilding is carried on with surprising celerity.

A startling number of refugees, driven out of their homes by the flood, are now encamped in the suburbs of Hanyang. I have been credibly informed that 120,000 daily get a supply of congee from the public charitable institutions. There are five places whence congee is dispensed, each employing one hundred men, and the daily cost of this charity is Tls. 700. The congregated mass keeps the peace almost perfectly, exhibitingan amount of fortitude and patient endurance which does them great credit.

## SHANGHAI.

(FROM OUR OWN CORRESPONDENT.)

SHANGHAI, Nov. 9, 1869.

The P. and O. Steamer *Ottawa* takes the outward mail. There are not any telegrams to hand since my last, which was written per *Dupleix*, leaving on the 3rd instant. The races passed off well, though the attendance was small. Mr. T. F. Wade, C.B., arrived on the 7th inst., by the *New York*. Sir Edmund and Lady Hornby have returned from Japan. Sir Rutherford Alcock is expected here in the *Adventure* to-morrow.

Peking advices say that the revised Treaty of Tientsin was signed on the 23rd of October. What it contains has not transpired, the general belief is that it remains essentially the same, the chief, if not the only concession, being the opening of coal mines at three different points in the south. Some difficulties have occurred to the American missionaries at I-chow; the city magistrate refused to let them occupy their chapel. The matter has been referred to Tseng-kwo jang, the Viceroy of the province. The foundation stone of the Prussian Legation was laid on the 28th of October by Miss Lowder.

You will have seen Mr. Hart's memorandum, and Mr. Ross Browne's comments on the Burlingame Mission. The document of the Inspector-General of Customs speaks for itself; there can be little to add to Mr. Browne's able remarks on it; indeed, that gentleman has taken it up in a masterly manner. On one point, perhaps, Mr. Hart has rather committed himself, that is the audience question. Few will really believe how insignificant a matter the mission is in the eyes of the Chinese. A writer in the *North China Daily News* says that the whole affair was not worthy of a special notice in the *Peking Gazette*, that chronicle of state affairs, destined to illuminate officialdom throughout the empire. It is a fact that not a thousand Chinese had the slightest knowledge of the mission at the time that Mr. Burlingame and his native clerks set out to "inaugurate a new era for two-thirds of the human race."

Mr Consul Hughes has returned to Kiukiang from leave of absence; he takes up the duties of H.B.M.'s Consulate from Mr. Lay, who proceeds to Chefoo.

The Club is to be kept open for another month, to admit of the shareholders and members coming to some arrangement.

The naval movements are few; the *Zebra* has left for Japan, and the *Icarus* takes her place.

The customs cruiser *Kwa-shing* has been surveying the Shahure-shan Channel; particulars have not yet transpired.

An outrage has been committed upon a French priest at Gnankin, near Nanking. Fears are entertained for the safety of the missionaries in the neighbourhood. Mr. Meadows, of Mr. Taylor's inland mission, has been attacked. The rioters were students.

Tientsin, like Shanghai, has been enjoying a holiday during its race time. The weather was all that could be desired, and the races were a success. A writer in the *North China Daily News* appears to think that the murder of the Rev Mr. Williamson has been connived at, if not instigated by, the petty mandarins, in revenge on their part for some of their number being degraded by Shung-How some time ago for unwarrantable oppression of native Christians.

At Ningpo an excitement was got up the other day (similar to what prevailed in Shanghai four weeks ago), that foreigners were burying Chinese under the new Consulate building. The inventors of the story were discovered and severely punished.

(FROM AN OCCASIONAL CORRESPONDENT.)

SHANGHAI, Nov. 9.

The correspondence just published between Sir R. Alcock and Messrs. Jardine, Matheson, and Co.* has attracted much attention here, and seems to open a wide field of inquiry, first, as to the advantage or disadvantage of keeping a Minister at Peking It has been commonly supposed that a Minister has been kept there for the benefit of his countrymen, and not merely to record the evasions and subtleties of the Chinese. With the one exception of the Yangchow outrage, our Minister has invariably adopted the Chinese version, and combated the statements and arguments of his nationals, imputing bad faith and dishonesty to his countrymen, and defending the tergiversation and bad faith of the Chinese Government. The atmosphere of Peking seems to have a peculiar effect on those residing there. Though surrounded by every evidence of bad government in the poverty and neglect reigning supreme, yet they become saturated, as it were, with an idea that the Chinese officials mean what they say, whereas all experience goes to prove them false at heart. It seems to me that two great changes are required to rectify the state matters have now got into; one, a firm policy towards the Chinese Government by our Minister, and the other a change in the distribution of our naval force in those seas. Negotiation with Chinese officials, except backed up by material force, is a mere waste of time. Instead, therefore, of frittering away our naval strength by keeping single vessels at the various ports, where they are practically useless, an imposing squadron should be kept at Chefoo, or in the Gulf of Pechelee, ready to back up the representations of our Minister by blockade or reprisals. But any person who has any knowledge of the course of events in China since 1840 must know that a demonstration of force has as much effect as its actual employment. A Minister at Peking with a fleet at hand would be a very different person in the eyes of the Chinese authorities to the same minister without such aid at his back. A prevailing mistake at home is imagining that the Chinese ever have, or ever will, give any concession to foreigners except when extorted by force Every concession or privilege we now enjoy in China has been extorted by force of arms; and the successive wars we have had since the signing of the Treaty of Nanking in 1842 have been owing to the bad faith of the Chinese in trying to evade their engagements. Notwithstanding all this, we now constantly hear of asking the Chinese for concessions, who have never conceded anything.

There is a local matter here that also requires reform, viz., the "currency;" and it is a matter of surprise to me how the merchants of Shanghai are content to be so far behind the age as to be satisfied with a currency fluctuating from day to day at the caprice or self-interested manipulations, of the Canton compicadors and shroffs, the traditionary incubus on foreign trade! In Canton this anomaly was got rid of years ago, but it still continues here; Tls. 72 to $100 is the par rate, while at present Tls. 79 to $100 is the rate. Fancy in England the sovereign being worth 20s. one week, and only 17s. 6d. the next week, and perhaps a month later 22s., and you may have some notion of the delightful circulating medium of Shanghai.

Referring to my previous remarks as to the distribution of the fleet in China Seas, I would remark that the custom of keeping a man-of-war at each of the Treaty Ports was first established in compliance with the Treaty of Nanking, in which Sir H. Pottinger bound his Government to keep a vessel-of-war at each port to restrain foreigners, as at that time the great dread of the Chinese was unruly foreigners. The utility or necessity of keeping those vessels at the ports has long ceased. They were never required to restrain foreigners, but in former times they were required to keep the Chinese in check. Any danger of attack on the communities at the Ports is now out of the question, for the simple reason that the residents are able to defend themselves, and the Chinese know it. Single men-of-war at the ports are useless, while concentrated at convenient points they would exercise a wholesome influence on the officials, and tend to prevent the war, which all here feel to be approaching, if the present policy continues. The revelations in Mr Hart's notes ought to open the eyes of the Home Government to the real views of the Chinese.

The only Chinese official who attempted to show any mark of attention to Prince Alfred was "Chen," the Magistrate of the Mixed Court at Shanghai. He was amongst those who attended to receive him on landing, and he also accompanied the Prince down the river on his return to the *Galatea*. If Chen was in any very high position, he would in all probability be degraded for his civility.

Mr. Taylor, the missionary of "Yang Chow" celebrity, is again in trouble. It is stated that he has been expelled from a city further inland than Yang Chow. This time he is not likely to get any redress, as Lord Clarendon has put an effectual stop to any outrage being redressed in China.

## AMOY.

A correspondent at this port writes that Liang, Taoutae, has been degraded for "the mismanagement of affairs in Formosa" (last autumn), as well as of the coolie emigration business of last spring. The Le-Kim still exists at Amoy, with all its former destructive effects on the prosperity of the port. The new dock at Ku-lan-soo is now finished, and in good working order.

* Reprinted in our last number.

### HONG KONG.

From this port our latest date by the present mail is Nov. 16. The French mail leaving London Sept. 30 was delivered on Nov. 14, with telegrams to Oct. 18, but by some unexplained accident is said to have brought no English mail. We extract the following from the *China Mail* of Nov. 16:—

"To-day the *Galatea* leaves our harbour, and the first visit of a British Prince to the Far East will have terminated. We believe that the visit may be regarded with feelings of unmixed satisfaction, so far as Hong Kong is concerned. There has not been the slightest hitch in the arrangements made to ensure the demonstration of a hearty welcome to his Royal Highness. Great enthusiasm has been shown to do honour to him and to the Royal House which he represents, but it has been neither noisy nor obtrusive, while its evident warmth and cordiality must have persuaded the Prince that the loyalty of Her Majesty's subjects here is as sincere as that of our more effusive brethren in the great English colonies of the south, and that all of us in Hong Kong, British subjects or not, gladly seized the opportunity to give expression to our feelings. The complete success which has marked the occasion is very materially due to the circumstance that our noble city hall was, thanks to his Excellency and the reception committee, made available for the time. It is a noble and handsome building, and its existence is highly creditable to the liberality and enterprise of gentlemen to whom Hong Kong is already deeply indebted for other valuable institutions."

The following is from the *Overland Trade Report*:—'It is stated that some Chinese merchants have it under contemplation to establish a firm in London for the purpose of conducting trade upon their own account. Whether the scheme will be productive of immediate results or not it is not possible to say; but there is good reason to believe that such a plan will, before very long, be carried out. It is, in fact, only the natural climax of the course which the China trade has followed for the last ten years, during which the Chinese merchant has become more and more acquainted with the mode of conducting foreign trade, and has steadily become more and more independent of foreign assistance. The European has, in fact, taught his business to the Chinaman, while he has remained in profound ignorance of the manner in which trade is conducted in China. Under such circumstances it is only natural that the trade should have become more profitable to the native than the foreigner, and that the latter should find it extremely hard to conduct his business in such a manner as to leave any chance of making it a paying investment. So long as the Chinaman was dependent on the foreign merchant for the means of conducting his trade, the latter was able to work the business in such a manner as to make it reasonably remunerative; but at the present time there is hardly anything in connection with foreign trade that a Chinaman cannot do without assistance. He can engage frieght, raise loans from foreign banks, clear his goods at the Customs, and, in short, conduct the whole ordinary routine of business without any difficulty; and he is thus under no temptation to sell his goods unless, by doing so, he can secure a profit, which makes him contented. Having acquired all this information, it now appears that he is about to turn it to account by establishing his own agency in London; and it may well be feared that the last remnant of pure foreign trade with this country stands a fair chance of being attacked."

The extraordinary memorandum by Mr. Hart upon the China question, to which Mr. Ross Browne has replied, and which appeared in the American papers, reached China by the last Pacific Mail steamer, and has been the subject of considerable comment. It is generally regarded as an extremely weak defence of the Burlingame Mission, and is looked upon as admitting the chief points that have been urged against that movement, as it clearly shows it was designed not to advance, but to check, progress.

The Chinese have at last kept the engagement entered into after the capture of Amping by superseding Liang Taoutai.

H. E. Auguste t'Kint de Roodenbeck, Envoy and Minister to China, from H. M. the King of the Belgians, has arrived in Hong Kong.

Mr. Commissioner Porter leaves by this mail to prepare the way for the Commercial Mission from China next spring. He will return to Peking *via* San Francisco about March next.

The arrival has to be noted of the French Admiral Cornulier de Luciniere, in H.I.M.S. *Minerve*, to await the *Venus* The advent has also to be noted of the Prussian corvette *Medusa*. There has been a severe gale on the southern portion of the coast, several vessels having entered Hong Kong more or less damaged.

### THE DUKE OF EDINBURGH AT CANTON AND MACAO.

A Canton correspondent writes:—"H.R.H. the Duke of Edinburgh honoured this ancient city with his presence on Saturday, Nov. 6. Aware that the Prince was coming to Canton on the day in question, many of the foreign residents assembled at the wharf of the Hong Kong, Canton, and Macao Steamboat Company for the purpose of giving him a hearty welcome. The Prince on landing was received with cheers on the part of the foreigners, who were evidently much pleased to have an opportunity afforded them of bidding him welcome to the City of Rams. The sailors of the *Fedoong* were drawn up on the wharf in line, and, headed by Captain Francis, took up the cheer of the residents with a 'Hip! hip! Ai-yah!'—an ending to the familiar cheer which was rather comic. In the course of a few minutes H.R.H. entered his State chair, and accompanied by the Hon. E. Yorke, Mr. Secretary Haig, and Mr. Consul Robertson, proceeded to the quarters which by the last-named gentleman had been prepared for his reception in the city. The State chair in which H.R.H. rode was trimmed with yellow velvet, and on the back thereof the Royal Arms of England were emblazoned. The chairbearers, four in number, wore white dresses, with yellow facings, and looked exceedingly neat. In my humble opinion, however, the bearers ought to have been eight in number, and their dresses and the trimmings of the chair of a red colour, as such, if I mistake not, is the Imperial colour of England." Of course an address was presented by the residents, and a suitable reply returned.

On the 9th November His Royal Highness proceeded to Macao, in the steamer *Fire Dart*. On her arrival the Governor of Macao, in full uniform, went on board the *Fire Dart*, and landed under a salute of twenty-one guns with H.R.H., who was received with cheers on the wharf by all the officials and foreign Consuls. A levee was held at the Government House, after which H.R.H. drove through the town with the Governor, followed by five other carriages, and visited Camoes Garden, and the famous cave, returning to tiffin at Government House at twelve. Covers were laid for forty guests. At two o'clock H.R.H. was conducted on board the *Fire Dart* under another salute of twenty-one guns from San Francisco Fort, and departed amid much cheering. Many houses on the Praya displayed flags; the residence of the Viscount do Cercal, which was literally covered with banners in graceful lines, from the flagstaff to the verandahs, and forming a large A, being especially noteworthy. During the night the Governor's house and the public and private buildings were illuminated. The shortness of his Royal Highness's stay was much regretted by all. The Prince expressed himself much pleased with the warm reception given, and said he was sorry he could not stay a couple of days. Having expressed a desire to make some purchases of curios, H.R.H. drove with the Baron do Cercal to Vochom's shop, and bought a very rich shawl and other articles.

## STRAITS SETTLEMENTS.

—o—

### SINGAPORE.

From Singapore we have advices to Nov. 23. The English mail of October 8 was received on the 13th Nov., with London telegrams to Oct. 20. The following is from the summary of the *Straits Times*:—The preparations for the reception of the Duke of Edinburgh are progressing, and it gives promise of being a very creditable affair. Triumphal arches are looming up in all parts of the line of procession, and whole streets are covered with a framework of poles, over which canopies have been stretched, and should the weather prove favourable, the entire town will assume a gala-day appearance. The Singapore Volunteer Corps are, we learn, to form the guard of honour, and were assembled at their drill ground on Saturday last for inspection by his Excellency the Governor, who, after complimenting them upon their general appearance, informed them of the honour awaiting them, and assured them of the favour of a personal introduction of every member, desirous of the honour, to H. R. H. at the levee.

There is little else of general importance to recapitulate. On the day of the departure of the last mail steamer a tiffin in honour of Admiral Keppel was given by the residents, at the P. and O. Company's offices, at New Harbour; it passed off admirably, and the old Admiral left us fully impressed with the warmth of admiration and esteem entertained for him by this community. The first day's races of the Autumn Meeting take place this afternoon, and very good sport is anticipated. It was at first intended to have the races during the stay of the Duke of Edinburgh here, but his visit has been so long delayed that to postpone them further would be unfair to the horses, which have now been in training for over two months.

## CEYLON.

—o—

The following items are extracted from the *Ceylon Examiner*:—

The change in our currency, after all, is not to come into operation until the 1st July, 1870. Whether the Governor is quite sure of the change which he has proposed being sanctioned by th Home Government, and therefore wishes to humour the discontents, or whether he himself suffers from any recent misgivings as to the wisdom and necessity of the change, and therefore has agreed to the postponement, we are not in a position to say. We have always maintained, and still maintain, that there was no necessity whatever for disturbing the arrangement under which transactions were conducted for the last thirty years.

Mr. Theodore Mackenzie, merchant, of Colombo, has been arrested on a criminal warrant, and is to take his trial before the Supreme Court. The case has created a very painful sensation in the community. The manager of the Mercantile Bank had sworn an affidavit before the J. P. of Colombo, charging Mr. Mackenzie with forging and negotiating certain bills of lading of coffee, purporting to have been shipped on board the *Elizabeth Graham*, by which the bank was defrauded of some £3,000. The accused pleaded guilty to the charge, and as the sessions of the Supreme Court at Kandy are still open, he is to be tried there at once.

Digitized by Google

The latest we have heard of Mr. George Duff, the Manager of the Oriental Bank here, is that he has joined the society with which Mr. Lawrence Oliphant is connected. We suppose in this case, Mr. Dunlop, the present popular manager, will be confirmed in his post.

All our contemporaries announce that a marriage has been arranged between Miss Robinson, the Governor's eldest daughter, and Capt. St. John, of the 73rd Regiment; and that the gallant officer will send in his papers with a view to retirement from the army before the happy event, which is to take place at the beginning of next year.

# Commercial Report.

*(For dates see First Page.)*

## CEYLON, STRAITS, JAVA, CHINA, AND JAPAN IMPORTS.

YOKOHAMA.—The continued low value and further depreciation of native currency had had a depressing influence upon this market. Holders were, however, firm, and prices remained unchanged. A few sales had been made in Yarn at quotations. Metals were very dull and no business was reported even at reduced rates. Coal being in heavy stock was slow of sale and prices were low. Stocks: Grey Shirtings, 70,000 pieces; Cotton Yarn, 10,200 piculs; Taffachelass, 84,500 pieces; Blankets, 44,000 pairs. Quotations were as follow:—Cotton Yarn, 16 to 24, $52.50 to $53.50 per picul; 28 to 32, $54 to $54.75 per picul; 38 to 42, $59 to $60 per picul; Grey Shirtings, 7 lbs., $2.60 to $2.65 per piece; 8¼ lbs., $3.02½ to $3.07½ per piece; Black Velvets, $9 to $9.65; T. R. Cambrics, $0.90 to $0.95 per lb.; Taffachelass, double weft, 12 yds. 43 ins., $3.25 to $3.50; Taffachelass, single weft, $2.50 to $2.90; Blankets, $0.38 to $0.45 per lb. Metals: Nail Rod Iron, $3 to $3.50 per picul; Head, $6.25 to $6.75 per picul; Tin Plates, $6.25 to $8 per box. Coal, $10 to $12 per ton.

SHANGHAI.—A very small business has to be reported in all classes of English manufactures. The festivities consequent on the arrival of the Duke of Edinburgh and the subsequent race week had materially impeded business, and the news from the north and from the river ports had not been such as to warrant extensive operations. On the other hand, it may fairly be stated that holders generally had remained very firm, and had declined to place their goods on the market at current rates. Grey Shirtings: There had been little or no inquiry for the north, and sales had been chiefly for Japan, Chinkiang and Hankow. Rates show a slight decline on last quotations, and were not strong at the close. Quotations:—7 lbs., Tls. 1 98 to Tls. 2.02; 8-4 lbs., Tls. 2.17 to Tls. 2.22; and 9 lbs. to 9-12 lbs., Tls. 2.45 to 2.75, these latter weights being almost entirely neglected. T-Cloths: Transactions had again been to a most limited extent, and holders had simply been obliged to wait for a demand. A few sales of 6 lbs. and 7 lbs. ordinary goods reported at last figures; but operations from first and second hands did not amount to more than 10,000 pieces; prices for the best kinds of 7 lbs. and for 8 lbs. 36-inch lower. Quotations: 6 lbs., Tls. 1.40 to Tls. 1.70; 7 lbs., Tls. 1.65 to Tls. 1.85; 8 lbs. 36-inch, Tls. 1.95 to 2.35 per piece. White Shirtings: Only retail sales effected, and the lower counts show a fall in value. 56 reed, Tls. 2.05 to Tls. 2.15; 60 reed, Tls. 2.15 to Tls. 2.20; 64 reed, Tls. 2.35 to Tls. 2.40; and 66 reed, Tls. 2.45 to Tls. 2.50. Drills, &c.: American Goods further receded in value, the latest sale from first hands at Tls. 3.90 per piece for PMC, D below; other chops bore a corresponding value in the market. Best English makes not worth over Tls. 3.75 per piece, with a very small demand. Dutch Goods very dull. Sheetings: Auction sales of damaged American Goods at extremely low figures; the market for sound cargo very dull. No market for Jeans. Fancy Goods: White Brocades, Dyed Brocades, Velvets, and Chintzes in moderate inquiry at last prices. In Woollens the business had been very trivial. Spanish Stripes: The staple colours all lower in value, Ash and White only showing a slight advance. Long Ells: The chief colours showed a decline, and the demand was far from active, while stocks were accumulating. Camlets: Little change to note; sales not easy to effect. The demand for Lastings and Crape Lastings had been of a retail character. Figured Orleans had changed hands at a decline of 5 cents on last rates. Metals—Iron: About 10,000 bundles of Nail Rod Iron had found buyers at Tls. 2.05 to Tls. 2.10 per picul. Large sizes neglected; small inquired after at hardening rates. Bar and Hoop Iron extremely dull; no transactions reported. Lead easier; speculative holders had been reselling; L.B. obtainable at 5.25 common brands at Tls. 5.10 to Tls. 5.15. Coals: Market without material change; Cardiff, without any arrivals, held for higher rates; English, neither receipts nor sales. Quotations (duty paid):—American Drills, 40 yards, Tls. 3.7.0 to Tls. 3.9.0; American Jeans, 30 yards, Tls. 2.9.5 to Tls. 3.0; American Sheetings, 40 yards, Tls. 3.5.5 to Tls. 3.7.0; English Drills, 40 yards, Tls. 3.5.5 to Tls. 3.7.5; Dutch Drills, 40 yards, Tls. 3.5.0 to Tls. 3.6.5; Camlets, English, SS, per piece, Tls. 11.5.0 to Tls. 12.5.0; Spanish Stripes, per yard, Tls. 0.5.2 to Tls. 0.8.0; Medium Broad and Habit Cloth, Tls. 0.9.5 to Tls. 1.5.5; Long Ells, Scarlet, per piece, Tls. 6.1.5 to Tls. 6.2.0; Assorted, Tls. 6.2 5 to Tls. 6.3 5; Coals (cargo quotations afloat)—Cardiff, per ton, Tls. 8.0; North Wales, per ton, Tls. 7.7.5; English, per ton, Tls. 6.6.0; Anthracite, per ton, Tls. 9.7.5 to Tls. 10.0.

HANKOW.—Grey Shirtings: The demand had been very limited, and prices gradually declined. At the close holders were rather firmer, but buyers did not come forward. Quotations—Tls. 1.97 to Tls. 2.01 for 7 lbs., Tls. 2.16 to Tls. 2.21 for 8¼ lbs., and Tls. 2.75 to Tls. 2.85 per piece (nominal) for 9¾ lbs. goods. White Shirtings: 64-66 reed goods asked for; commoner makes in smaller inquiry, at a decline. T-Cloths not in demand; 8 lbs. good 5 candareens lower. Drills: Good English and American makes had met with fair inquiry at about last quotations. Fancy Cottons: Few sales reported, the demand having fallen off. Woollens and Worsteds—Camlets not much inquired for, favourite colours only met with attention, assortments being difficult to move. Supplies to hand had exceeded the deliveries. Lastings: A fair amount of business at previous rates. Long Ells: Scarlet more readily taken, the stock of that colour being reduced, holders asking an advance of 3 candareens per piece. Assortments no improvement, prices lower. Spanish Stripes and Medium Cloths dull of sale. Figured Orleans: Of good assortments wanted, but the dealers would not take unsuitable colours. China Crapes quite neglected. Metals—Lead unsaleable at the price asked, no transactions. Quicksilver: Sales at former rates with great difficulty, no general demand. Tin: No business.

FOOCHOW.—The following had been the sales reported during the interval:—Long Ells, 100 pieces, at $8.25 per piece; Spanish Stripes, 120 pieces, at $0.80 to $0.82½ per yard; Grey Shirtings, 8¼ lbs., 1,750 pieces, at $3.10 to $3.15 per piece; Do., 8·2 lbs., 700 pieces, at $3.15 per piece; T-Cloths, 8·2 lbs., 500 pieces, at $3.10 per piece; Do., 7 lbs., 1,500 pieces, at $2.40 to $2.55 per piece; Turkey Red Cloths, 500 pieces, at $2.80 to $3.10 per piece.

HONG KONG.—The amount of business done in this market during the fortnight had been unusually small. Greater weakness in the prices of Yarn and Cotton Piece Goods was evident, the continued absence of demand for the latter causing much anxiety to some holders. Woollens had remained quite stationary. Cotton Yarn: The Chinese had abstained from purchasing, and the only transactions had occurred between foreigners, who bought for shipment. Sales, 100 bales, 16s. to 24s., of good quality, at $144.50 per bale; prices must be considered lower. Grey Shirtings: In these transactions the sales had been very small. Beyond a small lot of ordinary 8.4 lbs., sold at $2.82½ per piece, only a lot of spotted goods had changed hands. 7 lbs. quite out of demand. T-Cloths: 6 lbs. inquired for, but the desire of some importers to sell had led them to move rather finer qualities at the prices lately paid for 16 by 16 goods, say $2 per piece, which seems to be the utmost the natives will pay for these goods. 7 lbs. had had less attention than before, but the demand was now running upon qualities finer than common, and for these $2.32½ to $2.37½ per piece was paid. The finest makes attracted no attention, and of 36-inch goods only one small sale was reported. White Shirtings: No inquiry for any but the lower reeds, and of these only a trifling quantity had changed hands at about former value. Grey Twills: American and English quite neglected, and for Dutch only small inquiry for shipment to the North. A sale of 8.4 to 8.8 lbs. Jeans reported at $3.75 per piece. Dyed and Fancy Cottons had not improved. For Spots, Brocades, and Damasks no inquiry. Turkey Reds, Chintzes, and Handkerchiefs also neglected. Of Gentian Twills, a small sale at $3.15 per piece. Woollen Cloths: Quiet; no transactions reported. Spanish Stripes: Trifling sales; Scarlet commanded slightly better rates. Long Ells: No business. Camlets also neglected; not a piece reported to have changed hands. Lastings: A choice parcel sold at $16.25 per piece, beyond this nothing done. For ordinary goods no offers could be obtained. Of Crape Lastings a few taken at $12.10 per piece. Metals: The position of Nail Rod Iron was becoming worse, owing to the absence of demand. Bar Iron and Wire likewise neglected. Of Hoop a small sale made at a very low rate. Tin Plates asked for, but no business had resulted. Steel in moderate demand, at a trifling advance. Lead on the spot neglected, but purchases "to arrive" made by speculators at $6.40 per picul for "ordinary," and $6.50 per picul for "L. B. and Co." qualities. "W. B." neglected. Quotations—Cotton Yarn, per bale, 16 to 24, $142.50 to $147.50; 28 to 32, $150.0 to $155.0; Grey Shirtings, 7 lbs., $2.50 to $2.52½; 8.4 lbs., $2.77½ to $2.82; 9 to 10 lbs., $3.15 to $3.80; White Shirtings, $2.50 to $3.55; finer qualities, $4.05; T-Cloths, 6 lbs., $1.95 to $2.0; 7 lbs., $2.20 to $2.25; Mexicans, $2.30 to $2.45; 8 to 8.4 lbs., $2.65 to $2.75; Long Ells, per piece, Scarlet, $7.70 to $7.80; Assorted, $7.60 to $7.80; Blankets, assorted, $0.48 to $0.52; Camlets, SSS., $13.50 to $14.0; SS., $15 50 to $16.25; S., $17.25 to $17.75; Dutch, $24.0 to $26.50. Iron—Nail Rod, $2.45 to $2.55; Bar, $2.60 to $2.75; Hoop, $2.90 to $3.10; Quicksilver, $62.50 to $63.0; Lead, inferior, $6.40; L.B., $6.40 to $6.50; W.B., $6.75 to $7.0; Coals, English, $7.0 to $7.50; Welsh, $8.0 to $8.50.

SINGAPORE.—After the departure of the last mail a good demand for Grey Cloth was experienced, and large sales were effected at rates slightly in advance of those previously quoted. 8¼ lbs. Shirtings advanced to $2.92½ and $2.95; latterly, however, the demand had been weaker, and $2.90 must be considered a full price. In T-Cloths considerable clearances had been effected—rates advancing in the early part of the fortnight, but receding towards the close. Madapollams in small request, prices unchanged. Drills without change; heavy cloth, both Dutch and English, wanted; light out of request. White Shirtings of the finer qualities dull of sale; but a pretty active demand had been shown for the lower descriptions of cloth, and prices for these were a little higher. Cambrics in more request for medium and low makes; the higher descriptions without alteration. White Madapollams had been bought at an advance on last rates. Considerable sales of Figured Shirtings, but prices showed a slight decline. Sewing thread sold at 70 to 75 cents per gross for Spool, and 35 cents per 12 oz. bundles. Dyed Goods in very poor request, demand unequal to relieve the stocks in hand. Grey Yarn receded in price after the departure of last mail, and sales were effected of No. 40's at $148 per bale; at the close, however, the market was again bare, and $151 per bale had been paid; the lower numbers in better supply, and considerable sales made, demand being good. Turkey Red Yarn held firmly, sales small. Iron very dull, only small sales reported, at low rates. Govan Bar sold at $2.40 on quay, and $2.45 in warehouse. Hoop at $3.10, and Nail Rod at $2.47½; Yellow Metal quiet; Copper Sheathing in less request. Coals very dull; no speculative demand, and deliveries for consumption small. Sales reported of West Hartley on the wharf at $8¼, three months' credit, equal to about $7.50 ex ship.

PENANG.—There was no improvement in business to report; sales mostly effected at slightly weaker prices, but there had been no transactions of any great importance, buyers only supplying their immediate necessities. Grey Shirtings very quiet; only moderate sales of 7 lbs. at $49½ per corge cash and $51 credit, of 8¼ lbs. at $57 cash and $60 credit: in other weights no transactions. Grey Long Cloths: No operators, other Grey Cloths seemingly being preferred. Grey Madapollams: None on the market. Grey T. Cloths in moderate stock, but there being only a restricted demand, prices had not improved; sales reported of 6 lbs. at $38½ to $39; and of 7 lbs. at from $42 to $44 per corge; in other weights no business. White shirtings weaker—only a few sales Fine at $85 to $93

Digitized by Google

per corge. White Cambrics very dull; nothing done except in Low at $22; and in Nos. 15-16 at $32.40 to $33 per corge. Grey Shirtings inactive; only one sale at $93 per corge. Dyed Cottons of all kinds very difficult of disposal; sales of Turkey Red Cambrics, 2 lbs. 8 ozs., at $49 to $50 (heavy); Siam Chowls at $11¼ to $16; Ginghams, at $40 per corge; Handkerchiefs, Matadamas, at $1.60 per dozen; Batticks, at $2.75 to $4.80 per corge; Kling Dresses at $12; and Kains, Red and Yellow, at $5 to $7 per corge. Grey Twist: None on the market; quotations nominal; a few small sales of Turkey Red, No. 44, at $145; Imperial Red, No. 40, at $81; Green, No. 40, at $83; and Blue, No. 40, at $85 per 200 lbs.

CEYLON.—The following is from Messrs. Geo. Wall and Co.'s Circular, dated 30th ult.:—We have had a very dull market during the fortnight; and although there is still a general disposition to resist a further decline, we close with prices tending in favour of buyers. In the absence of any demand for export, the business in grey goods has been extremely limited. Of Grey Shirtings a few parcels only have found buyers at prices which maintain our last quotation. Twist has not been dealt in. Long Cloths and other heavy grey cloths have been quite neglected, with the exception of Grey Drills, of which a fair sale has been made. A little has been done, at moderate rates, in Grey Jacconets. A few small parcels of White Cambrics and Mulls have been fairly placed. There has been some Christmas demand for favourite Prints, and for Printed and Wove Handkerchiefs. Printed Dresses, and wove goods, with the above exception, are still out of favour.

## CEYLON, STRAITS, JAVA, CHINA, AND JAPAN EXPORTS.

### TEA.

YOKOHAMA.—During the interval a brisk business had been done, and settlements (entirely for the San Francisco and New York markets) amounted to about 3,500 piculs. Supplies not having come in very freely, stocks were somewhat reduced; holders were therefore firm, and purchases showed an advance on last quotations. The P. M. S. S. Co.'s steamer Japan took 36,846 lbs. for New York and 70,384 lbs. for San Francisco. The Crown for London and Phaeton for New York had sailed. The Janet Ferguson, Herbert Graham, and Southern Belle were on the berth for New York, the Rifleman for Boston, and the Miako for San Francisco. Quotations:—Common, $20 to $21; good common, $22 to $23; medium, $25 to $26; good medium, $27 to $30; fine, $32 to $35; finest, $36 to $38; choice, nominal.

SHANGHAI.—Black: A fair amount of business had been transacted at prices showing, on the whole, but little change. The stock on offer was very undesirable, and low descriptions comprised in it had been purchased at about Tls. 18 per picul. Supplies had been liberal for the time of year, and they were not exhausted. All ideas of a reduced export had vanished, receipts from Hankow showing a considerable excess on those of last season. Settlements for the fortnight, 23,000 chests; reshipments on owners' account, 2,300 chests; stock, 88 chops, or 28,274 chests. Quotations, duty paid, exchange for credit, six months' sight, at 6s. per tael, and freight at £2 sterling per ton:—Shanghai-packed, 10¾d.; Hohow, common, 11¾d. to 1s. 1¾d.; Oonam, common, 1s. 0¼d. to 1s. 2d.; Ningchow, common, 1s. 1¼d. to 1s. 2d.; Oopack, common, 1s. 1d. to 1s. 2¼d. Green: A considerable business had been transacted at fully former prices for fine and finest descriptions, and at about previous rates for medium and common kinds. Quotations: Moyune and Teenkai, Tls. 33 to Tls. 34; Fychow, Tls. 28½ to Tls. 33¼; Pingsuey, Tls. 34¼ to Tls. 37; Shanghai-packed, Tls. 31½ to Tls. 33. Arrivals had been rather large, and stock remained as liberal as it was on the departure of the last English mail. Settlements for the fortnight, 30,000 half-chests; re-shipments on owners' account, 2,600 half-chests; stock—150 chops, or 79,800 half-chests.

HANKOW.—The following is from Messrs. Drysdale, Ringer, and Co.'s report, dated Nov. 4:—We have now arrived at so late a period of our season that there is but little business to report upon. In closing our report for the year we cannot help expressing the disappointment so generally felt that the early prospects of the season, which were more promising than in any year since the opening of this port, had been so entirely frustrated, both by the desire to anticipate a rise on the home market, manifested on all sides, but more especially in Shanghai, for the high prices paid for low class teas, in the hope of a short export—a course of action defeating its own ends; and again by the unaccountable manner in which the early arrivals of the new crop were forced off at home, by sale without average at public auction, recourse to which seems to us quite unjustifiable and uncalled for, seeing the comparatively small quantity of Tea shipped from China during the early part of the season. The transactions since the 21st ult. have been limited to 2,572 chests, a large portion of which has been in barter, and the shipment of Shanghai for sale on native account of 6,000 chests and 1,000 chests contracts. Prices paid have been 14 taels for Tea of inferior quality to 16½ for clean Oopacks; they do not show any decline for rates quoted in our last, and are fully up to home rates per last advices.

KIUKIANG.—Black Teas: Only one chop had been purchased during the fortnight, this being a parcel of Hohow. Supplies had been six chops of Ningchow and four of Hohow. Quotations were—Ningchows, nominal. Hohows, Tls. 13.2.5. Export from Jan. 1 to Nov. 5, 1869, 13,598,642 lbs.; export from Jan. 1 to Nov. 5, 1868, 15,603,578 lbs. Green Teas: No business had been done, and all arrivals had been forwarded to Shanghai. Export from Jan. 1 to Nov. 5, 1869, 5,822,404 lbs.; export from Jan. 1 to Nov. 5, 1868, 5,662,506 lbs. Stock, 1,402 packages.

FOOCHOW.—The following is from Messrs. Odell and Co.'s Report:—Congous: The demand has not been very general, and a fair proportion of the settlements reported have been on Continental account. Prices have been fully maintained, though at the close holders show more disposition to realise at current quotations. Arrivals from the country have fallen off, and the quantity still to come to hand does not, it is said, exceed 30,000 chests. Souchongs: Only a few sales have been made, there being such a poor assortment on offer. Oolongs: Some settlements made prior to the departure of the last mail have been reported, but the business transacted during the fortnight has been very small, the bulk of the stock on offer being in the hands of two or three teamen, who are holding for extreme rates. Scented Teas continue in fair inquiry, at previous quotations. Settlements during the fortnight have been:—Congou, 20,727 chests, at Tls. 9.5.5 to Tls 21.8 per picul, ship off; Souchong, 657 chests, at Tls. 18.8 to Tls. 24.8; Oolong, 13,942 ½-chests, at Tls. 17.8 to Tls. 23.5.5; Scented Teas, 4,396 boxes, at Tls. 8.8 to Tls. 23.3.

AMOY.—Congou: Nothing had been done in this description during the fortnight. Oolong: Market quiet. Settlements since last mail 6,323 packages at $18½ to $22¾ for common to fair cargo; $23 to $26½ for good to superior, and $29 to $34½ for fine grades. Supplies from the country nearly 50,000 packages less than at the same date last year.

CANTON.—The market had been very quiet. There was no disposition on the part of Teamen to force sales, although the stock of Canton made teas was somewhat larger than usual at this period of the year, common capers particularly being in abundant supply. The small sales of scented teas had been at former quotations. Canton made green teas had been taken to a small extent, in execution of special orders for the Continent. There were no country congous in the market. Canton settlements from 29th October to 11th November, 1869:—Canton district congou, nil; scented orange pekoe, 5,000 boxes at Tls. 20 to 29; scented caper, 500 boxes at Tls. 23 to 26; Canton greens, gunpowder, 1,600 boxes at Tls. 18 to 26; imperial, 2,500 boxes at Tls. 19 to 26; young hyson, nil; country greens, no sales and no stock.

### SILK.

YOKOHAMA.—A steady business had been done, amounting to 375 bales. Notwithstanding an increase of stocks, natives had been less pressing to make sales, and prices perceptibly stiffened; purchases at the close were not practicable at the rates previously current. Stocks, 1,800 bales. Silkworm Eggs were coming in on a much reduced scale, and almost all Bivoltini. Total arrivals, 1,350,000. It was estimated that settlements to 7th Nov. were about 1,200,000. Prices for annuals, $2 to $4½. Bivoltini, 30c. to 50c. for ordinary, and up to $1.25 has been paid for superior.

SHANGHAI.—The following is from Messrs. C. J. Skeggs and Co.'s Circular, dated, 9th November. In the early part of the fortnight, and up to the French mail, which left on the 3rd instant, a moderate daily business was passing at rather hardening prices; since receipt of the above telegram operations have been somewhat checked, but although the market is rather easier, no actual decline can yet be quoted, except for Hainins, which are about Tls. 5 lower. Common Silks of all descriptions still command full rates, and even a slight advance is noticeable in purchases of low Kahings. Chops might be placed Tls. 5 lower at the close, and a few anxious sellers of medium sorts are willing to accept about the same decline, but holders generally are firm, whilst buyers on the other hand want a concession of about Tls. 20. Settlements for the fortnight, including shipments by an extra P. and O. steamer on the 31st October, the French mail steamer on the 3rd instant and several sailing vessels as noted at foot, amount to about 1,700 bales, bringing the total since 1st June up to about 26,900 bales, against 37,800 bales at the same time last year.

### STRAITS AND CEYLON PRODUCE.

SINGAPORE.—The opportunities of shipment continued very limited, and prices of most articles were lower. Gambier had been taken up to the extent of 1,200 tons, at from $3 to $2.92½, the latter rate being that at which the market closed. No supplies of pepper in the market. Sago flour further declined, purchases of Singapore as low as $2.35 and Sarawak at $2.42½. Pearl Sago without much alteration, $3.10 to $3.15 being paid for ordinary small grain. Bontyne Coffee in good supply, and sales at $12¼ per picul. Tapioca lower, good quality lump $4.30 per picul. Gutta Percha of first quality more enquired for—chiefly in execution of orders from Home. Tin much lower, having declined about $2 per picul; the last purchases of Malacca at $28 to $28¼ per picul.

PENANG.—Some of the articles of produce had come to market freely during the past fortnight, especially Tin, which had been in full supply. The price had declined to $27.50, and had been fluctuating between that rate and $27 during the whole fortnight—the higher figure was the last price recorded. There was a considerable quantity on the market held for a higher figure. There had only been one small arrival of Black Pepper, from Acheen, which was bought in the bazaar at $7.35 per picul. No White Pepper offered. Cutch: In good supply; price gone back to $4.50 per picul, at which rate a fair quantity had changed hands. Full arrivals of Gum Benjamin; No. 1 offered at $55, and No. 2, T. T. and Co., taken at $20.40 per picul. Hides: More plentiful, and purchases of Buffalo from $9.75 to $10¼; Cow from $13.45 to $14½, according to quality. Horns: Scarce, and maintained former price. Mace: Scarce; a small lot of No. 1 bought at $75, and some very fine at $78 per picul. No operations in Nutmegs. Sugar: Penang, Nos. 1-3 in good demand at a slight advance, in some cases, on former prices. Tapioca sold, for delivery in February, at $4.15 per picul.

COLOMBO.—Messrs. George Wall and Co. report as follows:—Coffee, Plantation: We requote at from 10s. 4d. to 10s. 9d. for low, and 11s. 3d. to 11s. 9d. for high-grown parchment. There is not much doing, owing to continued dull advices from London. The Wynaud, the only ship that has cleared for London during the fortnight, brings up the total export of Plantation Coffee from 1st Oct. to 57,186 cwt., against 75,676 cwt. at the same time last year, showing a decrease of 18,490 cwt. Native: Exports from 1st Oct. to 30th Nov., 7,925 cwt., against 36,333 cwt. at the same time last year, showing a decrease of 28,408 cwt. We can only reiterate our previous remarks to the effect that the natives are using pulpers this year, and sending down their Coffee in parchment, and there is very little native Coffee on offer. We quote nominally 46s. f.o.b., and this for a wretchedly poor sample. Cinnamon: We have nothing fresh to report of this spice; for the few small lots on offer previous prices have been paid, 22s. to 24s. per lb. Exports to date 3,109 bags, against 2,180 bags last year. Cocoanut Oil: We have not heard of much having been done in this article; 1,000 casks have been purchased at a price equivalent to £34 10s. per ton f.o.b. Plumbago: Good bright lump £12 to £14; the latter price for very fine only, for which description there is a good demand. Inferior parcels meet with no attention. Dust, £4 10s. to £5. Coir Yarn: The finer descriptions are in good demand at from 26s. to 32s. per cwt. Medium qualities also sell well at previous quotations, 20s. to 24s. Exports from 1st Oct. to date 4,521 cwt., against 7,429 cwt. during the corresponding period last year.

## ARRIVALS.

At YOKOHAMA.—From Cardiff, Oct. 31, Ocean Gem.

At HIOGO.—From London, Oct. 5, Westbury; from Liverpool, 14, Frederica.

At SHANGHAI.—From Glasgow, Nov. 4, H. Miller; from Hamburg, 2, Excellsior.

At HONG KONG and CANTON.—From Sunderland, 12, Loochoo; from Cardiff, Hansa; 13, Dudbrook.

At MANILA.—From London (put in), Nov. 1, Laurel; from Cardiff, 5, Harfruen.

At SINGAPORE.—From London, Nov. 18, Panic; from Glasgow, Kate Carnie; 21, Lismore; from Liverpool, 18, Naworth; from Cardiff, 19. Drache; from Boston, 16, Rockett.

At PENANG.—None.

At BATAVIA.—From Bordeaux, Nov. 6, Ida; from Newcastle, 11, Neimath.

At COLOMBO.—From London, Nov. 21, West Australian; from Glasgow, 23, Glenarsary.

At GALLE.—From Liverpool, Nov. 19, Arlington.

## DEPARTURES.

From YOKOHAMA.—For London, Nov. 4, Crown; for Callao, 1, James Cheston; for New York, 4, Phæton.

From SHANGHAI.—For London, Nov. 7, Paunton.

From FOOCHOW.—For London, Nov. 1 Albert Victor; 3, Polar Star; 5, England's Glory; for Boston, Oct. 30, Jeanie.

From HONG KONG and CANTON.—None.

From MANILA.—For Boston, Oct. 28, Archer; Nov. 6, Messenger.

From SINGAPORE.—For London, Nov. 8. Tycho Brahe (str.); for England 13, H.M.S. Rodney; for New York, 13, Gemsbok.

From PENANG.—For London, Nov. 11, Tycho Brahe (str.); 16, Knighton.

From BATAVIA.—For Holland, Nov. 12, Hannah; 16, Eliza b

From COLOMBO.—For London, Nov. 17, City of Paris; 18, S Southern Cross; 25, Wynaud.

From GALLE.—None.

## VESSELS LOADING.

At YOKOHAMA.—For London, None; for New York, Janet Ferguson, Herbert Graham, Southern Belle; for Boston, Rifleman.

At SHANGHAI.—For London, Dundonald. John Lidgett, Ocean Chief, Araby Maid, Arracan, Fluellin, Annersley, Barbadian, Corea; for New York, N. B. Palmer, Tynedale, Dilpussund, Elizabeth Dougal, Etha Rickmers.

At FOOCHOW.—For London, Ceylon, Carmarthenshire, Earl Dalhousie, Beemah, Tyburnia; for New York, Springfield, Resolute.

At AMOY.—For New York, Raleigh, Golconda.

At HONG KONG and CANTON.—For London, Pakwan, Petchelee, John Shepherd; for New York, Oliver Cromwell.

At MANILA.—For London, Hindostan, Doriga; for Cadiz, Espana, Cervantes, Elena; for New York, Western Chief, Franklin, Oliver Davais, Tabor; for Boston, Bunker Hill.

At SINGAPORE.—For London, Chusan, River Clyde, Roxburgh Castle, Kate Carnie; for Liverpool. Panic; for Boston, Rocket.

At PENANG.—For London, John Paul, Pelham.

At COLOMBO.—For London, Ocean Beauty, Albert Victor, Lincelles, Rookwood, Elizabeth Graham, Palestine, Belvidera, Lady Melville, Milcilla, Thomas Blue, Peter Denny.

At GALLE.—For London, *v a* Colombo, Percy Douglas.

## FREIGHTS AND CHARTERS.

At YOKOHAMA.—To London there is no vessel on the berth; to New York or Boston, £2 5s. per ton of 40 feet.

At SHANGHAI.—To London £2 per ton; to New York, £2 10s.

At FOOCHOW.—The rate to London is £2, and to New York the same.

At AMOY.—To New York, £2 and $10 gold.

At HONG KONG and CANTON.—To London, £2; to New York, £1 15s.

At MANILA.—To Europe there is only one vessel to report, the Doriga (554), taking sugar and tobacco, at £2.

At SINGAPORE.—To London, £2 5s. to £2 10s.; to Liverpool, £2 to £2 5s.

At PENANG.—There is no alteration to report.

At COLOMBO.—To London, coffee in casks, 60s.; dead weight, 45s. to 50s.

MISCELLANEOUS.—At Table Bay, Nov. 5, Bremen, Bullerdüeck, from New York, and sailed 17 for Batavia; 16. Nieuwe Waterweg, Von Lindern, from Batavia, for Amsterdam; at Kingstown, str. Arrow, for Colombo. The Admiralty have invited tenders for the conveyance of 77 tons stores to Hong Kong.

CASUALTIES.—The Wild Curlew, Parnell, from London to Bangkok, arrived in the Downs, 22 Dec, and was supplied with an anchor and sixty fathoms chain in lieu of others lost. The Eastern Isles (str.), Knight, which sailed from Glasgow, Dec. 17, for Singapore, Hong Kong, &c., put into Falmouth, Dec. 22, with slight damage to machinery. The Cleopatra, Doane, arrived at New York, Dec. 9, from Manila, experienced a heavy N.N.E. gale, Dec. 6, off the Highlands, lasting fifteen hours, during which she lost sails, and was driven as far as Cape May. The George Treat, Ginn, from Penang to London, which put into Fayal, Nov. 26, leaky, and with mainmast sprung, &c., commenced discharging on the 30th. The California, Deinum, which sailed from Ramsgate, Dec. 23, for Batavia, after repairing, put into Plymouth, Dec. 25, leaky. The Ogir, for Singapore, loading in the Birkenhead Dock, Liverpool, had part of her deck, hold, sails, and outstanding rigging burnt, owing to a shed having caught fire. The Mozart, Brusch, which sailed from Cuxhaven, Dec. 7, for Macassar, put back to Hamburg, Dec. 21, with loss of bowsprit and foretop.

## LATEST TELEGRAMS.

—o—

(VIA SAN FRANCISCO, RECEIVED AT THE "LONDON AND CHINA TELEGRAPH" OFFICE, DEC. 27TH.)

### CHINA.

THE NEW TREATY.

HONG KONG, NOV. 19.—A new treaty has been signed between the English and Chinese Governments; but it will not come into operation until the other Governments having dealings with China accept its provisions. The treaty guarantees a modification of the transit dues, the opening of two new ports, the working of coal mines by English appliances, a reduction of duties, the right of navigation on inland waters, and the right of foreigners to temporary residence in any part of the country. An English barrister will be employed to frame a code of mercantile regulations under this treaty, the draft of which Sir Rutherford Alcock is about to take with him to England. The Duke of Edinburgh has been splendidly entertained at Hong Kong.

At Shanghai the exchange on London is 5s. 11½d. The vessels *Mikado*, *Gladstone*, and *Willy Rickmers* have sailed.

### JAPAN.

YOKOHAMA, DEC. 2.—The English ambassador has been informed of the existence of a plot to assassinate him. The captain of the *Runnymede* has been drowned. The Austrian envoy has quitted the country, the Austrian subjects being left under the protection of the British Minister.

The tea demand is good, the crop being short. Silk is quiet, Exchange on London 4s. 5¾d.

## BIRTHS, MARRIAGES, AND DEATHS.

—o—

### BIRTHS.

DE SOUZA—On the 13th Nov., at Singapore, the wife of Mr. G. R. De Souza, of a daughter.

HABEKOST—On the 17th Nov., at Singapore, the wife of Capt. Habekost, of a daughter.

HOOPER—On the 23rd Sept., at Plympton, Devon, the wife of Capt. T. B. Hooper, of a daughter.

HOOPER—On Christmas-day, at Manor Park, Lee, the wife of John R. Hooper, Esq., of a daughter.

MACKENZIE—On the 11th Dec., at 22, Manor-park, Lee, the wife of James Mackenzie, late of Shanghai, of a daughter.

ROBERTSON—On the 26th Dec., at Lusswade, N.B., the wife of Dr. Robertson, of a daughter.

SCHUTZE—On the 10th Nov., at Macao, Mrs. F. S. Schutze, of a son.

SOHST—On the 11th Nov., at Singapore, the wife of Theodor Sohst, Esq., of a son.

### MARRIAGES.

CHURTON—HART.—On the 4th Nov., at Trinity Church, Shanghai, by the Rev. Canon Butcher, Charles Stanley Churton, fourth son of Edward George Churton, Esq., of 51, Ventnor-villas, Brighton, to Emilie, third daughter of the late Charles Hart, Esq., of Liverpool.

SMITH—BROOKE.—On the 30th Oct., at the British Consulate, Yokohama, before F. Lowder, Esq., H.B.M. Consul, and subsequently at Christchurch, by the Rev. M. B. Bailey, William Henry Smith, Esq. formerly of the Royal Marines, the eldest son of the late Rev. W. H. Smith, vicar of Tuddenham Norfolk, to Gertrude, eldest daughter of J. H. Brooke, Esq., formerly Minister of Lands, Victoria, Australia.

### DEATHS.

BRAYSHER—On the 7th Nov., at Shanghai, Jane Katherine, wife of C. Deighton Brayshер, Esq.

CAY—On the 22nd Dec., at Mentone, Charles Hope Cay, M.A., Fellow of Gonville and Caius College, Cambridge, Mathematical Master of Clifton College, third son of Robert Dundas Cay, W.S., Edinburgh, and late of Hong Kong.

DYMES—On the 4th Nov., at Shanghai Joseph P. Dymes, late of Chinkiang.

FENNING—On the 6th Nov., at Shanghai, Victorine Susan, daughter of William Fenning, aged 17 months.

LEE—On the 16th Dec., at Belsize-park, William David Lee, Esq., late of Colombo, Ceylon, aged 51.

LYLE—On the 3rd Nov., of consumption, James Lyle, brass finisher in the Gas Company's service.

## COURT OF COMMON PLEAS.—DEC. 21.

(Before the LORD CHIEF JUSTICE and a Special Jury.)

BRANDT AND OTHERS V. BLACK AND OTHERS.

Mr. Hawkins, Q.C., Sir George Honyman, Q.C., Mr. Watkin Williams, and Mr. English Harrison were for the plaintiffs; Sir John Karslake, Q.C., and Mr. Cohen for the defendants.

This was an action to recover damages for not delivering a cargo of tea in the same condition in which it was shipped at Foochow, in China. It was said that the tea, which arrived in England in the *Wemyss Castle*, was tainted more or less with tar, pitch, petroleum, or some oil or other, and that what was worth upwards of £9,000 originally had only sold for about £6.000 in England. The defendants paid about £1,100 into court, and as to the residue of the money claimed they said that the deterioration of the tea was not so great as was alleged, and that it had not been sold judiciously, having regard to the mode in which the good had been selected from the bad and classified. The day was occupied with the details of such sale and classification, and in ascertaining how the different packages had been examined and tested. In the end the jury, having retired to consider their verdict, found for the plaintiffs for £900 over and above the money paid into court.

---

THE AUSTRIAN TREATY WITH CHINA.—The treaty with China (says the *Standard*), which has lately been concluded at Peking by the Austrian Legation, while by a general article it secures every privilege which has been ceded, or may be ceded, to the most favoured nations, presents some peculiarities worthy of notice as representing the results of experience in modifying the relations of foreign nations with the Chinese Empire. The Chinese absolutely refused—and very wisely refused—to allow any foreign Consuls to trade. It is notorious that in every part of the East merchant-consuls have abused their privileges, involved themselves and their Governments in serious misunderstandings, have looked naturally enough to their own mercantile interests, and, being paid generally in the shape of fees alone, have practised exactions and permitted irregularities, which, on account of the remoteness of the locality or imperfection of evidence, have remained unredressed. In all the great marts of Oriental trade the British Government has given the example of appointing salaried Consular functionaries, and certainly with the happiest results. The Chinese have also objected to any clause giving the foreign authorities the right to claim protection or exemption from the native law for Chinese subjects converted, or claimed as converted, to Christianity—a condition naturally insisted upon by the Chinese, as so much trouble has been given by the Catholic missionaries in demanding that an adhesion to the Christian faith shall give special privileges to Chinese converts. The rights to build houses of worship, hospitals, &c., in all the open ports has been amply conceded. The Court of Rome expected, through the Austrian influence, to obtain further concessions for Catholic converts, and great indignation has been expressed in some of the Papal newspapers that the ties which bind Austria to Rome have been further loosened or broken in China when they ought to have been strengthened; but the fact thus recognised in the remotest East is but a confirmation of similar facts exhibited nearer home. It is a satisfaction withal that the Austrian Government—less disturbed by domestic affairs—has been able to extend its views to commercial objects abroad, and has succeeded in obtaining most satisfactory treaties with China, Japan, and Siam. The Austrian expedition reached San Francisco at the beginning of this month, and is now on its way to Valparaiso.

During the forenoon of Thursday, the 16th inst., and at the time the wind was backing out to the southward and increasing in its strength, the Donegal was signalled to proceed to sea. The order was obeyed, and the ship steamed out to encounter the gale. Eight hours afterwards the Donegal was off St. Alban's Head. Storm sails were split, ports stove in, quarter gallery washed out, and decks filled with water. The ship was strained and leaked very much in her topsides, if not below the water line. After knocking about in the Channel all night, St. Helen's Roads, beyond which no sane person who saw her get under way from Spithead on the previous day supposed she had gone, was made, and the ship anchored there in safety. *The Times* says that the bill for making good the total damages sustained by the Donegal will not be much less than £1,000. Some one is responsible for ordering the ship to sea in such weather. The Donegal sailed from St. Helen's Roads, off the east end of the Isle of Wight, on the 21st inst., for China. An officer, writing from her, says:—"One thousand pounds is the estimated cost of the bill for coals burnt and damages. Government stores in the wardroom and gunroom were damaged to the extent of £90. The dockyard people, and all interested, have 'dodged' the expense of the Donegal's refit by sending on board the materials necessary for repairs as stores, and the artificers of the fleet, as I may call them—we have on board four ship's companies, viz., the Ocean, the Rinaldo, the Zebra, and the Sylvia—have to make the repairs as best they can. Of course they will only be temporary ones, the material damage—that is, the straining of the hull of the ship—cannot be repaired except in harbour."

---

IT is announced that a lengthened and careful examination held at Trinity-house into the loss of the *Spindrift* has resulted in the suspension of Mr. MARTIN, the pilot, for six months. At the expiration of that period a re-examination and production of testimonials to character will be required before the licence is renewed. His previous good character is alleged as the reason for this lenient treatment, but for all that we must endorse the verdict of *The Times*, that it is "a most inadequate sentence."

## THE NEW CHINA TREATY.

A TELEGRAM received yesterday, and published in another part of our paper, announces the signature of a new treaty between Great Britain and China. This telegram, though bringing only three days' later news than the mail, announces it as a positive fact, whereas the China papers received by the mail mention it only as a report still wanting confirmation. Our own private advices leave no doubt that a new treaty was actually signed on the 23rd of October. What we shall gain by it is by no means so clear. The telegram tells us, "a modification of the transit dues"—which sounds exceedingly vague; "the opening of new ports"—we believe Wanchew is to be opened, and some other southern ports as subsidiary ports; "the working of coal mines by English appliances"—as far as our own information goes, which we believe to be thoroughly reliable, it is merely conceded that English appliances may be used to work certain mines *in the South only*, and means will doubtless be found to render this a dead letter, as far as any tangible advantage to Englishmen is concerned; "a reduction of duties"—on what articles, and to what extent, is still a mystery; "the right of navigating inland waters, and of residence in the interior"—valuable privileges if accompanied by the necessary protection for foreign life and property in the interior—otherwise worthless. Should foreign vessels appear in any waters, or foreign travellers arrive in any province where their presence is unwelcome to the mandarins, these latter, with the aid of the *literati*, will soon organise a riot or "anti-foreign demonstration," and have the intruders robbed or murdered, knowing that Lord CLARENDON'S instructions will secure them from any impertinent interference by British gunboats. Until, however, the treaty itself is made public, we cannot comment on it with any degree of certainty. One thing looks suggestive—the fact that all concessions are as much as possible restricted to the South, as though in pursuance of a determination to keep foreigners as far from the capital as possible. If access to the coal mines is to be permitted at all, why not open the Chai-tang mines? We regret to learn that WEU-SEANG, the Foreign Minister, who should have taken a leading part in the arrangement of this treaty, is seriously ill, and that the document does not bear his signature. WEU-SEANG is one of the most reasonable and liberal of Chinese statesmen; indeed, we have reason to believe that of late he has been the only one at all open to conviction on any point of progress. Should he succumb to this illness, there is no small probability of his being succeeded by an "anti-foreign" Minister, and then what little ground has lately been gained would be at once lost. WEU-SEANG can hardly be called a warm advocate of foreign intercourse, but at least he has the sense to see that progress in this direction is inevitable, and that the true policy is to acquiesce with a good grace. There are but few among the governing class who hold even such advanced opinions as these, and WEU-SEANG'S death would be a severe check to any hopes we may be induced to fix on the new treaty.

## THE CEYLON CURRENCY QUESTION.

THE last phase of the discussion regarding the position of the Ceylon currency is represented by the Report of a Commission appointed by Sir HERCULES ROBINSON to determine, *not* whether any alteration of the currency is desirable, but what will be the effects of an alteration that he has decided shall forthwith be made. The Governor is fully alive to the value of the old maxim "*Divide et impera.*" He found the colonists all but unanimous in opposing any change at all, and finding so strong a combination as this rather awkward to deal with, he sought to divert the attention of the people from the principal question at issue to some smaller one on which they might probably disagree, and accordingly threw them—as a bone of contention—the problem, how their accounts should be kept when the sterling currency *was* abolished; whether in rupees, annas and pie, after the Indian fashion, or in rupees, shillings and pence, or again, by a decimal method of rupees and cents. The Report of the Commission on these points is an exceedingly curious document, but before commenting on it we must for a brief space revert to the original difficulty, as to the necessity, or otherwise, for abolishing the sterling currency and making the rupee not only the sole legal tender, but the standard for all contracts and accounts. The Governor's view of the case seems to be this; though willing to admit that for thirty years or more the system of keeping accounts in pounds, shillings, and pence, while all payments have been made in rupees at the rate of ten to the pound, has worked well, he nevertheless contends that it may lead to grave difficulties, in this way—a person to whom the Colonial Treasury is indebted in the sum of, say, a thousand rupees, might at present refuse to accept payment in silver, and demand a hundred golden sovereigns, which, if acceded to, would entail a loss to the Treasury of £6 5s., the intrinsic value of each rupee in English money being only 1s. 10½d. Whence he concludes that the use of sterling denominations is altogether dangerous, and should be done away with entirely. The popular view, however, is this,—that English currency has nothing to do with the question at all, for the "pound" in this case would not mean a golden sovereign, but a Ceylon currency pound, which is simply ten rupees, or the equivalent of ten rupees, at their actual intrinsic value. The value of an imaginary coin, such as the Ceylon pound, must depend solely on its relation to the coin actually and tangibly in circulation. Beyond similarity of nomenclature, there is no affinity whatever between English and Ceylon currency, and the discrepancy that certainly exists, in the circulating medium being a coin that never enters into accounts, might be readily overcome by ordaining that the rupee should be a legal tender for sums to any amount, at a fixed value of two shillings. The inhabitants of Ceylon would then be in precisely the same position as we should be in England if our sovereigns, half-sovereigns, crowns, and half-crowns fell into disuse, leaving us only the florin and its subsidiary coins (the shilling and sixpence being virtually half and quarter-florins) as a circulating medium. We might still keep our accounts in pounds, and an English pound would then be ten florins, just as a Ceylon pound now is ten rupees. This, which, as we have said, is the "popular" view of the case, is, we are convinced, the correct one also. It is very fairly embodied in a report drawn up by a sub-committee of the Ceylon Chamber of Commerce, consisting of Messrs. MACDONALD, WALL, and RICHMOND, who recommended that a memorial should be addressed to the SECRETARY of STATE for the COLONIES, deprecating any alteration in the denomination of the currency. This recommendation was acted on, but the memorial was disregarded, and, as we stated in a recent issue, the affair is so far settled that the banks here connected with Ceylon are now sending out rupee notes to replace the pound notes hitherto in use.

Reverting to the Report of the Commission above alluded to, the first thing that attracts attention is, that out of ten Commissioners only three sign the document without dissenting therefrom! Some of the members were officials of the Colonial Government, while others were merchants, or independent residents; and from the first it became evident that no unanimity on any one point was to be hoped for. So it was decided to take legal evidence, in the first place, to decide what a "pound currency" in Ceylon really meant; and several members of the Ceylon bar, on being examined, agreed in holding that "a pound" in Ceylon meant a

Digitized by Google

pound in English currency, and nothing else; a conclusion so extraordinary, and so diametrically opposed to the facts, that we can only conclude that the subject was strange to them, and that they all went to the same source for information. However this may be, their joint *dictum* was adopted as the basis of the Report itself, while three members signed it only subject to a "memorandum of dissent," wherein they adduce ample reasons for adhering to exactly the opposite opinion. Then, as regards the best manner of subdividing the rupee, in accounts, there is also a great diversity of opinion. The Report itself recommends that the Indian system be adhered to; but another "memorandum of dissent" is signed by four out of the ten Commissioners, who think that as there is to be a total revolution in the monetary system of the colony, the great advantages known to attend the use of the decimal system should be availed of. Indeed (and here is another curious inconsistency in the Report) it seems that though the Indian system is avowedly recommended, the majority of the members voted in favour of the decimal system! The *imbroglio* was brought about in this wise—firstly, the decimal system was brought forward, but was rejected by a majority composed of the joint supporters of the two other systems; and next, the Indian method was brought forward as opposed to the rupees, shillings, and pence method *alone*. For the decimal system there were four votes; for each of the others, three—yet one of the latter is recommended in the body of the Report! The upshot of it all is, evidently, that the Governor will carry his own wishes into effect, to the great and not unreasonable discontent of the majority of the colonists.

## "THE TIMES" AND ITS SHANGHAI CORRESPONDENT.

A LETTER from the Shanghai Correspondent of *The Times* (rather stale, by the way, for all the news it conveys had appeared a week earlier in our own inward journal) contains some strong comments on the outrageous insult offered to the Duke of EDINBURGH by the Chinese Government, in refusing him an official reception at Peking. The writer broadly asserts that no progressive friendly intercourse is possible while this insolent assumption of superiority on the part of the Chinese is tolerated, and that Mr. BURLINGAME'S misrepresentations to our own and other foreign Governments have been so gross that even Mr. HART, the chief promoter of the Mission, is disgusted with the imposture. The statements thus put forth by its correspondent are printed in large type, as though considered worthy of special attention, and yet, with a curious inconsistency, the journal that does him this honour persistently refuses to accord the smallest degree of credibility to his information, preferring to adhere to the philo Chinese view that suits the present Government. However, there is little danger that those who read the letters of the correspondent, which carry conviction in every line, will allow their judgment to be blinded by the weak sophistries with which it is sought to bolster up Lord CLARENDON'S wretchedly un-English policy.

WE understand that the negotiations that have been on foot between the War-office and the Ceylon Government, in reference to the proposal that the colony shall assume the control and bear the entire cost of its military force, are likely soon to be made public. This would seem to be a not unsatisfactory solution of the difficulty; for, while the colonists assert that they are paying more than the actual cost of the force employed, the War-office retorts that this is not the case, as their calculations are made without any allowances for non-effectives, pensions, &c. We may also mention that the present arrangements regarding the Indian army are also considered unsatisfactory, and that Mr. CARDWELL is endeavouring to get quit of any connection with Indian military organisation. Probably some modification of military arrangements in the Straits Settlements will follow in due course.

WE are informed that the Rajah of SARAWAK and Mrs. BROOKE, with the Bishop of LABUAN and Mrs. CHAMBERS, intend leaving England by the second mail in February. The Bishop will stay on his way at Penang and Singapore, for the purpose of holding confirmation.

WE think it worth while to repeat the caution given in our last issue against the habit prevailing among correspondents in the East of omitting to address their London letters and packets in full. Some circulars that we received by the last French mail, addressed simply "London," had been stamped by the Post-office with the words "not fully addressed." This shows that the postal authorities now intend to give the precedence in delivery to properly directed letters, and when any delay or loss occurs with packets not so treated, the responsibility will lie—and very justly—with the writers who neglect so obvious a precaution.

JUDGING from certain remarks that have appeared in some of our contemporaries in the Far East, it would appear that an impression exists that the steamers of the *Messageries Impériales* will at once avail of the Suez Canal to proceed direct through to and from Marseilles, so as to avoid any transhipment of cargo. We find, however, that the Directors of the *Messageries* have not yet issued any instructions to this effect, as the depth of the Canal—16 to 17 feet—renders the plan impracticable for the present. The time-tables of this company for 1870 are not yet published.

## FOOCHOW TEAS—DETERIORATION.

(To the Editor of the *London and China Telegraph.*)

SIR,—In your issue of the 18th inst. you published a very capital letter from "An Importer" upon the above subject, and it is of such importance that I crave a small space in your paper in continuation, hoping that buyers in Foochow may take some measures to impress upon the Teamen that if imports from that port continue to come forward of a character so certain rapidly to lose all the little quality they might have possessed when shipped, red leaf teas will sink into disfavour more and more, and when once that disfavour has become general and rooted amongst country buyers, it will be almost impossible to restore them to favour at all. "Medium Kaisows" as now imported takes no place but a low one in the general consumption; they have very little flavour, which soon passes off, and no strength; disappointing—very—to the importer, and of little value to the dealer. If the former, disgusted at the low prices offered, puts them away, he finds that what lost him 4d. per lb. when he refused 1s. 4d., are only worth, when he looks at them again, 1s. 1½d. The dealer having also purchased similar experience, often times refuses to taste them, much less offer for them.

Now the Chinese are very amenable to reason in trading matters, especially where their own interests are involved, and I do think that Foochow buyers might bring this subject prominently before them, by means of intelligently and forcibly worded "chops," which might be freely circulated throughout the tea districts, and I am quite sure that the Consul—Mr. Sinclair—always ready and willing to assist where good may be done, would energetically back up the movement. The difficulty of securing unanimity and consonance of action in China I am well aware of, but as the matter under review affects *all* interested in the Foochow tea trade, I would fain hope that the *buyers abroad* will endeavour to see with the glasses *sellers here* are compelled to see through, and will try what are the practical methods of remedying, on their side of the water, the defects which are so glaring when the teas arrive here. One word more, and I have done. Have not the Chinese been brought to their present style of preparing tea for the home markets by the eager, I may say, reckless competition for "tea at any price" that has been, of late years, the order of the day? I think they have; and when they see that for mixed and wretched quality they can get prices that only ought to be paid for fine, they accommodate themselves to the times and pander successfully to the public taste; but let the buyers discriminate, and buy "rubbish at rubbish prices," and really fine accordingly, and it will soon be seen that the sellers will find out how to suit their customers.—I am, Sir, your obedient servant,

OLD CANTON.

## SILKWORM BREEDING.

IT has been strongly suspected for a long time that, like many other maladies, that which has ravaged the silkworms and almost ruined a most important industry was the result of codling—add want of knowledge of the effects of cleanliness and ventilation, and perhaps the case would be complete. This is certain, that when the eggs are well chosen and the breeding conducted by scientific men the disease either does not make its appearance at all, or comes in a very moderate form. We can speak of such experiments

Digitized by Google

from personal observation near Paris and in the extreme south of France. Without doubt too much heat is almost always to be found in ordinary magnaneries—they are almost stoves; one scientific breeder has had great success in keeping his worms—"educating," we call it in France—in the open air, with no shelter but a light tent. In the cooler parts of France it has generally been believed that silkworms could not be reared with profit, but this opinion promises to take its place amongst exploded fallacies. In one of the Departments of France, where the mulberry has never been grown, and silkworms never reared, the Nièvre, almost in the centre of the country, the experiment has been made of breeding silkworms in a small apartment with a cold exposure, without any fire, during the whole period of education, thirty-eight days; the temperature of the season was rather below than above the average, 48 deg. to 50 deg. Fahrenheit, yet the success of the experiment was complete, not a worm was diseased, and the cocoons produced were magnificent. Who can tell whether silkworms may not be reared with success in the south of England? the experiment is really worth trying on a large scale, care being taken that the establishment be in a situation well sheltered from wind. It is true that we have not much white mulberry in England yet, but here again a long existing notion is being sapped; the Spanish worms are principally fed on the common black mulberry, and they have scarcely suffered at all, while in France and Italy, where the white mulberry alone is used, the ravage has been terrible.

## BRITISH POLICY IN CHINA.

(STANDARD.)

The last mail from China brings us news of a farewell dinner which was given at Hong Kong to Admiral Sir Henry Keppel on the eve of his departure for this country. This entertainment was unusually significant for a variety of reasons. Admiral Keppel has been more closely identified than any other naval officer with the development of British trade in the Far East. It is twenty-seven years ago since he was first put in command of a ship on the China station. At that time it was officially reported that Hong Kong—just obtained from the Chinese by the treaty of 1840—might be capable of supporting one house of business. Now it is the seat of an important commercial city, whose trade, in the opinion of a company formed a short time since, requires a submarine telegraph to India and Europe. This magical change has been wrought by the policy which the British has hitherto pursued in China. The great principles of justice have been respected in our dealings with the native Government, but the power and dignity of the British flag have been vindicated at the same time, and the Chinese authorities have been taught the absolute necessity of tolerating that intercourse between their subjects and ourselves which the mercantile classes of China and of Europe were equally anxious to establish. Flagrant bad faith has been systematically punished, and, though the force at hand has generally been very small, and seemingly incommensurate with the magnitude of the work it was required to carry on, the gallantry and perseverance of its commanders supplemented all deficiencies, and the growing trade was protected until at last it acquired its present dimensions. Finally, however, a change has come over the spirit of the scene. The Government which now rules the destinies of England has seen fit to order a complete reversal of the one policy hitherto observed. The European communities planted in Hong Kong and at the treaty ports are in future, like colonies in trouble, to sink or swim as best they may. They are not to expect any further interference in their behalf from the Government of Great Britain. If they are outraged our political agents will be instructed to remonstrate; nothing more. If the rights guaranteed to them by treaties are disregarded, they must content themselves with representations through a consul to an Asiatic Government which has never been known to act wisely or fairly, except under compulsion. If they have imagined that their allegiance to the Queen of England entitled them to the protection of her power abroad, they must learn that such a claim is obsolete and worthless in the eyes of a Radical Government, and to impress this fact upon them in the clearest possible manner the gallant Admiral, Sir Henry Keppel, who had been their champion for nearly thirty years, was curtly recalled.

Organised though it appears to have been in the first instance as a simple demonstration of regard, the farewell banquet given to Sir Henry on his departure could hardly help acquiring a political importance. One of the speakers declared towards the close that the evening had been occupied with something like a debate on China affairs, and though all the speeches tended one way—as the speeches on this subject of all men practically acquainted with China invariably must—still they constituted a protest against the fatally erroneous doctrines of the present Cabinet the importance of which it would be impossible to ignore. The governor of the colony, Sir Richard MacDonnell, was present, and, hampered though he was, of course, by the impossibility of openly criticising the proceedings of the Government he represented, he showed, by his cordial eulogy of Sir Henry Keppel, his disapproval of the total change of policy which has deprived the admiral of his command. It was manifestly impossible for him to do this in the same uncompromising terms which were employed by men in a less responsible position; but he said, according to the local papers, that he could not but avail himself of the opportunity of expressing his complete concurrence with the action of the gallant Admiral. No doubt the eloquent Governor conveyed his meaning in much more graceful terms, but we have to be content with an imperfect report. Sir Henry being the most conspicuous living representative of our old policy in China, any expressions of admiration for him are sufficiently replete with meaning. Colonel Knox Gore, C.B., less oppressed than the Governor by the necessity of using diplomatic language, went still more directly to the point. He said that "if any fault was found with them," the army and navy, "it was to be attributed to false economy, resulting from the country committing itself to the views of mob-orators who were inclined to reduce the service to an inefficient state." There may be more truth sometimes in the blunt commonplaces of a soldier than in all the *finesse* of a doctrinaire. The vindication of Sir Henry Keppel's career, however, was more elaborately accomplished by other speakers. The Hon. C. H. Pollard, Q.C., the acting Attorney-General, briefly reviewed the political situation. England had taken the initiative in bringing China into commercial relationship with the rest of the world. Her Government had done this by inducing enterprising men to push their trade forward, often at the risk of their lives. They had to deal with a native Government proverbial for misrule, and so effete as to have no power in its own domains. To protect their lives and property had been the first care of the British authorities, and for this duty they had selected officers, like the gallant guest of the evening, not only of pluck and daring, but of knowledge, tact, and discretion as well. These officers, by a judicious exercise of their large powers, had brought the Chinese to understand that it was unsafe to molest the persons or property of British subjects. Sir Henry Keppel's conduct had been stamped with emphatic approval not only in China but at home. "Three different Administrations selected him upon three different occasions to take a command in China; and a fourth, not the present Administration, appointed him to undertake the grave responsibilities of Commander-in-Chief on the China station. These facts outweighed anything that had recently occurred." It is needless to go on quoting evidence of the character which the demonstration acquired. The mercantile speakers, as a matter of course, joined in the cordial approval bestowed on the admiral's conduct, and in the condemnation which that approval involved of the policy to make room for which he had been so unwisely and ungratefully removed.

The Hong Kong dinner completes the series of protests against that surrender of British interests to the Chinese which the present Government is setting itself to accomplish. First, we had an emphatic groan from Sir Rutherford Alcock, the British minister at Peking, who, in a published despatch, described the Chinese authorities as growing more difficult to manage than ever, more obstructive and hostile to measures of progress. This declaration was exceedingly significant to every one who had studied our relations with the Chinese, because Sir Rutherford himself had always been considered the foremost representative of inaction—a man who had nearly become a mandarin, and was but half-hearted in his defence of British interests. Lord Clarendon no sooner enunciates his doctrine about the reference of all subjects of dispute to Peking, and then if they are important to the Home Government, and no sooner enjoins for the future a total abstinence from gunboats, than Sir Rutherford confesses himself powerless to guard the interests of his countrymen on those terms. Next, the commercial community of Shanghai takes an opportunity of expressing its conviction that it would be impossible to settle all questions by diplomatic action at Peking, and Mr. Ross Brown, the American Minister, breaking free from all restraints of his official character, declares in a public speech that after a personal acquaintance with China and a residence in Peking, he had perceived the absurdity of treating the native Government like a civilised European Power, and of trusting to the delusive promises of the Burlingame Embassy. Finally, we have representatives of the military, official, professional, and mercantile communities of Hong Kong echoing the same language in various ways. Will all this have no influence on Lord Clarendon or the ruling spirits of the Cabinet? Surely it cannot fail to have some influence on public opinion generally. Surely it cannot be supposed that one gigantic conspiracy spreads through all Europeans in China, from the southern coast to the Peiho, and that they are all truculent filibusters, only desirous of bullying the Asiatic race amongst whom they live! Is it supposed that any natural bonds of sympathy unite soldiers, merchants, lawyers, Foreign and Colonial Office officials? Their natural feelings are rather those of antagonism, but in reference to the China policy of the present Government all minor prejudices disappear. All men who know anything of China must agree, no matter how divergent they may be on many points, in perceiving that the Chinese embassy is a farce, and that Lord Clarendon has been duped. They know that if trade with China is continued at all it must be protected from the hostility of the mandarins; that the people of the empire at large accept it with avidity, and that our difficulties are with the authorities of a barbarous despotism, not with China as a State. That to tie the hands of naval and consular officers by rules of conduct which would be only appropriate to intercourse between civilised nations, is to invite outrage and to refer anything to Peking is like referring it to the Greek Kalends. Experience shows that widely beneficial results—results more beneficial even to the Chinese than to ourselves—have ensued from spirited policy, and the concurrent testimony of everybody worth consulting is to the effect that disastrous consequences must ensue eventually from a revolution in our behaviour. For a time the good effect of lessons which have already been taught to the Chinese will still be reaped. It is a common practice of Liberal statesmen to profit in this way by the administration of their predecessors, and to plume themselves, before their own measures have had time to work, on the brilliant success they have accomplished. It is likely enough, therefore, that for a little while we may still be at peace with China, and continue to trade with her as before. The weak communities at the minor ports, however, will not be unmolested for long, and directly the mandarins discover that the British residents have been deserted by their own Government the effects of the new policy will begin to be felt.

# Monetary and Commercial.

The Christmas holidays having caused nearly all business establishments in the City to be closed for the last few days, we have little to chronicle under this head. Business generally continues depressed and a revival can hardly be looked for before the opening of the new year.

The branch of the National Bank of India, to be opened in China in 1870, will, we understand, be in the first place at Hong Kong, under the management of Mr. Sherwood. This branch will probably open in January. The position of the National in India fully justifies the step of extending its exchange operations to China.

At a meeting on the 22nd of the Ceylon Company (Limited), the directors' report, of which we gave a summary in our last issue, was adopted, and a dividend declared for the half-year at the rate of 6 per cent. per annum, free of income-tax.

At Lloyd's, on the 20th inst. a message received at 9 A.M. was posted, giving the names of "twelve English ships which had arrived out at Calcutta from London and Liverpool prior to the 19th of November." One of these ships had already created some anxiety, and twelve guineas extra premium had been paid to effect insurances upon her. This message just occupied *one month* in its transmission.

The *Leeds Mercury* announces the suspension of Messrs. Hamilton, Graham, and Co., who had been engaged in the stuff trade at Bradford for about eight years. The reasons given are depression of trade and heavy losses. The liabilities, it is thought, will reach £20,000; but there are grounds for hoping that the dividend will not be a bad one.

At a meeting of creditors of Mr. George Gledhill, cloth merchant, of Leeds and Morley, the statement of affairs showed liabilities for about £5,500, with assets valued at £650, and it was agreed to accept an assignment.

The *Yorkshire Post* says, with regard to the affairs of Messrs. Jörss and Co., of Leeds: "We understand that in consequence of certain formal difficulties attending the administration of the affairs of Messrs. Jörss and Co. by deed, the estate has been provisionally placed in bankruptcy, in order that subsequent arrangements may be satisfactorily adjusted. An adjudication has already been made in the Leeds Court, under which the estate will be protected."

The *Daily News* contains the following on the Agra Bank:—"The offer recently put forth by the Agra Bank (Limited) to the holders of the 'B' shares, to buy up their shares at the rate of £4 15s. each, has evidently occasioned a good deal of uncertainty amongst them. It is objected that, before acting upon this invitation either one way or the other, those interested ought to be put in possession of such a statement relative to the liquidation of the assets of the old company as shall enable them to understand their real position. At present they have not before them the means for forming a judgment."

The chairman of the British Indian Submarine Telegraph Company has transmitted for publication the annexed letter from the company's engineers, announcing the completion of their cable, to be laid from Suez to Bombay:—

"BRITISH INDIAN SUBMARINE TELEGRAPH.

"7, Pope's Head-alley, Dec. 13.

"Sir,—We beg to report that the manufacture of your cable, 3,600 nautical miles in length, was completed at Greenwich on Saturday last, the 11th inst., and we herewith forward you our final daily return of cable manufactured. The manufacture of the outer covering of this cable was commenced at Greenwich on the 23rd of June last; it has, therefore, been exactly five months and eighteen days in course of manufacture, equal to 147 working days, which gives an average speed of manufacture of twenty-four and a-half nautical miles per diem. This is probably the greatest average speed of manufacture ever before obtained for such a long and important cable, and it is gratifying to us to be able to state that its electrical condition throughout the entire manufacture has been practically perfect, and we feel that, so far as its mechanical condition is concerned, the cable is well suited for the depth of water and position it is intended for.—Yours faithfully, "CLARK AND FORDE."

## EXPORT OF COTTON GOODS TO THE FAR EAST.

The following is a summary of Mr Sam Mendel's tables for the present month, which contain details of the quantities of Cotton Manufactures and Yarn shipped from the ports of London, Liverpool, Southampton, and the Clyde, to Hong Kong, Shanghai, Japan, Singapore, Batavia, Manila, and Ceylon, during the month and twelve months ended 16th Dec., 1869, compared with the corresponding periods of the two preceding years:—

### HONG KONG AND WHAMPOA.

PLAIN COTTONS.—Export for the month ended 16th Dec., 1869, 5,975 934 yards; for the twelve months 1869, 40,914,118 yards; for the twelve months, 1868, 55,903,193 yards; for the twelve months 1867, 52,980,242 yards. Decrease for 1869 against 1868, 14,989,075 yards.

COLOURED COTTONS.—Export for the month ended 16th Dec., 1869, 172,958 yards; for the twelve months 1869, 1,617,317 yards; for the twelve months, 1868, 1,302,351 yards; for the twelve months, 1867, 2,553,349 yards. Increase for 1869 against 1868, 314,966 yards.

PRINTED COTTONS.—Export for the month ended 16th Dec., 1869, 98,966 yards; for the twelve months 1869, 973,587 yards; for the twelve months 1868, 2,143,654 yards; for the twelve months, 1867, 832,951 yards. Decrease for 1869 against 1868, 1,170,067 yards.

COTTON YARN.—Export for the month ended 16th Dec., 1869, 1,162,070 lbs.; for the twelve months 1869, 4,329,450 lbs.; for the twelve months 1868, 6,568,310 lbs.; for the twelve months 1867, 7,821,444 lbs. Decrease for 1869 against 1868 2,238,860 lbs.

VALUE.—For the month ended 16th Dec., 1869, £187,238; for the twelve months 1869, £1,148,253; for the twelve months 1868, £1,463,967; for the twelve months 1867, £1,568,217. Decrease for 1869 against 1868, £315,714.

### SHANGHAI.

PLAIN COTTONS.—Export for the month ended 16th Dec., 1869, 19,474,330 yards; for the twelve months 1869, 210,785,119 yards; for the twelve months 1868, 250,015 787 yards; for the twelve months 1867, 140,068,637 yards. Decrease for 1869 against 1868, 39,280,668 yards.

COLOURED COTTONS.—Export for the month ended 16th Dec., 1869, 759,478 yards; for the twelve months 1869, 13,234,043 yards; for the twelve months 1868, 6,553,961 yards; for the twelve months 1867, 11,019,780 yards. Increase for 1869 against 1868, 6,680,082 yards.

PRINTED COTTONS.—Export for the month ended 16th Dec., 1869, 155,000 yards; for the twelve months 1869, 4,910,036 yards; for the twelve months 1868, 3,507,173 yards; for the twelve months 1867, 5,539,454 yards. Increase for 1869 against 1868, 1,402,863 yards.

COTTON YARN.—Export for the month ended 16th Dec., 1869, 166,800 lbs.; for the twelve months 1869, 432,863 lbs.; for the twelve months 1868, 315,700 lbs.; for the twelve months 1867, 441,232 lbs. Increase for 1869 against 1868, 117,163 lbs.

VALUE.—For the month ended 16th Dec., 1869, £365,816; for the twelve months 1869, £4,152,586; for the twelve months 1868, £4,249,167; for the twelve months 1867, £2,920,353. Decrease for 1869 against 1868, £96,581.

### JAPAN.

PLAIN COTTONS.—Export for the month ended 16th Dec., 1869, 2,538,469 yards; for the twelve months 1869, 16,444,421 yards; for the twelve months 1868, 22,008,295 yards; for the twelve months 1867, 21,067,186 yards. Decrease for 1869 against 1868, 5,563,874 yards.

COLOURED COTTONS.—Export for the month ended 16th Dec., 1869, 181,786 yards; for the twelve months 1869, 1,661,013 yards; for the twelve months 1868, 1,665,311 yards; for the twelve months 1867, 3,211,646 yards. Decrease for 1869 against 1868, 4,298 yards.

PRINTED COTTONS.—Export for the month ended 16th Dec., 1869, 49,456 yards; for the twelve months 1869, 847,448 yards; for the twelve months 1868, 501,637 yards; for the twelve months 1867, 726,668 yards. Increase for 1869 against 1868, 345,811 yards.

COTTON YARN.—Export for the month ended 16th Dec., 1869, 1,065,580 lbs.; for the twelve months 1869, 5,254,414 lbs.; for the twelve months 1868, 4,848,275 lbs.; for the twelve months 1867, 3,441,349 lbs. Increase for 1869 against 1868, 406,139 lbs.

VALUE.—For the month ended 16th Dec., 1869, £119,837; for the twelve months 1869, £698,559; for the twelve months 1868, £711,221; for the twelve months 1867, £749,686. Decrease for 1869 against 1868; £12,662.

### SINGAPORE AND PENANG.

PLAIN COTTONS.—Export for the month ended 16th Dec., 1869, 3,262,619 yards; for the twelve months 1869, 49,858,799 yards; for the twelve months 1868, 46,733,783 yards; for the twelve months 1867, 64,180,992 yards. Increase for 1869 against 1868, 3,125,016 yards.

COLOURED COTTONS.—Export for the month ended 16th Dec., 1869, 649,454 yards; for the twelve months 1869, 5,479,756 yards; for the twelve months 1868, 4,126,069 yards; for the twelve months 1867, 8,940,276 yards. Increase for 1869 against 1868, 1,353,687 yards.

PRINTED COTTONS.—Export for the month ended 16th Dec., 1869, 398,266 yards; for the twelve months 1869, 4,289,153 yards; for the twelve months 1868, 2,061,641 yards; for the twelve months 1867, 4,433,951 yards. Increase for 1869 against 1868, 2,227,512 yards.

COTTON YARN.—Export for the month ended 16th Dec., 1869, 352,244 lbs.; for the twelve months 1869, 1,582,167 lbs.; for the twelve months 1868, 1,528,663 lbs.; for the twelve months 1867, 3,033,969 lbs. Increase for 1869 against 1868, 53,504 lbs.

VALUE.—For the month ended 16th Dec., 1869, £101,111; for the twelve months 1869, £1,149,682; for the twelve months 1868, £970,755; for the twelve months 1867, £1,725,563. Increase for 1869 against 1868, £178,927.

### BATAVIA.

PLAIN COTTONS.—Export for the month ended 16th Dec., 1867, 423,332 yards; for the twelve months 1869, 8,785,264 yards; for the twelve months 1868, 17,728,837 yards; for the twelve months 1869, 20,541,526 yards. Decrease for 1869 against 1868, 8,943,573 yards.

COLOURED COTTONS.—Export for the month ended 16th Dec., 1869, 240,289 yards; for the twelve months 1869, 7,890,008 yards; for the twelve months 1868, 6,924,708 yards; for the twelve months 1867, 13,448,622 yards. Increase for 1869 against 1868, 965,300 yards.

PRINTED COTTONS.—Export for the month ended 16th Dec., 1869, 502,836 yards; for the twelve months 1869, 4,649,780 yards; for the twelve months 1868, 5,084,235 yards; for the twelve months 1867, 14,391,128 yards. Decrease for 1869 against 1868, 434,455 yards.

COTTON YARN.—Export for the month ended 16th Dec., 1869, 16,000 lbs.; for the twelve months 1869, 324,195 lbs.; for the twelve months 1868, 581,820 lbs.; for the twelve months 1867, 703,960 lbs. Decrease for 1869 against 1868, 257,625 lbs.

VALUE.—For the month ended 16th Dec., 1869, £22,399; for the

Digitized by Google

twelve months 1869, £457,117; for the twelve months, 1868, £628,400; for the twelve months 1867, £1,148,192. Decrease for 1869 against 1868, £171,283.

MANILA.

PLAIN COTTONS.—Export for the month ended 16th Dec., 1869, 1,342,501 yards; for the twelve months 1869, 14,221,498 yards; for the twelve months 1868, 18,435,316 yards; for the twelve months 1867, 17,476,039 yards. Decrease for 1869 against 1868, 4,213,818 yards.

COLOURED COTTONS.—Export for the month ended 16th Dec., 1869, 1,011,953 yards; for the twelve months 1869, 12,358,230 yards; for the twelve months 1868, 14,223,082 yards; for the twelve months 1867, 15,394,522 yards. Decrease for 1869 against 1868, 1,864,852 yards.

PRINTED COTTONS.—Export for the month ended 16th Dec., 1869, 123,334 yards; for the twelve months 1869, 1,370,466 yards; for the twelve months 1868, 1,032,409 yards; for the twelve months 1867, 972,228 yards. Increase for 1869 against 1868, 338,057 yards.

COTTON YARN.—Export for the month ended 16th Dec., 1869, 36,260 lbs.; for the twelve months 1869, 194,245 lbs.; for the twelve months 1868, 315,912 lbs.; for the twelve months 1867, 261,136 lbs. Decrease for 1869 against 1868, 121,661 lbs.

VALUE.—For the month ended 16th Dec., 1869, £52,350; for the twelve months 1869. £591,705; for the twelve months 1868, £673,267; for the twelve months 1867, £812,634. Decrease for 1869 against 1868, £81,562.

CEYLON.

PLAIN COTTONS.—Export for the month ended 16th Dec., 1869, 1,304,928 yards; for the twelve months 1869, 22,705,674 yards; for the twelve months 1868, 22,644,373 yards; for the twelve months 1867, 18,472,689 yards. Increase for 1869 against 1868, 61,301 yards.

COLOURED COTTONS.—Export for the month ended 16th Dec., 1869, 87,912 yards; for the twelve months 1869, 1,229,086 yards; for the twelve months 1868, 757,675 yards; for the twelve months 1867, 1,270,224 yards. Increase for 1869 against 1868, 471,411 yards.

PRINTED COTTONS.—Export for the month ended 16th Dec., 1869, 206,359 yards; for the twelve months, 1869, 3,622,993 yards; for the twelve months 1868, 2,231,118 yds.; for the twelve months 1867, 2,038,200 yards. Increase for 1869 against 1868, 1,391,875 yards.

COTTON YARN.—Export for the month ended 16th Dec., 1869, 55,100 lbs.; for the twelve months 1869, 459,772 lbs.; for the twelve months 1868, 428,737 lbs.; for the twelve months 1867, 351,735 lbs. Increase for 1869 against 1868, 31,035 lbs.

VALUE.—For the month ended 16th Dec., 1869, £33,509; for the twelve months 1869, £528,504; for the twelve months 1868, £456,820; for the twelve months 1867, £470,851. Increase for 1869 against 1868, £71,684.

## ARTICLES OF IMPORT.

—o—

### TEA.

The following is from Messrs. W. J. and H. Thompson's Circular dated 22nd inst.:—Business in Tea has been much restricted, in consequence of the near approach of the holidays. Prices do not show any alteration. Foochow Congous: Dusty siftings have been sold at 7d. to 8d. Good common, at 1s. 0½d., continues rather scarce. Fair to medium have been little dealt in at 1s. 1d. to 1s. 3d. per lb. Good and fine do not show any change. Black Leaf Congous: Good common has been sold at 1s. 0½d. per lb., inferior at 1s. 0½d. per lb. In fair to medium, at 1s. 1d. to 1s. 4d., few transactions have taken place. Good and fine are held rather firmly, and occasionally better rates have been paid. Oolongs: A few have been taken for export at 1s. 3d. to 1s. 7d. for medium to fine. Souchongs: Medium to good have been sold at 1s. 6d to 1s. 10d. per lb. Scented Orange Pekoes: Several common parcels are offering, without finding buyers. Scented Capers: Clean common may be quoted at 10d.; fair to medium sell with great difficulty at 1s. to 1s. 4d. per per lb. Green Teas: Some sales have been made of Ping Suey Imperials and Gunpowders at fair rates, but the bulk of the late arrivals are still held back. There have been no public sales.

### SILK.

The market is firm, with an upward tendency; the sales during the interval have comprised a total of about 1,500 bales; Red Peacock is quoted 25s. 6d.

### COFFEE.

The business in Ceylon since our last issue has been somewhat restricted, but the improvement recorded in our last report has been further strengthened. Most descriptions of Plantation exhibit a further rise, while for Native the rates current for last mail have been firmly maintained. The supplies of other East India sorts have again been extremely limited; in Java and Manila no transactions are reported; of 335 bags Singapore offered one-half sold, ordinary dark at 36s. 6d., brownish at 51s. 6d. to 55s. 6d., at Pari Pari 52s., a small lot Bonthyne at 60s. 6d.

The quantity of Ceylon Coffee afloat for Great Britain on the 13th Dec. was as follows:—Plantation, 82,779 cwt., against 92,172 cwt. at the corresponding date of 1868; Native, 20,277 cwt., against 29,317 cwt. The quantity afloat for Europe was—*nil*, in both years. The quantity of Coffee landed in the fifty-one weeks ended Dec. 18, 1869, was, of Ceylon, 39,850 tons, against 43,953 tons during the corresponding period of 1868; of all descriptions, 69,242 tons, against 69,141 tons. The quantity entered for home consumption was, of Ceylon, 10,586 tons, against 11,335 tons; of all descriptions, 18,454 tons, against 19,050 tons. The quantity exported was, of Ceylon, 26,348 tons, against 30,970 tons; of all descriptions, 45,632 tons, against 47,153 tons. The stock on Dec. 18 was, of Ceylon, 13,911 tons, against 11,135 tons; of all descriptions, 24,476 tons, against 19,272 tons.

### SUGAR.

Without any great amount of activity the market since our last report has been steady for all descriptions, and there is consequently little or no alteration to record. The market will be closed this day, to be reopened on Tuesday, the 4th Jan. Penang: At auction—of 4,017 bags offered about 3,300 bags were sold, ordinary to middling brown (duty 8s.) at 28s. 6d. to 30s. 6d., good brown to middling strong yellow (9s. 7d.) at 32s. to 36s., good to fine dry yellow (10s. 6d.) at 37s. to 39s. Singapore: 335 bags low quality were offered at public sale and bought in at 27s. Manila: The only offer at auction has been 18,800 bags clayed (duty 8s.), which realised 30s. per cwt. There has been no business by private contract in any descriptions.

The quantity of Sugar landed in the fifty-one weeks ended Dec. 18, 1869, was, of Penang, 4,977 tons, against 1,654 tons in the corresponding period of 1868; of Manila, Java, and China, 33,054 tons, against 22,824 tons; the quantity entered for home consumption was, of Penang, 2,741 tons, against 1,583 tons; of Manila, Java, and China, 22,244 tons, against 15,750 tons; the quantity exported was, of Penang, 199 tons, against 128 tons; of Manila, Java, and China, 2,937 tons, against 1,957 tons; the stock on Dec. 18 was, of Penang, 2,396 tons, against 269 tons; of Manila, Java, and China, 36,137 tons, against 30,711 tons.

COIR GOODS.—At the last auctions a good supply of yarn offered met a steady demand, and nearly the whole of the parcels of fresh import sold at fully previous quotations. A large quantity ex catalogue of 17th November was chiefly withdrawn. Fibre: Sold at an important decline, second-hand parcels being chiefly withdrawn. Rope: Was eagerly competed for, and all sold at full rates. Yarn: Of 27,858 dholls (39 tons) Ceylon offered all was sold, low and common £20 5s. to £22 5s., good common £25, medium £27 10s. to £29 15s., good £32 5s. to £35 10s.; of 82 tons of old import offered about 20 tons sold, common £21 10s., good common £26 to £26 5s., medium to fair £27 10s. to £31; of 54 bales ditto 40 bales sold, good £37, very fine £56. Fibre: 52 bales Singapore withdrawn; of 11,903 ballots (32 tons) about 20 tons sold at £20, first-class sea damaged £19.

COCOA NUT OIL.—The market for Ceylon is steady at £41 per ton.

ISINGLASS.—The sales have included 14 cases and 15 bags Penang—good middling tongue at 3s. 6d.; middling, 3s. 4d. to 3s. 5d.; large thick leaf, 3s. 11d.; good thin, 3s. 6d. to 3s. 9d.; low and ordinary, 2s. 7d. to 3s. 4d.; Manila sort, 2s. 4d.

INDIA-RUBBER.—At auction 28 bales and 7 baskets Borneo realised 1s 0½d. to 1s. 1d., and 28 baskets Penang were bought in at 1s. 5d. per lb.

JAPAN WAX.—Five cases hard saucers were offered and bought in at 80s. per cwt.

MANILA HEMP.—The dulness in the market continues, and there have been no transactions since we last reported.

PLUMBAGO.—Of 243 barrels Ceylon offered 205 barrels common dust sold readily at 6s. 6d. to 7s., the remainder, chips, being bought in at 13s. 6d.

PEPPER.—Rates show no change; of 1,837 bags Penang Black offered, 1,400 bags sold at steady rates, common 4d., good common 4d. to 4½d., chiefly the former price; 71 bags Singapore White sold at 5½d. to 5⅝d. per lb.

RICE.—The dulness in the market continues, and the transactions at the public sales have been very limited, at steady prices. By private contract there has been no business. The only sales reported, beyond a small parcel of white Bengal, have been 1,051 bags middling white Java at 10s. to 10s. 6d., and the arrived cargo per S. A. Blaisdell, 702 tons Bassein, at 8s. 9d., ex ship, in London; 12,600 mats and 610 bags garden Siam having been offered and bought in at 9s.

RUM.—The market is dull, the inquiry being greatly restricted; 260 puncheons Penang have been sold at 1s. 8½d. proof.

RATTANS.—The sales have been 5,914 bundles Penang at 3s. 4d. to 4s. 3d., good 5s. 1d. to 5s. 2d., mouldy and damaged 3s. to 4s. 11d., and 2,384 bundles Singapore, one lot sound at 3s. 7d., chiefly damaged at 3s. to 3s. 11d per 100 canes.

TIN.—The quotations given in our last report are unchanged; the business has been limited; there are sellers of Straits at £111 and buyers at £110 per ton.

## NEW YORK MARKETS.

—o—

### TEA.

Only a moderate demand has existed, which has been principally confined to Greens, the bulk of the sales effected being of that description. Holders have been firm, and prices have consequently remained steady; an agitation to effect a reduction of five cents per lb. (gold) upon the duty now payable has had no appreciable effect upon the tone of the market. The current rates rule as follows:—Hyson; Common to fair, 90c. to $1.10; superior to fine, $1.15 to $1.35; extra fine to finest, $1.40 to $1.65. Young Hyson: Canton made, nominal; common to fair, 82c. to $1.05; superior to fine, $1.15 to $1.35; extra fine to finest, $1.40 to $1.70. Gunpowder and Imperial: Canton made, nominal; common to fair, $1 to $1.15; superior to fine, $1.25 to $1.50; extra fine to finest, $1.60 to $1.90. Hyson Skin and Twankay: Canton made, nominal; common to fair, 75c. to 80c.; superior to fine, 85c. to 88c.; extra fine to finest, 90c. to 95c. Uncoloured Japan: Common to fair, 80c. to 90c.; superior to fine, 95c. to $1.05; extra fine to finest, $1.10 to $1.25. Oolong: Common to fair, 70c. to 78c.; superior to fine, 85c. to $1.15; extra fine to finest. $1.20 to $1.60. Souchong and Congou: Common to fair, 70c. to 80c.; superior to fine, 90c. to $1.05; extra fine to finest, $1.25 to $1.50. The sales have been on the spot 1,823 half-chests Green, per Horatio, and 250 half-chests Oolongs, vessel not named; to arrive, 2,175 boxes, 4,000 half-chests new crop Greens, and 2,000 half-chests new Japans.

The total receipts of Tea from China and Japan in the United States from Jan. 1 to Dec. 1, 1869, were as follows:—Greens, 19,243,043 lbs.; Japans, 9,960,106 lbs.; Souchongs, 1,843,217 lbs.; Oolongs, 9,954,707 lbs.; other sorts, 263,748 lbs.; total, 41,264,821 lbs. The stock on Jan. 1 was 9,577,014 lbs., which, added to the above total, gives a re-

Digitized by Google

sult of 50 841,835 lbs. Subtracting from this total the exports from Jan. 1 to Dec. 1, 4,971,847 lbs., and the withdrawals for home consumption during that period, 36,558,385 lbs., there remains a total of 9,311,603 lbs., representing the stock on the last-named date. The receipts from Nov. 17 to Dec. 1 amounted to 199,818 lbs.; the withdrawals for home consumption to 1,620,757 lbs., and the exports to 123,631 lbs.

COFFEE.—There is no alteration in the tone of the market to record, a fair enquiry still prevailing for Brazil, and the demand for all descriptions of East India continuing extremely inactive; no sales of the last named are reported. The current quotations—which must be regarded as nominal—are, Java (mats) 22½c. to 23c.; do. (Government bags), 22c. to 22½c.; Manila (duty paid), 16c. to 18c.; Singapore, 20c. to 22½c.; Native Ceylon, 17½c. to 19½c. gold. The stock of Manila on the 1st Dec. was estimated at 2,627 bags, against 4,867 bags on Nov. 1, 1868; of Java (Government) at 560 bags, against 1,336 bags; of Java (mats) 14,245 mats, against 13,000 bags; of Ceylon *nil*, against 8,500 bags; of Singapore *nil*, against 3,190 mats.

CORDAGE.—Prices have declined half a cent, and we quote Manila 23½c.; ditto 6-thread and 9-thread (¼ inch and 5-16 inch diameter), 24½c.; ditto, 12-thread (⅜ inch diameter), 24c.; Manila Hay Rope, 24c.; Manila Cordage, Bolt Rope Yarns, 25½c.; ditto, 6-thread and 9-thread, 26½c.; Tarred Manila, 23c.; Fine Tarred Manila Lath Yarn, 24½c.

HEMP.—The market for Manila is still dull; there have been sales to the extent of 1,000 bales on the spot, and 250 bales to arrive at 14½c. gold (30 days and 60 days), but at the close there is an entire absence of enquiry, holders being firm at 14½c. to 14¾c. gold. The Cleopatra has arrived with 1,250 bales, all to manufacturers. The stock of Manila on the 1st Dec. was estimated at 15,034 bales, against 13,508 bales at the corresponding date of 1868, and 16,560 bales in 1867.

INDIGO.—The market for Manila is quiet, but firm: 18 cases have been sold at $1.15 to $1.45 currency, and 29 cases on private terms.

RICE.—The dull tone of the market for East Indian produce continues to prevail; the only sale has been of 350 bags Rangoon for export at $3.25 gold (in bond). The stock of East India on the 1st Dec. was 8,507 bags, against 7,590 bags at the corresponding date last year, and 4,742 bags in 1867.

RHUBARB.—The quotation for China is $2 to $3 currency.

SUGAR.—The market remains inactive, the demand being restricted to the immediate wants of Refiners and the Trade. The latter are doing very little, and the former having reduced their work about 33 per cent., the inquiry from that quarter is also light—yet the offerings continue quite small, and holders maintain a firm attitude, the little business done being at full previous rates. We note the sale of 4,556 bags Manila at the current quotations, which rule as follows:—Java, Nos. 10 and 12, 11c. to 11⅛c.; Manila, current clayed, and superior, 10⅜c. to 10½c. per lb. gold. The stock of Java on the 1st Dec. was 310 baskets, against 310 baskets at the corresponding date last year; of Manila 186,538 bags, against 37,866 bags.

TIN.—The demand is very limited, sales are reported amounting to 200 slabs Malacca at 33c. to 33¼c. gold. The nominal quotation for Banca is 35c. to 36c. gold.

## SHIPPING.

ARRIVALS.—Nov. 8. at Port Ludlow, from Shanghai, Marzillias; 24, at Boston, from Singapore, Jungfrau; 27, at New York, from Hong Kong, A. W. Stevens, H. Upmann; from Manila, Sonora; 30, from Colombo, Mary Ann Johnson; Dec. 9, from Manila, Cleopatra.

## FREIGHTS AND CHARTERS.

Freights to the Eastern Ports are about the same, nor do we anticipate much change until after Christmas. In coal freights there is but little doing.

Current rates of freight for vessels on the berth:—To Yokohama: 32s. 6d. weight, 35s. meast. To Shanghai: 40s. weight, 30s. meast. To Hong Kong: 35s. weight, 30s. meast. To Batavia: 25s. weight, 30s. meast. To Singapore: 30s. weight, 25s. to 30s. meast. To Ceylon: 20s. to 25s. weight, 20s. meast. At New York to China; $12 to $15 per ton of 40 cubic feet.

The current quotations for coal, &c., are as follows:—From Wear or Tyne per keel.—For Shanghai: £40. For Singapore: £25 10s. For Galle: £23. From Newport, Cardiff, or Swansea per ton. For Yokohama: £1 18s. For Shanghai: £2 2s. For Hong Kong: £1 11s. For Saigon: £1 5s. For Singapore: £1 5s. 6d. For Galle: £1 4s. 6d.

The Admiralty have invited tenders for the conveyance of 242 tons stores to Hong Kong.

## MISCELLANEOUS.

The Viajante (Port. barq.), Gonsalves, Lisbon to Macao, which arrived at Port Said Nov. 19, and the Curacao (Dut. corvette), for Java, have passed through the Canal.

A brig, reported to be the Mexican, from an English port to China, passed Madeira Dec. 12, but did not anchor.

At ST. HELENA.—Nov. 15, Star of the South, Smith, from Ceylon, and sailed for London; 16, Juanpore, Brown, from Shanghai, and sailed for London; 17, Challenge, Causebrook, from Shanghai, and sailed for London; 18, Maasluis, Kuchler, from Batavia, and sailed for Rotterdam; Ullswater, Mew, from Penang, and sailed for London; 19, Grasmere, Stockman, from Canton, and sailed for London; 20, Dilkhoosh, Gedye, from Shanghai, and sailed for London.

HOLLOWAY'S OINTMENT. — Scald Head, Ringworm, and all the cutaneous disorders peculiar to children are permanently removed by the use of this healing and renovating Ointment Mothers of families should never be without it, for it may be applied at all times without danger of any kind, as it is composed entirely of pure balsams, and should it not do good, it cannot possibly do harm. The parts affected should be first fomented with warm water, and then the Ointment should be rubbed in briskly, except where there is any tenderness, irritability, or excoriation. In that case the painful spot should be gently lubricated with the Ointment twice every day, and the surrounding skin only should be rubbed therewith.

KEATING'S COUGH LOZENGES.

THIS UNIVERSAL REMEDY now stands the first in public favour and confidence; this result has been acquired by the test of fifty years' experience. These lozenges may be found on sale in every British colony; and throughout India and China they have been highly esteemed wherever introduced. For COUGHS, ASTHMA, and all AFFECTIONS of the THROAT and CHEST, they are the most agreeable and efficacious remedy; they do not contain opium or any other deleterious drug and may therefore be taken with perfect safety by the most delicate constitution.

Sold in boxes, tins and bottles of various sizes.

KEATING'S
CHILDREN'S WORM TABLETS.

The great remedy for these disorders In Adults and Children can now be administered in the form of A PURELY VEGETABLE SWEETMEAT, at once agreeable and effective

TESTIMONIAL.

"Batley, Jan 26, 1869.

"Sir,—One of my children, aged two years and four months, being troubled with worms, I was induced to try your Bon Bons I purchased some from Mr. B. Whitaker, chemist, of Batley, and after taking two only she voided nine large worms. Two days after another dose, she again voided three more; three of them, the worst, measuring from 8 in. to 9 in. each in length I consider them a most invaluable remedy, and should be tried by all suffering from worms

(Signed) "JOHN STENSON.

"Witness, B. Whitaker.

"To Mr. Keating, London"

Sold in tins and bottles of various sizes.

KEATING'S INSECT DESTROYING POWDER.

This Powder is QUITE HARMLESS TO ANIMAL LIFE, but is unrivalled in destroying Fleas, Bugs, Cockroaches, Beetles Musquitos, and every other species of insect.

## SINGAPORE DOCKS.

THE PATENT SLIP AND DOCK COMPANY execute SHIPS' REPAIRS of all descriptions in the most efficient manner, under the supervision of European Engineers and Shipwrights.

The DRY DOCK (opened in March, 1859) admits two Vessels at the same time, being over 400 feet in length, with a depth of water ranging to 15½ feet. A second DRY DOCK of larger dimensions will shortly be completed, and available for the heaviest Steamers.

Adjoining the above there is extensive WHARF WAREHOUSE, and other accommodation, including every convenience for coaling Steamers, discharging cargo, and storing goods, together with ample MACHINERY and appliances for repairing iron steamers, &c.

Apply at the offices of Messrs. PATERSON, SIMONS and Co., Singapore; or 21, St. Swithin's-lane, Cannon-street, London, E.C.

WM. CLOUGHTON, Managing Director.

New Harbour, Singapore, June, 1868.

## PORT OF AMOY.

SHIPOWNERS, AGENTS, and COMMANDERS are informed that the Dock Company's establishments at the above port afford every facility, at moderate charges, for REPAIRING and SPARRING VESSELS, cleaning and painting iron ships and steamers.

Their large Granite Dock has 286 feet length on the blocks and at average spring tides can receive vessels of 16 to 17 feet draught It has a caisson-gate and a powerful centrifugal steam pump, and an engineer's workshop fitted with machines and tools, driven by steam: iron and brass foundries, boiler-makers' shop, a large smithy and carpenters and boat-builders' sheds. All superintended by resident Europeans.

Their two smaller GRANITE DOCKS can receive, at spring tides, vessels drawing 12 feet.

Spars, timber, and other Dockyard material kept in stock.

Quarters for officers and a DRY GODOWN for stores of vessels under repair.

## FOOCHOW DOCK.

*RIVER MIN.*

THE above granite floored DOCK, of the following dimensions, viz., Length, 300 feet, breadth at bottom, 40, is capable of receiving vessels drawing 13 to 16 feet, as the state of the tides will allow The Dock runs dry to the blocks and is pumped out by steam.

The above premises comprise a large Machine Shop containing a

WHITWORTH'S 12-INCH SCREW CUTTING GAP LATHE, DRILLING AND SCREWING MACHINES, A LARGE SMITHY, &c., &c., &c.

Large Godowns are on the premises for STOWAGE OF CARGO, &c. &c. A large stock of Woods, Metal, &c., &c., always on hand.

The Dock steam tug *Woosung* is available at all times to tow vessels to or from sea.

JOHN C. SKEY, Superintendent.
